**Capitol Lumber Co.**
*Largest Lumber Company in City*
Four Yards
Two Planing Mills
Main Office, Belmont 4783

*Start this afternoon and run out in any direction, to the outskirts of town and notice the many new homes going up and you will be surprised by their beauty and the many modern conveniences that are now considered indispensible to the modern home-owner. Places that were newly marked out subdivisions only two years ago are completely built up today. Try and buy one of these places and you will find that they have increased in value from twenty to fifty per cent, and they were built only a couple of years ago.*

# Sealed Proposals

## SCHOOL HOUSE
## NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee of Bethel Township School Town in Posey County, State of Indiana, will receive sealed bids or proposals for the erection of a school house according to the plans and specifications now on file in the office of Menzie L. Cox, Trustee of Bethel Township School Town at Griffin, Indiana, and at the office of Shopbell, Fowler & Thole, Architects, 705-715 Furniture Building, Evansville, Indiana.

Bids will be received at the office of Menzie L. Cox, Trustee of Bethel Township School Town at Griffin, Indiana, until 1:30 p. m. on Saturday, June 27, 1925.

Proposals or bids are to be sealed addressed to Menzie L. Cox, Trustee of Bethel Township, Griffin, Indiana, and marked "Proposals for public school building for Bethel Township" and delivered at the above mentioned office before the time above stated.

Bids will be received on separate items as follows:

1. For the general construction of the building complete, except the plumbing, ventilating, heating and electric wiring.

2. For heating, ventilating and plumbing system complete.

3. For the electric wiring system complete.

The total estimated cost of the general construction, heating, ventilating plumbing and electric wiring of the building aforesaid is $35,000.00.

The general conditions of the specifications on file should apply to all contracts that may be for any part or parts of the said building. Each bidder must file with the Trustee of the said School Town when he files his bid, the usual statutory affidavit and a certified check or bid bond as provided in the specifications as prepared by the architect as a guarantee that he will enter into a contract within ten (10) days after receiving written notice from the Trustee aforesaid that he has been awarded the contract. In the event the said bidder does not enter into a contract within said ten (10) days such check shall be forfeited by the bidder.

All proposals must be submitted on contractor's form No. 96 as prescribed by the State Board of Accounts and subject to all laws and rules of the State of Indiana governing the awarding of public school contracts.

The successful bidder will be required to furnish a surety bond or personal bond acceptable to said Trustee in an amount equal to the contract price, insuring the faithful completion of said building according to the contract.

The Trustee reserves the right to reject any and all bids and re-advertise said building.

Menzie L. Cox, Trustee of Bethel Township School Town, Posey Co., Ind. June 13th, 1925.

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee of Concord School township will receive bids for the construction of a new school house in the town of St. Joe, Indiana, according to the plans and specifications now on file in his office, until the hour of ten o'clock A. M., on the 27th day of June, 1925. And that said Trustee will let a contract for the construction of said building at the school building in the town of St. Joe, DeKalb County, Indiana, on the 27th day of June, 1925, at ten o'clock a. m., of said day to the lowest responsible bidder for the construction of a school building according to the said plans and specifications now on file in his office, each bidder will be required to furnish a certified check in the sum of 5% of his bid conditioned that he will enter into a contract with said trustee if his bid shall be accepted and shall furnish a bond as required by law to the approval of said township trustee, which bond shall be in the sum of his bid. Bids will be received on the contract separately and combined.

The township trustee reserves the right to reject any and all bids. Dated this 29th day of May, 1925.

Frank L. Milliman,
Trustee of Concord Township.

June 6th-13th-20th, 1925.

### SCHOOL (ALTERATIONS)
### NOTICE TO CONTRACTORS

Notice is hereby given that on the 23rd day of June, 1925, at 10:30 o'clock a. m. at their office in the High School Building in the City of Wabash, Indiana, the Board of School Trustees of the School City of Wabash, Indiana, will let contracts for the furnishing of the necessary materials and labor for the proper placing and erection of certain alterations and plumbing in the the East Ward School in the City of Wabash, Indiana. The estimated cost of said work is $8,000.00.

The materials to be furnished and the work to be done shall be according to plans and specifications heretofore adopted by the Board of School Trustees of the School City of Wabash, Indiana, and on file in the office of said Board, as furnished by J. Edwin Kopf & Woolling, Architects, of Indianapolis, Indiana, and prospective bidders may obtain copies of said plans and specifications for the work described from the said Architects at their office, 403 K. of P. Building, Indianapolis, upon deposit of Twenty-five Dollars ($25.00), Said deposit to be returned to the bidder upon the return of the plans and specifications in good condition to the office of said Architects.

All prospective bidders are hereby notified that said bids on each of said items must be upon forms prescribed by the State Board of Accounts and the same must be sealed and delivered at the office of the said Board of School Trustees in said High School Building at or before 10:30 o'clock a. m. on said date, at which time said bids will be opened and read by said Board of School Trustees.

A certified check must be filed by each bidder with each bid in a sum equal to five per cent (5%) of such bids and conditioned that such certified check will be forfeited to the Board of School Trustees as liquidated damages occasioned by the default of bidder, in the event that such successful bidder fails or refuses to enter into a contract on such bid within five (5) days after the acceptance by said Board of School Trustees of such bid.

The right is reserved by the Board of School Trustees to reject any and all bids whatsoever and to waive defects or informalities in any and all bids.

Minetta F. Jordan,
N. P. Lavengood,
Milo R. Meredith,
Trustees for the School City
of Wabash, Indiana.

## "BC" Series Up-Draft Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T .U's. Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

## SEASONABLE VARIATIONS IN LUMBER TRADE MUST BE ELIMINATED TO ATTAIN STABILITY IN THE INDUSTRY

### Interesting Point Scored At Annual Meeting of Lumbermen

The aggregate of lumber consumed in the United States in about the last two years and a half, and not represented by current production in the sawmills, is between ten and twelve billion feet. Allowing for import and export balances, this means that the average annual consumption of lumber during this period has been between forty-two and forty-three billion feet, as against the average annual production of from thirty-six to thirty-eight billion feet. But now this "slack" has been absorbed. From now on the current consumption of lumber should, unless the demand is artificially distorted by speculative buying and auction selling, be more closely reflected in the current demand upon sawmills for replacement of retail yard and industrial stocks.

For this reason, maintenance of stability in the lumber trade requires that seasonal fluctuations in the use of lumber for building and other purposes be eliminated, so far as possible, in order, throughout the year, to equalize the lumber movement and hence the demand upon the sawmills for mill shipments. These variations may be off-set in part by compensating changes in industrial, railroad and especially expert demand. But they will likely continue the most important single factor in determining the volume of lumber movement.

The direct consumption demand for building lumber, for the country as a whole, is highest in the month of May, namely, 11 per cent of the total yearly volume, and the lowest in the month of January, at 6 per cent. Thirty-two per cent of the total retail lumber business for building purposes is booked in three months, namely, April to June; 58 per cent during the six months from March to August; 75 per cent during the eight months from March to October; and the remaining 25 per cent of the year's business during the four months from November through February. These relations, of course, vary in different sections of the country with changes in climatic and other conditions. In the North Atlantic States nearly 45 per cent of the year's retail business is booked during four months, from March to June, while in the Pacific Coast States only 36 per cent of the year's business is done during the same period.

The greatest degree of variation in the seasonal building operation is in the Rocky Mountain States, followed in order by the North Atlantic, Central and Middle Western States. The Southern States and the Pacific Coast show the least seasonal variations. In the North Atlantic States, representing one of the largest markets, the average seasonal variation in building activity is about 36 per cent. In the Middle Western States, 20 per cent; and in the Pacific Coast, only 15 per cent. Concerted effort to reduce seasonal variations in building operations has been under way for three years, initiated at the instance of President Harding and promoted through the Department of Commerce. The lumber industry should continue its co-operation with these activities from the success of which it will generally benefit.—(From Report of Sec'y of National Lumber Manufacturers' Association.)

## USE OF COLOR MAKES STUCCO HOUSES INDIVIDUALISTIC

### A New Development That Has Removed the Dull Drab Monotony of Former Years

Among the many things which go to make a house individualistic is color. Home builders and architects have long realized this fact, as has been demonstrated by the continued use of color on frame houses. Men painted to preserve the exterior of their houses, but they also used color because of the distinction and air of difference such painting gave our homes.

It is only natural, then, that color in stucco houses should be an inborn development. One can test this desire for color by noting the indifference with which most folks view the monotonously gray stucco house common to building a few years back.

In the stucco house, the entire exterior surface is susceptible to color treatment. The relation of the color of the wall to the color of the roof, to the setting of the house, are all of great importance. Through this use of color, one gives his home an air of belonging to its site, gives it an expression of his own personality, accentuates the architectural beauty of the structure.

But, unlike houses of other materials, use of color does not exhaust the possibilities of treatment in the stucco house. Combined with this wide range of color is extural treatment. By the use of the steel trowel, the wood float, the carpet or burlap covered block, even the hands, an almost limitless variety of surface textures are possible.

Walls can be given lights and shadows, reliefs and tones through a manipulation of the stucco coat. There are delicate, concise textures for the small cottage or bungalow and there are also bold, sweeping textures for the large or rambling home. These various textures can be intimately incorporated with the architectural style of the house.

Today it is not surprising to see stucco houses of pink, buff, green, red, black, even blue and all the intermediate shades and colors. Whole districts of stucco houses, containing almost every conceivable color for houses, have

sprung up over the country. And without exception there is no color or note to mar the beauty of the whole.

Yet even here the possibilities of stucco color and texture have not been exhausted for these colors, these textures, these lights and shadows are permanent. There is no need for annual freshening, no cause for worry because of fading colors, no expensive maintenance, for with stucco these features are permanent.

New conceptions of home beauty have come into being with this growing use of colored stucco. Color and texture in stucco have brought into favor architectural styles long considered impossible of transposition. This movement toward more diversified architecture has brought forth English, French, Spanish, Italian and many other old world styles of home architecture, and not only for large and pretentious homes, but for the smaller cottage and bungalow these styles are now being adopted. The result has been an increased beauty, more livableness, greater firesafety, and more permanment homes.

---

## PICKED FROM THE DEBRIS HERE AND THERE

Bricklayer to foreman: "Looks like a good, long job, but I can't take it, with no place near to park my car."

Foreman: "All right. This is a high-class job. We don't want you unless you have a chauffeur."

"Hey, Mike," yelled one workman to another on top of a building, "don't come down that ladder on the north corner I just took it away."

---

When you get to the end of your rope tie a knot in it and hold on.

---

Bees don't whine; they hum while they are working; and how they co-operate.

---

The balustrade may have a high polish, but it's the little risers that get you up in the world.

---

Get acquainted with your competitor —you might like him.

**Housing Project:** (10 residences) Fort Lauderdale, Florida. Archt., Harrison and Turnock, 500 Board of Trade Bldg., Indianapolis. Owner, company organizing, care of architect. Plans in progress. Stucco on masonry walls.

**Sorority House:** $40,000 (for 22 girls), Greencastle, Ind. Archt., Clarence T. Myers, 413 Penway Bldg., Indianapolis. Owner, Delta, Delta, Delta Sorority, Greencastle, Ind. Plans in progress. Brick, vapor heating system slate roof.

**Residence:** $10,000, 110 Berkley Road. Archt., Clarence T. Myers, 413 Penway Bldg. Owner, S. M. Ritter, 209 Berkley Road. On working drawings. Owner will build by day labor. Brick veneer and frame, asbestos shingle roof, furnace.

**Residence:** $8,000, Shelby and Edgewood. Archt., Clarence T. Myers, 413 Penway Bldg. Owner, Myron J. Gardner (electrician Insane Hospital). Plans in progress. Owner will build by day labor, starting work late summer. Brick veneer.

**Residence:** (5 room bungalow), 41st St. near Capitol. Archt., Clarence T. Myers 413 Penway Bldg. Owner, Enos D. Pray (real estate), American Central Life Bldg. Plans in progress. Owner will build by day labor. Cinder block walls, tile roof, furnace.

***Church** (Sunday School seating 1,000, auditorium seating 800), $100,000, Hartford City, Ind. Archt., A. A. Honeywell & Co., Penway Bldg., Indianapolis. Owner, First United Brethren Church, Rev. Turley, pastor Hartford City, Ind. Archt. receiving bids to close June 29th. The following contractors are figuring general contract: Noah Arnest, Kokomo, Ind.; E. A. Carson, Logansport, Ind.; G. W. Heinzeman & Sons, Marion, Ind.; Folger-Wilson Constr. Co., Lapel, Ind.; E. L. Danner, Kokomo, Ind.; S. P. William, Hartford City, Ind.; Palmer and Son, Hartford City; Ball & Kaufman, 941 No. Keystone, Indianapolis; John R. Curry Constr. Co., Empire Life Bldg., Indianapolis; Harry L. Pinnick, Richmond, Ind.; Barringer and Tumilty, Greensburg, Ind.; W. R. Dunkin and Son, Flora, Ind. Brick, stone trim.

***Power Plant and Equipment:** $44,000, Rockville, Ind. Engineer, Charles Brossman, 1503 Merchants Bank Bldg., Indianapolis. Owner, Indiana State Sanitorium, Dr. Amos Carter Supt., Rockville, Ind. Plans in progress on power plant. Power plant equipt. has been purchased. Brick and conc.

**Motion Picture Theatre and (4) Store Rooms:** $175,000. "The Trivola" Theatre, seating 2,000 persons, 80x160. North of 42nd street on College Ave. Archt. and contractors, The Ostrom Realty Co., Peoples Bank Bldg. Owner, The Clyde Realty Co., G. A. Reed, Pres., 4170 Winthrop; L. R. Zapf, Secy., 601 Peoples Bank Bldg. Plans in progress, start work soon. Brick, concrete and steel, comp. roof, steam heat ventilating system, motion picture theatre equipment, tile work, copper-set store fronts.

**Apartment Building:** 30th and Meridian 2 sty. and bas. Private plans. Owner, Thomas A. Moynahan, c/o The Moynahan Construction Co., Ambassador Apartments. Preliminary plans. Definite data soon. Site just purchased.

**Residence and Garage:** $10,000, Range Line Rd. Archt., Frank B. Hunter, 912 State Life Bldg. Owner, Bernard R. Batty, V.-P. Ogle Coal Co., 1410 Fletcher Trust Bldg. Plans in progress. Stucco and frame, tile roof, tile bath, private water system, septic tank, water softener.

**Store Buildings:** $8,000.00, 1 sty., 21x70, 35th and College. Archt. and contractor The Ostrom Realty Co., Peoples Bank Bldg. Owner, Gustave G. Schmidt, c/o The Crystal Theatre. Plans in progress. Start work soon. Brick.

***Gymnasium:** $60,000, seating 5,000 persons, Rushville, Ind. Archt., McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Rushville Athletic Association, D. F. H. Green, Pres.; H. B. Allman, Supt. of Schools, Rushville. On working drawings. Brick, steel, stone trim.

***Church:** $75,000, 1 sty. and bas., 51x115., 44th and Carrollton, Indpls. Archt., Charles W. Bolton and Son, 1505 Race St., Philadelphia Pa. Associate Archt., Walter Scholer, Painters and Decorators Bldg., LaFayette, Ind. Owner, Carrollton Ave. Reformed Church, Rev., Gerard H. Gebhardt, pastor, 4468 Carrollton Ave., Indianapolis. On working drawings. Bids soon. Brick.

***Bank and Offices:** (add. and rem.), $60,000, 2 sty. and bas., 70x70, Tipton, Ind. Archt., McGuire and Shook 320 Indiana Pythian Bldg., Indianapolis. Owner, Citizens National Bank, F. E. Davis, Pres., Tipton, Ind. On working drawings. Owner will award separate contracts. Brick, stone or terra cotta front, steam heating, bank equipment.

***Bank:** (rem. and add.), 2 sty. and bas., 62x118, Brazil, Ind. Archt., McGuire and Shook, 320 Indiana Pythian Bldg., Indpls. Owner, The First National Bank, Brazil, Ind. Plans in progress. Archt. ready for bids soon.

***Nurses' Home:** $20,000 1071 W. Mich. Archt. and Contractor, The Ostrom Realty Co., Peoples Bank Bldg. Owner, Indiana University School of Medicine, c/o Robert W. Long Hospital. Start work at once. Stucco over frame, 2 sty., 30x116.

**School:** (1 room frame addition), Patoka Twp., Pike County, Ind. Archt., Bacon and Tislow, 31 W. Ohio St. Indianapolis. Owner, Thomas J. Wiggs, trustee, Winslow, Ind. Owner receiving bids. Frame.

***Auditorium and Gymnasium** (addition to high school), $32,000, Allen Twp., Miami County, at Macy, Ind. Archt., Charles E. Bacon, Odd Fellow Bldg., Indianapolis. Owner, Scudder Wilson, trustee, Macy, Ind. Bids close July 6th at noon. Brick.

**Township School Buildings:** $42,000, Wayne Twp., Wayne County Ind. Archt., Omar Hodge, 31 West Ohio St., Indianapolis, Ind. Owner, Charles Hodge, trustee, Court House, Richmond, Ind. Owner receiving bids to close July 9th at 2:00 P. M. Brick.

**Apartment Building:** $15,000, (14 Apts.), 2 sty. and bas., 30x50, Sutherland near Central. Archt., Russell N. Edwards Co., 45 Union Trust Bldg. Owner, McCord and McKinney, Paul L. McCord and E. Kirk McKinney (realtors), 311 Lemcke Bldg. Archt. ready for bids. Brick veneer, steam heat, asphalt shingle roof, battleship linoleum, refrigerators, ranges.

***School Building:** (additions and alterations), $45,000, Sugar Creek Twp., Hancock County, at New Palestine, Ind. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Fred W. Ruschhaupt trustee, New Palestine, Ind. Owner receiving bids to close July 3rd at 10:00 A. M. Brick.

**Church:** (auditorium and Sunday School rooms) $25,000, at 16th and Colorado. Private plans. Owner, Starbuck Christian Church, 1620 Garfield Ave. Plans in progress. Bids soon. Brick, auditorium seating 200 persons, 30x50. Sunday School rooms in basement.

**Boys' Club:** English Ave. and Laurel St. Owner, The Boys' Club of Indianapolis, Arthur Wolf, Pres., Madison Ave. and Meridian St. Contemplated. Site purchased. Brick.

**School:** (2 room portable building), Perry Twp. Marion County, at Edgewood. Owner D. W. Vorhies, R. R. "D", Box 109, Indianapolis. Owner receiving bids to close July 10th at 8:00 P. M. Frame.

***Church:** (add. and rem.), Lynnhurst and Morris. Archt., Fermor S. Cannon, 21 Virginia Ave. Owner, Lynnhurst Baptist Church, Rev. C. H. Sheick, pastor, Plainfield Line, Indianapolis. Preliminary plans. Brick veneer and frame.

### Contracts Awarded

***Church and Sunday School:** (rem. and add.), $45,000, 960 W. 31st. Archt., A. A. Honeywell & Co. Penway Bldg. Owner Home Presbyterian Church, Rev. A. S. Buchanan pastor, 3320 Northwestern Ave.; R. E. Sprague, Chmn. Bldg. Comm., Golden Hill. General contract awarded to Ball & Kaufman Construction Co., 941 N. Keystone Ave., Indianapolis. Start work shortly. Brick, stone trim, new Sunday School add., brick veneering present bldg., new brick tower new steam heating plant for entire bldg.

***Waterworks:** $85,000, Boonville, Ind. Engineer, Charles Brossman, 1503 Merchants Bank Bldg., Indianapolis. Owner, Municipal Water Works Corp., Boonville, Ind. The contract for the pipe was awarded to the United States Cast Iron Pipe Co., Birmingham, Ala. Contract for laying of the pipe line was awarded to Emil H. Hartig, Evansville.

***Residence** (double): $10,000, 48th and Kenwood. Archt. Elliott B. Hadley, State Life Bldg. Owner, John A. Shafer, 1008 Odd Fellow Bldg. General contract let to Emmett Pierson, 2934 Kenwood.

**Residence and Garage:** 20,000, 2 sty. and bas., 47x46, at 4130 N. Illinois. Archt., D. A. Bohlen and Son Majestic Bldg. Owner, A. C. Bohlen, c/o D. A. Bohlen and Son, Majestic Bldg. General contract let to William P. Jungclaus Co., 825 Mass. Ave. Brick veneer, slate roof.

**Store:** $10,000, 1 sty., 45x122, at 10th and Denny. Private Plans. Owner, Frank Irish, 2909 E. 10th. Contract let to E. H. Dalby, c/o Owner. Brick and concrete block.

**Residences** (2): $10,000 each, at 4535 and 4541 N. Delaware. Owner, Mrs. Katherine B. Mott, 522 Powell Place. Owner builds. Frame and stucco.

**Stores and Offices:** $18,000, 2 sty., 53x67 at 4137-39 College. Owner, Harry Templeton, 42nd and College. Contractor, A. V. Stackhouse, Fletcher Trust Bldg. Brick.

**Store:** $8,500, 714 E. 10th. Owner, Dan LeGore, 409 Peoples Bank Bldg. Brick and concrete block. Owner builds.

**Residence:** (double), $10,000, 1936-38 Boulevard place. Owner, Charles Patton, 2100 W. 41st. Contract let to L. W. Schupp, 2357 N. LaSalle St. Frame.

# Indiana Society of Architects

Office of the Secretary
500 BOARD OF TRADE BUILDING
Indianapolis, Ind.

## ALL STATE ARCHITECTS INVITED TO JOIN IN I. S. A. TENTH BIRTHDAY GATHERING

### Attractive Program Planned

Everything is in readiness for the gathering of the members of the Indiana architectural profession at Indianapolis next Saturday, at which time the annual meeting of the Indiana Society of Architects is to be held. It was just ten years ago that the Society came into being, and since then the membership has grown considerably, much of an organized constructive effort has been put forth with the result of distinct achievement, and the organization has become one of the strongest and most progressive state architects' bodies in the country, having attracted attention in territory beyond the boundaries of Indiana.

It is but fitting this meeting should be made into the nature of a jollification to celebrate the ten active years the Society has put in and to that end all members of the profession are urged to attempt to be present.

The meeting will open with a 12:30 p. m. luncheon at the new $1,000,000 Elk's Building, recently opened, at St. Clair and Meridian Sts. Then at 2 p. m. the business session will be called to order by President Scholer, Lafayette, at which annual reports will be submitted by the various committee chairmen. General discussions are to be launched in which all those present are invited to participate, with the hope of developing new ideas and solutions to various problems, as they effect the profession and the building industry. Finally, as a conclusion to the business session, the annual election will be held.

Following adjournment the visiting architects will be taken to the Woodstock Club out on the Michigan road, where the spacious and pretty grounds will offer recreation, relaxation and an opportunity for good fellowship. Then with the coming of twilight will sound the summons to the banquet table where more good cheer, music and a general good time will put the finishing touches to what it is hoped will be one of the happiest events in the history of the Indiana Society of Architects.

## INDIANA ARCHITECTS RETURN FROM AMERICAN ASSOCIATION OF ENGINEERS' CONVENTION IN FLORIDA

### Great Gathering of Engineering Profession Participated in by Men From All Sections of the Country

Interesting reports of a successful, enthusiastic and delightful convention at Orlando, Fla., early this month, were brought back home by Architects Herbert Foltz and L. A. Turnock, Indianapolis, who have just returned from the annual gathering of the American Association of Engineers. Mr. Turnock, as president of the Indianapolis Chapter of the A. A. E., and Mr. Foltz were delegates from Indianapolis to the convention.

In addition to the enjoyment of the convention they had an interesting trip with the motorcade of delegates which journeyed from the west coast of Florida around to and up the east coast, visiting St. Petersburg, The Keys, Miami, Sebring and other places of interest.

## TIME FOR ELECTION AGAIN

### Strong Tickets Named

One of the important features of the approaching annual meeting of the Indiana Society of Architects to be held at Indianapolis next Saturday, will be the election of officers for the ensuing year and a fine selection of candidates is offered for the consideration of the membership with practically every section of the state represented.

As per custom there will be two tickets in the field, one nominated by the president, the other offered by the committee named by the Society.

The official ballot is:

**President**

Robert Frost Daggett, Indianapolis
Wilson B. Parker, Indianapolis

**1st Vice-President**

J. W. Gaddis, Vincennes
Rodney Leonard, Frankfort

**2nd Vice-President**

Ralph O. Yeager, Terre Haute
L. A. Turnock, Indianapolis

**Secretary**

Walter Scholer, Lafayette
Fermor S. Cannon, Indianapolis

**Treasurer**

George W. Allen, Laporte
Lawrence W. George, Indianapolis.

**Chairman Entertainment Committee**

August Bohlen, Indianapolis
Wilbur Shook, Indianapolis

**Chairman Membership Committee**

E. R. Austin, South Bend
Frederick Wallick, Indianapolis

**Chairman Legislative Committee**

Warren D. Miller, Terre Haute
Byron Sutton, Vincennes

**Chairman Publicity and Public Action Committee**

E. F. Miller, Anderson
Herbert Foltz, Indianapolis

**Chairman Pageant and Exhibit Committee**

Wayne E. Bell
Edward Pierre, Indianapolis

**Chairman Handbook Committee**

Merritt Harrison, Indianapolis
Merritt Harrison, Indianapolis

**Chairman Building Code**

Fermor S. Cannon, Indianapolis
Fermor S. Cannon, Indianapolis

Indianapolis

ORGANIZATION AND CURRENT NEWS

## A RECENT MOVE THAT ACCENTUATES THE NEED FOR ORGANIZATION AMONG CONTRACTORS

### Every Builder Indebted to His Industry to the Extent of Safeguarding It

One of the best arguments why every contractor in this country should be interested in the question of organization is found in a news item from Washington, D. C., stating that an intensive organization campaign that will extend the length and breadth of the United States and Canada was launched in that city recently by the American Federation of Labor. The movement will be backed by the united strength of every bona fide trade union organization in the two nations. The conference which decided to take this step was composed of the executive council of the American Federation of Labor, the presidents and secretaries of the Federations, four departments and 108 national and international unions.

The campaign is to be the most extensive drive ever conducted by the Federation to bring the unorganized wage earners into the labor movement. The United States and Canada will be divided into five districts and a group of four representatives of labor will visit every city and town in each district to spread the gospel of trade unionism.

Building contractors should be especially interested in this movement inasmuch as an extra effort will be made to increase the strength of the Building Trades Department, which already is one of the best organized groups in the country.

The contractors of the United States have within themselves the potential power of a big, strong, aggressive organization that would be in a position to demand that numerous evils in the industry be corrected. The only thing that stands in the way is lack of organization. This subject has been stressed so many times that almost any further discussion concerning it becomes rtite, and yet, it seems that only thru constantly driving home the organization idea building trades employers can be made to realize their own responsibility to the industry of which they are a part.

Contractors' organizations are founded on one basic principle, the protection of the industry in that conditions may be effected that will keep building moving along under favorable auspices, co-operating if need be with other building construction interests. And in that purpose the contractors individually and collectively are indirectly protected. Therefore, it is only fair to say that the contractor who refuses to align himself with the organization movement, at least locally, is unfaithful to his own interests and his industry at large. On the other hand for him to sit back and derive all the benefits that accrue from association effort without turning his hand to support that effort is typical of the selfishness that prompts him to wade in and raise accepted and agreed upon wage scales, pay bonuses, do anything to secure men to complete a job regardless of what bearing such action may have on future local building conditions and operations.

Now is the time for each man in this great industry to ask himself the question—Have I ever done anything to help make better conditions in the building game?

## HIS REASON FOR BEING

The reason for a General Contractor is his ability to administer the building operation effectively, executing with his own direct employees certain portions of the work and directing the various sub-contractors and correlating their work so that proper progress is secured. It cannot be denied that many who go by the designation of General Contractor are incompetent to perform these important functions properly. Their experience, organization and reputation based on performance, should be more carefully investigated than is frequently the case before they are invited to bid.

## COURT HOLDS CONTRACTOR LIABLE TO HIS ASSOCIATION FOR INFRACTION OF MEMBERSHIP AGREEMENT

### Building Trades Employers Association At Hammond Victor in An Interesting Case

A decision was handed down by the Appellate court of Indiana, June 12, which is expected to set a precedent in the management of employers' associations with regard to agreements on wages of employes. The case was that of John Androff, a Porter county contractor, and the New Amsterdam Casualty Company against the Building Trades Employers' Association of the Calumet district. In the appeal, Androff and the casualty company were attempting to set aside a judgment of $1,000 against them, received in the Porter Circuit court, but the Appellate court decided that the judgment should stand.

#### History of Case

History of the case is that Androff became a member of the trades association early in 1921, and as a member posted a $1,000 bond that he would not violate the by-laws of the association, which set a maximum wage to be paid by all its members for labor. He was charged by the association with violating the agreement by paying a higher wage, and late in 1921 the association sued Androff on his bond. The Porter Circuit court awarded the association the $1,000, the amount of the bond, but Androff and his bonding company appealed the case, the decision being handed down by the Appellate court.

It is believed this decision will result in employers' association being better able to handle recalcitrant members. It is the first case of this character to be taken to a higher court.

## GENERAL BUSINESS CONDITIONS

### Lasting Prosperity Only With a Readjustment of Price Relations

Most economists are agreed that the one thing standing in the way of good business is the disruption of price-relations incidental to the violent changes in wages and prices. It is true that the industrial capacity of the country is over-developed and therefore cannot be employed continuously to the full, but the main difficulty is not in the amount of production but in the price relations.

The high cost of building is reflected in rents, which take a larger proportion of average earnings than has been usual in the past. As a result of this condition, there must be curtailment in some other line of expenditures.

It is evident, therefore, that there will not be any real lasting prosperity in this country until there has been a readjustment of price-relations throughout our entire economic system.

## EUROPE LONG AGO LEARNED TO BUILD SAFELY

### America Must Do Likewise and Get Away From Fire Waste

"America may be away ahead of European countries in many things, but in the matter of proper and adequate building these countries can teach us many lessons, not only in beauty and economy but in permanence and stability," observes H. Augustus O'Dell, chairman of the competition committee of the Michigan Society of Architects.

"Over there it is considered almost a crime for anyone to have a fire. In case of fire, the owner or occupant of the building thus damaged is arrested, tried and if found at all at fault, is fined and pailed. Such fires are considered a menace to all other citizens and will not be tolerated. During the 19 months I spent in France I did not see a fire or a fire department in action. How different in the United States!

"No taxes are required, or at least only a small amount, for fire-fighters, and equipment over there is no loss of moment to property and life. Buildings of masonry construction, brick and stone, do not deteriorate nor depreciate except in a slow way, and buildings of these materials, hundreds of years old, in first-class condition and constantly occupied are the usual thing in Europe.

"America must awake to this same conservation of life and property and learn to build better and more permanently. In the saving of lumber alone this is necessary, for conditions have reached the point where every effort should be exerted to conserve it and not by carelessness allow it to go up in smoke."

## MUSIC AND ART TO THE LABORING MAN

### It Drifted in With the Mail This Week

O there's Music in a Hammer;
There's Art in a Pick.
You'll find a highbrow Masterpiece
In every Chisel's click.
You'll find a Steady Martial Air
In the Spike Mall on the Track,
And Lots of Classic Dancin' Movements
In the Pilin' of the Sacks.

"The Building Bard."

## A CHEERING FORECAST

### U. S. Secretary of Labor Projects Pleasing Visualization for the Future

In the not distant future, according to Secretary of Labor Davis, employer and employe will think it just as senseless to fight in a strike or lockout as it would be for a board of directors to transact business by peeling off their coats and going at each other in a battle royal. The old order of hostile employer and resentful union is passing rapidly, and a new order, one of co-operation, is taking its place says Secretary Davis.

## BRINGING OUT THE HOME BY THE INCORPORATION OF "ATMOSPHERE"

### Final Result Up to the Owner

The beauty of any home lies not in its acreage, or its surroundings, but rather in that vague intangible which may be called "atmosphere." This is made up of a feeling of quiet, dignified simplicity and a love of quantity which is too infrequently encountered in this day of elaborate decoration. Concessions to modern ideas are responsible for the use of over decorated homes. Every home owner must solve the problem in his own home and infuse into its arrangements distinctive features which portray his own artistic tastes and personality.

Well finished floors are in themselves a thing of beauty, while soft-toned walls shaded by colorful effects in lighting arrangements, and simple and tasteful pieces of furniture make any room comfortable and restful. Perhaps in no other type of interior decorating can there be found such a display of taste and thoughtfulness as in the real old New England colonial homes. They reflect the best of the colonial days in simplicity and harmony.

# EVANSVILLE

## HOME-BUILDING ACTIVITIES STILL CONTINUING STRONG

### Bulk of New Permits Issued Pertain to House Work

Of a total of about $87,300 involved in building permits issued at the office of the city commissioner of buildings during last week, about $30,300 referred to home improvements, including repairs, plumbing, heating and general remodeling, according to City Building Commissioner Ed Kerth.

Permits for 19 new homes, averaging about $3,000 in construction cost, were issued, involving a total estimated cost of about $57,000.

# HAMMOND

## NOT TO BE RAILROADED

### Property Owners Rebel At Attempt to Rush Street Paving Jobs Thru

There was a gathering of taxpayers at the Building Trades Employers Association rooms Thursday evening, the 11th, which resulted in the forming of the Hammond Taxpayers' Association. The move was brought about by the excessive high taxes locally, and a move by certain interested parties to build nine roads, nearly all of which are within the corporation limits of the city in North Township, and some of which are main thoroughfares that should be taken care of by the abutting property owners. The scheme was to pave them at the expense of the taxpayers of the township by selling bonds and making

a tax levy of an additional 40 cents on the hundred dollars valuation to meet the bonds. Remonstrances have been filed against six of the roads and a hearing before the State Tax Commissioners is scheduled.

### AGAIN RESTLESS

**Windy City Labor Leaders Chafe At Landis Award Conditions**

The Building Trades Council at Chicago is again at work agitating against the contractors working under the Landis Award, threatening to pull the union men off all jobs where workers not affiliated with the council are employed.

A Chicago contractor who called at the B. T. E. A. office the past week said that if the move threatened by the building trades was put into effect it would result in making Chicago an open shop city. The contractors there are determined not to give up what they have gained, or return to the old conditions of graft and intimidation that prevailed under the old rule of the closed shop.

### ACTION INDICATES DEFINITE MOVE TOWARD ERECTION OF GREAT STEEL MILL

**New Activity Begins At Site**

The Jones & Laughlin Steel corporation, Pittsburgh, is gradually taking steps toward the improvement of its property at Hammond. Two of the largest type of steam excavators have been assembled at 130th street and Calumet avenue, to handle filling material which will be delivered to the company's site over a new spur track of the Indiana Harbor Belt Railroad.

The Jones & Laughlin Company, recently contracted with the Inland Steel Company, Indiana Harbor, for its entire output of slag and cinders for use in filling in for the first unit of the proposed plant. The East Chicago ship canal has been deepened to 21 feet as far as Jones and Laughlin site and it is reported that the dredging of a new channel through the property will be undertaken this summer. Plans and permits for a new private water intake from Lake Michigan and a private sewer to discharge into the Grand Calumet River have been tentatively approved by the City of Hammond.

### HAMMOND JOTTINGS

Several fine rains the past week broke the drought. Truck farms, corn and wheat had been badly damaged by the excessive heat and high winds, but it is believed all will not be lost now that the rain has come.

There was an error made in reporting the Trapinina job at Indiana Harbor. H. B. Olney was awarded the contract instead of Ahlborn & Pecoz.

The plasterers in Chicago have pulled their men off several jobs on account of the dispute with the bricklayers over the terrazo floor laying.

A canvass of the architects' offices disclosed the fact that not a great deal of new plans are being drawn.

The steam shovel has got down to the water level in excavating for the new theatre building on State street and the pumps are being put down to draw the water so that the excavating can continue.

Everything in Labor Circles is quiet now in the District since the Gary difficulties have been settled. There is no scarcity of labor, plenty of men being available to meet the demand.

E. E. COLE.

## SOUTH BEND

### CURRENT YEAR'S BUILDING EDGES PAST CORRESPONDING FIGURES OF 1924

**Renewed Activity of Last Two Months Turns the Trick**

Building activities in South Bend continued good during May, the new work developed, according to the city building inspector, carrying an estimated valuation of over a million dollars, $1,187,634 to be exact. This was almost on a par with the April returns, the best building period for the city in many months.

The permits issued in May were 14 in arrears of those granted during the corresponding period a year ago, but the money involved amounted to 23% more than the May, 1924, estimated valuation.

With the aid of the building spurt that started in April and carried on through May the city's building volume for 1925 is now 13.4% ahead of the volume registered from January 1st, to June 1st, 1924, the figures being:

| Period | Per. | Est. Val. |
|---|---|---|
| 5 months, 1925 | 1,533 | $3,422,926 |
| 5 months, 1924 | 1,501 | 3,017,730 |
| Gain for 1925 | 32 | $ 405,196 |

Sealed bids will be received by the Board of Trustees of the Indiana State Normal School at 1:30 P. M., July 7, 1925, at the office of the President of the Eastern Division, Indiana State Normal School, Muncie, Ind., for the paving of certain established roadways on the campus of the Indiana State Normal School, Eastern Division, Muncie, Ind.

Bids must be made on Form No. 89, prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of the bid.

Detailed plans and specifications will be on file in the office of the President of the Eastern Division of the Indiana State Normal School, Muncie, Ind., and additional plans and specifications for individual use of the bidder may be secured from H. Lester Janney, County Surveyor and Engineer, Muncie, Ind.

Bids will be made for the completion of said improvement in strict accordance with such

June 20-27-July 4, 1925.

### HEATING, VENTILATING, PLUMBING AND WIRING FOR NEW SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Township Trustee of Grant School Township, Newton County, Indiana, will, at the School House in the Town of Goodland, in said County, at the hour of two o'clock P. M., on Saturday, June 27th, 1925, receive seal proposals for the following work:

First—For installation, construction and furnishing of all labor and material of the Heating, Ventilating and Plumbing system; the estimated costs thereof being $18,000.00.

Second—For the Electrical Lighting Fixtures and Wiring Material, and labor; the estimated costs thereof being $1,800.00.

Each of said class of contracts to be furnished and done in strict accordance with the plans and specifications, and installed in a proposed new school building in the town of Goodland, which are on file in the office of the above named Trustee and in the office of John A. Bruck, Architect, at Kentland, Indiana.

The bids for each of said classes shall be made separately, and inclosed in separate envelopes and endorsed with the bidder's name, and the class of contract bid on, and upon forms approved by the State Board of Accounts.

Each bid shall be accompanied with a certified check in the sum of $500.00 for the first class bids and $200.00 for the second class bids. To guarantee that if said contract shall be awarded to said bidder, that he will within ten days after said award enter into a written contract and give bond in an amount equal to the contract price with resident free-hold or Surety Company a surety, to the acceptance of said Trustee and conditioned as provided by law, and failing to do so said sum shall be retained by said Trustee as liquidated damages.

Said contracts will be let to the lowest responsible bidder, and the Trustee reserves the right to reject any and all bids.

Lewis W. Lemasters, Trustee,
Goodland, Indiana.

June 20th, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Sealed bids will be received by the Board of Education, Petersburg Ind., at the office of Supt. of Schools, Mr. J. B. Leas, Thornton school building, for the erection of a new grade school and auditorium building, including general construction, heating and ventilating, plumbing and sewering and electrical work.

The estimated cost of the building including the above, is approximately $44,000.00.

Bids will be received until 2 p. m. Monday, July 6th, 1925, and then opened for consideration.

All bids must be made upon proposal blanks which have been approved; these blanks will be supplied by the Architects upon application.

Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid on.

All bids must be accompanied by a certified check or bid bond (either personal or Security Company) for not less than three per cent (3%) of the amount of the bid submitted, made payable to the order of the "School City of Petersburg" as liquidated damages in the event that the successful bidder fails to enter into the proper contract for the work bid upon, and give the proper security or personal bond within ten days from the acceptance of such bid. Checks of unsuccessful bidders will be returned.

Each bidder shall file with his bid a non-collusion affidavit as required by law.

The Board of Education reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidder.

Plans are on file in the office of the Board of Education, Petersburg, Ind., in the office of the State Board of Accounts, Indianapolis, Ind., and in the office of the Architects, Harry E. Boyle & Co., Furniture Bldg., Evansville, Ind.

Signed: Board of Education,
Petersburg, Ind.

June 28, 27, July 4, 1925.

### SCHOOL EQUIPMENT
### NOTICE TO CONTRACTORS

Notice is hereby given that James Wright, Trustee of York Township, Benton County, Indiana, and the Advisory Board of York Township, Benton County, Indiana, will receive sealed proposals until 10 o'clock a. m. on Saturday June 27, 1925, at the Railway Station of the Cleveland, Cincinnati, Chicago and St. Louis Railway Company in the Town of Raub, Benton County, Indiana, for the material, labor, construction and completion of electric wiring, electric fixtures, lockers, school supplies to be installed in a school building for York Township in Raub, Benton County, Indiana, now under construction.

Full details of plans and specifications are now on file at the office of the undersigned, James Wright, Trustee of York Township, Benton County, Indiana, and at the office of the architect, John A. Bruck, Kentland, Indiana, and are open for the inspection of all persons concerned. Copies of plans and specifications will be furnished to any contractor applying for the same on a deposit of the sum of $20.00 made payable to the Township Trustee for the safe return of said plans and specifications.

Bids may be received for electric wiring and fixtures separately, and lockers and school supplies separately, or a bid may be received for all the work in one bid. All bidders will be required to file their bids in forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits. Each bidder will be required to deposit with his bid a certified check in the amount of not less than 3% of his bid, payable to James Wright, Trustee, to insure that the successful bidder will enter into a written contract with said Township Trustee, and will furnish a bond with a resident free-hold surety of Benton County, Indiana, or a Surety Company bond to the approval of the said Trustee and Advisory Board, conditioned that he, or they will faithfully perform and execute the work and contract awarded to him or them, according to such plans and specifications under the direction of said architect and to the acceptance of said Trustee as aforesaid, and according to law, and conditioned further, for the payment of all bills as provided by law.

The estimated cost of said work and material is Five Thousand Dollars ($5,000.00). The right is reserved to reject any and all bids, and to take a reasonable time for making a decision in awarding said contract.

Dated this 3rd day of June, 1925.

James Wright,
Trustee, York Township, Benton County, Ind.
Warren McConnell,
Scott McEwen
Ellis Childress,
Members, Advisory Board, York,
Township, Benton County, Indiana.

June 20th, 1925.

### SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee of Concord School township will receive bids for the construction of a new school house in the town of St. Joe, Indiana, according to the plans and specifications now on file in his office, until the hour of ten o'clock A. M., on the 27th day of June, 1925. And that said Trustee will let a contract for the construction of said building at the school building in the town of St. Joe, DeKalb County, Indiana, on the 27th day of June, 1925, at ten o'clock a. m., of said day to the lowest responsible bidder for the construction of a school building according to the said plans and specifications now on file in his office, each bidder will be required to furnish a certified check in the sum of 5% of his bid conditioned that he will enter into a contract with said trustee if his bid shall be accepted and shall furnish a bond as required by law to the approval of said township trustee, which bond shall be in the sum of his bid. Bids will be received on the contract separately and combined.

The township trustee reserves the right to reject any and all bids. Dated this 29th day of May, 1925.

Frank L. Milliman,
Trustee of Concord Township.

June 6th-13th-20th, 1925.

### SCHOOL (ALTERATIONS) NOTICE TO CONTRACTORS

Notice is hereby given that on the 23rd day of June, 1925, at 10:30 o'clock a. m. at their office in the High School Building in the City of Wabash, Indiana, the Board of School Trustees of the School City of Wabash, Indiana, will let contracts for the furnishing of the necessary materials and labor for the proper placing and erection of certain alterations and plumbing in the the East Ward School in the City of Wabash, Indiana. The estimated cost of said work is $8,000.00.

The materials to be furnished and the work to be done shall be according to plans and specifications heretofore adopted by the Board of School Trustees of the School City of Wabash, Indiana, and on file in the office of said Board, as furnished by J. Edwin Kopf & Woolling, Architects, of Indianapolis, Indiana, and prospective bidders may obtain copies of said plans and specifications for the work described from the said Architects at their office, 403 K. of P. Building, Indianapolis, upon deposit of Twenty-five Dollars ($25.00), Said deposit to be returned to the bidder upon the return of the plans and specifications in good condition to the office of said Architects.

All prospective bidders are hereby notified that said bids on each of said items must be upon forms prescribed by the State Board of Accounts and the same must be sealed and delivered at the office of the said Board of School Trustees in said High School Building at or before 10:30 o'clock a. m. on said date, at which time said bids will be opened and read by said Board of School Trustees.

A certified check must be filed by each bidder with each bid in a sum equal to five per cent (5%) of such bids and conditioned that such certified check will be forfeited to the Board of School Trustees as liquidated damages occasioned by the default of bidder, in the event that such successful bidder fails or refuses to enter into a contract on such bid within five (5) days after the acceptance by said Board of School Trustees of such bid.

The right is reserved by the Board of School Trustees to reject any and all bids whatsoever and to waive defects or informalities in any and all bids.

Minetta F. Jordan,
N. P. Lavengood,
Milo R. Meredith,
Trustees for the School City of Wabash, Indiana.

## Lemonade---And Cats!

It happened at a village Sunday School picnic.

Two little boys had lemonade stands—one on either side of the entrance. The pastor came along and going up to George, said:

"Well, my little man, how much do you charge for your lemonade?"

"Five cents a glass," replied George.

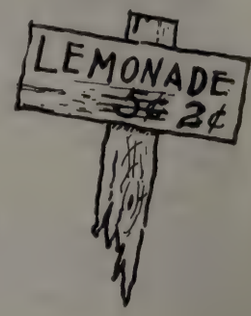
"And how much do you charge?" he asked, turning to Harry, who ran the competing stand.

"Two cents a glass," replied Harry.

The pastor cast a censorious eye upon George and said to Harry, "I'll try a glass of yours, my boy."

As he quaffed the fluid, he smacked his lips and said, "That's good; I'll have another glass," and he smiled when he thought he was getting two glasses at less than George asked for one.

"Tell me, my little man," he said to Harry, "how you can afford to sell your lemonade for two cents a glass when George is asking five cents?"



"Well, you see," said Harry, "the cat fell in my pail."

*AND HERE'S THE MORAL*

## BUSINESS INTERESTS CARELESS AS REGARDS MAIL

### Frequently Fail At Safeguarts to Assure Efficient Delivery of Correspondence

Offenses against good mailing practices are not confined entirely to the average man who mails only his yearly quota of 112 letters, says Postmaster General New.

The business man, who is naturally expected to take every precaution in the interest of intelligent communication with his clients or customers, often falls woefully short in providing adequate safeguards for the efficient delivery of his mail.

It is true that comparatively few business letters reach the Dead Letter Office because the business man learned long ago to have his return address printed on his envelopes if only for its accruing advertising value.

There are firms, however, that purposely leave off return cards when sending out circulars and advertising matter. They seek this method of arousing curious recipients to examine letters which otherwise might be consigned unopened to the waste basket.

But "Nixies"—meaning letters requiring directory service before delivery can be effected—are comprised largely of business letters, and this service costs the Post Office nearly two million dollars yearly.

The practice of buying sales lists—usually antiquated ones—for advertising soliciting through the mails is especially prolific of nixies. The owners of such lists seldom attempt to keep them current although the Post Office will furnish clerks to revise such lists at the nominal charge of 65 cents an hour.

Advertisers in newspapers, magazines and elsewhere often fail to specify their own street addresses. Answers, therefore, particularly where the advertiser is located in one of the larger cities, just as frequently are returned to the senders.

"That's a penny-wise and pound-foolish policy," Mr. New said. The return of one letter marked "Not Found" will do the advertiser more harm in the town from which it came that he can repair with many thousand dollars worth of advertising.

The person to whom it is returned will give him plenty of advertising, but it will be of the wrong kind."

Almost as foolish is the firm—and there are many of them—which fails to carry its complete address, including street number, city and state, on its letter heads and other stationery, particularly order blanks.

## MAY BUILDING OVER THE STATE WAS GENERALLY IN EXCESS OF THAT RECORDED FOR THE CORRESPONDING PERIOD A YEAR AGO

### Hammond and Evansville Lead the Other Cities in the Matter of Gains Made

Ten Indiana cities in reporting their building permit issuance for the month of May turned in new work that will total an estimate cost of $5,940,420, and this with Ft. Wayne omitted from the list, as no official figures were received from that city. The latter place hashad a steady building wave for several years and undoubtedly her May figures, had they arrived, would have increased substantially the total volume of business. With that report missing, and deducting the East Chicago figures because no comparative figures for May, 1924, were available, the other nine cities show a total estimated valuation of $5,583,045 on new work as against $4,869,291 recorded in May, 1924, a gain of 14.65% for May, 1925.

While the estimated financial investment showed a fair increase over the corresponding period a year ago the number of projects approved for construction operations was considerably below those passed upon and for which permits were issued in May, 1924, 239 less permits having been granted in May, 1925.

Hammond topped the list in the mater of gains coming thru for a 38.3% increase over the volume posted a year ago. Next came Evansville with 33%, to be followed in this order; Gary, 24.7%; South Bend, 23%; Indianapolis, 4.17%; Terre Haute, .04%. Three of the cities registered losses: Muncie, 4.4%; Elkhart, 4.5%; Kokomo, 28%.

The official May figures for the two years received from the various city building inspectors are:

| | 1925 | | 1924 | |
|---|---|---|---|---|
| Cities | Per. | Est. Val. | Per. | Est. Val. |
| East Chicago | ---- | $ 357,375 | ---- | $ ------ |
| Elkhart | 47 | 153,700 | 47 | 161,000 |
| Evansville | 317 | 274,090 | 151 | 205,947 |
| Gary | 243 | 835,779 | 261 | 670,178 |
| Hammond | 164 | 756,975 | 167 | 54[illegible]025 |
| Indianapolis | 1,561 | 2,047,741 | 1,754 | 1,965,[illegible] |
| Kokomo | 56 | 53,945 | 70 | 75,730 |
| Muncie | 78 | 128,914 | 137 | 134,920 |
| South Bend | 441 | 1,187,634 | 455 | 965,148 |
| Terre Haute | 186 | 144,267 | 290 | 143,602 |
| Total | 3,093 | $5,940,420 | 3,332 | $4,869,291 |

## OUTLOOK FINE FOR A GOOD CONVENTION

### Many State Architects Expected to Attend I. S. A. Gathering At Indianapolis Today

Prospects for a fine representative attendance of architects at the tenth annual convention of the Indiana Society of Architects at Indianapolis today, Saturday, were indicated at press time by the responses and reservations that had been received by Secretary Merritt Harrison, and still more were looked for in the remaining period before the time for convening arrived.

The board of directors was scheduled to meet at 10:30 A. M. at convention headquarters, the new Elks Club, in its last session under the 1924-25 administration, as a new set of officers and several directors were to be elected today.

Luncheon at noon at the fine new club is to be followed by the business session of the Society and the election of officers. Following this the visitors are to be conducted on a tour of inspection thru the building under the guidance of Anton and Herman Scherrer, who were the architects for the structure.

Then was to come a new departure, the whole crowd to be conveyed to the Woodstock Club out at 38th street and Michigan road, where golf, tennis matches, and other forms of recreation are to be indulged in by those who so wish such diversion.

An attractive evening program has been arranged as a finale. There is to be a 6:30 P. M. dinner, special music, an address by Hon. Charles J. Orbison, Indianapolis, and a ballet sketch, "Woodland Dance Scene," by Miss Helene Hibben and pupils.

## TO RETIRE AS SECRETARY

### Merritt Harrison to Give Up Official Post After Ten Consecutive Years of Service

It is with regret that we are obliged at this time to announce to the membership of the Indiana Society of Architects the retirement from the secretaryship of Architect Merritt Harrison, Indianapolis, who ever since the inception and formation of the organization has acted in that capacity. After ten years of constant and indefatigable service in the interest of the Society, Architect Harrison feels that he is entitled to the privilege of turning the reins of the secretary over to someone else, and with that idea in mind refused to allow his name to be placed in nomination for re-election this year.

No architect in the state has given more of his time to the endeavor to advance the interests of the profession in Indiana than has Mr. Harrison, nor has any one made the sacrifice he has to keep the state architect's organization going in a constructive direction. He has served faithfully under ten different presidents and taken an active part in every progressive move launched by the Society. Some of those efforts have failed for sundry reasons but enough has been accomplished to cause gratification, and whatever of success has been achieved is in no little part due to the sincere and dynamic spirit shown by the retiring secretary who was constantly in the thick of the fight. He was always in intimate touch with the situation and was a power of aid to his officers and the various committees. His name is indellibly inscribed in the history of the Indiana Society of Architects, and the state architectural profession is indebted to him beyond measure for the willing service and support he has contributed thru his years of incumbency as secretary.

It was thru his hearty co-operation that the Architect's Page in the Recorder has become a fixture and given to the Indiana architects a regular weekly means of publication of news pertaining to the profession, the only such weekly agency possessed by any state architects in the country.

And in retiring from office Mr. Harrison gives the assurance that his interest in the Society is as great as ever and that he will continue to serve and support it, though as a private member rather than an officer.

## LAUNCH NEW ARCHITECTURAL PARTNERSHIP

### Ed Pierre and Caleb Wright Link Forces At Indianapolis

A new architectural firm has developed at Indianapolis in the forming of a partnership between Edward D. Pierre and Caleb Wright, same to be known as Pierre and Wright, with offices at 1133 Hume-Mansur Building.

Mr. Pierre, formerly of Ft. Wayne, has for some years been associated with Indianapolis architectural circles, having been employed in various local offices and of later years having engaged in independent practice. Mr. Wright was, before moving to Indianapolis, located at Chicago, he leaving there to enter the office of Architect Herbert Foltz, where he was situated up to the time of the formation of the new affiliation with Mr. Pierre.

## ORGANIZATION AND CURRENT NEWS

### CONDITIONS AMONGST THE BUILDING TRADES

**Things Seem to Be Fairly Well Settled Up**

Differences between contractors and the building trades have been settled in most of the larger cities of the country and it is believed that for the balance of the year there will be peace and harmony in the construction industry The only obstacle in the way at this time apparently is the disinclination of certain trades, especially the carpenters, to go along with the decisions of the National Board for Jurisdictional Awards.

In the city of Boston the painters returned to work on May 26, after having been on strike since April 1, in an effort to secure an advance from $1.10 to $1.25 an hour. The painting contractors after waiting for some time for the union to accept the same kind of an agreement that was signed by the majority of the other trades in Boston began to employ mechanics on the open shop basis. As a result the union changed tactics and agreed to the rate of $1.10 per hour. On May 25 approximately 5,000 union laborers went on strike for an increase in wages above the prevailing rate of 65 and 70 cents an hour. Contractors are hiring non-union men in order to man their jobs.

In Washington, D. C., on May 14th, the strike of painters and paperhangers was called off and the men went back to work at $9.50 which was a fifty cent increase. Plumbers in the same city recently negotiated an agreement, which runs until February 1, 1927. From May 8, 1925, to February 1, 1926, the rate will be $10.50 a day and from that date until February, 1927, it will be $11.00 a day.

The general strike of structural iron workers in Indianapolis, which began on April 1st, following the refusal of the employers to grant a wage increase of 25 cents per hour, ended recently when the strikers returned to work at the 1924 wage scale; but on July 1st they will automatically receive an increase of 10 cents per hour.

In St. Louis the United Slate Tile and Composition Roofers recently renewed an agreement with the Master Roofers Association at the 1924 rate of $1.25 an hour.

In Los Angeles the bricklayers are demanding $11.00 a day which is an increase of $1 a day over the old rate. Contractors are united in their opposition to granting this craft an increase.

In Portland, Oregon, the bricklayers and plasterers were recently given an increase of $1 a day, and the carpenters are asking for an increase from $8 to $9 a day.

The union branch of the Master Painters' Assn. of Buffalo, have an agreement with the men employed by its members whereby the latter get a rate of $8 per day for one year effective May 1, 1925.

The Master Plumbers Association and the Heating and Piping Contractors of Buffalo have closed contracts with their men calling for a rate of $9.50 per day to October 1st and $10.00 per day from October 1, 1925, to May 1, 1926, when further adjustments will be made.—(Semi-monthly Bulletin National Association of Building Trades Employers.)

### NOR SHOULD CALIBRE OF THE SUB-CONTRACTOR BE OVERLOOKED

It is not sufficient to rely solely on the reputation of the General Contractor for he cannot produce for the owner work of a better quality than the abilities of his sub-contractors and their mechanics.

Therefore, wherever quality of work is to be considered and not merely price, it is important to select sub-contractors with as much care as general contractors. Many general contracts, however, are awarded on a lump sum without any reference to the sub-contractors to be used in the work. Such a method is dangerous and should be corrected.

## HAMMOND

### HANDWRITING ON THE WALL GROWS BOLDER

**Unless Arbitrary Attitude of Labor Abates Working Conditions Are Due For a Change**

As time rolls on certain conditions more and more are developing in Union Labor Circles to that stage where if continued contractors in the building industry will for the sake of protection be forced to turn to the open shop regime.

The change in the working relations between the bosses and the employes, if it does come as it threatens to, will be due to the increasing arbitrary attitude assumed by Organized Labor which persists in placing restrictions on membership in the various building trades unions and limits apprentices, and by such methods seeks to limit the available labor supply. Then, too, another contributing cause to the dissatisfaction that is growing under the lash of present conditions is the seeming stand taken by some of the labor organizations that a working agreement is only binding on the employer and can be disregarded on the Union side whenever it is to the latter's special in-

terest or suits its convenience to do so. It is these very things that are evolving conditions for which the unions are prone to blame the employers, yet, it is the unions themselves who, by their actions, are causing such a decided change of sentiment.

Frequently and in ever increasing volume comes the word that localities, heretofore regarded as strictly union centers, are seriously considering the abandonment of the closed shop idea and are advocating a change to the open shop order. Even in the Calumet District such advocacy is creeping in stronger all the time and already in The District there is considerable construction work being put thru by non-union labor.

This latter development is quite pertinent for it is impossible for the closed shop contractor to compete with the open shop employer in that he has to pay higher wages and is not in a position to urge production to the highest point because of union restrictions behind which the union men seek refuge and are inclined to be independent. A continuation of this condition of affairs will eventually cause more builders to adopt the open shop plan, otherwise, the unions must steer a different course or they will have nobody but themselves to blame when the open shop becomes prevalent.

## LONG LITIGATION COSTS HEAVILY

### Association Has Four Other Grievances Against Insurance Company

After three years of litigation the Building Trades Employers Association of Hammond has been sustained in its stand against Contractor Androff and The New Amsterdam Insurance Co. The case arose over the refusal of the latter concern to pay the bond forfeited by Androff when he broke his membership agreement by ignoring the agreed-upon building trades wage scales. First the county court ruled for the association and recently the State Appelate Court sustained the lower court's decision when an appeal was carried to the higher court.

Had the insurance company settled originally when the trouble arose it would have been far better off than by going to law over the matter. As it is, interest, court costs and fees will just about run the amount up to double the original called for in the policy.

The association has four more grievances of a similar nature but has so far made no move to collect by suit. It is just possible the matter will be carried to court but such action is up to the decision of the B. T. E. A. board of directors.

## GONE FISHING

### B. T. E. A. Secretary Drops Duties For a Spell

The desk of the secretary at B. T. E. A. headquarters is locked, his corner is quiet, and the atmosphere about the place is charged with lethargy. Vacation days are here and he has "ducked out." The whirring of the motor early this week heralded his departure as he sped away southeast for Lake Webster down in Kosciusko County. They say he was all booked up with fresh fish orders before he left and contemplated considerable action in an effort to fill them all.

## HAMMOND BUILDING JOTTINGS

The Hammond Brass Works, whose plant was recently destroyed by fire when the Paxton Lumber Yards went up in smoke, has purchased a new site on Summer St. and started excavating for a new building.

With the stone cornice all set on the new skyscraper bank the structure makes a fine appearance.

Hammond is proud of the new Lloyd building which is generally conceded to have the finest front in the city.

Architect Mac Turner this week began receiving bids for the construction of a new warehouse and garage for the Hammond Lumber Co. It will be one story high with a trussed roof, brick construction, 60 ft. by 96 ft.

Local architects report building prospects brightening up. They all are busy on tentative plans.

# FT. WAYNE

## A NEW PLANT, A NEW RAILROAD— AND THE OPPORTUNITY THEY HAVE DEVELOPED

### Transform Open Tracts of Land Into Ideal Industrial Center

Watch for an increased industrial development in Ft. Wayne within the next few years. There's a reason. The city now is in a position to welcome and accommodate many types of new industries demanding transportation and switching facilities which hitherto were alleged to be lacking.

The new order of things is due to the alertness of those who have the best interests of the city at heart and is evidence of what can be done when business men take a hold of things and seek to improve the city both physically and industrially. The two big factors in Ft. Wayne's new commercial opportunity are the Chamber of Commerce and the Greater Ft. Wayne Development Corporation. The first named because it was that central business organization that secured a monster new manufacturing plant to locate in the city, and the second agency because it organized to meet a specific need and has created an ideal industrial district thru the completion of the Ft. Wayne union railway, a belt line that is owned by the interested connected railroads but which was promoted by the development corporation.

It is doubtful if Fort Wayne would ever have had such a condition but for the coming of the big manufacturing plant, for it is through the creation of ideal conditions to meet the requirements of the new concern that an ideal condition is also available for a large number of other plants.

Before the closing of the arrangements with the big plant, the tract which now is graced by one of the most modern manufacturing plants in America was only a large vacant field, reached by ordinary country roads. As a part of the many demands of those at the head of the new factory, broad cement highways were built to connect with streets entering the downtown district. The company officials also, without asking for anything in the nature of a bonus, required that ample connections for water and gas also be provided. This was done, not only that the firm's requirements should be met but also to

create ideal conditions on adjoining tracts owned by the development corporation, located along the Pennsylvania railroad and the new belt line. All other utilities—sewers, telephone connection and the like—have not only been provided for the large plant but they are also available to all who locate factories in the new industrial district.

Now that the belt line of railroad is finished, the Greater Fort Wayne Development corporation will enter consistently, in co-operation with the chamber of commerce and other agencies upon a campaign seeking to bring to Fort Wayne additional industries.

## Indiana Harbor

### CONSTRUCTION WORK GOING ALONG AT A GOOD PACE

#### Many New Homes and Flats Under Way

Building of new homes, apartments, and business structures at Indiana Harbor is continuing with little sign of abatement.

Intensive construction of several new homes and business buildings on Euclid avenue is now under way, and many similar structures are taking form on Main street. Block avenue, Watling street, and throughout the Park Addition.

Building operations in the new subdivision east of Sunnyside has already been started, and plans have been completed by several prospective owners to erect homes there this summer.

The general scope of new construction embraces every neighborhood in the city, and is confined to no special locality, or street. Practically no square block in the town is without one or more newly constructed homes.

Many of the two-story, brick flat buildings are now completed with tentative customers or renters displaying a lively interest in that type of home investment. The second unit of these flats will be started by the group of Indiana Harbor realtors who are financing the program, as soon as the present unit is sold.

It is estimated by contractors and realtors that approximately 500 new homes, apartments and business buildings will have been built in the city before the present year is over.

### NEW MILLS IN PROSPECT

#### Announcement to That Effect Arouses Interest

Immediate construction of the 24 hot tin mills at the Indiana Harbor site of the Youngstown Sheet and Tube Works is outlined in the announcement of President James A. Campbell , who states that plans have been completed for the installation of the unit.

Erection of a small seamless tube mill here at the same time is also contained in the announcement. Units are expected to be completed and ready for operation by spring of next year.

The installation of the tin mills marks the entrance of the company at its Indiana Harbor plant in the manufacture of tin plate in competition with the United States Steel corporation at Gary.

## INDIANAPOLIS

### STILL LEADING 1924

#### Local Building Volume This Season Out In Front Of That Of Last Year

Five months of building activity in Indianapolis, January 1st to June 1, this year succeeding in producing a greater volume of business in 1925 than was developed over the same period the preceding year. The margin of increase was small it is true, it registering but 1.51%, but, the fact that there was a gain is gratifying.

Of the five months just past three of them, March, April and May showed increases over the corresponding periods in 1924, while January and February, slow getting started, fell behind those of the same months last year. The best building month of the ten was April, 1925, when the estimated valuations ran up close to $3,000,000.

The comparative figures of the city building inspector's office are:

| | 1925 | 1924 |
|---|---|---|
| January | $ 964,526 | $ 1,012,221 |
| February | 1,905,578 | 2,354,162 |
| March | 2,454,598 | 2,213,313 |
| April | 2,817,231 | 2,492,173 |
| May | 2,047,741 | 1,965,741 |
| Total | $10,189,674 | $10,037,610 |

# Sealed Proposals

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the Joint School Board of Union School Township, Union County, Indiana, by John E. Kauffman, its trustee, and the Advisory Board of said township, and the Board of Education of College Corner Village School District, Preble County, Ohio, by its Board of Trustees, will receive sealed bids at the office of said Joint School Board at the school building in the Village of College Corner, Ohio, and West College Corner, Indiana, on Monday, July 27. 1925, up to 12 o'clock M. of said day for the construction of a new joint high school and elementary school building in Union Township, Union County, Indiana, and in Preble County, Ohio.

At the same time and place bids will also be received for the installation of the following:

(a) The heating and ventilating system;
(b) The plumbing and sewerage system;
(c) The electric wiring;

all in accordance with the plans and specifications heretofore adopted and approved by the Trustee and Advisory Board of Union School Township, Union County, Indiana, and by the Board of Education of College Corner Village School District, Preble County, Ohio, which plans and specifications are now on file in the office of said Joint Board and in the office of the State Board of Accounts of the State of Indiana. Said building to be a two-story brick building with basement, to be located upon the real estate now owned in Union Township, Union County, Indiana, and in Preble County State of Ohio, and now occupied and used for school purposes. The estimated cost of the proposed building completed is $112,000.00. All bids must be in writing on forms prescribed by the laws of the States of Ohio and Indiana, and delivered to the president or secretary of the said Joint School Board, on or before the time mentioned herein. Each bid on the general construction shall be accompanied by the certified check of the bidder in the sum of 10 per cent. of his bid, payable either to John E. Kauffman, Trustee of Union School Township, Union County, Indiana, or to S. M. Gilmore, Treasurer of the Board of Education of College Corner Village School District, Preble County, Ohio. Each bid for the

heating and ventilating system shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. Each bid for the plumbing and sewerage system shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. Each bid for the electric wiring shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. These certified checks shall be held by said persons as a guarantee of good faith that the bidder will enter a contract and execute a bond for the full amount of his bid, to be approved by the Joint Board for the due performance thereof, if his bid is accepted. The checks of the unsuccessful bidders will be returned to them when the contract is awarded and entered into. Should the successful bidder fail to enter into a contract and execute said bond, he shall forfeit his certified check as liquidated damages, for the use and benefit of said school township and said school district. The plans and specifications may be examined at the offcie of the township trustee of Union Twp., Union County, Indiana, and at the office of the secretary of the Board of Education of the College Corner Village School District, Preble County, Ohio, and at the office of Omar P. Gordon, Architect, at Greenfield, Indiana. A deposit of $15.000 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of the architect, which amount will be returned in full in case same are returned of the day of letting, and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only, the sum of $5.00 only shall be returned to him, but should be fail in the observation of both conditions, he shall forfeit the whole amount of said deposit. Each bidder shall stamp or write his name on the back of the drawing or cover of the specifications used by him in preparing his proposals. Said contract will be let in four parts as stated above to the lowest responsible bidder, who, upon the award of a contract, shall give bond to the approval of the Joint Board for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by said Joint Board, and shall pay for all labor and materials furnished him or any of said contractors in the construction of said work. Each bidder must file with his bid a statement showing he has complied or will comply with the workman's compensation act in both the States of Ohio and Indiana. All bids must in strict accordance with the plans and specifications heretofore adopted. The Joint Board reserves the right to reject any and all bids.

Dated, this 23rd day of June 1925.

R. A. HOCKERSMITH,
President of the Joint Board.
JOHN E. KAUFFMAN,
Secretary of the Joint Board.

Post Office, College Corner, Ohio.
June 27th, July 4th-11th-1925.

## PAVING
## NOTICE TO CONTRACTORS

Sealed bids will be received by the Board of Trustees of the Indiana State Normal School at 1:30 P. M., July 7, 1925, at the office of the President of the Eastern Division, Indiana State Normal Schcol, Muncie, Ind., for the paving of certain established roadways on the campus of the Indiana State Normal School, Eastern Division, Muncie Ind.

Bids must be made on Form No. 89, prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of the bid.

Detailed plans and specifications will be on file in the office of the President of the Eastern Division of the Indiana State Normal School, Muncie, Ind., and additional plans and specifications for individual use of the bidder may be secured from H. Lester Janney, County Surveyor and Engineer, Muncie, Ind.

Bids will be made for the completion of said improvement in strict accordance with such plans and specifications. Approximate estimates on the quantities required, including 50 tons of crushed stone to be used in the preparation of the foundation and 6,950 square yards of asphaltic concrete pavement, unit prices per ton of crushed stone and per square yard of pavement surface shall be submitted. Also specifications are on file for rock asphalt pavement and sheet asphalt pavement, and alternate bids will be received for each of these types of pavements. Total estimated cost of such improvement is $12,500.00.

BOARD OF TRUSTEES OF THE
INDIANA STATE NORMAL SCHOOL,
By Helen C. Benbridge, Secretary.

June 20-27-July 4, 1925.

## COMMUNITY BUILDING
## NOTICE TO CONTRACTORS

The undersigned School Board of the Salem City of Salem, Washington County, Indiana and the Trustee and Advisory Board of Washington Township, Washington County, Indiana, hereby give notice that on Friday, July 10, 1925, at 10 o'clock a. m. at the office of the School Board in the High School Building at Salem, Indiana they will receive sealed proposals for the erection and completion of a new Community Building, and at the same time and place will also receive sealed proposals for the installation of heating and ventilating, plumbing and sewerage and electric wiring in the same building, all in accordance with plans and specifications heretofore adopted and approved by the School Board, Trustee and Advisory Board.

The estimated cost of the proposed building is Forty Thousand Dollars ($40,000.00).

All bids must be signed, sealed and delivered in writing on Form No. 96 as prescribed by the State Board of Accounts.

Each bid for the general construction shall be accompanied by a certified check for one One Thousand Dollars ($1,000.00); each bid for the heating and ventilating shall be accompanied by a certified check for Four Hundred Dollars ($400.00); each bid for the plumbing and sewering shall be accompanied by a certified check for Two Hundred Dollars ($200.00); and each bid for the electric wiring shall be accompanied by a certified check for One Hundred Dollars ($100.00). These checks must be made payable to the School Board of Salem, Indiana, and will be held by it as a guarantee of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of the bid, approved by the School Board, Trustee and Advisory Board for the due performance thereof if his or their bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bonds then he or they shall forfeit the amount of said certified check as liquidated damages for such failure for the use and benefit of the proper fund of the Salem School City and Washington School Township, Washington County, Indiana.

Copies of the said plans and specifications are on file in the office of The Elmer E. Dunlap Company, Architects, 1060 North Delaware Street, Indianapolis Indiana, and in the office of the State Board of Accounts State House, Indianapolis. Copies of the said plans and specifications may be obtained from the office of the Architects upon the deposit of Twenty-five

June 27th, July 4th, 1925.

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Sealed proposals will be received by the Trustee of Allen School Township, Miami County, Indiana, to and until twelve o'clock Noon, on Monday, July 6th, 1925, at the office of the undersigned at the consolidated school building located at the Town of Macy, Miami County, Indiana, for the remodeling, repairing, and construction of an addition, including an auditorium, to the said above described school building, including plumbing, heating and electrical wiring, the total estimated cost of which is Thirty Thousand ($30,000) dollars, all in accordance with the plans and specifications prepared by Charles E. Bacon, architect, copies of which plans and specifications are now on file in the office of the State Board of Accouts, in the State House, Indianapolis, Indiana; at the residence of the undersigned Trustee, at Macy Miami County, Indiana: and at the office of the architect, Charles E. Bacon, 606 Odd Fellows Building, Indianapolis, Indiana.

Separate bids will be received on the general construction, on plumbing, on heating, and on wiring, all in accordance with the said plans and specifications. All bids must be in writing, enclosed and sealed within an envelope, upon which envelope shall be endorsed the name of the bidder, the class of work bid upon, and the bid shall be on the forms on file with the specifications, and all bids will be opened and read publicly at the time and place fixed in said notice.

The right is reserved to reject any and all bids, and to take a reasonable time to investigate the bids and qualifications of the bidders, and the limit of time to be allowed such investigation shall not be less than seven (7) days from the date of receiving bids.

Each bid shall be accompanied by a certified check for the sum and amount equal to three (3%) per cent of said bid. These certified checks shall be payable to the School Trustee of Allen School Township and will be held by him as a guaranty of good faith that the bidder, or bidders, will enter into a contract and execute bond or bonds, approved by the Trustee for the performance of said contract, after such contracts are awarded the checks of bidders who failed to be awarded the contract shall be returned to them.

Should the successful bidder or bidders fail to enter into such contract and execute such bond then he or they shall forfeit the amount of such certified check as liquidated damages for the use and benefit of proper fund of Allen School Township, Miami County, Indiana.

Each bidder shall file with his bid the statutory affidavit required ynder Section 8698 Burns' Revised Statutes of 1914.

Copies of the plans and specifications may be obtained from the office of the architect, 605 Odd Fellow Building, Indianapolis Indiana upon the deposit of Fifteen ($15) Dollars, for each set, and said deposit will be returned to the bidder upon the safe return of the plans and specifications to the office of the architect on or before the day and the hour set for receiving bids.

Each bidder receiving plans and specifications will be required to submit bid, or bids, to the Trustee, or failing to do so, the deposit for said plans and specifications will be retained for the use and benefit of proper fund of Allen School Township, Miami County.

Scudder Wilson,
Trustee Allen School Township,
Miami County, Indiana.

York and Rees,
Attorneys for Trustee.
June 27th, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Sealed bids will be received by the Board of Education, Petersburg Ind., at the office of Supt. of Schools, Mr. J. B. Leas, Thornton school building, for the erection of a new grade school and auditorium building, including general construction, heating and ventilating, plumbing and sewering and electrical work.

The estimated cost of the building including the above, is approximately $44,000.00.

Bids will be received until 2 p. m. Monday, July 6th, 1925, and then opened for consideration.

All bids must be made upon proposal blanks which have been approved; these blanks will be supplied by the Architects upon application.

Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid on.

All bids must be accompanied by a certified check or bid bond (either personal or Security Company) for not less than three per cent (3%) of the amount of the bid submitted, made payable to the order of the "School City of Petersburg" as liquidated damages in the event that the successful bidder fails to enter into the proper contract for the work bid upon, and give the proper security or personal bond within ten days from the acceptance of such bid. Checks of unsuccessful bidders will be returned.

Each bidder shall file with his bid a non-collusion affidavit as required by law.

The Board of Education reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidder.

Plans are on file in the office of the Board of Education, Petersburg, Ind., in the office of the State Board of Accounts, Indianapolis, Ind., and in the office of the Architects, Harry E. Boyle & Co., Furniture Bldg., Evansville, Ind.

Signed: Board of Education,
Petersburg, Ind.

## DESLAURIERS METAL COLUMN MOULDS

*Adaptability*—in that Deslauriers Forms are more flexible as regards erection–require less framing–require absolutely no bracing.

*Convenience*—in that they can be supplied quickly from any of our fourteen distributing points–in that they are handled by experienced and competent men.

*Results*—smooth, hard, true columns, requiring a minimum of finishing–the pleasing appearance that has made their reputation.

*Economy*—the above facts mean reduced overhead cost on a job and hence, Deslauriers forms are the cheapest in the end. Benefit by the experience of the largest users in the country.

Our method is to furnish and erect the moulds at building under construction, or lease the moulds on reasonable terms to the contractor doing the erection. The moulds are never sold. Submit your plans to our Estimating Department for our rental or erection proposition.

**Residence:** $4,300.00, 1221 West 36th. Owner, Mrs. H. M. Talbott, 1336 N. Delaware. Contract let to William Rooker, 1630 N. New Jersey St.

**Residence:** $3,250.00, 6037 Dewey Ave. Owner, James Murdoch, 6021 Bonna Ave. Owner builds.

**Residence:** $3,250.00, 6044 Dewey. Owner, James Murdoch, 6021 Bonna Ave.

**Residences:** (2 doubles), $3,800.00, at 1418-20 West 32nd and 533-35 West 29th. Owner, F. M. Knight Realty Co., 500 Fletcher Trust Bldg.

**Dry Cleaning Bldg.:** (add.), 1 sty., 18x60, 934 E. Pratt. Owner, Schoen Bros., Penn. and North Sts. Contract let to Ball & Kauffman, 961 N. Keystone. Brick.

## CONNERSVILLE

**Gymnasium:** $20,000.00, 1 sty. 60x100, Frankton, Indiana, Pipe Creek Township, Madison County. Archt. Henkel and Hanson, 108 Heineman Bldg., Connersville, Ind. Owner, Frank Behymer, Trustee, Elwood, Indiana. Plans in progress. Brick, built-up-roof, struct. steel steel sash, steam heat.

***Garage:** 1 sty., 38x120. Private plans. Owner Board of County Commrs., Court House. Bids close July 11th, at 1:00 p. m. Concrete block, conc. floors, steel sash.

***Dormitory (general alterations) New Kitchen and Dining Room:** $25,000.00, Kinghtstown, Indiana. Archt. Harry M. Griffin, McFarlan Building, Connersville. Owner, Board of Control, Indiana State Soldiers and Sailors Home, Daniel F. Mustard, Anderson Ind.; James S. Engle, Winchester, Ind.; Joseph A. Minturn, Indianapolis; Leslie A. Cortner, Supt. Kingstown, Indiana. Plans in progress. Brick.

**Commercial Building:** (6 store rooms), $48,000, 1 sty. &bas., 70x150, 7th and Eastern. Archt. Joseph R. Fallon, Thornburg Building. Owner, W. J. Henry, Connersville. Plans in progress. Brick, hollow tile, steel sash, comp. roof 6 furnaces, tile floors, copper set store fronts.

***Double Residence:** (remodeling) $5,200.00, 19th and Vermont Sts. Archt. Jos. R. Fallon, Thornburg Bldg. Owner, W. E. Sparks, Connersville, Ind. Plans in progress. Frame construction, 2 furnaces, 2 water softeners, wood shingle roof, hardwood floors.

***Parochial School:** $100,000.00, 1 & 2 sty., 80x120. Archt. Henkel and Hanson, 108 Heineman Bldg. Owner, St. Gabriels Catholic congregation, Rev. T. S. Mesker, pastor, 232 E. 9th St. Plans completed. Will ask for bids early Fall. Brick over hollow tile.

**Church:** (Vapor Heating System), $60,000.00, Oldenburg, Indiana. Archt. Henkel and Hanson, 108 Heinemann Bldg., Connersville, Ind. Owner, Oldenburg Catholic Church, Oldenburg, Ind. Bids close July 7th.

### Contracts Awarded

***Theater:** (rem.), $7 000.00. Archt. Joseph R. Fallon, Thornburg Bldg. Owner, The Auditorium Theater. General contract let to Hoosier Construction Co., Connersville, Ind. General alterations.

**Residence:** $5,000.00. Owner, L. M. Bess c/o contr. Contract let to Jones Construction Co. Frame.

**Residence:** $5,000.00. Owner. R. W. Smith c/o contractor. Contract let to Jones Construction Co. Frame.

## CRAWFORDSVILLE

**Office Building:** $20,000.00, 2 sty. & bas., 44x[illegible]. Archt. Boswell and Beeson, Ben Hur Building. Owner, The Crawfordsville Seed Co., Crawfordsville. Bids in under advisement. Low bid.

## I. S. A. CONVENTION MADE ATTRACTIVE BY PLEASING AND WIDELY DIVERSIFIED PROGRAM

### New Officers Elected

Two pleasing sessions marked the tenth annual convention of the Indiana Society of Architects at Indianapolis, Saturday, June 27, both being well attended. The first took place at the new Elks Club, where a noon luncheon was served and the business meeting was held. Adjournment was then taken, and the architects were conveyed by autos to the Scottish Rite Temple, where, by special arrangements the designs submitted in the recent competition for a new Rite Temple were reviewed by the architects. When this feature was completed the architects again entered the waiting autos and were whirled out to the Woodstock Country Club, where golf and other recreation were indulged in. When evening came a chicken dinner was served, of which all partook with a realish.

At the Elks Club, the business session covered merely routine matters, and the annual election of officers. Various committee reports were read showing the Society to be in a thriving condition and actively engaged in interesting itself in matters related to and bearing on the profession and the building industry.

The report of the treasurer, submitted by L. A. Turnock, showed a substantial bank balance on hand, and it was moved that same be accepted when a special auditing committee approved same.

Herbert Foltz, chairman of the legislative committee reported considerable activity by the Society at the last session of the State Legislature, and cooperation extended on several proposed bills.

An interesting submission was put forth by Wilbur Shook, delegate from the Society to the Fifty-eighth Annual Convention of the American Institute of Architects. His report in addition to its informative nature was greatly enhanced by subtle and sparkling wit that brought forth many a good laugh.

As for membership, Geo. W. Allen, chairman of that committee reported a few losses, but also some new members, making things about a fifty-fifty break on the year. Three new members were admitted Saturday, Carroll O. Beeson, Crawfordsville, John Parrish, Indianapolis and C. E. Miller, South Bend.

Kurt Vonnegut, of the Pageants and Exhibits committee, regretted that more interest had not been injected into the annual architectural exhibit last winter, and suggested the architects all over the state should give more attention to this event, to make it a real outstanding profession, and endeavor to impress upon the public, by a fine exhibit, the service the profession renders in a building operation.

The annual election of officers was close and resulted in the naming of these men: President, Robert Frost Daggett, Indianapolis; 1st Vice President, Rodney W. Leonard, Frankfort; 2nd Vice President, L. A. Turnock, Indianapolis; Treasurer, Geo. W. Allen, Laporte; Secretary, Fermor S. Cannon, Indianapolis. The committee chairmen named were: Entertainment, Wilbur Shook, Indianapolis; Exhibits and Pageants, E. D. Pierre, Indianapolis; Legislative, W. D. Miller, Terre Haute; Membership, E. R. Austin, South Bend; Publicity and Public Action, Herbert Foltz, Indianapolis.

It was announced that the medal the Society offered for the exhibit of the best example of architectural work executed during the year, by an Indiana architect, to be decided by ballot, and the certificate of honorable mention, awarded to Robert Daggett and E. D. Pierre, respectively, were now being made and would be presented as soon as completed.

After visiting the Scottish Rite Temple, exhibits of competitive architectural drawings, the architects hurried out into the open for an afternoon of recreation at the Woodstock Club. "Bob" Daggett was keen for a golf match, some clubs were dug out and Daggett, with De Long as a partner started out against Zimmerman and Campbell. "Bob's" shooting kept his side out in front till the fifth hole and then Lady Luck frowned enough to allow the last named pair to halve or win enough of the remaining holes to come in with one up, at the last hole to win. Quite a gallery started around, but the hot sun, then a threatening storm drove all to cover except the players who kept on going to the finish.

Tired and hot the golfers finally reached the club house to find the architects half way through soup, on a chicken dinner round, but the handicap was easily overcome and everyone finished on an even Stephen basis.

Then came a real treat, an address by Hon. Charles Orbison, who spoke on architecture and its benefits to humanity. He enlarged upon his subject and

## ORGANIZATION AND CURRENT NEWS

### CARPENTERS AS MANY PER MILLION AS IN 1850

#### Other Trades Show Decease

How different the building construction of today is from that of 75 years ago is graphically shown in a tabulation published in the last number of the Monthly Labor Review under caption. "Trend of Occupations in the Population." For instance, the use of steel for framing has accounted for the comparatively new trade of structural iron worker. This was shown separately as an occupation for the first time in the census returns for 1910. In 1920 there were 178 structural iron workers per million of population.

Only 81 plumbers per million inhabitants were employed in 1850, testifying to the small amount of plumbing in the dwellings of those days; almost 25 times that relative number were employed in 1920.

In 1920, 2,014 electricians per million of population were reported, compared with 667 in 1900, the first year in which a separate report was made, electric lights being unknown in 1850, and being but little used for forty years thereafter.

Notwithstanding changes in building construction, notably the present use of other materials than lumber in large industrial and public buildings, carpenters and joiners have increased in almost the same proportion as the population during the 70-year period—1850 to 1920—but brick and stone masons, plasterers, and marble and stone cutters have decreased perceptibly when compared with population.

With the increased use of machinery, as might be expected, the principal woodworking shop crafts have decreased amazingly since 1850, including coach and wagon makers, wheelwrights, cooperage and cabinet makers, while machinists in the metal-working trades have increased to more than seven fold, per million of inhabitants, during the same period.

Lumbermen, raftsmen, wood choppers, etc., listed as one occupation, show 491 per million of population in 1850, 1,582 in 1890 and 1,826 in 1920.

Of all occupations listed in the Labor Bureau's tabulations, agricultural laborers and farmers and planters showed in 1920, and in all previous decades the greatest number of workers per million of population, agricultural laborers in 1920 numbering 37,544 per million and farmers and planters, 57,550. General laborers are next on the list.

---

### WHAT THE SAFETY DRIVE IS

#### Is Just a Common Sense Precautionary Move to Lessen the Ever-Present Danger Hazard

There are people who think that the safety movement is being conducted by cranks who are trying to take the joy out of life by impressing everybody with the perils that constantly confront us. This is a wrong conception. There is no doubt but what life would be a terribly sad existence if adventure were eliminated. The idea that inspires the safety leaders of the nation, however, is to educate our people to meet dangers consciously and intelligently. He who leaps in the "dark of some sharp accident" and takes a "mitigatable chance" only wastes an "unadventured soul."

The enthusiastic accident preventionist will admit that danger and risk are fundamental to life and that the adventure of life might be tame without the possibilities of chance or mishap. The mechanical age has only accentuated the innumerable possibilities of accidents. In spite of those common dangers and the growth of them, only suicides willingly give up life. There is no inconsistency with living a joyous adventurous life and at the same time respecting these dangers.

In a recent statement W. H. Cameron, managing director of the National Safety Council, which is conducting a perpetual accident prevention campaign, points out that no sane person would cut a hole in the floor, or leave such an opening unguarded, just for the fun of falling into it and breaking a limb. It is the holes in factories, on the sterets, or pavements and in our homes that the safety man wants covered up. Thousands of factories have accidents that can be prevented through the elimination of the causes which are common in every industry.

There will always be accidents, admits Mr. Cameron, but a great many tragic deaths and long lingering sufferings can be avoided through the exercise of due care which will follow the necessary educational work along this line. Safety does not mean cowardice. Precautionary teaching does not necessarily result in the development of a "fear complex." The right kind of safety means constructive conquest, not timid submission.

## WHERE THE ARCHITECT COMES IN

### He Is the Specialist To Cure Building Ills.

In live American cities today where greater eras of building along modern lines is now going on, there is coming a keen realization of the value of the services of the architect. In this connection, a statement by a prominent member of the American Institute of Architects, is of particular interest.

He says, "The thinking public is awake to the value of the services capable of being rendered by the architect, and recognizes that his province bears the same relationship to the owner as that of a specialist in medicine or surgery to his patient. In countless ways the expert advice and suggestions of an experienced architect will be found to have substantial value, and his worth, in this respect cannot be economically ignored by anyone who has determined to build, whether it be a bungalow or a great commercial or monumental project.

"When a location is in contemplation, or has been determined upon, the architect selected should be made acquainted with the owner's ideas and conception of what the building should be, and its character and purposes. The exigencies of the site should then be studied, and the climate, outlook, grades, drainage and other existing factors carefully considered, as their influence make for the success or failure of the contemplated building.

#### Intelligent Planning

"This study will enable the architect to obtain a knowledge of the essential requirements, to discuss any fallacies, and to sketch out practical and comprehensive plans for the interior design, organized and adapted to the real need and precise realities, in conjunction with the economic conditions that underlie the problem.

"From these sketches and studies, showing the general plan and design of the contemplated building, with their accompanying synopsis of the materials of construction, fixtures and finish, the approximate costs of the structure may be obtained from contractors. These fixtures will afford a basis for determining the future possibilities of the project and enable its further development by the preparation of the final working drawings, which involve an accurate layout of all floors, of all the elevations, both exterior and interior, together with typical sections and detailed methods of construction. The working drawings must be so complete that a contractor will know exactly how and of what material exery part of the building is to be constructel, thereby forestalling any guessing, which so frequently is costly to the owner.

"The working drawings are accompanied by specifications, taking up in the form of a description what it is impossible to express on the drawings, and stating therein, with clearness and precision, the grades and character of the work, materials, ingredients, appliances and fixtures required to be used and installed.

"The specifications also show how the contractor shall perform certain portions of the work in co-operation with the various subcontractors, they further state the indemnity bonds, insurance, etc., required; and in general, form a complete thesis of the building to be constructed, leaving no doubt in the mind of the bidder as to the exact amount and character of the work called for. Thus it is assured that all estimates received shall have been intelligently submitted and that, when the contract is ultimately awarded, the contractor can plan its progress with a definite knowledge of the materials and requirements, and carry out his work with expedition and consequent economy.

#### Binding Contract Needed

"After it has been determined to proceed, a legal, binding and definite contract must be prepared, in which the requirements on both sides are clearly set forth, the 'instruments of service,' in the form of specific and technically intelligible drawings and specifications being made an inherent part of this contract. Definite terms of payment, time of completion, and requirements in connection with lien laws must be provided for. There must also be provisions in the contract for fire, lightning, casualty, compensation and contingency insurance, for necessary bonds in connection with completion, and for compliance with federal, state, county, city, borough or township laws and regulations.

"After the contract has been awarded the architect should be placed in full charge, so as to enable him to direct and observe the proper laying out of the work, and see that the plans and specifications are conformed to. He must also make proper disposal of the problems that arise while the building is in progress, passing on all technical questions and furnishing from time to time explanatory detail drawings of the various parts of construction, ornamentation, fixtures, arrangements, etc., as required. He issues the certificates of payment, as they fall due under the terms of the contract, and also becomes the arbiter in all questions of dispute."

# EVANSVILLE

## JUNE HOME BUILDING OFF

### Past Month's Record Not Up to Expectations

With a total of close to 230 permits issued by the offiice of the City Commissioner of Building Ed. L. Kerth, involving an expenditure of about $229,000 in construction costs, home construction for the month of June shows a falling off from normal expectations, according to Carl Dreisch, deputy commissioner. Permits for 37 new homes were issued during the month. "The normal demand should show about 60 home building permits," Mr. Dreisch said. The bulk of the permits were for remodeling, repair and installation work.

The last week, however, is said to have shown some slight renewal of activity with 75 permits issued, involving about $75,000 in construction costs. Permits for the erection of 12 new homes are included in this record.

# FT. WAYNE

## LOCAL HOME OWNERS TURN TO SUBURBAN DISTRICTS

### Good Roads, Transportation Facilities and Specialty Conveniences Make Outlying Living Attractive

This city's continued activity in the purchase of homesites and the building and buying of homes has seen very little let-up during the past few weeks, and

most of of the remaining properties in the subdivisions lying in the outskirts of the city, just within and just beyond the city boundaries, are being purchased with a steadiness which indicates that the year should close with a fine volume of new suburban building operations.

Right now, locally, the creation of a more flexible bus service in all directions, even that which parallels and becomes adjunct to the electric lines, has served to suggest to many families that the lands still farther out, with their offering of purer air and cheaper living, are creating a new interest in the suburbs.

Several months ago, Roger Babson declared that throughout the country there would be a tremendous movement of the population of all cities into the suburban and rural districts. Formerly, only the cultivator of the soil could live three, five or eight miles from the heart of the city. Now, the automobile bus and the electric line have made it easy for the factory worker, and the men and women employed in any way in the downtown district to live in the outskirts without and interference with their convenient connection between home and place of employment.

But the increasing transportation facilities while important, and offering a lure to draw folks to the suburban districts, as witnessed at Ft. Wayne are not all. The fact that great strides have been made in such specialties as private water supply, electric and sanitation systems has been one of the chief contributing causes for the trend to the country or suburban districts of much building activity. Formerly citizens were restricted to the corporate limits of cities for pressure water supply, electric light and modern sanitation methods, but now through specialty progress one can live in the country and enjoy all the conveniences of the city. Nor have Ft. Wayne citizens been slow to take advantage of this suburban opportunity as is evidenced by the hundreds of new homes built recently or now in course of construction out around the edges of the city.

# HAMMOND

## ANOTHER LABOR DRIVE AT THE CALUMET DISTRICT

### Attempt To Be Made To Unionize The Steel Mill Workers

Now it appears as if the Calumet District steel mills are to bear the brunt of an offensive campaign to be waged by the American Federation of Labor. The word is out to the effect that in the near future an effort is to be launched by the Federation, the objective of which will be to organize the steel mill workers under the banner of unionism.

This move is but a part of a nation-wide campaign recently decided upon in an endeavor to more thoroughly and intensively organize the workers of the country including all branches of labor.

## TAXPAYERS TRIUMPH

### Effort to Foist New Street Improvements on Them Killed

Not to be further overburdened with taxes as a result of certain interests desirous of securing street improvements and pasing the payment buck over to the public many citizens of Hammond organized the Hammond Taxpayers Association and stood out against the new pavement improvements of six streets in Hammond and East Chicago. Remonstrances were filed and accomplished their purpose. Four of the proposed projects were knocked out and two of them were approved. As for the latter there was very little opposition to either as they are main connecting highways. Chapman road when improved will connect Michigan Ave., Hammond with Fifth Ave., Gary, and the other thoroughfare, Kennedy Ave., will form an outlet through Hessville for East Chicago.

## LOCAL BUILDING OPERATIONS QUIET DOWN

### Activity and Prospects Slough Off

A quietude has settled down over local building affairs and at the present writing it looks as if such a state may continue for some time. Construction costs have reached the level where folks are timid about investing in building, either for home purposes or as an investment. Necessity is the main impetus for going ahead nowdays and the work going on or about to be launched is that which must be had, principally for business reasons.

The architects report that very little preliminary work is being done, and summer and fall prospects are not as high as in former years. Material supply prices have continued steady but labor costs have mounted and the effect of such a condition is beginning to tell. Perhaps before the season is over those who were so insistent upon hourly wage advances will be brought to see the folly of their deamnds by a spell of idleness. If there is any consolation in high wages with no work upon which to collect the chances are that quite a few building trades mechanics will have a chance for solace in just such consolation.

## CONTRACTORS COUNCIL MEETS

### Builders Talk Things Over At Meeting Held at Hammond

The General Contractors Central Council of the Calumet District held a special meeting at the headquarters of the Building Trades Employers Assn., Hammond this week at which general reports on conditions were made and matters of mutual interest were gone into. Several of those recently attended a specially called meeting of A. B. C., secretaries at Indianapolis and reported as to that affair.

## CALUMET BUILDING PROGRESS

East Chicago reports building moving along slowly. Things are quite slack for this time of the year and prospects are few and far between.

Architects Hess and Greenwood, Hammond, announce plans in course of preparation for a couple of nice brick residences. One is for Mr. Nicholsom on Vine St., the other for a Mr. Allison. Plans will be ready for estimates about July 15.

## HASN'T TOLD OF ANY BIG ONES THAT GOT AWAY

### B. T. E. A. Secretary Back From His Fishing Trip

Lake Webster in Kosciusko County, Ind., gave up many blue gills, some bass and a few big cat fish when the B. T. E. A. secretary made his annual pilgrimage down there last week and so he returned home fairly well supplied. The fish were not biting as fast as in former years nor were those hooked as large as some picked off in previous visits, but the sport was good till the weather took a hand and cut in with

some high winds that whipped up the surface of the lake to such an extent that boat fishing was out of the question. Rather than just sit around and wait for placidity to settle down once more the secretary meandered back to Hammond opened his desk once more and now has the B. T. E. A. moving along at normal again.

E. E. COLE.

## INDIANAPOLIS

### A WHOPPER

**June Greatest Building Month at Indianapolis in Years**

The greatest building month in several years, that is what June, just completed, developed into at Indianapolis. Not since August 1924, when over a three million dollars building construction volume was turned in for the month has any thirty-day building period recorded anything to equal the June 1925 business. Last month the total estimated valuation of the 1401 permits issued was $3,989,987, or just $10,013 short of the $4,000,000 level. The May figures of this year were far outdistanced, the June increase being 94.8 per cent. As for the corresponding period a year ago, the volume this June showed a gain of 190.9 per cent, over that for June 1924, when the estimated valuation amounted to $1,755,234.

The past month's figures received a tremendous boost due to the fact that one permit alone was issued that carried a $1,600,000 estimated valuation. Even without that amount the month's business would have been $2,389,987, a very respectable figure.

The new work for which permits were issued amounted to $3,549,451, while the remodeling, repairs, etc., totaled $440,536. There were 433 permits covering new work, and 968 permits granted for repairs and miscellaneous projects. The 234 permits for housing projects totaled an estimated valuation of $3,073,753, one million six hundred thousand dollars of which was for a new apartment hotel.

A classified list of the building projects passed upon shows the following:

| Kind of Work | Per | Est. val. |
|---|---|---|
| Business Bldgs. | 17 | $ 295,[illegible] |
| Housing | 234 | 3,073,753 |
| Industrial Bldgs. | 1 | 50,000 |
| Miscellaneous | 176 | 44,[illegible] |
| Public Bldgs. | 5 | 85,700 |
| Repairs & Alts. | 968 | 440,536 |
| Total | 1401 | $3,989,98[illegible] |

### ALSO A GOOD POINT

Secondary estimates, after bids are received, upon various items, usually small and often reductions, introduce the chance for bidders to revise their original bids by quoting new prices widely at variance with the value of the proposed changes. This opportunity is often taken, making in effect a second chance to bid on the entire work. Such practice is therefore faulty because it requires contractors to bid twice, the second bids carrying a greater element of gambling and price cutting, which lead to business instability.

# Sealed Proposals

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustee and Advisory Board of Peru School Township, Miami County, Indiana, will receive sealed bids at the office of the Trustee in the Court House of Miami County until Twelve (12:00) o'clock noon of Saturday, July 18 1925, for repairing and building an addition to the Ridgeview School Building in said Peru Township and installing in said building a Heating plant and Toilet System. Also for wiring and plumbing in connection with said improvement, the total estimated cost of all of which is Fifty Thousand and 00/100 ($50,000.00 Dollars), all in accordance with the plans and specifications therefore prepared by Griffith Goodrich Company, of Fort Wayne Indiana and now on file in the office of said Trustee.

Seperate bids will be received on the general construction on plumbing on heating and on wiring all in accordance with said plans and specifications. Said bids must be upon forms prescribed by the State Board of Accounts must be sealed and delivered to the Trustee at or before the time and at the place above mentioned, a certified check must be filed by each bidder with each bid in a sum equal to Five (5%) per cent of such bids and conditioned that such certified check must be forfeited to said Trustees as liquidated damages occasioned by the default of bidders in the event that such successful bidder fails or refuses to enter into a contract on such bid within Five (5) days after the acceptance by said Trustee of such bid.

Each bidder shall file with his bid the Statutory Affidavit in regard to non-collusion.

Said plans and specifications may be seen and examined at the office of said Trustee or copies thereof obtained from the architects.

The right is expressly reserved by said Trustee to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

Dated this 26th day of June, 1925.

J. H. JENKINS,
Trustee, Peru School Township

AARON B. ZOOK,
JASON BLAIR,
WM. H. MYERS.
Advisory Board, Peru School Township.
July 4th, 1925.

2. The specifications are on file for the inspection of bidders at the office of the Board of School Trustees, Frankfort, Indiana, and at the office of Rodney W. Leonard, Architect, 309 Peoples Life Building, Frankfort, Indiana. Copies are available to bidders for use at their own offices upon deposit with the Architect or Trustee of $10.00 to guarantee safe return of same on or before opening of bids. If plans are not returned on date of letting, deposit shall be forfeited. Bidders must familiarize themselves with such specifications befor bidding and no departure from the same will be considered.

3. Bidders, in submission of bids, will submit same as follows:

(1.) Combined bid on Heating, Ventilating and Temperature Regulation for First Ward School Building.

(2.) Bid on Construction of Pipe Tunnel from Central School Building to Boiler House.

(3.) Bid on furnishing and installing Condensation Pump for Central School Building.

4. All bids shall be accompanied by the certified check of the bidder in sum equal to at least 5 per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder according to proposal. Checks to be made payable to Treasurer of the Board.

5. All bids and proposals shall be upon the forms prescribed by the State Board of Accounts. Unless bids are accompanied by certified checks as above and upon forms as above, no attention will be given same.

6. The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety to the School City of Frankfort, Indiana, in a sum equal to the full amount of contract as usually conditioned.

The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in general conditions of the specifications. The Board of Trustees for the School City of Frankfort reserves the right to reject any and all bids without giving any reason therefor.

School City of Franfort,
Clinton County, Indiana.
HOWARD HARSHMAN, President.
C. V. FULHAM. Secretary.
Frank Isgrigg, Treasurer.

July 4, 1925.

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustee and Advisory Board of Jefferson School township. Miami County, Indiana, will receive sealed bids at the office of the Trustee in the Denver School Building, in Denver, Miami County, Indiana until 11 o'clock a. m. Monday, July 27, 1925, for the erection and completion of alterations to the present school building in Denver, Indiana, all in accordance with the plans and specifications heretofore adopted therefor by the said Trustee and Advisory Board and which are now on file in the said office.

At the same time and place, separate bids will also be received for a new heating and ventilating system and for plumbing and sewering.

The estimated cost of all the work contemplated is Twelve Thousand Five Hundred Dollars ($12,500.00).

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed and must in every respect conform to the laws of the State of Indiana.

Each bid, of whatever class, shall be accompanied by a certified check in an amount equal to 5 per cent of the maximum bid.

The certified checks must be made payable to the Trustee of Jefferson Township, Miami Coun-

ty, Indiana, and will be held by him as a guarantee of good faith that the said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid (said bond to meet the approval of the Trustee and Advisory Board) for the due performance thereof, if his or their bid or bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder fail to enter into such a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages for the use and benefit of the proper fund of the said Jefferson School Township Miami County, Indiana.

Copies of said plans and specifications may be obtained from the office of the Elmer E. Dunlap Co., Architects, 1125 N. Buckeye St., Kokomo, Indiana, upon deposite of Twenty-five ($25.00) dollars, for each set. Said deposit will be returned to the bidders upon the safe return of the said plans and specifications to the Architects on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

DOE S. HOOD,
Trustee Jefferson School Township,
Miami County, Indiana.

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the Joint School Board of Union School Township, Union County, Indiana, by John E. Kauffman, its trustee, and the Advisory Board of said township, and the Board of Education of College Corner Village School District, Preble County, Ohio, by its Board of Trustees, will receive sealed bids at the office of said Joint School Board at the school building in the Village of College Corner, Ohio, and West College Corner, Indiana, on Monday, July 27 1925, up to 12 o'clock M. of said day for the construction of a new joint high school and elementary school building in Union Township, Union County, Indiana, and in Preble County, Ohio.

At the same time and place bids will also be received for the installation of the following:
(a) The heating and ventilating system;
(b) The plumbing and sewerage system;
(c) The electric wiring;
all in accordance with the plans and specifications heretofore adopted and approved by the Trustee and Advisory Board of Union School Township, Union County, Indiana, and by the Board of Education of College Corner Village School District, Preble County, Ohio, which plans and specifications are now on file in the office of said Joint Board and in the office of the State Board of Accounts of the State of Indiana. Said building to be a two-story brick building with basement, to be located upon the real estate now owned in Union Township, Union County, Indiana, and in Preble County State of Ohio, and now occupied and used for school purposes. The estiamted cost of the proposed building completed is $112,000.00. All bids must be in writing on forms prescribed by the laws of the States of Ohio and Indiana, and delivered to the president or secretary of the said Joint School Board, on or before the time mentioned herein. Each bid on the general construction shall be accompanied by the certified check of the bidder in the sum of 10 per cent. of his bid, payable either to John E. Kauffman, Trustee of Union School Township, Union County, Indiana, or to S. M. Gilmore, Treasurer of the Board of Education of College Corner Village School District, Preble County, Ohio. Each bid for the heating and ventilating system shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. Each bid for the plumbing and sewerage system shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. Each bid for the electric wiring shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. These certified checks shall be held by said persons as a guarantee of good faith that the bidder will enter a contract and execute a bond for the full amount of his bid, to be approved by the Joint Board for the due performance thereof, if his bid is accepted. The checks of the unsuccessful bidders will be returned to them when the contract is awarded and entered into. Should the successful bidder fail to enter into a contract and execute said bond, he shall forfeit his certified check as liquidated damages, for the use and benefit of said school township and said school district. The plans and specifications may be examined at the offcie of the township trustee of Union Twp., Union County, Indiana, and at the office of the secretary of the Board of Education of the College Corner Village School District, Preble County, Ohio, and at the office of Omar P. Gordon, Architect, at Greenfield, Indiana. A deposit of $15.000 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of the architect, which amount will be returned in full in case same are returned on the day of letting, and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only, the sum of $5 only shall be returned to him, but should he fail in the observation of both conditions he shall forfeit the whole amount of said deposit. Each bidder shall stamp or write his name on the back of the drawing or cover of the specifications used by him in preparing his proposal. Said contract will be let in four parts as stated above to the lowest responsible bidder, with upon the award of a contract, shall give bond to the approval of the Joint Board for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by said Joint Board, and shall pay for all labor and materials furnished him on any of said contractors in the construction of said work. Each bidder must file with his bid a statement showing he has complied or will comply with the workman's compensation act of both the States of Ohio and Indiana. All bids must in strict accordance with the plans and specifications heretofore adopted. The Joint Board reserves the right to reject any and all bids.

Dated, this 23rd day of June 1925.

R. A. HOCKERSMITH,
President of the Joint Board.
JOHN E. KAUFFMAN,
Secretary of the Joint Board
Post Office, College Corner, Ohio.
June 27th, July 4th-11th-1925.

### COMMUNITY BUILDING
### NOTICE TO CONTRACTORS

The undersigned School Board of the School City of Salem, Washington County, Indiana, and the Trustee and Advisory Board of Washington Township, Washington County, Indiana, hereby give notice that on Friday, July 10, 1925, until 10 o'clock a. m. at the office of the School Board in the High School Building at Salem, Indiana, they will receive sealed proposals for the erection and completion of a new Community Building, and at the same time and place will also receive sealed proposals for the installation of heating and ventilating, plumbing and sewerage and electric wiring in the same building, all in accordance with plans and specifications heretofore adopted and approved by the School Board, Trustee and Advisory Board.

The estimated cost of the proposed building is Forty Thousand Dollars ($40,000.00).

All bids must be signed, sealed and delivered in writing on Form No. 96 as prescribed by the State Board of Accounts.

Each bid for the general construction shall be accompanied by a certified check for one One Thousand Dollars ($1,000.00); each bid for the heating and ventilating shall be accompanied by a certified check for Four Hundred Dollars ($400.00); each bid for the plumbing and sewering shall be accompanied by a certified check for Two Hundred Dollars ($200.00); and each bid for the electric wiring shall be accompanied by a certified check for One Hundred Dollars ($100.00). These checks must be made payable to the School Board of Salem, Indiana, and will be held by it as a guarantee of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of the bid, approved by the School Board, Trustee and Advisory Board for the due performance thereof if his or their bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bonds then he or they shall forfeit the amount of said certified check as liquidated damages for such failure for the use and benefit of the proper fund of the Salem School City and Washington School Township, Washington County, Indiana.

Copies of the said plans and specifications are on file in the office of The Elmer E. Dunlap Company, Architects, 1050 North Delaware Street, Indianapolis, Indiana, and in the office of the State Board of Accounts State House, Indianapolis. Copies of the said plans and specifications may be obtained from the office of the Architects upon the deposit of Twenty-five Dollars ($25) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Sealed bids will be received by the Board of Education, Petersburg Ind., at the office of Supt. of Schools, Mr. J. B. Leas, Thornton school building, for the erection of a new grade school and auditorium building, including general construction, heating and ventilating, plumbing and sewering and electrical work.

The estimated cost of the building including the above, is approximately $44,000.00.

Bids will be received until 2 p. m. Monday, July 6th, 1925, and then opened for consideration.

All bids must be made upon proposal blanks which have been approved; these blanks will be supplied by the Architects upon application.

Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid on.

All bids must be accompanied by a certified check or bid bond (either personal or Security Company) for not less than three per cent (3%) of the amount of the bid submitted, made payable to the order of the "School City of Petersburg" as liquidated damages in the event that the successful bidder fails to enter into the proper contract for the work bid upon, and give the proper security or personal bond within ten days from the acceptance of such bid. Checks of unsuccessful bidders will be returned.

Each bidder shall file with his bid a non-collusion affidavit as required by law.

The Board of Education reserves the right to reject any or all bids and to take time to investigate the bids and the qualifications of the bidder.

Plans are on file in the office of the Board of Education, Petersburg, Ind., in the office of the State Board of Accounts, Indianapolis, Ind., and in the office of the Architects, Harry E. Boyle & Co., Furniture Bldg., Evansville, Ind.

Signed: Board of Education,
Petersburg, Ind.

## *Have Metal Partitions Made Good?*

A RECENT example of Sanymetal Office Partitions is shown in these views taken in the City Savings Bank, Albany, N. Y. Here is an all-metal partition job that for appearance is fully the equal of wood, and for durability and sanitation far outclasses wood. Owners of high-grade office and plant office buildings are accepting the metal partition idea as never before, and the fine qualities of Sanymetal have played no small part in the change.

FOR SUPPLYMAN CONTRACTOR

VOL. VII — INDIANAPOLIS, INDIANA, JULY 11, 1925 — No. 15

## GREAT BUILDING CONSTRUCTION VOLUME TURNED IN BY INDIANA CITIES IN JUNE.

### Figures For The Month Out-Distance Those For The Corresponding Periods For The Past Four Years.

Indiana during the month of June just past experienced one of the greatest new building construction periods in years. The volume of business recorded by the various city building inspection departments for the above mentioned period far exceeded the different June volumes posted thruout the past four years. The figures recorded being, June, 1921, $3,543,388; June, 1922, $6,813,884; June, 1923, $6,795,510; June, 1924, $4,531,654; June, 1925, $8,559,585.

May came thru with a fine set of figures, $7,512,243, but June came right back for a 13.9% gain over that volume. Comparing the past month's building business reported from nine of the leading Indiana cities, East Chicago figures being omitted because those of June, 1924 were not available, the fact is revealed that those cities totaled a gain of 88.8% over the building volume for the corresponding period a year ago.

Indianapolis, Ft. Wayne and South Bend all came thru in fine style rolling up a volume of $6,172,893 or 72.1% of the entire month's business recorded by the ten cities.

As for individual performance in the matter of gain over the last year's showing, South Bend led all the rest to the extent of 245.4%; next came Indianapolis with 190.9%, Gary with 47.6%, Ft. Wayne, 45%; Richmond, 28.6%; Evansville, 14.5%; Hammond, 5%. Two cities showed losses, Terre Haute, 55.8% and Kokomo, 70%.

The June figures for 1925 and 1924 received from the various city building inspectors are:

| | 1925 | | 1924 | |
|---|---|---|---|---|
| Cities | Per. | Est. Val. | Per. | Est. Val. |
| East Chicago | --- | 533,204 | --- | --- |
| Evansville | 408 | $ 254,079 | 253 | $ 221,947 |
| Ft. Wayne | 230 | 1,121,466 | 292 | 773,436 |
| Gary | 306 | 956,220 | 188 | 647,805 |
| Hammond | 111 | 340,753 | 123 | 324,525 |
| Indianapolis | 1401 | 3,989,987 | 1589 | 1,755,234 |
| Kokomo | 58 | 51,465 | 39 | 174,797 |
| Richmond | 91 | 162,650 | 53 | 126,450 |
| South Bend | 429 | 1,061,440 | 351 | 307,296 |
| Terre Haute | 178 | 88,321 | 268 | 200,164 |
| Total | 3212 | $8,559,585 | 3156 | $4,531,654 |

## CONSTRUCTION COSTS SHOWING STABILITY

### Standardization of Materials Held to Be a Contributing Cause in Holding Costs Down

Construction costs generally are stable with a tendency downward, particularly in the larger cities, such was the report made to the National Association of Real Estate Boards, by John E. Parsons, of Toledo, chairman of a special committee of the mortgage and finance division which has been investigating comparative building costs in various cities and the outlook for 1925.

Mr. Parson's report included present costs per room for bungalows, houses, apartment buildings and duplexes as that checked upon by the committee's investigations, and also present costs of constructing hotels, office buildings, retail stores and garages.

#### Lower Tendency Seen

Construction costs may be expected to remain at practically their present level, the reports of the mortgage experts state. Reports from the cities of under 100,000 population made this statement without qualification. Reports from mortgage houses in cities of the larger classes indicate a tendency to lower building costs.

Questionnaires sent out by the division show that costs have increased 98 per cent since 1914 in cities under 100,000 population, 88 per cent in cities of 100,000 to 300,000 population and 112 per cent in cities over 300,000 population, an average increase of 99 per cent. Costs were reported generally the same as in 1924 with a tendency to be higher in the smaller cities and lower than 1924 in cities over 300,000. Wages were reported generally stationary with a tendency upward in cities of all sizes.

#### Standardization Cuts Costs

Standardization of building material has already decreased costs, according to reports from the larger cities. Such standardization can be probably extended, the reports agreed. Cities over 300,000 in population reported that the additional standardization should proceed in all lines, particularly in millwork. Cities of between 100,000 and 300,000 population advocated standardization of millwork, hardware and plumbing.

Small single family dwellings are the type of construction most needed, the reports uniformly show. Mortgage money is reported uniformly plentiful, the prevailing interest rates being reported at from 6-8 per cent in cities under 100,000 population, from 5½ per cent to 7 per cent in cities of from 100,000 population upward.

## PUT A "PUNCH" INTO IT

### Delegate's Convention Report Given a Personal Twist That Amused Greatly

Frequently reports from conventions are more or less prosaic and trite, in fact most of them get a round of applause not because of the contents but because the reading of the report has been completed. Now it so happened that Architect Wilbur Shook, Indianapolis, acted as delegate from the Indiana Society of Architects to the A. I. A. convention at New York, hence the official report fell to him upon his return to Indiana. Now "Shookie" must have heard many dry convention reports, he must have sensed that the day of the I. S. A. annual meeting was going to be super-heated and the atmosphere would be charged with lethargy, consequently, he went contrary to custom, framed a document the reading of which made his auditors sit up and take notice, everybody listened interestedly, laughed heartily and gave Mr. Shook a "big hand" of appreciation when he completed his verbal submission.

Here it is:

#### Many Countries Represented

"The 58th Convention of the A. I. A., held in New York City, recently, which I was privileged to attend and wear a badge as representative of the Indiana Society of Architects, was probably the biggest show ever staged by the architects of this or any other country. Some 1,200 delegates and visitors would vouch for this statement, I believe. Foreigners were much in evidence, some fourteen countries in all being represented.

Messrs, Foltz, Harrison and myself all started on even terms and collected our reservations at the Roosevelt Hotel, convention headquarters. I found it rather difficult to keep track of Mr. Foltz. Harrison wasn't so much of a task, since he was my room mate, and it was necessary, of course, that he report at least once in each 24 hours, especially after the first night out when they wanted him to buy the place in lieu of the cover charge.

#### Convention Business Expedited

All business and convention actions have been published in detail in the current issues of the architectural publications, so I will make no attempt to wish that on you here. Briefly, the necessary business duties of the institute were taken care of through previously prepared committee reports and resolutions, which were in nearly all cases passed or rejected as recommended by the committee on resolutions, or by the Board of Directors.

All present officers were re-elected without ballot, the secretary casting the vote of the convention. This general attitude was a compliment and a vote of satisfaction for the efforts of members responsible for the past year's work.

The whole program was a "publicity campaign" of a gigantic, varied and far-reaching significance. Architecture, at least as far as New York is concerned, was most certainly "put on the map." The public at large were made to realize that an architect is or should be "some guy."

The various angles of the profession were dwelt upon in the many addresses and discussions. The luncheon meetings were unique and proved the most popular, particularly the ones given over to the draftsmen, and the meeting the following day featuring the awarding of medals to building craftsmen, for excellence of craftsmenship. Talks by the British notables at the opening luncheon meeting were heartily received.

#### The Exhibit a Fine Affair

The architectural exhibition at the Grand Central Palace consisted in the main of three parts, viz: The display of work from the membership of the A. I. A.; the display from the Architectural League of New York and the products of the activities of the Small House Service Bureau. The vastness of the extent of this exhibit makes detailed description here impractical. Indiana work was on display. I took two afternoons off to try and find it and finally succeeded. So I know it was there.

The exposition, international in scope, was a huge success through the various displays by the representatives of the allied arts and trades. Their booths and spaces were well arranged and stored with interesting material.

Mr. Murchison in the May number of "The Architect," scores a point for the exposition when he says:

'The Exposition of Allied Arts offered a great excuse to duck the speeches. Instead of listening to 'How I Laid Out the Sunlight Soap Village," the delegate felt that he was getting much more useful information out of Whale-Bone-Ite Seats, or Sheet-Rock Roofing, or Kleen-Heet, or other useful by-passes. By the time he had qualified and registered and was bebadged and had three or four cocktails, he had enough of the convention per se, and felt that he ought to go out and see some of the sights for which our city is justly famous—including our mayor.'

The pageant and presentation of medals at the Metropolitan Museum was

## ARE YOU GETTING YOURS?

the grand climax with the presentation of the 1924 medal to Sir Edwin Landseer Lutyens and the posthumous award of the Institute's 1925 gold medal to the late Bertram Grosvenor Goodhue.

**Entertainment Features Plentiful**

Considerable entertainment awaited the delegates during the week. Every one was supposed to go out Riverside Drive, and some wanted to know who was buried in Grant's tomb.

A boat ride up the Hudson, back around the Battery and (as some one said, Hells Bells Gate), and up to 35th street. The ferry in East River gave every one a good squint at the famous skyline of New York. This supplemented a trip to the Music Box Revue, which likewise gave every one a good squint at 'the eyeline of New York.' However, speaking of such, Clyde Stoughten and the writer went this one better. In looking for Mr. Foltz one night we put on our false beards and sneaked in to see 'Artists and Models.' I haven't seen Clyde but once since.

A few of us were fortunate to get out in the suburbs for a look at the Domestic Architecture—our trip took us through the Bronx, Scarsdale, White Plains, Hartsdale and New Rochelle. The roofs impressed me much, they are beautiful and seem to be such an integral part of the house and landscaping.

**Lead Us Not Into Temptation**

We were all grateful for the fact that fourteen cafes and restaurants were padlocked the day we arrived. If this had not have happened, Merritt Harrison would no doubt have returned a sadder Bud-weiser delegate, and I may not have returned at all."

## NEW CONSULTING ENGINEERING FIRM ENTERS INDIANA FIELD

**Offices Opened At Indianapolis**

Announcement is made by Warren C. Bevington and Grover A. Williams, engineers, Indianapolis, of their association under the firm name of Bevington-Williams, Inc., Consulting Engineers, with offices located at 523-24 Indiana Pythian Bldg.

Mr. Bevington, for eight years was connected with the firm of Snider & Rotz, well known heating and ventilating engineers, of Indianapolis, while Mr. Williams was with the Indianapolis Heat and Light Co. for ten years, four years in the practice of heating and ventilation, and during the past eighteen months was in charge of the construction of a large power plant at Peoria, Ill., for the Illinois Power Company.

## ORGANIZATION AND CURRENT NEWS

## CALUMET DISTRICT CONTRACTORS PROPOSE COUNTY CENTRAL BUILDING COUNCIL

**Idea Hatched At Recent Gary Meeting**

There was a fine gathering of Calumet District building contractors at Gary last week and those who failed to respond to the invitation little realized what they were overlooking. The affair consisting of a business session and a dinner was held at the Y. M. C. A., and was attended by builders from East Chicago, Gary, Hammond and Indiana Harbor. The only disappointing feature was that the Gary contractors did not show up as strong as it was expected they would.

The purpose of the meeting was to further the organization idea for contractors and in connection with that move C. C. Pierson, Indianapolis, Secretary of the Associated Building Contractors of Indiana, delivered a straight-from-the-shoulder address in which he minced no words packing punch after punch in each utterance he made. His talk was direct and to the point in which he called a spade a spade and did not beat about the bush. In the course of his remarks he referred to the secretary of an organization and what was expected of him. Many members, he said, have the idea that whatever is to be done should be done by the secretary who is supposed to build up the association, collect all dues, tend to this and that, smooth out all troubles, keep peace and harmony in operation and otherwise hold things in tact. Mr. Pierson said such a conception was all folly, that the office of secretary to function properly must have the co-operation of every member of the organization, and that if the organization is to achieve its purpose each individual member must be willing to sacrifice to some extent by putting time into the effort. No organization, no matter what its stripe, can grow, function, and hold itself together unless the constituent members are agreed to work hard and earnestly in the endeavor.

At the conclusion of Mr. Pierson's address attention was turned to the state contractors' association and J. H. Owens, field representative, was called upon. He gave a very interesting insight into the organization machinery, what has been done in the interest of the Indiana building contractor, the co-operation that has been extended to allied building interests, and what it all has meant to the building industry of the state.

Various contractors from the cities represented at the meeting entered the general discussion that followed and presented some good constructive ideas for consideration.

Growing out of the meeting evolved a plan for more unity of effort by the contractors of the Calumet region and the development of an agency whereby the contractors of the whole district may be held in closer contact with each other. The scheme decided upon is to seek to esztablish a central organization similar to the Building Trades Council with representatives from each city representing each branch of the building contracting business.

The idea was received with favor and it is thought that if it can be worked out, much benefit will accrue from the innovation. In an effort to get the new order under way a series of meetings to work up interest will be held thruout the District, the first to be held at Hammond Monday, July 13.

## East Chicago

### CLOSE TO THREE MILLIONS OF DOLLARS OF NEW BUILDING STARTED THE FIRST SIX MONTHS OF 1925

**Northern Indiana Lake City Rolls Up a Good Record**

| | |
|---|---|
| January | $135,207 |
| February | 544,825 |
| March | 502,750 |
| April | 718,745 |
| May | 513,875 |
| June | 533,204 |
| Total | $2,948,606 |

Building in East Chicago during the month of June maintained the high level of other five months. As it happened last month's building volume fell just a few thousand dollars short of being the second highest of the year to date.

According to the official figures made public by Building Commissioner Henry Bainbridge, the total amount of permits issued during the month exceeded the half-million dollar mark.

In only two other months since January was this total exceeded. February topped it with permits totalling $544,825; and April established a new high monthly record with $718,745.

The grand total for the first six months of 1925 almost reached $3,000,000. Of this total, less than $300,000 was taken out in permits for industrial expansions.

The preponderance of permits issued during June were for the private dwelling type of building. Apartment construction fell far below the usual figure with only $67,000 taken out in permits.

## FT. WAYNE

### NEARLY SIX MILLION DOLLAR BUILDING VOLUME ROLLED UP FIRST HALF OF THE YEAR

**Total, However, Trails Other Records Made in Previous Years**

With five of the first six months of 1924 showing building totals that exceeded those posted in 1925, the construction business in Ft. Wayne this year since January 1st does not stand out so strongly as it has in several previous years. It must be admitted that there were not the large projects this season to swell the volume which for support had to depend on residential construction work which carried the big burden so far in 1925. There was a great deal of new house work but not enough to make up for the lack of large new projects. This is readily apparent in the different monthly totals as registered at the building inspection department.

There were 1,390 permits issued from January 1 to June 30 this year as against 1,578 granted during the corresponding period in 1924, a deficit this year of 188.

Though the total estimated valuation of new work ran to $5,689,309, an average monthly volume of $948,218, it was $1,189,109 or 17.29% in arrears of last season's work. Also it was 22.9% behind the high six months record of $7,382,134 posted in 1923.

The comparative official figures for the first six months of the two years are:

| Month | —1925— | —1924— |
|---|---|---|
| January | $ 329,514 | $ 241,650 |
| February | 566,850 | 733,450 |
| March | 1,019,828 | 1,676,000 |
| April | 1,079,828 | 1,609,612 |
| May | 1,571,823 | 1,844,270 |
| June | 1,121,466 | 773,436 |
| Total | $5,689,309 | $6,878,418 |

## HAMMOND

### GIGANTIC LAKE FRONT RECREATIONAL CENTER OPENS

**Hammond Now Possessed of Fine Amusement Resort**

Boardwalk Amusement Park, "the Atlantic City of the West," Hammond's new $1,000,000 play ground, was thrown open to the public July 3 in order to give the "stay-at-home folks a place to go on the Fourth.

Hammond's gigantic amusement project at the Lake Front is by no means completed. It is only well started. But people have been insisting upon making use of what is ready and the management decided to give the folks a whirl at it instead of having the opening on July 15.

An idea of the extent of the park may be gained from the fact that the substation installed by the Northern Indiana Gas & Electric Co., is designed to furnish 600 horsepower of electric energy. The old outline system of lighting is not being used but instead eighteen Cahill floodlights, each of 2,000 watts capacity will render the grounds light as day. Interior lighting is of course employed under the roof of the board walk.

### BIG STEEL MILL MERGER ANNOUNCED

**Calumet Region Plants Involved**

It would seem from current indications that the Calumet District carries much weight as a site for steel mills and their allied interests.

The report from Chicago recently was to the effect that a merger of a number of large steel plants and several smaller concerns had been brought about. The new corporation is to be capitalized at $1,500,000,000, which is a figure $400,000,000 more than the capitalization of the U. S. Steel Corporation.

Among the companies involved are the Bethlehem Steel Co., The Inland Steel Co., Steel and Tube Co. of America, and the Youngstown Sheet and Tube Works. Since the latter company has just started on 24 tin-plate mills at Indiana Harbor and extensive im-

provements are under way at the Steel and Tube Co. of America plant, the Calumet District still holds the favor of the big steel interests as a manufacturing center.

### HAMMOND BUILDING JOTTINGS

The Union Tank Corporation, at one time a part of the Standard Oil Co., has awarded a contract to a Pittsburg, Pa., construction company for the erection of a $1,700,000 plant in North Hammond near the Whiting corporation line.

The exterior brick and stone work on the new twelve-story bank and office building has been completed.

Architect Mac Turner, Hammond, is receiving bids on a new auto display and garage building for G. E. Shaver on Michigan Ave., Indiana Harbor.

The above architect will be ready for bids after July 15 on a store and apartment building at Indiana Harbor for R. J. Wagner.

E. E. COLE.

# INDIANAPOLIS

## ALMOST REACHES RECORD LEVEL

### Volume of Building At Indianapolis For First Six Months of 1925 Soars to Great Proportions

During the first six months of this year building construction work in the matter of volume has staged a nice come-back at Indianapolis and with the completion of June totaled an estimated valuation on new work amounting to $14,177,661, just $399,585 short of the highest six months building record ever made by the city, when, in 1923 from January 1 to June 30, inclusive, the total of new work launched ran up to $14,577,246.

The first six months figures for the past six years are: 1920—$7,558,630; 1921 — $9,557,910; 1922—$12,093,325; 1923—$14,577,246; 1924 — $11,792,844; 1925—$14,177,661.

This year's monthly building record as taken from the books at the city building inspection office are:

| | 1925 | | 1924 | |
|---|---|---|---|---|
| Month | Per. | Est. Val. | Per. | Est. Val. |
| January | 771 | $ 964,526 | 634 | $ 1,012,221 |
| February | 1125 | 1,905,578 | 784 | 2,354,162 |
| March | 1787 | 2,454,598 | 1257 | 2,213,313 |
| April | 1724 | 2,817,231 | 2110 | 2,492,173 |
| May | 1560 | 2,045,741 | 1754 | 1,965,741 |
| June | 1401 | 3,989,987 | 1589 | 1,755,234 |
| Total | 8368 | $14,177,661 | 8398 | $11,792,844 |

# Sealed Proposals

### HEATING AND VENTILATING SYSTEM NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, Trustee of Tippecanoe Township, Pulaski County, Indiana, will receive bids on Saturday, August 1st, 1925, up to the hour of 3 o'clock p. m., at the office of the Trustee in the Town of Monterey in said Township, on the following work, to-wit:

The installation and completion of a heating and ventilating system in the school building at Monterey.

All work is to be done in accordance with the plans and specifications adopted and on file in the office of said Trustee at Monterery, also at the office of County Superintendent, Allen Kemp, at Winamac, also at the office of the Architects, Allen and Garriott at Logansport, Ind.

All bids should be on forms prescribed by the State Board of Accounts. Each bidder will be required to deposit with his bids a certified check for $200 or such sum as shall be approved by the Advisory Board, made payable or properly endorsed to the Trustee of said Township. Checks of unsuccessful bidders will be returned. The check of each successful bidder will be held as a guarantee that such bidder will execute proper contract and bond, and in the event that any successful bidder fails to execute a contract approved by the Board and Trustee and give required Bond within ten days, then such check shall become the absolute property of said Township as agreed and liquidated damages for such failure. Contractors will be required to have their contracts completed and ready for acceptance by Sept. 12th, 1925.

The Trustee and Advisory Board reserve the right to reject any and all bids.

Dated this 6th day of July, 1925.

A. R. HOESEL,
Trustee of Tippecanoe School Township, Pulaski County, Ind.
Address: Monterey, Indiana.

Horner & Thompson, Attys. for Trustee, Winamac, Ind.
July 11th & 18th, 1925.

### SCHOOL BUILDING NOTICE TO CONTRACTORS

Sealed proposals will be received at the Law Office of Lett and Lett, Rooms 501, 502 and 503, Glass Block Marion Indiana, Attorneys for the Trustee of Washington Township, Grant County, Indiana, until 2 o'clock sharp, on Wednesday, July 29th, 1925, for the furnishing of all materials and finishing and doing all labor required for the proposed New Elementary School located at the village of Landesville in Washington Township, Grant County, Indiana.

All work necessary to complete the Building will be included under one contract. All contractors desiring to bid on work shall be required to post a certified check with the Architect or Trustee for the amount of Twenty-five ($25.00) dollars, made payable to Harry Wigger, Trustee, before said plans and specifications are delivered to him in order to guarantee the return of said plans and specifications to the Architect.

If for any reason the bidder fails to return the plans and specifications then his check becomes a forfeit for fixed and liquidated damages and the certified check is retained by the Trustee and Advisory Board and reverts to such funds as

statutes covering those matters require.

Before submitting proposal as a bid, all plans, drawings and specifications shall be returned to the office of the Architect.

Such proposal shall be typewritten and signed by the bidder and accompanied by a certified check to the amount of five per cent (5%) of the bid and made payable to the order of Harry Wigger, Trustee, Washington Township, which check shall be taken and retained by the Trustee and his Advisory Board as fixed and liquidated damages if after his proposal has been accepted the bidder, for any reason, refuses or neglects to enter into formal written contract to the satisfaction of the board to carry out the proposal, and execute a bond in a penalty in at least the full amount of his bid with sureties to the approval of the board as required in the specifications. In the event any bidder whose proposal shall be accepted, shall not within ten (10) days after notice of the acceptance of his proposal, enter into such written contract with the board and secure the contract by a surety bond in the full amount of the contract price and in form and terms and with the surities to the approval of the Trustee and his Advisory Board, such certified check shall be and remain the absolute property of the trustee and his advisory board as fixed and liquidated damages for such failure, and the bidder shall be liable for nothing beyond the proceeds of the certified check.

The bidder shall accompany his bid with an affidavit of Non-Collusion, as prescribed by and under the statutes of the State of Indiana.

All bids shall be made out in Bidders Blank form No. 96 as prescribed by the Indiana State Board of Accounts. All affidavits of Non-Collusion shall be made out on blanks as prescribed by the Indiana State Board of Accountants. The above blanks and blank bonds may be procured from the Trustee of Washington Township or at the office of the Architect.

Payments on account of contract shall be made once each month in amounts as estimated and certified by the Architect and approved by the Trustee and his Advisory Board, which amounts are understood to be fifteen per cent (15%) less than the estimated values of materials permanently in place in the building and for labor performed at the time at which such estimates are made, and for acceptable materials delivered and properly stored on the premises and properly insured.

For the purpose of checking estimates the contractor shall be required to file with the Architect, a typewritten, itemized list of the cost of labor and material entering into the work included in his proposal before the contract is signed.

Forty-five days after all work embraced in the contract including all additional work (if any is authorized by the Trustee and his Advisory Board) is completed agreeably to the drawings and specifications and to the satisfaction of the Architect, and the owner, the balance then unpaid shall be paid upon the contractor giving a release as per art. 29 General Conditions.

The Contractor shall begin operations upon the site when notified by the Architect. He is to accept the premises in such condition as delifered to him by the owner and is to prosecute the work in a manner so as to accomplish its entire completion, ready for occupancy, on or before the First day of February, A. D., 1925.

The estimated cost of such work is $13,500.00. The right is reserved to reject any and all bids.

HARRY L. WIGGER,
Trustee of Washington Township,
Grant County, Ind.

Lett and Lett, Attorneys.
July 11th, 1925.

## SCHOOL BONDS
## NOTICE OF BOND SALE

Notice is hereby given, by the Trustee of Washington Township, Grant County, Indiana, that sealed bids will be received by him at the Law Office of Lett & Lett, 501, 502 and 503 Glass Block, Marion, Indiana, up to the hour of 12 o'clock m., of Wednesday, July 29th, A. D., 1925, for the purchase of $14,000.00 school bonds of Washington Township, Grant County, Indiana.

Said bonds will be 14 in number, dated August 10th, 1925, of $1,000.00 each, payable at the office of the Trustee of said Township, bearing interest at the rate of five (5%) per cent, payable semi-annually on the 10th day of February and the 10th day of August, 1926 and of each and every year thereafter, and maturing serially on the 10th day of August, 1926 and on the 10th day of August, of each year thereafter.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and with an order duly entered upon the records of the Advisory Board of Washington Township, Grant County, Indiana, authorizing and directing the issue and sale of said bonds for the purpose of providing funds for the erection and construction of a New School House in School District No. 10 of Washington Township, Grant County, in the State of Indiana.

Said bonds will be sold according to law to the highest and best bidder, for not less than their par value.

Sale will continue from day to day until all of said bonds are sold. The right is reserved to reject any and all bids.

HARRY L. WIGGER,
Trustee of Washington Township.
Grant County, Indiana.

Lett & Lett, Attorneys.
July 11, 1925.

## SCHOOL HOUSE
## NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned School Trustees of the City of Greenfield, Indiana, will receive sealed bids at the office of said Board in the High School Building, in the City of Greenfield, Indiana, until 10:00 o'clock, a. m. on the 28th day of July, 1925, at which time and place the same will be publicly opened, read, and considered for the contruction complete of the school building to be built on the ground owned by said School City, according to plans and specifications therefor heretofore accepted and approved as the law provided, and prepared by Omer P. Gordon, Architect, of the City of Greenfield, Indiana.

The plans and specifications are on file in the office of said Board of School Trustees and in the office of said Architect in the Thayer Building in the City of Greenfield for the information and inspection of bidders, and duplicate copies are available from the Architect at $25.00 per set; and bidders must familiarize themselves with such plans and specifications as no departure therefrom will be considered.

The bidders will submit their bids at their option, as follows:

1. For the construction of school building alone, the general contract.
2. For the installation, complete, of the heating and ventilating systems.
3. For the installation, complete, of the plumbing, drainage, and sewerage systems.
4. The installation, complete, of the electric wiring, and electric equipment.
5. For the construction, complete, of the building with the several heating, ventilating, plumbing, drainage, sewerage, electric wiring, and electric systems, the total contract.
6. For any combination of parts and systems as indicated.

In any submission of combination bids the several parts or portions shall be separately stated.

All bids shall be upon the forms prescribed by the State Board of Accounts of Indiana, must be completely submitted, and each bid must be accompanied by the certified check of the bidder in an amount equal to 2 per cent as for divisions (1) or (5) above and 5 per cent as for divisions (2), (3), (4) and (6), the same payable to the undersigned Board of School Trustees to guarantee the entry into the contract if the bidder's bid is accepted.

The successful bidder will be required as condition precedent to entry upon said work to within 10 days from the acceptance of his bid to:

1. Enter into written contract upon forms as provided by the State Board of Accounts of Indiana to do the work contracted for in strict compliance with the plans and specifications therefor.
2. Deliver bonds with an approved Surety Company in an amount equal to his contract in form of bond likewise prescribed by said Board of Accounts, the said bond being and to be further conditioned as provided by terms of Chapter 44, Acts of the General Assembly 1925.

The building proposed to be constructed being of brick, stone, steel, cement and wood, two stories high with a basement, 163 feet by 122 feet and the estimated cost complete of $125,000.00 and to be erected on the real estate owned by said School City on West North Street in the City of Greenfield, Indiana.

Each bidder must file a certificate with his bid that he has complied with Section 68, of the Workmen's Compensation Act.

The said Trustees reserve the right to reject any and all proposals without giving any reason for so doing.

Each bid must be accompanied by a non-collusion affidavit and upon failure to submit said affidavit, said proposal or bid will be rejected.

Dated this 9th day of July, 1925.

Chancy F. Pasco,
Leah Karly,
Lawrence Wood,
Board of School Trustees of the
City of Greenfield, Indiana.

**SCHOOL HOUSE**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the Joint School Board of Union School Township, Union County, Indiana, by John E. Kauffman, its trustee, and the Advisory Board of said township, and the Board of Education of College Corner Village School District, Preble County, Ohio, by its Board of Trustees, will receive sealed bids at the office of said Joint School Board at the school building in the Village of College Corner, Ohio, and West College Corner, Indiana, on Monday, July 27, 1925, up to 12 o'clock M. of said day for the construction of a new joint high school and elementary school building in Union Township, Union County, Indiana, and in Preble County, Ohio.

At the same time and place bids will also be received for the installation of the following:

(a) The heating and ventilating system;

(b) The plumbing and sewerage system;

(c) The electric wiring;

all in accordance with the plans and specifications heretofore adopted and approved by the Trustee and Advisory Board of Union School Township, Union County, Indiana, and by the Board of Education of College Corner Village School District, Preble County, Ohio, which plans and specifications are now on file in the office of said Joint Board and in the office of the State Board of Accounts of the State of Indiana. Said building to be a two-story brick building with basement, to be located upon the real estate now owned in Union Township, Union County, Indiana, and in Preble County State of Ohio, and now occupied and used for school purposes. The estiamted cost of the proposed building completed is $112,000.00. All bids must be in writing on forms prescribed by the laws of the States of Ohio and Indiana, and delivered to the president or secretary of the said Joint School Board, on or before the time mentioned herein. Each bid on the general construction shall be accompanied by the certified check of the bidder in the sum of 10 per cent. of his bid, payable either to John E. Kauffman, Trustee of Union School Township, Union County, Indiana, or to S. M. Gilmore, Treasurer of the Board of Education of College Corner Village School District, Preble County, Ohio. Each bid for the heating and ventilating system shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. Each bid for the plumbing and sewerage system shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. Each bid for the electric wiring shall be accompanied by the certified check of the bidder in the sum of 10% of his bid, payable to either of the above named persons. These certified checks shall be held by said persons as a guarantee of good faith that the bidder will enter a contract and execute a bond for the full amount of his bid, to be approved by the Joint Board for the due performance thereof, if his bid is accepted. The checks of the unsuccessful bidders will be returned to them when the contract is awarded and entered into. Should the successful bidder fail to enter into a contract and execute said bond, he shall forfeit his certified check as liquidated damages, for the use and benefit of said school township and said school district. The plans and specifications may be examined at the offcie of the township trustee of Union Twp., Union County, Indiana, and at the office of the secretary of the Board of Education of the College Corner Village School District, Preble County, Ohio, and at the office of Omar P. Gordon, Architect, at Greenfield, Indiana. A deposit of $15.000 will be required of prospective bidders for plans and specifications for each branch of work taken from the office of the architect, which amount will be returned in full in case same are returned of the day of letting, and a bona fide bid is submitted by the contractor. Should the bidder fail in one requirement only, the sum of $5.00 only shall be returned to him, but should be fail in the observation of both conditions, he shall forfeit the whole amount of said deposit. Each bidder shall stamp or write his name on the back of the drawing or cover of the specifications used by him in preparing his proposals. Said contract will be let in four parts as stated above to the lowest responsible bidder, who, upon the award of a contract, shall give bond to the approval of the Joint Board for the benefit of any person, persons or corporation who shall suffer any loss or damage by reason of such bidder failing or neglecting to perform the work awarded him by said Joint Board, and shall pay for all labor and materials furnished him or any of said contractors in the construction of said work. Each bidder must file with his bid a statement showing he has complied or will comply with the workman's compensation act in both the States of Ohio and Indiana. All bids must in strict accordance with the plans and specifications heretofore adopted. The Joint Board reserves the right to reject any and all bids.

Dated, this 23rd day of June. 1925.

R. A. HOCKERSMITH,
President of the Joint Board.

JOHN E. KAUFFMAN,
Secretary of the Joint Board.

Post Office, College Corner, Ohio.

FOR SUPPLYMAN CONTRACTOR

VOL. VII — INDIANAPOLIS, INDIANA, JULY 18, 1925 — No. 16

## FIRST HALF YEAR'S BUILDING VOLUME IN INDIANA CLOSELY APPROACHES HIGH LEVEL RECORD ESTABLISHED IN 1923.

During the first six months of this year ten Indiana cities who keep official tab on the building construction operations within their corporation limits, thru the building inspection departments, turned in a $41,401,458 estimated valuation on the new work approved.

This was far and away ahead of the business last year even with the East Chicago figures subtracted from the above sum. This subtraction is made for the reason that the 1924 figures from that city were not available thus leaving an equalized comparison between the other nine cities all of whom submitted building statistics for both 1925 and 1924, which show a total of 17,505 permits for an estimated valuation of $38,452,852 for 1925 and 16,923 permits with a valuation of $31,911,917 for the corresponding period a year ago, a gain in 1925 of 582 permits and a 20.49% increase in the financial involvement of new work started.

The same cities during the first half of 1923, when all state building records were broken, reported a $39,873,877 volume of business. In view of that record total 1925 has made a fine showing, being just 3.56% in arrears of the highest six months building record ever posted in Indiana.

This 1925 showing compares favorably also with the first half of 1922 and 1921 when $25,114,642 and $17,802,146 respectively were posted.

Regarding the individual building performances, the one put across at Indianapolis naturally was the greatest and was only 2.87% behind the high record of 1923, and showed a gain of 20.21% over the work for the corresponding period last year.

Ft. Wayne and South Bend have always been strong contenders for the runner-up position to Indianapolis, but this year Gary by a great burst of building activity has jumped to the fore and edged into second place with a volume of $7,463,419 crowding Ft. Wayne with $5,689,309 back to third place, who in turn forced South Bend into fourth position, she registering $4,484,366.

As for gain over the first six months of 1924 Gary heads them all with 471 more permits and 87.9% on estimated valuations. The other cities follow in this order: Richmond, 57 permits increase, 47.4% gain; Muncie, 202 permits decrease, but 44.6% gain in volume of business; Hammond, 49 permits increase, 42.2% gain; South Bend, 110 more permits, 39% gain; Indianapolis, 30 permits decrease, 20.21% gain; Evansville, 622 permits increase, but 1.18% loss in estimated valuation of new work; Ft. Wayne, 17.2% loss; Terre Haute, 307 less permits, 36.6% loss.

The official figures from ten of the Indiana cities for the first six months of the year are:

| Cities | 1925 Per. | 1925 Est. Val. | 1924 Per. | 1924 Est. Val. |
|---|---|---|---|---|
| East Chicago | ---- | $ 2,948,606 | ---- | ---------- |
| Evansville | 1969 | 1,564,438 | 1347 | $ 1,583,195 |
| Ft. Wayne | 1390 | 5,689,309 | 1578 | 6,878,418 |
| Gary | 1407 | 7,463,419 | 936 | 3,970,576 |
| Hammond | 651 | 2,707,014 | 602 | 1,902,790 |
| Indianapolis | 8368 | 14,177,661 | 8398 | 11,792,844 |
| Muncie | 402 | 900,329 | 604 | 622,560 |
| Richmond | 356 | 596,095 | 299 | 404,297 |
| South Bend | 1962 | 4,484,366 | 1852 | 3,225,026 |
| Terre Haute | 1000 | 870,221 | 1307 | 1,532,211 |
| Total | 17,505 | $41,401,458 | 16,923 | $31,911,917 |

## MORE LIGHT ON THE CONTRACTOR

### Effort Proposed To Gain Assurance As To His Degree of Responsibility.

One step toward insuring the responsibility of contractors, and of cutting down the number of failures in the contracting business, will be taken if contract-awarding authorites insist on the filling out by bidders—or even by the lowest bidder—of the experience, equipment and financial questionnaires just adopted by the conference of representatives of societies interested in contract bonding. These questionnaires have been carefully worked out by contractors, bankers, surety people, engineers and architects, and are soon to be made available, probably through the Associated General Contractors. Their intent is to present to the awarding body as nearly true a picture as possible of the resources, financial, physical and experimental, of the contractor who proposes to undertake construction work.

The preparation of such a questionnaire may seem to be an academic effort to those authorities who by law are required to award the contract to the lowest responsible bidder, the responsibility by the same law being assured by the fact that the bidder can furnish a corporate bond. It must be remembered, however, that the major purpose of the contract bonding conference, which has prepared the questionnaire, has been to set up some method whereby a better assurance of responsibility of the contractor can be had by both the awarding authority and by the bonding company. Too many irresponsible contractors are being bonded. Some of them are being bonded by irresponsible sureties, but more, we believe, are being bonded by honest intentioned surety companies because those companies have not sufficient information as to the responsibility of the contractor seeking the bond. Insistence by the awarding authority on the questionnaire will have several effects, but they all should tend toward

better assurance of the contract being satisfactorily completed.

In some cases the awarding body has discretion as to the award, such as in the State of Ohio where the "lowest and best" bidder may be accepted and where the attorney general has interpreted this to mean that the commissioner of public works can use his own discretion, always supposing that he avoids fraud or collusion. In such cases the questionnaire is of estimable value because it will present to the awarding body or official a true picture of the contractor's adequacy in all ways for the work he is about to undertake. Further than that, it will serve to deter the irresponsible contractor from submitting a bid, because if he feels that his irresponsibility in any of the three particulars which are being investigated is a matter of information available to those who are to award the contract, he will be reluctant to attempt to get the job.

Finally, the bonding companies themselves will either directly, if the contractor chooses to submit the information to them, or indirectly, if the awarding body chooses to use the information available in the questionnaires, be advised of the potential irresponsibility of bidders and will therefore be in possession of much more information on which to judge whether a bond should or should not be issued. It will indeed be a most healthy thing for a public awarding body to be able to confront a bonding company about to bond an obviously irresponsible contractor with facts as to that irresponsibility which would require some explanation. The elimination of the irresponsible surety company should be materially helped.

It is possible, of course, that a contractor will be able to fudge his report that he will be able to make a better presentation in the blank than his condition warrants. It is also true that a paper presentation of a contractor's responsibility will guarantee his successful completion of work, but nevertheless the more those interested know about the man who is about to undertake a large public construction, the better they are able to judge the desirability of letting him attempt it and the more definite will become the legal interpretation of the word responsible as applied to a bidder.—(Engineering News Record.)

## ALL MEN ARE ARCHITECTS

### Each, So Declared Judge Orbison, Is The Designer, The Planner of His Own Structure—His Life.

No architect who attended the annual dinner of the Indiana Society of Architects recently at the Woodstock Country Club, Indianapolis, and heard Judge Charles J. Orbison's address on "Architecture" could help but feel a greater pride in his profession and an innate satisfaction that he was an intimate part of that great calling. The pity is that every architect in the state was not privileged to hear the dissertation.

While paying high tribute to the science of designing, planning and the supervision of the erection of our big and small structures the judge went further and, in a fascinating unfolding, likened the molding of human life to architecture, a twist convincingly applicable and one that somehow made one feel, particularly an architect, a deeper regard for the profession, his, the intracicies of which could be thus applied, for, of all building, truly, there is nothing more important or so far reaching as the correct design and plan for a human life.

The judge said in part: "You men by your choosing and calling are architects, and yet, in reality, all men are architects, for each is a designer, a planner, of his own life. We all build our own lives and each one should be so designed, so planned as to have a fundamental purpose for good.

"We, as the years roll by, should fit ourselves for some useful and beneficial purpose to the world. The main design should be to add good to the world scheme. Why potter along, just wait for Gabriel's horn to sound and then fly away to some ethereal future. Let's, each of us, seek to create a heaven on earth. Each of us must in our designing and planning fully appreciate our obligation to our neighbors, our country and The Creator.

"There are four fundamentals in building, based on thought that will inspire the builder to put wood and brick and steel and stone together that the best end may be attained; 1st—Stability—that things may stay put when erected and not disintegrate; 2nd—Economy—so that the most good may be secured from that at our command; 3rd—Utility—that great and suitable use may be afforded; 4th—Beauty—so that attractiveness may result.

"And so it is in planning human structure, we must equip our lives for stability. After all, one can mock at religion and the moral code, but every human plan to be successful must have for its foundation a firmness, a strength and a stability, and to gain that there must be a conformance to the moral code.

"Then, too, there is the feature of economy—a slogan these days more honored in the breach than in the observance. Every one should seek to shape his life to live longer and in that economic development we must stop burning the candle at both ends. The laws of nature are irresistable and are not to be trifled with. To waste energy in the building of life curtails it just that much, weakens it, thus we should conserve so that our structure may remain strong as long as it stands. Recreation is the answer; we must work and play and thus vary our business with outside interests and restore the power and material used up by the building process. There is nothing more important than an appreciation of this fundamental of economy.

"And, again, utility must be taken into consideration. Life must be utilitarian. Are we merely breathing, eating, drinking animals? If that is the architectural scheme in life there is nothing to it. In the plan of our existence there must be design in the direction of utility that the world may be made more purposeful by our individual existence thru the effort put forth to serve. Lives in the structural process should fit in in the great utility plan, if they don't it was thoughtlessness that failed to incorporate that feature in the design. It is because utility in a life has been overlooked that men are inclined to be neglectful of their duties as citizens. Every one is endowed by right to be intested in politics, but in the exercise of that right utility should inspire less allegiance to party emblem and more to the flag and the country's welfare. The reason for rotten politics, gang rule and graft is because we all have not fashioned our lives to give of the best that is in us, therefore, our plans should be redrafted and in the interest of utility.

"Last, but as important as the other three, is beauty. We must work religion into life so as to build a structure that inspires others, one so fashioned, designed and planned that glory and beauty will radiate from it; not interior beauty alone, though that is a grand thing, but exterior beauty as well, that which attracts others and inspires. Too

often are we prone to repress the very beauty of the soul, thinking that to expose it is less manly. Our individual life structures to be what they were intended should make manifest beauty to those about us. Let the God within us express Himself that the glory of the Grand Architect, the Supreme Designer, may be reflected unto the world about us. The life we all should design and build should be a joy to the living, a temple of inspiration conceived in the spirit of that which gives the glory of the flower to those who can appreciate, not in the spirit of that which places the beauty of them upon the bier after the soul who would have enjoyed them has departed."

C. C. PIERSON, Secretary
Indianapolis

## ORGANIZATION AND CURRENT NEWS

### HERE IS THE KEYNOTE OF ASSOCIATION ENDEAVOR.

**A Far Cry That Heeded Would Level Many Obstacles**

Herbert Hoover, U. S. Secretary of Commerce, in a recent speech said:

"So complex has become the economical structure of the country that the individual as an isolated unit in any industry is no longer able to cope with the multitude of business forces and hold his own."

It is not hard to appreciate the wisdom and timeliness of those words, and yet, there are thousands of contractors who, by their actions, assert they can get-by by "going-it-alone," and persist in sticking to that policy.

### DISCONTINUANCE OF TERM "FIRE-PROOF" RECOMMENDED.

**Its General Use As Applied To Buildings Is Misleading.**

Qualified engineers have contended for years that there is no such thing in common residential building practice as "fire-proof" construction. No doubt many thousands of American families are today living in so-called "fire-proof" homes under the delusion that they are immune to the hazards of fire. Such stress has been laid upon the "fire-proof" quality of certain building materials that the Committee on Building Construction Specifications for Private Residences of the National Fire Protection Association has made the following notation in its recent report:

*"The use of the term 'Fireproof' is recommended to be discontinued. This general term has been erroneously applied to buildings and materials of a more or less fire-resistive or incombustible nature. Its indiscriminate use has produced much misunderstandings and has often engendered a feeling of security entirely unwarranted."*

The term "fire-resistive" may be applied to any standard building material when correctly used. The fact that the material itself is incombustible does not mean necessarily that a structure of which it is the major part is fire-proof or fire safe. The arrangement and protective features of construction are of paramount importance. Any construction which will pass a fire test made in accordance with the tentative specifications of the American Engineering Standards Committee for Fire Tests of Materials and Construction is "fire-resistive," whether of stone, steel, concrete, lumber, or brick.—(National Lumber Bulletin.)

### AS SOME VIEW IT

**New Yorkers Evidently Don't Think Much of Board's Decision.**

The National Board of Jurisdictional Awards held a public hearing at Washington, D. C., on the long standing controversy between the carpenters and sheet metal workers as to which trade should have the exclusive right to erect hollow metal doors and metal trim.

About three years ago the Board decided this burning question in favor of the sheet metal workers contrary to the rules of common sense as every one, with the possible exception of the sheet metal men themselves, admits that the carpenters are much better fitted to do the work and in most cases have been doing it.

Notwithstanding this, the Board at an Executive session held after the hearing, re-affirmed its decision.

Evidently the members of the Board choose to disregard the fact that it is the part of wisdom to recede gracefully from an untenable position.

How the law looks at the matter is shown by a decision rendered by the United States Circuit Court at Cincinnati on May 15th, which makes permanent an injunction granted by the Federal Court at Cleveland about two years ago, which denies the right of sheet metal workers to strike on jobs where carpenters are installing the metal trim.—(Buffalo, N. Y., Builders Exchange Bulletin.)

### PLUMBERS ADOPT UNIQUE TRAINING METHOD.

**Results Will Be Watched With Interest**

Likening the method adopted by a group of Wisconsin cities to train apprentices in the plumbing trade to the itinerant preacher of colonial days known as the "circuit rider," the Monthly Service Bulletin of the National Trade Extension Bureau in a recent issue describes in detail the plan which is being tried out in that state. Five cities have employed a plumbing instructor to spend

...ay a week in each place instructing ...prentices in the plumbing trade. This ... will no doubt be watched by many ... small cities where there are not ... apprentices to keep an instructor ... and if it proves successful in Wis... it will likely be used in other ...ties. — (Builders Bulletin, Pitts...gh, Pa.)

## ANTI-INJUNCTION BILL PASSES IN ILLINOIS.

### Labor Unions Score By This Move In Sister State.

The anti-injunction bill, which was sponsored by organized labor in Illinois, was recently passed by the legislature and it is almost sure to be signed by the governor. The bill sanctions picketing and prohibits judges from restraining strikers from persuading workers to stop work. It also provides that no restraining order shall be issued to prevent employes from terminating their employment or from peacefully persuading others to do so. Unless this law is declared unconstitutional, employers in Illinois will be without recourse to courts of equity in any future labor trouble.

## THE JURISDICTIONAL DISPUTE

### A Wasteful And Uncalled For Practice

In commenting on the recent decision of the United States Circuit Court of Appeals in connection with the Central Metal Products Case, the current issue of Law and Labor has the following to say: "The jurisdictional strike has no apologist. It is perhaps the most harassing and wasteful practice in which trade unions have persisted. As practiced in the building trades, it is against the interests of workers and employers alike and imposes high tribute upon rent payers. It is not even defended by the national unions themselves and has been openly condemned by the Federation. This decision should ultimately lead to the conclusion that strikes of this kind can find no room within the law. They are without standing socially, economically, legally, morally.'

# HAMMOND

## EFFORT TO LAUNCH COUNTY CONTRACTORS ASSOCIATION BEGUN.

### Lake County Builders Would Form Central Body.

A general meeting, specially called, with building contractors from Hammond, East Chicago and Indiana Harbor as a nucleus, was held at the Building Trades Employers Association headquarters at Hammond Monday evening, July 13, to discuss and consider the proposition of forming a county central body or council of contractors.

The proposed organization would be molded along lines somewhat similar to the Building Trades Council of the union building trades for the purpose of negotiating working agreements and wage scales.

The outcome of the suggested scheme all depends upon the amount of interest the contractors are willing to devote to it. If the builders will determine to actually buckle down, take a hold, put effort and thought into the proposition and stay with it the scheme for united effort can be put across, but it will take a lot of hard work to accomplish the end desired. The builders to derive real benefit in their conferences with the labor unions the coming winter must get busy and thoroughly organize the Calumet District, and the idea as proposed is the way to do it.

It is to be regretted that such is the case but there are numerous building contractors in The District who are only too willing to let the other fellow do the work of combatting wage and other demands and put up the money for such effort, but they do like to step in and profit by any advantage secured. It is those men who don't want to be obligated in any way; they wish to be free to jump any way the wind blows if by such flopping there is a selfish advantage in it for them. There is one big barrier to be hewn away, convert the "go-it-alone-man"; another one that offers serious resistance to organized effort by contractors is the builder who carries a union card and is afraid to stand firm for the contracting business, his business, for fear of jeopardizing his standing in the union.

## STILL AT IT

### Unions Continue To Tangle In Jurisdictional Issues.

It looks as if the bricklayers and plasterers are going to cause builders all over the country a lot of trouble in their jurisdictional dispute over terrazzo floor laying. Both trades are up in arms regarding their rights and the controversy still grows.

As conditions are now it seems utterly impossible to get thru a building season anymore without some jurisdictional fracas between a couple of unions breaking out to upset building progress. Architects, owners and contractors are innocently drawn into the maelstrom of contention in that their affairs are affected and they have no chance of relief until the trade factions get the trouble settled at their own sweet pleasure.

There certainly should be some court or tribunal that could take a hand in such matters and straighten them out, instead of letting a great industry get hopelessly tied up because one set of men yell, "That's our work," and another set yells back, "'Tis not. It's ours."

## HAMMOND BUILDING JOTTINGS

The Longacre Construction Co., which has the contract on the new million dollar theater on East State street, has started a force of carpenters putting in the concrete forms for the basement walls.

Guy Young was awarded the contract for remodeling the S. A. Lavin building on East State street.

Architect Mac Turner is preparing plans for the remodeling of the Lawrence Cox concrete building on West State street.

The new pavement on South Hohman street, where it was widened, is completed which gives that part of the thoroughfare a very nifty appearance.

Architects Hess & Greenwood, have the plans ready for a two story brick store and apartment building, 26x95 feet on Highland street, for Jos. H. Salyer, plumbing contractor.

E. E. COLE.

**Country Club:** $30,000.00. Archt. E. F. Miller. Farmers Trust Bldg. Owner, Anderson Country Club, J. E. Van Deventer, Pres.. George T. Hitz, Secy. Preliminary plans in progress.

**Contracts Awarded**

***High School:** annex $80,000.00, Washington Township, Hamilton County, at Westfield, Indiana. Archt. Ernest R. Watkins, Farmers Trust Bldg., Anderson, Indiana. Owner, Rufus Jobe, Trustee, Westfield, Indiana. General contract let to R. W. Stephenson, Plainfield, Ind. Htg. & Plmg. let to Edwards Htg. & Plmg. Co., Noblesville, Ind. Wiring let to Carter Elect. Co., Kokomo, Ind.

## BLUFFTON

**Store:** (1 sty. add., 25x60). Private plans. Owner, Arthur Costello. Contract let to Jesse L. Reiff, Bluffton, Ind. Brick.

**Residence:** $7,500.00. Owner, C. S. Brinneman. Owner builds. On foundation.

## EVANSVILLE

**Bungalow:** $5,000. 619 Covert Ave. Owner, Geo. O. Wahnseidler. Owner builds. Frame.

***School:** $40,000.00, Mackey, Ind., Gibson County. Archt. Eli M. Stingle, Evansville. Owner, J. Edgar Beatty, Trustee, Somerville, Ind. General contr. Roth Constr. Co., Boonville, Ind. Htg. & Plmg., John E. Wooling Co., Evansville. Wiring let to Circle Electric Co., Evansville. Will start work soon as bonds are sold. Bonds advertised to sell July 25th.

# Sealed Proposals

### HOSPITAL BUILDING ADDITIONS AND ALTERATIONS
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Trustees of the Soldiers and Sailors' Orphans' Home, Knightstown, Indiana, will receive sealed bids at the office of the Trustee in the Executive Building at the Home, located three miles south of Knightstown and in Rush County, Indiana, until 3 o'clock p. m. Wednesday, August 5, 1925, for the erection and completion of additions and alterations to the present Hospital Building and heating, plumbing, and electrical installations, all in accordance with the plans and specifications heretofore adopted therefore by the said Trustees, and which are now on file in the said office.

The estimated cost of the work under this contract is $13,000.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid shall be accompanied by a certified check for $300.00 made payable to the Trearsurer of the Soldiers and Sailors' Orphans' Home, and will he held by him as a guarantee of good faith that said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid for the due performance thereof, if his or their bid or bids are accepted. The checks of unsuccessful bidders will be returned immediately after the award of the contract. Should the successful bidder fail to enter into a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages, for the use and benefit of the proper fund of the said Soldier and Sailors' Orphans' Home.

Copies of said plans and specifications may be obtained from the office of H. M. Griffin, Architect 105 McFarlan Building, Connersville, Indiana, upon the deposit of $15.00 for each set. Said deposit will be returned to the bidders upon the safe return of the said plans and specifications to the Architect on or before the day and hour set for receiving the bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

Board of Trustee of the Soldiers and Sailors' Orphans' Home.
Per R. H. Tyner, President.
Hester M. Hart,
Joseph A. Mintarn,
Arthur Wolf,
James W. Spain,
Members of Board.

July 18th, 25th, Aug. 1.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustee and Advisory Board of Perry School Township, Tippecanoe County, Indiana, will receive sealed bids at the consolidated school building at the place called Monitor in Perry Township, Tippecanoe County, Indiana, until twelve o'clock noon, August 3rd, 1925, for the remodeling repairing and construction of an addition, including an auditorium and assembly room to the said above described school building including plumbing, heating and electric wiring, the total estimate cost of which is Twenty-five thousand ($25,000) dollars, all in accordance with the plans and specifications prepared by F. P. Riedel and T. A. Zink, Architects, copies of which plans and specifications are now on file in the office of the State Board of Accounts, in the State House, Indianapolis, Indiana, at the office of the undersigned Trustee, Joseph Kerkhoff, R. R. L., Lafayette, Indiana; and at the office of the Architects, F. P. Riedel and T. A. Zink, 821-822 Lafayette Life Building Lafayette, Indiana.

Separate bids will be received on the general construction, on wiring and a combined figure on plumbing and heating, all in accordance with the said plans and specifications. All bids must be in writing, enclosed and sealed within an envelope, upon which envelope shall be endorsed the name of the bidder, the class of work bid upon, and the bid shall be on the forms on file with the specifications, and all bids will be opened and read publicly at the time and place fixed in said notice.

The right is served to rejejcjtj any and all bids.

and to take a reasonable time to investigate the bids and qualifications of the bidders, and the limit of time to be allowed such investigation shall not be less than seven (7) days from the date of receiving bids.

Each bid shall be accompanied by a certified check for the sum and amount equal to five (5%) per cent of said bid. These certified checks shall be payable to the School Trustee of Perry School Township and will be held by him as a guaranty of good faith that the bidder or bidders, will enter into a contract and execute bond or bonds, approved by the Trustee for the performance of said contract, after such contracts are awarded the checks of bidder who failed to be awarded the contract shall be returned to them.

Should the successful bidder or bidders fail to enter into such contract and execute such bond then he or they shall forfeit the amount of such certified check as liquidated damages for the use and benefit of proper fund of Perry School Township. Tippecanoe County, Indiana.

Each bidder shall file with his bid the statutory affidavit required under Section 8698 Burns' Revised Statutes 1914.

Copies of the plans and specifications may be obtained from the office of the architects 821-822 Lafayette Life Building, Lafayette, Indiana, upon the deposit of Fifteen ($15) dollars for each set, and said deposit will be returned to the bidder upon the safe return of the plans and specifications to the office of the architect on or before the day and the hour set for receiving bids.

Each bidder receiving plans and specifications will be required to submit bids, or bid, to the Trustee, or failing to do so, the deposit for said plans and specifications will be retained for the use and benefit of proper fund of Perry School Township, Tippecanoe County.

Joseph Kerkhoff,
Trustee Perry School Township,
Tippecanoe County, Indiana.

**SCHOOL BUILDING FOR PHYSICAL TRAINING, MANUAL TRAINING, DOMESTIC SCIENCE, VOCATIONAL, GYMNASIUM AND OTHER EDUCATIONAL PURPOSES.**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the undersigned Board of Trustees of the Consolidated School District of Greencastle School City and Greencastle School Township of the County of Putnam, in the State of Indiana, will receive bids up to the hour of one o'clock p. m. on Saturday the First day of August, 1925; at the office of said Board of Trustees in the High School Building in the City of Greencastle, Indiana, for the furnishing of all materials and doing and performing all the necessary labor and work, according to the drawings, plans and specifications as prepared by McGuire and Shook, Architects, of three hundred twenty Indiana Pythian Building, Indianapolis, Indiana, now on file in the office of said Trustees, and accepted and approved by them, with separate bids for the erection and construction of the buildings the plumbing, the heating and ventilating, and electrical installation in and for said building, which is to be located on Lots number 172 and 181 in the Original Plat of the town, now city, of Greencastle, Putnam County, Indiana. Bids will also be received for said building including plumbing, heating, ventilating and electrical installation as a whole. All bids must be on forms prescribed by the State Board of Accouts.

Each bidder on said items named above will be required to file with his bid a certified check for a sum equal to three per cent of his bid, payable to Cleve Thomas, Trueasurer, of said school board, which shall be held by said Treasurer as a guaranty that if the bidder is awarded the contract for said work, said bidder submitting the same will furnish bond to the approval of said Board of School Trustees, and will enter into a contract with said trustees for such work within a reasonable time, not exceeding five days from the date the bonds are sold for the construction of said building, and failing so to do said certified check or checks will be and become the absolute property of said School City and School Township. Checks of unsuccessful bidders will be returned to them.

Successful bidders will be required promptly on and at the time required by said School Board, to enter into a written contract for the performance of said work, as awarded, and will be required to give bond in a sum equal to the amount of their bids, with sureties thereon to the approval of said School Board, for the faithful performance of their contracts and for the payment of all persons performing labor thereon and furnishing material therefor and for all sums justly due them, and said contract and bond shall be further conditioned pursuant to Chapter 44 of the Acts of 1925, of the State of Indiana.

Each bidder must file with his bid an affidavit of non-collusion and upon failure to submit such affidavit, such proposal or bid will be rejected by the Board, and the Board reserves the right to reject any and all bids. The time for the completion of said work will be agreed upon at the time the contract is entered into.

Each bid together with the affidavit as to non-collusion and the certified check or checks must be sealed and filed on or before the above named date, not later than the hour above named.

A true and correct copy of the drawings, plans and specifications of said work of the general construction and mechanical installations will be found on file in the offices of the Architects, the Board of School Trustees, and the State Board of Accounts.

Each bidder receiving copies of the drawings or specifications from the Architects will be required to deposit as surety for their return to the Architects in good order upon the day of the letting, the sum of Fifteen Dollars ($15.00).

The nature of said work is for the construction of a school building for Physical Training, Manual Training, Domestic Science, Vocational Gymnasium and other educational purposes, and for the installation therein of plumbing, heating, ventilating and electrical systems and appliances.

The estimated cost of said above work is the sum of Eighty-Five Thousand Dollars ($85,000).

Witness our hands this 11th day of July, 1925.

Thad Jones, Pres.
E. R. Hamrick, Sec.
Cleve Thomas, Treas.
School Trustees of the Consolidated School District of Greencastle School City and Greencastle School Township, Putnam County, Indiana.

July 18th, 1925.

**HEATING AND VENTILATING SYSTEM**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the undersigned, Trustee of Tippecanoe Township, Pulaski County, Indiana, will receive bids on Saturday, August 1st, 1925, up to the hour of 3 o'clock p. m., at the office of the Trustee in the Town of Monterey in said Township, on the following work, to-wit:

The installation and completion of a heating and ventilating system in the school building at Monterey.

All work is to be done in accordance with the plans and specifications adopted and on file in the office of said Trustee at Monterery, also at the office of County Superintendent, Allen Kemp, at Winamac, also at the office of the Architects, Allen and Garriott at Logansport, Ind.

All bids should be on forms prescribed by the State Board of Accounts. Each bidder will be required to deposit with his bids a certified check for $200 or such sum as shall be approved by the Advisory Board, made payable or properly endorsed to the Trustee of said Township. Checks of unsuccessful bidders will be returned. The check of each successful bidder will be held as a guarantee that such bidder will execute proper contract and bond, and in the event that any successful bidder fails to execute a contract approved by the Board and Trustee and give required Bond within ten days, then such check shall become the absolute property of said Township as agreed and liquidated damages for such failure. Contractors will be required to have their contracts completed and ready for acceptance by Sept. 12th, 1925.

The Trustee and Advisory Board reserve the right to reject any and all bids.

Dated this 6th day of July, 1925.

A. R. HOESEL,
Trustee of Tippecanoe School Township, Pulaski County, Ind.
Address: Monterey, Indiana.

## "B60" Series Hot Blast Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T .U's. Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX HOT BLAST SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 800 sq. ft. to 25,000 sq. ft. steam

FOR SUPPLYMAN CONTRACTOR

VOL. VII INDIANAPOLIS, INDIANA, JULY 25, 1925 No. 17

## FIGURES SHOW THE COUNTRY INDULGED IN A GREAT BUILDING ACTIVITY OVER THE FIRST HALF OF 1925.

### Gains Generally Shown Over 1924.

Indiana's fine showing in the way of new building operations for the first six months of 1925, and the excellent record registered in June in comparison with June a year ago, was in keeping with the building situation thruout the country.

Figures secured from almost four hundred cities throughout the country and just published by S. W. Strauss & Co., building financiers, show that the first half-year of 1925 closed with building activities ahead of 1924, thus lending documentary proof that the nation is now proceeding on the basis of a six billion dollar building year.

In 370 cities and towns the half-year brought a gain of 5 per cent over the similar period in 1924, which, it will be remembered, showed a gain of 8 per cent over the first half of 1923.

June records indicate an even more favorable situation, as the gain over the same month in 1924, in the 370 centers, was 33 per cent.

Only four of the twenty-five leading cities, Chicago, Baltimore, Dallas, and Milwaukee, showed a loss from June, 1924, and only five, New York, Baltimore, Newark, Rochester and Milwaukee, reported a loss for the half year. Many large and small cities reported a gain for the half year.

All of the regions reported gains for June and all showed half year gains except the Eastern States, where a loss of $83,000,000 in New York City pulled the region down to a loss of less than one per cent.

The June gain in the Eastern States was 28 per cent, New York City contributing 21 per cent. The Central States had a June gain of 24 per cent; twelve Southern states 93 per cent, and the Pacific West 35 per cent.

During the first half of the year the Central States gained 7 per cent; the South 26 per cent and the Pacific West 9 per cent.

#### Twenty-five Leading Cities

During the first six months of the year the twenty-five leading cities contributed 63 per cent of the total of building permits in 370 cities, the largest number of comparable cities ever reported to the S. W. Straus & Co. survey for a half year period.

Some of the outstanding gains were in: Akron, 116%! Albany, 15%; Asheville, N. C., 201%; Boston, 10%; Chicago, 23%; Cincinnati, 28%; Cleveland, 14%; Columbus, 40%; East Cleveland, 49%; El Dorado, Ark., 99%; Hollywood, Fla., 803%; Kansas City, Mo., 120%; Key West, 416%; Kingston, 121%; Lakeland, 224%! Louisville, 49%; Miami, 222%; Mansfield, Ohio, 84%; New Rochelle, 28% Philadelphia, 18%; Pittsburgh, 33%; Portland, Ore., 52%; St. Louis, 75%; St. Petersburg, 214%; Washington, 82%; West Palm Beach, 173%; White Plains, 49% and Yonkers, 86%.

## ASSOCIATED GENERAL CONTRACTORS OF AMERICA CHARTER CHAPTER AT INDIANAPOLIS

### Affiliation With National Organization Effected the Past Week

Intent upon establishing general building contracting on a higher plane and assuring to the public and those with whom they deal, a service founded on skill, integrity and responsiblity the members of the General Contractors Association, 927 State Life Building, Indianapolis, have affiliated with the Associated General Contractors of America and will be known as the Indianapolis Chapter.

The national organization was launched six and a half years ago at Atlantic City by twenty-four prominent national general contractors who six months later met at Chicago and organized with ninety-four charter members. Only general contractors of proven ability and responsibility are eligible to membership and though all branches of general contracting, building, highway and bridge are included in the classification, each individual group handles its own problems, each being governed by the general code of ethics advocated by the central organization.

It was only after serious consideration that this latest step was taken by the Indianapolis general contractors, thus tying up with the national body.

The General Contractors Association of Indianapolis is the oldest contractor's organization in the city, having been started in 1878. It, in a way, has had its ups and downs, its trials and tribulations, thru various affiliations with local associations. Last winter the general contractors decided there was need for a more virile effort and withdrew from the general Building Contractors Association, whose membership consisted of various sub-contractors. A new unattached start was made and when spring came things were moving along nicely with the result that wage scales and working agreements were easily adjusted for the new building season without any long drawn out quibbling.

The association members hold a regular meeting monthly at headquarters, a spacious suite of rooms that have been fitted up at the State Life building.

Officers of the Indianapolis Chapter, Associated Contractors of America, are: President, Wm. Carper; Vice-President, J. Emmett Hall; Secretary, Harrison Walters; Treasurer, Fred Schlegel.

It is planned to work out a definite program of activities for the year and seek to do everything possible to encourage building operations.

## INDIANA CHAPTER A. I. A. ELECTS NEW OFFICERS

### State Unit of National Architectural Body Holds Annual Meeting

At the recent annual meeting of the Indiana Chapter, American Institute of Architects these officers were named: President, Fermor S. Cannon, Indianapolis; Vice-President, Geo. W. Allen, Laporte; Secy.-Treas., Merritt Harrison, Indianapolis. Directors: Frederick Wallick and Robert Frost Daggett, Indianapolis. Warren D. Miller, Terre Haute, is also a director, holding over from last year.

There are twenty members in the chapter and it is hoped this number can be increased this season.

One thing the chapter was instrumental in doing was gaining recognition for the work produced by the Indiana architectural profession. Just recently examples of the efforts of three of the state architects were selected for exhibit purposes at the Annual Architectural Exhibit of the A. I. A. at New York City, greatest exhibit of its kind ever held in this country.

## PRIZES OFFERED FOR BEST CELLARS—NOT SELLERS

### Unique Architectural Competition Announced

The "Architectural Forum" has just announced a national competition for architects and draftsmen, carrying cash prizes of $4,200. The affair deals with the designing of a perfect cellar.

Every architect and home builder realizes, says the announcement of the competition, that in estimating the cost of a new dwelling the cubic foot measurement is applied to the entire cellar with a cost factor equal to that of any other part of the building. Thus the owner's investment in the cellar is proportionately equal to that in the principal rooms, but the return upon that investment, in realty valuation, in rental valuation and in living comfort, is entirely disproportionate, small because a fixed habit due to conditions of the past overlooks the possibility of developing the cellar in full measure as useful or livable space.

Another step in modernizing the cellar is to be a recognition by the architectural profession of the possibilities of designing and planning the cellar of the average American home of eight rooms or more in such a manner that the cellar space will be provided with a series of practical utility features and one or more interesting, livable rooms which will add to the living comfort and realty value of residential properties. The purpose of the competition is to place the problem of cellar planning and design before the architectural profession in the interesting form of suggestions which will indicate in a practical manner the arrangement of cellar space that can be made to provide a direct return and to establish a capital valuation which will be clearly recognized in residential real estate transactions of the future.

What must naturally follow this valuable economic contribution by the architectural profession, will be the general acceptance of this idea of the improved cellar, and its recognition by owners, builders and those who sell, rent or finance homes. Over $2,000,000, says the announcement, is at present invested States. This latest competition prom- in the cellars of existing American homes, and at the present rate of dwelling construction $300,000,000 is being invested annually in cellar construction by the home builders of the United ises to exercise a new influence on this vast expenditure, which will quadruple the efficiency of the investment and aid materially in offsetting costs.

There will be a grand prize of $1,000, and the following additional prizes: First prize, class A, $500; class B, $500. Second prize, class A, $300; class B, $300 Third prize, class A, $200; class B, $200. Fourth prize, class A, $100; class B, $100 10 mentions, class A, each $50; class B, each, $50.

Class "A" is for a house on level ground; class "B" is for a house on sloping ground. The requirements include a perspective view of the boiler room and main room of the cellar; detailed cellar floor plan; perspective of the whole house showing first and second floors; detail showing installations of heating plant and arrangement for concealing piping; and detail of special architectural feature of the main cellar room.

The competition closes August 25th, and designs will be judged by a jury of well known architects, selected by "Architectural Forum."

## ORGANIZATION AND CURRENT NEWS

### A SUGGESTION FOR CONSERVATION AND ECONOMY

**Uses For Short Length Lumber Pointed Out**

The Department of Commerce has just released for publication a report of a study of the possible uses of short lengths of lumber. The report is based on a study of twenty houses in which over 46,000 pieces of lumber were used.

It found that a little more than half of the lumber used was nine feet in length, one-third under eight feet and the balance of about twelve per cent between eight and nine feet. In other words, one-third of the lumber delivered to the jobs in long lengths was cut into lengths less than eight feet during the process of construction, while an additional twelve per cent was cut into eight to nine foot lengths.

The National Lumber Manufacturers Association has pointed out that 1,350,000,000 feet of the total softwood yard lumber produced is under eight feet and 1,680,000,000 feet is from eight to nine feet in length. It also reports a substantial reduction in the prices for these short lengths. Additional amounts of short lengths might be saved by the manufacturers if they were salable. Thus it is obvious that the purchase and proper use of short length lumber would result in national economy through closer lumber utilization as well as a saving in price.

Experienced builders were found to have worked up their material very closely and what was left over was moved to the next job. Waste occurred with inexperienced builders or carpenters who built only one house and had no place to use the left over material.

There was found to be a considerable difference in the length of studding between the Eastern districts and the Middle West. This was determined to result from three causes, ceilings were higher in the East; roofs were plainer in the East requiring less gable studs; balloon framing was entensively used in the East, with two-story studs, while the platform construction was used in the Middle West using one story studs.

On several of the balloon framed buildings all of the outside studs were set up full length, the window and door openings being cut in after sufficient sheathing had been nailed on to support the short pieces. The short pieces that were cut out were used in the openings where possible for heads and short side studs.

In the other type of balloon framing all of the studs were cut accurately to length before assembling, thus making it possible to use short lengths over and under openings.

The place where the greatest number of short lengths were utilized was in the sheathing. Wide sheathing was preferred by most of the builders because of the quick covering capacity, but several also expressed a preference for it on the ground that it had a better bracing effect.

The survey revealed that the percentage of short lengths used in sub-flooring to be rather small. It found that the sub-flooring and sheeting were usually taken from the same pile. The sub-floor being laid on a surface with few openings will accommodate long lengths and as it is usually laid before the sheathing, the left over ends were reserved to use as sheathing between windows.

More short lengths were found to be used in ceilings than in any other item, accounted for largely by the number used over projecting eaves.

As in the case of hardwood floors, there seemed to be no objection to the use of short lengths of softwood flooring. Much of this softwood flooring was found to be laid directly over the joist without sub-floor. In the opinion of several of the builders flooring should be made in multiples of sixteen inches, especially those pieces under eight feet.

In two of the houses surveyed, stair carriages or horses were made by nailing triangular blocks cut to the proper angle to one end of a 2" x 4" piece of lumber. These blocks were cut from ends of 2" x 6" with little waste as they came from alternate sides of the pieces.

Belt courses and cornice boards were usually selected from sheathing and roofing material as it was found that there were a sufficient number of pieces good enough to be used for this purpose. Bridging was made from ends of sheathing and roofing and in two cases from ends of flooring.

### BUILDING MATERIAL MARKET TONE

**Most Prices Ruling Steady and Firm**

Greater firmness prevailed in the building materials market during June, though price movements were mixed. Iron and steel continued somewhat unsettled; lumber exhibited firmer tendencies; other materials showed minor fluctuations in both directions.

In some Eastern centers, notably New York City, structural steel continued weak, but in most cities a $2.00 Pittsburgh equivalent persisted as the ruling quotation.

The downward movement in lumber prices was checked by the temporary cessation in activity in both Douglas Fir and Southern Pine mills. While some prices continued to work lower, the lumber as a whole was much firmer than at any time during recent months.

Starting materials showed practically no change. Common brick was higher in both New York and San Francisco, though lower in Detroit. Detroit, New York and Birmingham also reported a weakening in lime prices. Linseed oil was slightly lower. Wire nails and reinforcing bars were quoted a shade under prices prevailing in May.

## HAMMOND

### ASSOCIATION MEMBERSHIP DRIVE STARTED BY LOCAL B. T. E. A.

**Determined Effort Begun**

An effort has been launched by the Building Trades Employers Association of Hammond to repair its fences and to that end a membership campaign is on.

Last week there was a good attendance out at the regular meeting of the association and one new member, a general contractor, who had not been affil-

iated with the B. T. E. A., signed up for membership.

Following a general discussion of association affairs and the general building and labor situation in Hammond a special membership committee was appointed with instructions to call on non-member contractors in an endeavor to interest them in the B. T. E. A.

The new committee and the secretary at once pitched in and started on a round of calls. After a day of such work one more new member was signed up and some five good prospects for membership were located who though apparently interested were not in the mood to give a definite answer just yet.

Another special committee was named the past week and with the secretary is plugging away to secure more members and stir up a snappier spirit of interest in contractors organization efforts.

There are several new building contracting operators in Hammond who had not been called upon officially by B. T. E. A. representatives and who admitted they had given little or no thought to the association's endeavor. These non-member contractors all gave the committees a courteous reception and hearing and consented to take the matter of joining under advisement.

It is going to take time, patience and hard work to swing all the contractors into line but the association members have agreed unanimously to keep hammering away on the new campaign so that more unity of action may be injected into the ranks of the Hammond contractors and a solidarity effected that will count when times of stress come. There has been too much muddling along going on, too many breaches in the front presented and it is to overcome these impediments that the B. T. E. A. has entered upon this most recent and earnest effort.

### THINKS WELL OF THE CITY'S PROSPECTS

#### Visiting Architect Impressed Favorably

An outside architect, Fred Friedline, Kentland, Ind., dropped into the city the other day and was an interesting caller at B. T. E. A. headquarters. He was sort of prospecting around and was favorably impressed by Hammond's possibilities.

### BUILDING ACTIVITY SLUGGISH

#### Not Much New Work Showing Up

It is much the same old story in Hammond relative to new building. Inquiries at the various local architects' offices brought forth the information that there is considerable prospective work in sight, indicated by tentative plans under consideration but no definite decisions are being made as to going ahead with the work.

The contractors have been figuring a great deal, yet, few jobs are being contracted at the present time.

### HAMMOND BUILDING JOTTINGS

The Insul Interests who have taken over the Lake Shore and South Bend Interurban Electric Line are reported to be buying up considerable land on the north side of Hammond along their right of way and near the site of the new Jones-Laughlin steel mill. This may mean some new building work of an extensive nature.

Architects A. C. Berry & Co. are at work on plans for the remodeling of P. W. Meyn's residence in Glendale Park.

The contratcors on the work for setting back a block of buildings on the south side of W. State street, twenty-six feet have a half a block of the structures raised ready for moving. It is quite an undertaking and arouses much interest in the passer-by. When completed W. State street will be greatly improved.

A new front is to grace the Arkens building on East State street, plans for which are now being prepared by Architect Mac Turner.

Now that the brick work on the new Lloyd Bldg. is rapidly nearing completion the plasterers have started in on their share of the interior work.

Charles Rhoades, the contractor, has the Florida fever again. He says he might as well be down there for when it is too hot to work he at least can fish.

E. E. COLE.

## INDIANAPOLIS

### MASON CONTRACTORS ASSOCIATIONS ALWAYS ON THE JOB

#### International Mason Contractors Body Continually Aiding Local Organization in Building Up Morale

Plugging along steadily, surely, diligently goes the Mason Contractors Association of Indianapolis. There is no flare of trumpets or any verbal hallabaloos but it gets there and accomplishes what it sets out to do nevertheless. A fine morale has been established thru the close personal contact of members, maintained by the interest that has been created in the organization which is always taking active measures in seeking to preserve harmonious relationships in the brick-laying industry and contributing its effort to encourage amicable conditions in the building contracting field.

And just as the local organization exerts its efforts to establish a community of interest amongst its members so does the parent organization, the Mason Contractors Association of United States and Canada, with which the Indianapolis organization is affiliated.

The secretary of the International Association is Walter McGarvery at Cincinnati, who keeps in close touch with all subsidiary mason bodies. Just this week the Indianapolis brick-layer contractors received the following bulletin from headquarters, a good example of his way of keeping his members posted.

"A gratifying report came to this office the other day through the Daily Press with the information that the Jurisdictional dispute between the plasterers and the bricklayers had reached a temporary adjustment, the plasterers having agreed to go back to work on buildings, which have been inactive during this dispute, involving something in the neighborhood of $500,000,000.

The platsterers agreed to accept the decision of an Arbitration Board and to continue their operations until a decision was reached by this board.

The discussion between the bricklayers and the plasterers over the question of individual rights in the use of certain materials has become one of vast interest to the employers of both crafts. May the usual wisdom and intelligence of the officials of both these unions prevail and the matter be finally adjusted satisfactorily to all parties concerned."

#### U. S. Circuit Court of Appeals

A rather interesting decision was handed down by the United States Circuit Court of Appeals relative to jurisdictional strikes. The Court, as well as the public in general, are being awakened to the immense loss of time and money occasioned by these jurisdictional disputes and have now seemingly taken a stand to prevent any like action in the future.

It seems too bad that the public and the contractors have been compelled to

undergo financial losses by these jurisdictional disputes and the decision rendered by the above mentioned Court delivers a blow to any further activity on the part of tradesmen causing a cessation of work through any union's dispute within their own ranks.

Our International President has oft times used the expression that "Time is a great level," and we confirm our President's statement when we say that we believe the only remedy for all these unsettled conditions will be "TIME."

### Passing of D. M. Stowe

It is with sadness that we inform the field of the passing of our State Vice-President, Mr. D. M. Stowe, of Ft. Worth, Texas.

Mr. Stowe had been very active in our International work and had almost reached the stage when he was devoting his entire time towards the interest of our International movement.

A great work had been started by Mr. Stowe in the state of Texas and our International Association will certainly feel his loss keenly.

### Cleveland, Ohio

Our associate members at Cleveland have sent to this office a very interesting report pertaining to conditions there. Mr. Carroll, secretary of the Association, informs us there are approximately 2,750 union bricklayers in Cleveland. There is no surplus, neither is there any acute shortage.

The building permits for the city of Cleveland for the first five months in 1925 amounted to $45,347,705, or a gain of approximately $5,000,000 over 1924.

The city of Cleveland has had a great deal of interference through the jurisdictional strike.

Our member city on Lake Erie is certainly making wonderful progress and growing with the rapidity of a booming town. The contractors there are fully capable of coping with all conditions that arise in their business with the result that the various crafts are beginning to realize that Cleveland is not a place to instigate any interference with the Building Industry.

### President Visited Ohio

International President, Mr. R. M. Gillespie, has just had a successful trip to Canton, Alliance, Zanesville and Columbus, Ohio. He had the privilege of talking to the contractors in each of these places, and in Columbus was successful in getting the contractors together for a meeting and explained to them the real need of an association, which resulted in again re-establishing a Mason Contractors Association in the city of Columbus.

### Cincinnati, Ohio

The city of Cincinnati is today hampered somewhat by a shortage of bricklayers, but, however, the contractors feel that when the present spurt has subsided there will be ample mechanics to man the work.

### Estimating Rule

Headquarters office has received a sample of an estimating rule, which has been designed "The Contractor's Protection."

The rule is eighteen (18") inches long, but does not fold. It is laid out on both sides with a ¼" scale showing the figures of measurement, and saving the contractor the necessity of multiplying.

Both sides of the rule contain the ¼" scale, thereby preventing the contractor from making an error, which is apt to occur when there is an ⅛" scale on one side and a ¼" scale on the other. Sometimes a contractor will use the wrong scale on the rule in estimating.

It is said for the rule that it will aid the contractors in avoiding mistakes when taking off work from scale drawings.

The rules are also made on the ⅛" scale.

This carries out the idea of the rule as submitted at the St. Louis convention when the secretary was authorized to see if the sample submitted there could be duplicated. The only difference in the two rules being that this is not a folding rule and is only 18 ins. long in place of 24 ins.

If any of our members are interested in this rule we will be very glad indeed to send one on approval.

### Final

The work of our International Association is still going forward, and we are abiding in the hope that some day this organization will be the means of bringing in the millennium for the well tried and faithful mason contractor."

## ONE OF INDIANAPOLIS' BEST KNOWN PAINTING CONTRACTORS PASSES ON

### Christian A. Wilhelm Taken—Son to Continue the Business

Building circles at Indianapolis once again were called upon to give up a man, who, for many years was intimately associated with and active in the building construction business of the city, when Christian A. Wilhelm, prominent painting and decorating contractor, was taken by death.

Back in 1890 Mr. Wilhelm established his business, known as the C. A. Wilhelm Company, which he carried through to the time of his death. During those years he executed large contracts, working on projects too numerous to mention. He was active in organization work and was a guiding spirit in local, state and national painters' associations for years until failing health caused him to relinquish his efforts in those endeavors.

The business of the firm will be continued under its original name at the same address, 226 E. Michigan st., by R. E. Wilhelm, the son who was associated with his father for fourteen years.

# Sealed Proposals

**HOSPITAL BUILDING ADDITIONS AND ALTERATIONS**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the undersigned Board of Trustees of the Soldiers and Sailors' Orphans' Home, Knightstown, Indiana, will receive sealed bids at the office of the Trustee in the Executive Building at the Home, located three miles south of Knightstown and in Rush County, Indiana, until 3 o'clock p. m. Wednesday, August 5, 1925, for the erection and completion of additions and alterations to the present Hospital Building and heating, plumbing, and electrical installations, all in accordance with the plans and specifications heretofore adopted therefore by the said Trustees, and which are now on file in the said office.

The estimated cost of the work under this contract is $13,000.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid shall be accompanied by a certified check for $300.00 made payable to the Trearsurer of the Soldiers and Sailors' Orphans' Home, and will he held by him as a guarantee of good faith that said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid for the due performance thereof, if his or their bid or bids are accepted. The checks of unsuccessful bidders will be returned immediately after the award of the contract. Should the successful bidder fail to enter into a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages, for the use and benefit of the proper fund of the said Soldier and Sailors' Orphans' Home.

Copies of said plans and specifications may be obtained from the office of H. M. Griffin, Architect 105 McFarlan Building, Connersville, Indiana, upon the deposit of $15.00 for each set. Said deposit will be returned to the bidders upon the safe return of the said plans and specifications to the Architect on or before the day and hour set for receiving the bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

Board of Trustee of the Soldiers and Sailors' Orphans' Home.
Per R. H. Tyner, President.
Hester M. Hart,
Joseph A. Minturn,
Arthur Wolf,
James W. Spain,
Members of Board.

July 18th, 25th, Aug. 1.

## I. S. A. TO CO-OPERATE IN ANOTHER INDIANA BUILDERS CONFERENCE

### Event To Be Held At Purdue University This Fall

Again the Indiana Society of Architects is to take an active part in another building builders conference at Purdue University this fall. As on a similar previous occasion when the university sponsored a meet of state architects, contractors, engineers and representatives of Labor, the I. S. A., has again been invited to participate this year and has agreed to lend its aid to the success of the affair.

The conference is promoted by the Engineering Extension Department of Purdue and affords to the building industry a somewhat official recognition, an opportunity that the four big interests in Indiana building construction appreciate and are eager to take advantage of.

This is a matter all Indiana architects should give serious consideration to and look forward to with anticipation. It will bring the state architects' contractors, engineers and Labor together in conference and afford a chance to get the other man's viewpoint, an opportunity to present constructive ideas and work for the promulgation of a better understanding of both individual and collective problems.

As yet the mere preliminary work for encouraging the conference has been started but from time to time as the scheme takes more formal shape announcements will be made that the architects may be fully posted on the developments and the prospects.

## PUBLIC INTEREST IN LABOR RELATIONS

### It Is a Vital One and Should Be Protected By the Contractor and the Architect

In the matter of labor relations one important factor is too often neglected—that of the rights of the public. No dispute between employer and employe has ever been permanently settled on an equitable basis that did not take into account public rights.

Secretary of Commerce Hoover recognized this fundamental principle when he recently said: "Workers have a right to organize to protect and improve wages and conditions of labor. They have a right to collective bargaining. They have a right to strike. They have a right to refuse to join such organizations. They have a right to work without intimidation and assault. Employers have a right to refuse to recognize such organizations. They have a right to lockout. They have a right to keep open shop. No one seriously denies any of these rights, but a lot of people are overlooking a superior right. That is the right of the public to a continuous supply of its vital necessities and services upon terms fair to the employer and employe. When these various rights infringe upon the public right, then the dominant right is public right."

The most effective way of protecting that most important group in labor relations—namely, the public, is through organization. Labor has consistently pursued a policy that completely ignores any rights other than its own. The ever-recurring jurisdictional strike among the trades in the building industry furnishes an excellent example of the attitude of labor toward the question of public right.

Therefore it is up to the contractors and architects of the country to see to it that the rights of the public are carefully guarded. That can only be done through organization and co-operative effort. (Natl. Assn. of Building Trades Employers).

## MORE RIGID CARE NEEDED IN DETERMINING WHETHER LOW BIDDER IS ABLE TO MEET FULL RESPONSIBILITY ENTAILED BY CONTRACT

### Mere Ability to Furnish Surety Bond Not a Criterion

Investigation as to some of the causes for the present uneconomic conditions in construction has developed:

First, a custom more or less common throughout the country, due to the interpretation of a somewhat general law, governing the award of contracts for public work, which provides that the contract shall be awarded to the lowest responsible bidder. This determination of responsibility has in many communities been limited to the ability of the contractor to purchase a bond with little, if any, consideration as to his ability to perform the contract.

Second, competition between surety companies has been very keen, with the result that many bonds have been written which did not insure responsibility or experience.

The result of thorough investigation and careful study of the problems facing public officials and all interests allied with construction has developed a recognition of a definite obligation of co-operation between all elements, if the public is to receive the benefit that will result from responsibility and experience.

If the interest of the public is to be safeguarded in the expenditure of such large sums of money as are involved in construction, there must be a thorough and intelligent investigation and consideration of the bidder's qualification to perform the work.

ORGANIZATION AND CURRENT NEWS

## ECONOMIC VALUE OF TRADE ASSOCIATIONS

### Combined Force Accomplishes That Which It Is Physically Impossible For Individual to Do

Behind all these associations which have sprung up and attained robust growth almost within a hand's breadth of time as measured in human evolution, a great purpose, perhaps unconspicuous and dimly revealed may be traced, says NATION'S BUSINESS. It is the purpose to get things done not by the sacrifice of individuals or human initiative but through the power of pooled effort and accumulated wills.

The individualist, the specialist, gets more time for his particular task thru his ability to draw on pools of accumulated effort, such as reservoirs of light, heat, water, gas, intelligence. Secondly, there is something in the combined wills and intelligences of a great number of human beings that is greater than the wisdom of the individual. Most of the so-called triumphs of individual genius are, after all, simply the fruitage of pooled effort. The automobile, for instance, an evolution rather than an invention and until electric ignition was invented the internal combustion engine was a thing of no practical utility. It would be heaping truism upon truism to offer up illustrations as to what associational effort has accomplished for the peace, comfort and security of humanity.

When it comes to trade and business the association can do for the individual what he cannot afford, with all his strivings to accomplish for himself.—The National Sand and Gravel Bulletin.

## THE RESPONSIBLE CONTRACTOR

### As The Advisory Board Associated General Contractors of America Defines Him.

The responsible contractor whether an individual, firm or corporation, must possess, as a minimum of requirement, three essential qualifications, as follows:

**Integrity**

He must consistently and persistently comply with the spirit as well as the letter of his contracts. He must have business experience and handle every transaction with fairness and honor.

**Skill**

He must possess the necessary technical knowledge and practical experience, as applied to his particular form or group of undertakings, to enable him to carry them to completion in a workmanlike and economical manner.

**Responsibility**

He must possess cash or credit to meet all his commitments, also the equipment and organization for the satisfactory performance and completion of his undertakings.

In special cases, problems may appear which will demand that consideration be given to other qualifications, but in general the above three requirements apply to all construction contracts, and without them no contractor can properly be regarded as wholly responsible.

## STILL PLYING HIS PENCHANT THO NOT SO FREQUENTLY

### Bid Peddler a Hang Over From An Older Day

Says the official bulletin of the Duluth, Minn., Builders Exchange.

We are glad to be enabled to say, that we believe there is a vast improvement in Duluth in the matter of bid peddling, and that the practice is growing less and less as times goes on. But there are still a few instances when sub-contractors are called into an office and the following conversation occurs: "Now, Mr. Blank, I would like to have you undertake this job because you are reliable and know just how the work should be done, *but*, your bid is just a bit too high. Now, I've got a bid here just $1,500 lower than the one you sent in, and * * *"

What should be done in a case like the above? A demand should be made for the return of the set of figures as submitted by the sub-contractor, and further, he should notify the "Bid Peddler" that, it is not desirable to transact business with any man on that basis.

One can readily imagine the light breaking in on the emaciated brain of such a searcher for cut bids, when the first man to whom he tells the old, old story, springs a snappy come-back by severing business relations and walking out with his figures. By the time the second and third sub-contractors have followed suit, an educational program for better business will be well under way. This will act as a remedy to the "Bid Peddler."

**Same Old Story Everywhere**

And the Monthly Bulletin of the Associated Building Contractors of Illinois comes right back with this:

We hope that Duluth sub-contractors haven't got it into their bonnet that such conditions are peculiarly present only in Duluth. The truth of the matter is that, "Bid Peddling," has been resorted to ever since the industry began, and that takes us way back into the rock ages. It originated with a "smart Aleck" who figured he could increase his personal profit by subtracting it from (unsuspect-

ing?) sub-contractors. The truth of the matter is that, this "smart Aleck" must have had the "willingness" of some crooked sub-contractor to play the game that way, otherwise it could never have been introduced. Both proved themselves Judas Iscariots to their brethren but their following have been legions, and like a festering sore, require strenuous and drastic measures to overcome and correct.

If sub-contractors would only realize that this game of "Bid Peddling" is like a shell game—heads they lose and tails the "Bid Peddler" wins, that system could quickly be eliminated once and for all ways. The sub-contractors have nothing to lose and everything to gain, if they will only apply the "Golden Rule;" play square with their colleagues as they would have their colleagues play with them. By simply refusing to be a party to such shady deals, bid peddling will be impossible. Competitive bidding is at times difficult in itself, but what's the use of wasting time estimating and submitting your figures when you know that, though you are low and entitled to the job, peddling will be resorted to and cost you the job. Would a sane man enter into a game of poker with known sharks and crooked dealers, knowing the odds are all against him and he hasn't a ghost of a chance to win? That's the chance a sub-contractor takes with a "Bid Peddler." What's the object of gambling; why not play the game safe.

## NOT DEAD—JUST DORMANT

### Five-Day Week Pushed Aside Temporarily by Conditions

The demand for the five-day week, which threatened to become a serious issue earlier in the year, has not met with favor on the part of workmen themselves. The sole reason why it was ever advocated was to provide employment for more men. In view of the fact that the country this year, is enjoying a continuation of the building boom which requires the services of every skilled mechanic, the argument in favor of shortening the working week fell into disfavor.

The issue is not dead by any means and the moment the pressure for additional building is removed it is likely to be revived, particularly by those trades in which the shortage of mechanics is most acute. It is evident to any one who has made a study of conditions that the time is coming when the demand for new building is going to fall off quite considerably. Then there will have to be readjustments in wage rates in order to lessen the wide difference that exists between the income of skilled workers in the building trades and those in other industries.

In order to meet this exigency when it comes, contractors should be in a position to co-ordinate their efforts through strong local associations and even co-operate with national associations which would be in a position to deal with the larger problems of the industry on a nation-wide basis.—Semi-Monthly Bulletin of Natl. Bldg. Trades Employers.)

## SEES END OF BUILDING SHORTAGE IF PRESENT 1925 ACTIVITY CONTINUES

### At Least That Is the Opinion of National Realtors' Body

If the construction record established during the first half of 1925 continues throughout the balance of the year, the building shortage will be at an end by the first of January, 1926, is the conclusion reached by the National Association of Real Estate Boards. The Association has recently completed a survey of conditions which shows that only in the smaller towns is there a need for additional structures. In cities under 25,000 population, 40 per cent reported shortage in dwellings, 34 per cent a shortage of apartments and 36 per cent a shortage of business buildings. In no city over 500,000 was a shortage in apartment houses noted, while only 18 per cent reported. A shortage in dwellings and 10 per cent a shortage in business structures.

## LABOR VALUE OF THE EMPLOYER'S DOLLAR

### Return For Wage Has Increased

In July, 1920, the labor value of the dollar as recently pointed out by the National Industrial Conference Board, was approximately two-fifths its value in July, 1914. Wage reductions in 1921 and 1922 increased it slightly. During the past three years the general trend of wages has been upward. In March, 1925, the labor value of the dollar, as compared with 1924, was 43.6 cents, or 2.9 cents greater than in July, 1920, the peak of average hourly wages.

# EVANSVILLE

## NOT SO BAD

### Building Season, While Not Marked by Large Work, Has Been Active

Though no large prospects of a building nature are appearing over the Evansville horizon it can not be said that operations are at a standstill, in fact, there is a great deal of building activity going on locally.

The work in course of construction and that for which plans are being prepared is in good volume but of a smaller structural nature, still running to new residential work, repairing, alterations and remodeling. It is this kind of effort that has kept Evansville's building volume up to fair proportions comparing favorably with that of last year.

There seems to be sufficient work to keep the local contractors busy with the result that the rank and file of the building trades mechanics have encountered no serious unemployment period.

Local architects practicing over a wide territory comprising the city, southern Indiana, Illinois and western Kentucky have turned out many new plans this season and are still at it, all of which has kept the architectural offices busy steadily.

As for the material supply men, they too cater to a field that covers the three states besides he confines of Evansville and all report a good business so far. Prices have shown no tendency to fluctuate materially one way or the other, instead they have held steady to firm all season which has inspired a confidence in the prospective builder.

Taken all in all Evansville has had a fair building season and the end is not yet, some men holding forth the prediction that the fall will see a renewed activity in building construction endeavor.

## HAMMOND

### AND SO MUCH OF THIS COULD BE AVOIDED

#### When Will the Contractors Learn?

Building contractors have faults; they wouldn't be human if they did not, but, there is one that stands out preeminently above all the rest, and it deals with the lack of the majority of the builders to take themselves or their profession seriously enough; they fail to realize that each and every one of them and their individual work is an integral part of one of the greatest and most essential industries of the country. Hence, the industry muddles along, somehow, thru mires of impediments and labyrinths of entanglements to certain situations and thru conditions that are anything but satisfactory.

Now the pity of it all, the regretable and lamentable side, is all this could be obviated if the contractors could but see the light of harmony and unity of action. If building contractors would but take it upon themselves to take a pride in their calling, really a profession, and further its interests, protect it the same as do the doctors, the lawyers, the architects, and even business men such as the bankers, merchants and others do theirs, they could by concentrated effort, easily build up the prestige of their profession and the building business to a status where it would be a power unto itself, commanding attention and receiving respect. That would be a situation of which any builder could be proud, and it would mark the end of the current custom of making a football of the building business by selfish labor interests and others who prey upon it for their own aggrandizement and advancement.

There is no field in which there is greater opportunity for achievement or accomplishment whereby it is possible to pass on to posterity monuments that, by their stability, strength and beauty, will tell our story in the ages to come. And yet, the men who supervise the construction of these monuments are but whip crackers for others because they won't stand for what they know to be right, and allow competition, selfishness and envy to creep in, separate them, and sink the wedges that cause the crevices where disintegration sets in to the detriment of the whole contracting industry.

### BEARING FRUIT

#### Organization Building Drive Not In Vain—Several New Members Fall Into Line

The B. T. E. A. extension work is going ahead nicely. Last week the special membership campaign committee went out skirmishing and came back having bagged three new applications for admission to membership. Not only that but the same crowd lined up some promising prospects.

So far the effort has been encouraging and next week the committee will give over another day to the work following up prospects and recoinoitering for other new members. The scheme of campaign is to keep hammering away everlastingly at the recalcitrants until they hear, feel and heed the call that will line up the local building contracting fraternity into a rock ribbed solidarity.

### DUTCH LUCK

#### Nobody Knows Just How Many Rabbits' Feet They Had Working That Day

Thank goodness we are all intact and back at our desks once more. Several days ago L. J. Granger and the B. T. E. A. secretary took a motor spin over to Crown Point and they got by without being murdered, held up or put in jail Some accomplishment you must admit.

### HAMMOND BUILDING JOTTINGS

The Hammond Lumber Co., awarded the contract for the construction of its new warehouse and garage to Charles N. Scott.

Archictects J. T. Hutton & Son have plans out for bids for the erection of a newspaper plant for the Lake County Times. The structure will be two stories high, 50x115 feet of fire resistive construction.

The Marland Refining Co., from Oklahoma, will start the construction soon of a new reinforced concrete office, warehouse and garage estimated to cost $50,000. Architects Buckley & Skidmore, Hammond, prepared the plans.

Architects Hess & Greenwood are preparing plans for a brick residence for Mr. McOwen to be located in South View. It will be two stories, 32x68 feet.

The Neilson Development Company has several projects that will be out for bids this week. A two story, 30x75 ft. apartment building at Whiting for John Broskovic, and the remodeling of the bank building at State and Hohman streets, Hammond, to be occupied as a five and ten cent store when the First Savings & Trust Co., moves into its new home.

# Sealed Proposals

**NEW SCHOOL BUILDING FOR PHYSICAL EDUCATION AND HEATING, PLUMBING AND ELECTRIC SYSTEMS**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the undersigned Board of Trustees of the School City of Rushville, Indiana, will receive bids up to the hour of one o'clock p. m. of August 21, 1925, at the office of the Superintendent of Schools, Rushville, Indiana, for the funishing of all materials and doing and performing all the necessary labor and work, according to the drawings, specifications and details as prepared by McGuire & Shook, architects of Indianapolis, Indiana, now on file in the

... of said Trustees and accepted and approved ... with separate bids for the erection ... construction of the building, the plumbing, ... and ventilating, and electrical in... ... and for said building, located in said ... of Rushville, Indiana. All bids must be on ... prescribed by the State Board of Accounts. ... bidder on said items named above will ... required to file with his bid a certified check ... a sum equal to one (1) per centum of his bid, ... payable to Edwin R. Cassady, Treasurer of the School Board, which shall be held by said ... as a guarnaty that if the bidder is ... the contract for said work, said bidder ... the same will furnish bond to the ... of said Board of School Trustees, and ... enter into a contract with said Trustees ... such work within a reasonable time, not ... 10 days from the date said award is ..., and failing so to do, said certified check ... will be and become the absolute proper... ... said School City. Checks of unsuccessful ... will be returned to them.

Payments will be made on said work monthly ... and as the work progresses and in strict ... with the laws of the State of Indiana. ... bidders will be required promptly on ... at the time required by said School Board, ... into a written contract for the per... of said work, as awarded, and will be ... to give bond in a sum equal to the ... of their bids, with sureties thereon to ... approval of said School Board, for the faith... performance of their contracts and for the ... of all persons performing labor thereon, ... furnishing material therefor and for all ... justly due them.

A ... and correct copy of the drawings, ... and details of said work of the ... construction and mechanical istallations ... be found on file in the office of the Architects, ... the office of the Board of School Trustees, ... at the office of the State Board of Accounts.

All bids must be accompanied by proper affida... as to non-collusion, properly signed and ex... by the bidder and by the certified check ... checks as hereinbefore indicated, and must ... sealed and filed on or before the above named ..., not later than the hour above named.

Each bidder receiving copies of the drawings ... specifications from the Architects will be ... to deposit as surety for their return to ... Architects in good order upon the day of the letting, the sum of Fifteen ($15.00) Dollars.

The right is reserved by said Board of School Trustees to reject any and all bids. The estimated cost of said above work is the sum if Fifty Thousand ($50 000.00) Dollars.

Warder H. Wyatt,
Allie Aldridge,
Edwin R. Cassady,
As Board of Trustees of the School City of Rushville, Indiana.

August 1st, 1925.

## HOSPITAL BUILDING ADDITIONS AND ALTERATIONS
## NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Trustees of the Soldiers and Sailors' Orphans' Home, Knightstown, Indiana, will receive sealed bids at the office of the Trustee in the Executive Building at the Home, located three miles south of Knightstown and in Rush County, Indiana, until 3 o'clock p. m. Wednesday, August 5, 1925, for the erection and completion of additions and alterations to the present Hospital Building and heating, plumbing, and electrical installations, all in accordance with the plans and specifications heretofore adopted therefore by the said Trustees, and which are now on file in the said office.

The estimated cost of the work under this contract is $13,000.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid shall be accompanied by a certified check for $300.00 made payable to the Trearsurer of the Soldiers and Sailors' Orphans' Home, and will he held by him as a guarantee of good faith that said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid for the due performance thereof, if his or their bid or bids are accepted. The checks of unsuccessful bidders will be returned immediately after the award of the contract. Should the successful bidder fail to enter into a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages, for the use and benefit of the proper fund of the said Soldier and Sailors' Orphans' Home.

Copies of said plans and specifications may be obtained from the office of H. M. Griffin, Architect 105 McFarlan Building, Connersville, Indiana, upon the deposit of $15.00 for each set. Said deposit will be returned to the bidders upon the safe return of the said plans and specifications to the Architect on or before the day and hour set for receiving the bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

Board of Trustee of the Soldiers and Sailors' Orphans' Home.
Per R. H. Tyner, President.
Hester M. Hart,
Joseph A. Minturn,
Arthur Wolf,
James W. Spain,
Members of Board.

## FIRE IN A *"FIREPROOF"* BUILDING

"That a building is of firse-class or fire-resistive construction is no assurance that a serious fire cannot occur as long as there are any cumbustible *contents*. The damage due to heat and water is always serious, even though the building is not itself consumed.

"First-class or fire-resistive buildings are a barrier to sweeping fires only when the openings are properly protected. Although of superior construction ,these two buildings were gutted because the fire easily entered through the ordinary windows. The windows should have had fire shutters or been of wired glass in metal frames. The buildings shown would probably have been saved had the windows been of these materials."

VOL. VII INDIANAPOLIS, INDIANA, AUGUST 8, 1925 No. 19

## FIRST AID HINTS

### Tips For Contractors That Will Help in Emergencies

DR. H. W. GENTLES

(Director First Aid Department, Chicago Chapter, American Red Cross)

No large contractor can undertake any great piece of construction work without realizing in a very short time that the character of the accidents vary with the progress of the building on which he is working.

At the beginning, men fall into excavations; later, they may fall from scaffolds; occasionally material drops from above.

In falls, the most frequent type of injury is one or more broken bones. This may mean either a simple or a compound fracture. A compound fracture is where, in addition to a broken bone there is a wound of the surface, or skin, connecting with the fracture.

Good first aid is the doing of the most important thing. Curiously enough, this sometimes takes a negative form and means that the first aider will prevent the patient from being lifted or moved in any way until the broken bones have been fixed by splints. Then the transportation can be done without causing a great increase of unnecessary pain, and without doing further damage.

Therefore, if a man falls, do not rush and pick him up. If his leg is broken, the moment the weight of his body comes on it, the sharp ends of the broken bones are liable to be driven to the surfact, and the unfortunate man will have possibly from four to six months in bed, a great deal of suffering, fever, and loss of muscular strength, and may never be able to go back to his job.

Instead, if boards are put down each side of the limb, and some excelsior used as padding between the leg and the splint, and these are tied in such a way that the fracture is fixed from the foot to well up towards the hip, the man will be back at work in six weeks, and his ability as a wage earner will not be interfered with in any way.

If building material drops on people below, it is apt to strike the head or the arms. If the man is knocked unconscious, and one does not know what injury has been done, fold a coat and put underneath his head. In cold weather, cover him with blankets, coats, gunnysacks, and get the ambulance as quickly as possible.

What may appear to be a very simple case at first, may in the course of a few hours demonstrate its seriousness by the man becoming more or less paralyzed, which shows that there has been bleeding going on inside of his brain. When there has been an injury on the head and the man has been knocked unconscious, it is a wise precaution to send him home with an escort, or to a hospital where he can be watched for twenty-four to forty-eight hours, if the doctor thinks it necessary.

If the shock of an injury has been great, the man's face is pale and his extremities are cold. In such a case it is wise to keep the man lying flat. If a little aromatic of amonia can be got —half a teaspoonful in one-fourth glass of water will tend to boost the heart action and pull him together.

In all kinds of construction work, cuts figure very prominently—flying scraps of metal or glass even though small in size, dropped ten, twenty or fifty feet may penetrate with a great deal of force. Where a cut is mostly of the surface and it bleeds freely, the bleeding often carries away the infection from the wound.

Narrow punctured wounds of considerable depth are especially dangerous, because infective material such as threads of clothing is carried down into the wound and acts like an explosion of dynamite. They penetrate vital organs, the brain, lungs, intestines, etc. Also, these deep cuts frequently open large vessels which bleed furiously. To cut off bleeding of a limb, it is well to remember that if the blood is bright red, the first person to reach the patient should have the limb held up in the air; then the limb should be grasped with two hands, putting on a firm, constant pressure between the wound and the heart. This stops the bleeding and allows a belt or suspenders to be used as a tourniquet (pronounced tour-ne-key), which will shut off the bleeding and keep the man alive, until he can be got to a hospital, or a doctor summoned to the case.

On the other hand, if the bleeding is very dark, almost black, one can be sure that it comes from a vein. In that case, the laying of the patient flat down and the raising of the limb is very important. Very slight pressure on the side furtherest from the heart will generally stop the bleeding at once.

Small wounds caused by slivers of wood, scratches from wire, or nails, are more common, and are especially liable to cause infection. Whenever possible, the sliver ought to be picked out with a needle, or the point of a sharp knife, which has been sterilized by passing thru the flame of a match two or three times. After the sliver is extracted, if there is no iodine to put into the bottom of the wound, the injured part should be squeezed or milked so as to make it bleed and wash out as many of the germs as possible. In an ordinary cut the bleeding is a source of safety. If the wound is left open to the air and kept from further injury, it usually will heal quickly. Never apply to a wound a dressing that has not been sterilized.

When unseasonably hot weather happens along, it is important that men should realize that is not wise to eat a great deal of meat, or sweets, or to indulge in alcoholic beverages.

Work during protracted heated spells uses up more of one's reserve, therefore, longer hours of rest are necessary. An increased amount of cold water to drink on the job and at home is important.

## AMERICAN ARCHITECTURE

(From The Vil'ager)

The new habits of life which America's citizens are developing are habits naturally propitious to the development of an architecture.

For one thing, the movement of the population is strongly centrifugal. Not only is there a tremendous divergence to the large cities, but the small, scattered communities tend to draw closer together; the four or five little one-room red schoolhouses are being rapidly abandoned for the large four or five-story, Indiana limestone, "consolidated" schoolhouse; even villages begin to have their apartment houses. When people crowd together, large buildings become not only feasible but necessary. Architecture flowers where there is need of large buildings. In the several periods of architecture's development, there have been many little buildings of rare beauty, but they were by-products; architecture never gets far if the needs of the community do not go beyond the small, low edifice.

The tendency of the population to concentrate is one condition favorable to the growth of an American architecture. Another condition is the lessening of the family unit and the increasing inclination of the citizens to take their work and play in public. More and more Americans are coming to live, like the Greeks, in the streets and public places; more and more they are requiring of their dwellings only that these be shelters, be sleeping-places and storage rooms. They work miles distant from their homes, they eat in public places, their social life, their recreations, tend all to be outside the home. The American home is ceasing to become a thing to glorify; hospitality is becoming lost in the press of new economic conditions.

America's only contribution to architecture so far has been domestic architecture, but if she has any further to give, we may be sure it will not be the architecture of the home. The American farmhouse and the Colonial planters' fine residence were the expression of that intense individualism which was early America's reason for being, but the day of individualism is over; the tendency is now all toward the communal and away from the private. The rich man's country places are being turned into country clubs in these later days; the city mansions are being torn down, and luxurious, non-descript apartment houses are being erected on their sites.

England could develop a domestic architecture because son lived where father had lived. In America the number dwindles of those who are willing to spend all their own lives in the same dwelling, let alone hand it on to their children.

The fact that the heart beats in the linoleum factory and the garage prevents the architect from building dwellings of character, but it does not prevent him from building gas works and biscuit factories of character.

Whenever nations have developed new, or even changed, institutions, the housing of them has been the architects' opportunity. America is developing a new institution, Modern Industry, an institution with new and definite necessities which will make it difficult for the architecture which is to house it to be borrowed.

### Infernal Architecture

The English writers on architectural subjects have added a sixth to the Five Orders of Architecture. They speak of Infernal Architecture. They mean by that those structures which the etchers manage to make pictures of, Pittsburgh architecture great smoke-stacks and tanks, belching furnaces, derricks, cranes, dredges, monstrous eyeless buildings, or if not eyeless, then trimmed with row on row of blank, glassy, dark windows. But the writers should not call this architecture. "Infernal" is excellent, but "architecture" is premature. The architects have yet to make it architecture; no one of them has yet set out to capture all those helter-skelter lines and bind them into an outline. A few efforts have been made to prettify these monsters, yes, and shocking indeed have been the results! Colonial trim and window boxes on power plants; workmen's cottages, dormered and trellised, grouped about the cotton mill according to the fancy of a landscape gardener! Automobilists do not motor out to see these sights, no! But they would motor out to see the cotton mill or the gas works which had been genuinely architecturalized, the form fitted down to the purpose, yet contriving to suggest to the spectator the meaning of the activity it encased.

Could "infernal" architecture be as beautiful as "classic or Gothic," What could we do about it if we knew? The fact which concerns us, is that the conditions of life now are such as to make a new architecture a need. Musicians may write their symphonies any way they please, artists may paint any subjects they like—that is their pitiful circumstance; it makes no difference what they do or do not do; they stand outside the main stream of this present-day life, unneeded, mere extras.

The architect called to design a shoe factory cannot design as he likes; he may have no vagaries. To date he has been allowed to treat the shoe factory only as a building wherein shoes are to be manufactured. But the time is ripening for the recognition that the building wherein the shoes are manufactured can also be made the building which adver-

## ARE YOU GETTING YOURS?

tises, which help to sell the shoes, and which in the same stroke honors the great civilization that allows everybody to have plenty of shoes.

The architect's building will sell shoes and honor Industry only if the people are moved by the sight of it—here is the most favorable condition of all for the development of our American order of architecture. The architect of the new architecture will be obliged to think in terms of his audience. The painter and the musician paint and compose for their fellow artists and the critics. But the architect who is employed by a manufacturer to "get results" will not dare take his eye from the spectators; his days he will spend pondering the fellow's habits and interests, his nights he will spend construing his susceptibilities, wondering how he can lead him on here, touch his wonder there; in other words, the architect will be held in the very middle of the stream of life, the servant of the dominant interest of the time. It is when artists have been in just such situation, and only when they have been, that art has developed.—(Monthly Bulletin of Illinois Society of Architects.)

## INDIANA ARCHITECTURAL FIRM CHANGES OFFICES TO CHICAGO.

### Lafayette Concern Makes a Change

Announcement has just been received from the architectural firm of Nicol, Scholer & Hoffman, Lafayette, Ind., that it is moving to Chicago. The new location of the firm will be 941 Straus Building, Chicago, Ill.

## ORGANIZATION AND CURRENT NEWS

## BIG OUTING PLANNED FOR INDIANA BUILDERS.

### Event Scheduled For August 20, at Broad Ripple Park, Indianapolis.

Arrangements have been completed for a semi-annual meeting of Indiana builders under the auspices of the Associated Building Contractors of Indiana. The affair is to be held at Broad Ripple Park, Indianapolis, Thursday, August 20, and will cover the afternoon and evening.

This is in accordance with action taken at the annual convention in January when it was unanimously voted to hold a semi-annual gathering to which all builders of Indiana, those allied with the building construction industry and the wives and daughters of those attending would be invited to be among the guests.

It is the first big meeting-outing ever held by the A. B. C. and preliminary plans for the event have been brewing for some time until finally they have shaped up to a definite stage. Announcements have been sent out over the state to the various local city affiliated contractors associations and early reports are to the effect that much enthusiasm is being shown over the approaching event.

While it is to be an A. B. C. outing the guests are not to be limited to the membership of the association, instead, any and all builders and those interested in the building construction business will be welcome.

As now planned all those contemplating attending the outing will meet at the Claypool Hotel at 1:30 p. m., August 20, and then leave in a body for the Broad Ripple summer resort out on White River.

A special program of amusements and recreations is to be arranged for the afternoon and at five thirty p. m., there will be a boat ride up the river and back. That trip will be of an hour's duration and upon the return to the park a chicken dinner will be served at the dining pavilion. The evening will then be given over to dancing as a finale to the day's festivities.

Such an outing given along the above line will be conducive to a fine brand of good fellowship and afford the builders a glorious day of recreation.

In order to facilitate the work of those in charge of the day's arrangements it is necessary to know just how large a crowd to prepare for in order that the proper accommodations may be provided for all, therefore, all those who contemplate attending should send in reservations by August 15 at the latest, either to your local association secretary, or to C. C. Pierson, secretary, Associated Building Contractors of Indiana, 320 Peoples Bank Bldg., Indianapolis.

## THE NEW LUMBER STANDARDS

### How to Use Them

Not so very long ago, there were thirty or more sets of grading specifications which could be used in purchasing lumber. Most of them were Greek to the average contractor, who trusted to luck and his own description to obtain what he wanted.

Now, after three years of effort on the part of the U. S. Forest Service, the Department of Commerce, lumber manufacturers and lumber users, the grades for soft woods have been reduced to one for the entire United States. The new system is exceedingly easy to understand.

Lumber is first divided according to use into (1) yard lumber, (2) shop lumber, (3) timbers. The first and third concern the builder, the second the woodworker.

Yard lumber comes in three general degrees of manufacture designated as rough, surfaced and worked. The first is simply sawed, the second is planed smooth on one or all four sides; worked lumber is the product of a matching machine, sticker or molder. It is used chiefly for interior and decorative work and may be (1) matched—for flooring, ceiling, etc.; (2) shiplap—siding and close fitting wall uses; (3) patterned—various forms of trim, finish, mouldings, etc.

As to quality of material, yard lumber is divided into: (1) Select lumber; (2) common lumber.

Select lumber is of better quality than common lumber, and is in turn graded according to quality, A, B, C and D. A and B are of such a superior quality that they may be used with a natural

finish. C and D are of excellent quality, but require a paint finish.

Common lumber is graded as No. 1, 2, 3, 4, 5. Nos. 1 and 2 common are susceptible to general building use without waste; and Nos. 3, 4 and 5 involve some waste in the use of various pieces.

In addition, the consumer of yard lumber need only remember that timbers (6x6 inches or larger) are graded in order of relative strength as dense select, select and common.

As for applying these simple quality classifications the consumer should remember that for some uses rough or partly dressed lumber is suitable and that for most purposes not involving appearance a lower grade is just as durable and satisfactory as a higher one. For instance, No. 2 common boards are more generally used in floors and sheathing than No. 1. In low grade structures, like simple sheds, No. 3 and even No. 4 may serve the purpose just as well as the much more costly No. 1. In joists and beams the lower grades of common can generally be used with entire satisfaction, especially if some attention is given to placing pieces so that defects are not at points of greatest strain.

Uniformity of size and grade is now being supplemented by grade marking of each piece of lumber so that the purchaser can buy on faith in the knowledge that he is backed by expert and responsible grading and inspection. He can absolutely count on getting what he buys if he stipulates that sizes and grades shall be according to the American Lumber Standards adopted by the lumber associations and recommended by the U. S. Department of Commerce for the benefit and protection of the public. —(Monthly Bulletin, Associated Builders of Chicago.)

# EVANSVILLE

## HELD WELL TO FORMER BUILDING LEVEL

### July Figures Just Around Normal

A little over a quarter of a million dollars worth of new building construction for the month of July, as shown by the estimated valuation placed on the permits issued, serves to show that the building business in Evansville is holding close to local normalcy. For instance, in June of this year the total volume was $254,079, and in July, 1923, it was $253,600, this July the figures were $252,427. Last year for the corresponding period the figures dropped to $180,834. Thus the past month shows a 39.5% gain over July, 1924, with an increase of 52 in the issuance of permits. As against the June showing July held its own, just a slight fraction of a few thousandths of a per cent loss developing.

During last month there were 310 permits issued, forty-seven of which were for new residences. Of the total permits granted 82 were for repairs, etc., and 222 were for new work.

The permit record for June and July, 1925, and July, 1924, was:

| Period | Per | Est. Val. |
|---|---|---|
| July, 1924 | 258 | $180,834 |
| June, 1925 | 408 | 254,079 |
| July, 1925 | 310 | 252,427 |

# FT. WAYNE

## FOLLOWING TREND SHOWN OVER CORRESPONDING MONTHS IN 1924

### Building Construction At Ft. Wayne in July, However, Shows Gain Over That For July a Year Ago

The building construction movement in Ft. Wayne for the past few months is paralleling that for the corresponding period in 1924. A year ago building activity in the Allen County metropolis reached its peak in May, then in June fell away considerably and showed a further decline in July. Practically the same trend has developed again this year. In May the volume of business mounted to 319 permits at an estimated valuation of $1,571,823. In June it dropped to 230 permits for $1,121,466 and in July it receded to 249 at $856,640.

The bright spot, however, focuses on the fact that the July business tho below that of June this year, shows an 11.35% increase over the volume of new building construction posted in July, 1924.

The official figures put out by the city building inspection department for the July periods of the years are:

| Time | Per | Est Val. |
|---|---|---|
| July, 1925 | 249 | $856,640 |
| July, 1924 | 285 | 769,272 |

# GARY

## SLIGHT LOSSES REGISTERED BY GARY'S BUILDING OPERATIONS DURING MONTH OF JULY

### Temporary Let-up of Bristling Activity That Has Marked the City's Building Circles This Season

After going along at a great building clip month after month for the first half of 1925, a performance that gave Gary the second best building total in the state over the period from January 1st, to June 30th, inclusive, a slight reaction set in in July that pulled the total down below that of June and considerably underneath the July, 1924, volume.

Despite the lessening of activity last month's building business estimated a total valuation of $816,540, which in reality is not a figure to be ashamed of. This was but 14.6% behind the preceding month's business. However, in July a year ago the city building permits granted carried an estimated valuation of $1,314,315, as a result of that showing the 38% decrease the past month does not stack up so well.

City building inspector Herbert Erickson submitted the following figures:

| Period | Per. | Est. Val. |
|---|---|---|
| July, 1925 | 275 | $ 816,540 |
| July, 1924 | 302 | 1,314,315 |

# HAMMOND

## PRETTY GOOD PAY, CONSIDERING THE CIRCUMSTANCES

### That's What the Youngsters Think

Is it any wonder the rural districts are losing their young man power, and irksome school work fails to lure many boys on to higher learning after they reach the legal limit where they can quit the school room?

Why, one is entitled to ask in the light of present conditions, should a man toil on a farm or spend years of effort and much money in the pursuit of learning to attain a profession when mere youths without any education or years spent in training can, by investing in ten pounds of nails and by practicing a few hours at wielding a hammer, command $16.00 to $18.00 per day as a lather?

Something surely has gone awry and

the old system is out of adjustment, for any young man, who is willing and active can, in two or three months, easily put on thirty bundles of lath in a day, the allotted amount for eight hours work. It don't take brains to make money these days; all one needs is a hatchet, some nails, plenty of lath and a lot of gall and the resultant income will stack up beyond that of the ordinary trained brain worker.

### EVERY CITY FINDS THIS OUT AT SOME TIME OR OTHER

**Hammond Having Trouble With Her Street Car Company**

Given a franchise by a municipality a public transportation concern can assume the superlative in independence. Things soon get to the place where it seems the city is merely incidental to the transportation company, is to be shaped and conducted to suit the latter rather than the latter to be run to accommodate the city.

Hammond has learned the bitter lesson and has been forced to use drastic action to assert her rights.

All along the local street car company has continuously blocked street improvements by steadfastly refusing to pave or keep in repair its right of way thru sundry streets. At last the arrogance was beyond endurance and when the company sought to block the paving of Indianapolis boulevard, the main road to Chicago, by refusing to remove its tracks to the center of the thoroughfare as ordered the governor of Indiana and the State Highway Commission were appealed to by the city officials. The state authorities after reviewing the situation ordered the street car company to relay its tracks in conformity with the approved plans, and if such action is not carried out in a prescribed given time orders have been given the contractor on the work to relay the tracks and charge the cost to the car company.

### HAMMOND BUILDING JOTTINGS

Monday the contractors on the job started moving the buildings on West State street, back twenty-six feet.

The steel forms for the reinforced concrete floor of the new theatre building are now being placed.

Architects report considerable preliminary sketching, numerous inquiries regarding building, and some plans in progress. However, some of the more promising projects are being held up due to difficulty in financing.

The general contract for the new building for the Lake County Times was awarded to J. H. McClay, at $50,000. The plumbing and heating went to Hilbrick & O'Connor for $8,000.

Wittmer Bros., "Robertsdale," are doing their best to build up Hammond. They have just completed seventeen, five and six rooms, bungalows, have thirteen others under construction and are erecting a four apartments building on Davis street.

Architect Mac Turner is preparing plans for a new heating plant for St. Casimire Polish Catholic Church, school, and sisters' house.

The new amusement park has gotten its fool killers into action. Recently the Scenic Railroad or "Blue Streak" bumped off a couple of passengers who didn't believe in signs which read "Don't stand up." They did.

General building activity shows a tendency to slow down. The mills and factories are not working full time nor up to capacity. There seems to be an undercurrent of uncertainty prevailing to put things "off their feed."

—E. E. COLE.

## SOUTH BEND

### THIS YEAR'S BUILDING RUNNING FAR AHEAD OF THAT FOR 1924

**July Served to Further Substantially Boost Present Season's Business**

Ever since January the city has shown a strong tendency to come back in building activity after a lean year in 1924. The good work was continued in July, which added an $812,130 boost to the previous six months total, sending the current year's building volume up to and over the $5,000,000 level.

Tho the last month's figures in dollars were not up to those of June by 23.4%, nevertheless, there were more permits issued showing an increased activity. On the other hand, the July total volume of building business was 190.57% greater than that of July, 1924, a real gain, probably the best recorded in the state.

As for the business for the first seven months of 1925, the volume shows a gain of 52.5% over that for the corresponding period last year, $5,296,496 as against $3,504,487.

The official figures for July, 1925, and 1924, are:

| Time | Per | Est. Val. |
|---|---|---|
| July, 1925 | 527 | $812,130 |
| July, 1924 | 368 | 279,461 |

# Sealed Proposals

NEW SCHOOL BUILDING FOR PHYSICAL EDUCATION AND HEATING, PLUMBING AND ELECTRIC SYSTEMS
NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Trustees of the School City of Rushville, Indiana, will receive bids up to the hour of one o'clock p. m. of August 21, 1925, at the office of the Superintendent of Schools, Rushville, Indiana, for the funishing of all materials and doing and performing all the necessary labor and work, according to the drawings, specifications and details as prepared by McGuire & Shook, architects of Indianapolis, Indiana, now on file in the office of said Trustees and accepted and approved by them with separate bids for the erection and construction of the building, the plumbing, the heating and ventilating, and electrical installment in and for said building, located in said City of Rushville, Indiana. All bids must be on forms prescribed by the State Board of Accounts.

Each bidder on said items named above will be required to file with his bid a certified check for a sum equal to one (1) per centum of his bid, payable to Edwin R. Cassady, Treasurer of the School Board, which shall be held by said Treasurer as a guarnaty that if the bidder is awarded the contract for said work, said bidder submitting the same will furnish bond to the approval of said Board of School Trustees, and will enter into a contract with said Trustees for such work within a reasonable time, not exceeding 10 days from the date said award is made, and failing so to do, said certified check or checks will be and become the absolute property of said School City. Checks of unsuccessful bidders will be returned to them.

Payments will be made on said work monthly during and as the work progresses and in strict compliance with the laws of the State of Indiana. Successful bidders will be required promptly on and at the time required by said School Board, to enter into a written contract for the performance of said work, as awarded, and will be required to give bond in a sum equal to the amount of their bids, with sureties thereon to the approval of said School Board, for the faithful performance of their contracts and for the payments of all persons performing labor thereon, and furnishing material therefor and for all sums justly due them.

A true and correct copy of the drawings, specifications and details of said work of the general construction and mechanical istallations will be found on file in the office of the Architects, and the office of the Board of School Trustees, and at the office of the State Board of Accounts.

All bids must be accompanied by proper affidavits as to non-collusion, properly signed and executed by the bidder and by the certified check or checks as hereinbefore indicated, and must be sealed and filed on or before the above named date, not later than the hour above named.

Each bidder receiving copies of the drawings or specifications from the Architects will be required to deposit as surety for their return to the Architects in good order upon the day of the letting, the sum of Fifteen ($15.00) Dollars.

The right is reserved by said Board of School Trustees to reject any and all bids. The estimated cost of said above work is the sum if Fifty Thousand ($50 000.00) Dollars.

Warder H. Wyatt,
Allie Aldridge,
Edwin R. Cassady,
As Board of Trustees of the School City of Rushville, Indiana.

August 1st, 1925.

## I. S. A. SCHEME LAUNCHED YEARS AGO SOON TO ASSUME DEFINITE FORM

### New State Building Regulations A Monument to Co-operative Organized Effort

According to current indications the prospect is that the opportunity will shortly be presented to the members of the Indiana Society of Architects, whereby those of them who have followed the workings of the organization over the past five or six years, will come to realize that the Society is in reality a constructive force for good in the Indiana building field, and through co-operation with other basic building construction interests, is in a position to exert a power and influence of almost inestimable benefit not only to architects, contractors, engineers and labor but to the public and the commonwealth as well.

Back over a short period of some six or seven years ago there was no real pulsing spirit of co-operation for the general good of the building industry, in fact few if any of those in the various professional and business branches of the state building industry gave such a thing much thought. Each profession and each business involved in construction endeavor in Indiana was going it alone.

However, a spirit of co-operation had seized upon the members of the I. S. A., and that spirit had a tendency to tie the state architectural profession closer together, there was no getting away from the fact and gradually the idea bore in that even a greater and more entensive co-operation could be exercised with the contractors, to the betterment of conditions in the building field by creating broader understandings for the solution of mutual problems.

When the subject was broached it was considered revolutionary and there were those who shook their heads dubiously. Architect E. Hill Turnock, Elkhart, who was then president fostered the idea deeply and, sought to put it into effect. The result was that when the Associated Building Contractors of Indiana held its annual convention that winter, Mr. Turnock appeared before the builders and advanced his constructive theory as he saw it. He went even further and proposed that the architects and contractors work together in an endeavor to secure a State Building Code. The proposition was received with favor, and the possibilities dawned on those possessed of vision. That was the real beginning of a new relationship between the Indiana architectural profession and the contractural interests.

Each year that relationship has grown down through the succeeding administrations of both organizations, broadening as time wore on, until the engineering profession and the representatives of labor felt the urge and joined in on the co-operation movement.

Gradually the proposition for a State Building Code, or state-wide standard building regulations and requirements appealed, took hold, and after strenuous legislative efforts by the architects, contractors, engineers and labor, terminated with the creation of a law that established the Administrative Building Council of Indiana. The Council is composed of the chairman of the State Industrial Board, the State Fire Marshal and the Secretary of the State Board of Health, with an Advisory Committee, made up of representatives from the architectural and engineering professions, contractors and representatives of labor. There is no financial reimbursement for the men thus serving but that did not deter them, rather, they have worked steadily for over a year now codifying the existing state building laws and shaping up standard regulations and requirements. Their research efforts have been exhausting and the data they secured was voluminous. The latest and best proven factors of safety, sanitation, etc., have been threshed out of the mass and are now being compiled.

About sixty per cent of the work toward shaping up the regulations and requirements has been completed, and certain parts of this are to be printed for distribution shortly. There is still much work to be done, but the first tangible evidence of what has been accomplished will be available soon.

This is a great constructive effort and while its final accomplishment would have been impossible without the assistance and co-operation of the Associated Building Contractors of Indiana, the Indiana Engineering Society and the representatives of Labor, nevertheless, the architects can feel a pardonable pride in the fact that it was the Indiana Society of Architects who conceived the idea, sponsored it and worked untiringly with others to gain this end, one of the greatest constructive moves ever attempted in the Indiana building field.

ORGANIZATION AND CURRENT NEWS

## WHO IS RESPONSIBLE?

### Is It the Contractor Or Workman When Current High Wages Fail to Get the Utmost In Efficient Result?

The consensus of opinion generally among building contractors of all classes is that high wages will eventually have a serious effect upon the volume of construction work to be done in any community. Many however believe that when applied to the cost of construction that the percentage of increase would not be serious as compared with costs of material if mechanics would give value received for the high wages they are being paid.

After all it is the public that pays and both the contractor and the workmen being part of the public must necessarily have to pay part of the cost of construction and be in a measure responsible for any let up in building activity. A willing building public will only go along so far and when they find they are being imposed upon by an unjust high rate of wages they will undoubtedly cease building. One contractor discussing the subject of high wages recently made the statement that there were only three trades in the building industry that he could conscientiously say were earning the wages they were getting for an eight hour day. Two of these were $1.50 per hour trades, the other getting 12½ cents less. In these trades he agreed that the high rate which they received did not amount too much because they worked the full eight hours and did not waste any time.

Several other trades he mentioned were absolutely wasting time, coming late to work, quitting before the time they should, having arguments and discussions on the job, killing time constantly at the expense of the employer and the owner. These trades, he stated from his own personal observations did not work on the jobs he visited in any instance more than four hours a day and were certainly not entitled to the pay they were drawing for an eight hour day.

He charged the contractor with the responsibility for this state of affairs. He stated that they did not have the proper superintendents and did not visit their jobs often enough, particularly around both the starting and quitting time. There is a great deal of truth in this statement.

But the greater responsibility rests upon the workmen themselves and the respective labor organizations they are affiliated with. If these practices are continued and no attempt made to correct them, the men themselves will be the sufferers in the long run and will soon have no job to go to where they can mulct the owner and the contractor out of money they do not earn.

Every building tradesman is making almost as much money per day as was paid to men in his trade per week twenty-five years ago and it certainly seems strange that the present day craftsmen do not appreciate the changed condition and make it worth the while of the builders and owners to continue to keep the present rate of pay in vogue for an indefinite period.

## LET-UP IN TOTAL VOLUME OF BUILDING CONSTRUCTION WORK IN INDIANA CITIES SHOWN BY JULY FIGURES

### South Bend, the Big Exception, Having Hung Up a Big Gain Over Corresponding Period a Year Ago

Nine Indiana cities reporting in on the amount of new building construction work passed upon favorably by their respective city building inspection departments and for which permits were issued in July ran up a total estimated valuation of $5,981,201 on the combined volume of business. This was not bad and yet it fails to match either the figures for June this year or July a year ago, trailing by 25% that of the former month and 22.6% that of the corresponding period in 1924. At that there were 145 more permits issued in July than during June this season and 193 more than in July a year ago.

Of the nine cities South Bend, who this season has staged a steady building come-back after a lean year in 1924, continued to bristle with reawakened activity and made the best showing, registering 159 more permits issued in July, 1925, as compared with July last year, while the gain in the volume of business over that of the corresponding period a year ago was 190.57%. Three other cities also showed gains over the July, 1924, figures, Evansville slipping in next to South Bend for second place with 39.5%, next came Richmond with 15.2% gain and Ft. Wayne with 11.35% increase.

Of those cities developing losses from last year's July building business Indianapolis showed the least decline, 24.85%. Gary slipped a little from the earlier season's fast pace and had to take a 38% loss. Terre Haute suffered a 46.7% drop; Hammond, 57.1% decrease, and Muncie trailed them all with a 66.6% loss.

The official building figures of the nine cities as sent in by the city building inspectors are as follows:

| Cities | 1925 Per. | 1925 Est. Val. | 1924 Per. | 1924 Est. Val. |
|---|---|---|---|---|
| Evansville | 310 | $ 252,427 | 258 | $ 180,834 |
| Ft. Wayne | 249 | 856,640 | 285 | 769,272 |
| Gary | 275 | 816,540 | 302 | 1,314,315 |
| Hammond | 126 | 774,600 | 147 | 1,807,875 |
| Indianapolis | 1,599 | 2,228,237 | 1,499 | 2,965,051 |
| Muncie | ---- | 57,802 | ---- | 173,124 |
| Richmond | 64 | 103,660 | 47 | 89,982 |
| South Bend | 527 | 812,130 | 368 | 279,461 |
| Terre Haute | 207 | 79,165 | 258 | 147,865 |
| Total | 3,357 | $5,981,201 | 3,164 | $7,727,779 |

Agreeing to work for a stipulated sum per hour and day and failing to perform one of the essentials of an agreement made in good faith is nothing less than playing a confidence game and obtaining money under false pretenses. The sooner all realize this, the more confidence the contractor will have and the more encouragement it will give the skeptical owner to continue to employ both the contractor and the workmen to help enhance and beautify the community in which they work and abide.—(Bulletin of Building Construction Employers' Association, Chicago.)

## SEEKS UNITED BACKING OF BASIC BUILDING INTERESTS

### Jurisdictional Awards Board to Hold a Special Conference At Washington, D. C.

The National Board for Jurisdictional Awards at a recent four days' session at the Hotel Dennis in Atlantic City took action calling a conference to be held at Washington, D. C., on Tuesday, September 22nd. It is proposed to invite all of the International Presidents of the Trades Unions and the official representatives of the Contractors National Organizations including the Architects and Engineers. Invitations will also be extended to Secretary Hoover and Secretary Davis. The purpose of the conference is to discuss the activities of the Board, the effect of its decisions and its general policy, with a view towards having the aims and purposes of the Board more fully understood and solicit the co-operation of all in its efforts to stabilize conditions and eliminate jurisdictional disputes on construction work. The Board at its meeting heard a number of cases, all of which were of great importance to the industry. The disputants in large numbers attended the hearings and gave testimony. Every session was full of interest and was well worth attending. In executive session the Board rendered the following decisions: Installation of Conduo Base, rehearing granted at the request of the Electricians, the Board decided that in its judgment not sufficient new evidence had been presented to warrant a change and therefore reaffirmed its previous decision made August 2, 1923, awarding the work to the Sheet Metal Workers.

Cutting of Chases, Channels, etc. The Board rendered the following decision. The Cutting of Chases, Channels, Holes and Openings shall be done by the trade which requires them in the instal'ation of its work. The Board also heard evidence in the following disputes. Placing of Reinforcing Rods in Concrete Construction and the setting and sticking of artificial stone, decisions in both of these cases were referred until the next meeting of the Board.

The request for a rehearing of the decision of the Board respecting the installation of metal trim in connection with hollow metal doors and trim for elevator enclosures, was by mutual consent withdrawn and a new request will be presented by the sheet metal workers for action of the Board at its next meeting.

The Board decided in the future that the Chairman and Secretary shall compile a schedule of cases to be heard and set the time for hearings in order that contestants may know at least ten days before a meeting when their cases may be heard.

The next regular meeting of the Board will be held at Washington, D. C., November 9, the first days session being devoted exclusively to executive matters and the rendering of any deferred decisions.

# FT. WAYNE

## CONTRACTORS MAKE MOVE TO AID PROSPECTIVE BUILDERS

### Many of the Best Local Building Operators Arrange Scheme to Facilitate Financing

Home building in Fort Wayne will be given impetus of far-reaching scope and magnitude through the operation of a unique "help the builder" plan, which has just been announced by leading Fort Wayne building contractors. The plan which with one stroke sweeps away entirely the bugaboo of arranging for finances, which so often deters persons from building homes or having badly needed improvements made to their property.

If there is any one thing which for years has proven a major hindrance to the home-building movement it has been the intricacies and complication of arranging finances for the project to be undertaken. Through the co-operative arrangement of the progressive Fort Wayne contractors, this greatest of problems entering into the building of a home or making of needed improvements is entirely eliminated and every indication points to its being productive of a marked increase in home building here.

**No Executive Expense**

The big outstanding feature of the "help the builder" plan perfected by the Fort Wayne contractors is the fact that it entirely eliminates the costly executive expense, which otherwise is attendant to building a home or having improvements done under other arrangements. Other agencies providing finances for home building and improvements, necessarily embody a heavy executive expense and the maintenance of a high salaried staff of salesmen, etc.

All of these factors have been making the building of a home much more expensive than it should be and the contractors feel that through the elimination of these incidental costs they will be ab'e to stimulate building operations in Fort Wayne to a very appreciable extent.

Not only will the contractors, under the new plan, finance new homes but the improvement of the homes, such as building garages, porches, etc., as well. Payments for these improvements can be arranged so as to meet the needs of everyone.

The new plan provides for the contractors arranging with the various trust companies for arrangement of finances for home building for anyone who owns a lot or has any reasonable amount of ready cash.

# GARY

## FREELY PREDICTS RECORD BUILDING YEAR FOR GARY

### Monthly Figures Continue to Justify Stand Taken by Building Inspector Erickson

Nineteen Hundred and Twenty-five will be the record building year in the history of Gary.

For months such has been the prediction of Building Commissioner Herbert Erickson and the recent release of the July building statistics makes the prediction all the more certain.

Every month this year the building records have mounted to or close to $1,000,000 totals, May being the poorest of the lot with $784,100, but at that time there were strikes and much labor unrest, a condition that made itself felt strongly in the building field.

March was the biggest month of the year when nearly a million and one-half dollars worth of new building projects were started.

The total for the first seven months of

the year shows an expenditure of nearly eight and one-half million dollars in new building projects. This does not include the millions of dollars worth of industrial construction that has been done this year.

# HAMMOND

## AHEAD OF JUNE THIS YEAR BUT IN ARREARS OF THE JULY, 1924, BUILDING RECORD

### Last Month's Construction Effort Locally Was Good

Hammond's building record for July reached something like its old time proportions, hitting a total of $773,250. This is more than double the total for June when the figure was $304,753. The total number of permits issued last month by Building Inspector Henry Vis was 125 as compared with 111 for June. But July, 1925, falls far short of July, 1924, when 147 permits were issued aggregating $1,807,875. Several large jobs which got under way last summer took out permits during July, 1924, thus swelling the total materially.

## BIG ADDITION TO CITY'S INDUSTRIAL LIFE UNDER WAY

### To Cost $2,000,000

The newest addition to Hammond's many industries, the Union Tank Car Co., is building its plant in Robertsdale. The site is being leased from the Standard Oil Co., and it is understood that this company is a subsidiary.

The property extends a quarter of a mile south from 129th street and the western boundary is Calumet avenue. The contract for the plant went to a Pittsburgh concern.

Present plans call for a machine shop, foundry, power plant, wheel shop and other units. Total cost will reach $2,000,000.

## PLASTERERS INJECT SOME MORE WAGE HIGH JUMP ANTICS INTO LOCAL BUILDING FIELD

### Shoot Wages Up to $15 Per Day

Just to keep in trim, to refrain from forgetting how to tilt wages when the inspiration comes along, and to let the public know that they are still up to their old tricks, the lathers have raised their own wages to $15.00 per day. Oh, well, it looks as if they were determined to get while the getting is good, or at least keep on boosting their income as long as the public will foot the bill without complaint.

The surprising thing about it all is that they fell short of $20.00 per day for with even figures it wouldn't have taken so much of their time to figure out what was coming their way.

## SEEK CONFERENCE WITH BUILDING TRADES COUNCIL

### General Contractors Not Satisfied With Labor Conditions

The General Contractors Central Council at a recent regular meeting turned its attention to the lathing situation. At the conclusion of the deliberations the secretary was instructed to get in touch immediately with the Building Trades Council and seek to arrange a meeting between the representatives of that body and the contractor's council to go into the conditions that have been brought about by the recent wage boost action of the lathers. There are also some other labor conditions to be gone into and talked over.

## BUSINESS IS GOOD

### Contractors Too Busy to Follow Up Membership Campaign

The membership drive of the B. T. E. A. experienced a lull last week due to the fact that all the contractors on the special weekly committee were so busy they couldn't take out enough time to do any rounding up. The effort is not over and just as the opportunity arises the members will continue the effort to build up the association. Tho many regretted the lapse last week there was one consolation about it all and that was that all our contractors are so busy right now they don't know which way to turn next.

## LATHERS AND PLASTERERS TAKE THEIR CUE FROM CHICAGO

### Action of Contractors There Causes Unrest in Nearby Building Fields

The contractors at Chicago are playing hot with conditions in the adjacent territory which includes the Calumet District. Up there they are paying lathers and plasterers $15 to $20 a day and their bounteousness is draining the surrounding sections. All the lathers and plasterers are rushing to the big city or if not that, are bucking for the Chicago rates.

It is hard to understand how the building business already struggling along under the burden of high construction costs can waddle much farther. Perhaps if a few of the lavish contractors who are dispensing wages with a free hand get stuck with several of these high priced jobs on their hands they will be a little more careful as to costs hereafter.

## HAMMOND BUILDING JOTTINGS

The contract for a $50,000 residence for Wm. Wilkis on S. Hohman St., has been awarded to Fred C. Rowley.

General Contractor John G. Meyers is completing his third six-room bungalow on S. Monroe St.

Wade Petitt is erecting a new Auto Sales and Garage building for the Snodgrass Auto Sales Co., at Calumet and Lyons St. The structure will be two story and basement, 50x110, of brick construction.

The Neilson Development Co. is receiving bids on a four store rooms, four flats building on Broadway, Indiana Harbor, for John Tapajana.

Architect Mac Turner has awarded contracts to Bayless and Million for remodeling and moving back two buildings 20 feet on South State St.

Architects Berry & Co. are preparing plans for an addition to and the remodeling of the Harvey Gostlin residence on South Hohman St.

Plans are being prepared by Architect Charles N. Smith, Chicago, for the new office building of the Northern States Life Insurance Co. The structure will be located at Hohman and Waltham streets, Hammond.

E. E. COLE.

# INDIANAPOLIS

## SMALL PROJECTS BOOST ACTIVITY BUT LESSER COSTS REDUCE VOLUME OF BUSINESS

### July Building Drops Off Considerably Below That of June

Activity in building construction circles at Indianapolis continued brisk through July, in fact, permits issued by the city building inspection department were more numerous last month than in June this season, or in July, 1924 exceeding the aforementioned month by 198, and the latter period by an exact 100. However, the volume of business based on the estimated valuation of the total projects approved was decidedly off, running 41.65% in arears of the June business and 24.85% behind that of July, 1924. The reason for this decline was that last month no really large projects were submitted to the building inspector for the issuance of permits.

Business projects totaled a better volume financially than either in June or July last season, while residential work continued active and practically on a par with the general boom that has prevailed in this class of construction endeavor. Neither in July, 1925 or 1924 were ther any new industrial projects launched.

An analytical line-up of the types of work passed upon favorably, checked from the official city record for July shows the following:

| Kind of work | Per | Est. Val. |
|---|---|---|
| Adds. & Repairs | 1,158 | $ 457,509 |
| Business Buildings | 14 | 509,425 |
| Miscellaneous Work | 199 | 37,936 |
| Public Buildings | 2 | 322,000 |
| Residences | 226 | 954,371 |
| Total | 1,599 | $2,281,237 |

# Sealed Proposals

### SCHOOL BONDS
### NOTICE OF BOND SALE

Notice is hereby given by the Trustee of Washington School Township, Grant County, in the State of Indiana, that sealed bids will be received by him at the Law Offices of Lett & Lett, Rooms 501, 502 and 503 Glass Block, Marion, Indiana, up to the hour of 2:00 o'clock p. m., of Monday, August 31st, A. D. 1925, for the sale or purchase of Forty-seven Thousand ($47,000.00) dollars of school bonds of Washington School Township, Grant County, Indiana.

Said bonds will be 94 in number, dated September 15th, 1925, of Five Hundred ($500.00) dollars each, payable at the First National Band, of Marion, Indiana.

earing interest at the rate of five (5%) per cent per annum, payable semi-annually, on the first day of August, 1926, and on the first day of February, 1927, and on the same dates of each and every year thereafter until fully paid, and maturing as follows, to-wit: August 1, 1926, $500.00; February 1, 1927, $500.00; August 1, 1927, $500.00; February 1, 1928, $500.00; August 1, 1928, $1,000.00; February 1, 1929, $1,000.00; August 1, 1929, $1,000.00; February 1, 1930, $1,000.00; August 1, 1920, $1,000; February 1, 1931, $1,000.00; August 1, 1931, $1,000.00; February 1, 1932, $1,000.00; August 1, 1932, $1,500.00; February 1, 1933, $1,500.00; August 1, 1933, $1,500.00; February 1, 1934, $1,500.00; August 1, 1934, $2,000.00; February 1, 1935, $2,000.00; August 1, 1935, $2,000.00; February 1, 1936, $2,000.00; August 1, 1936, $2,000.00; February 1, 1937, $2,000.00; August 1, 1937, $2,500.00; February 1, 1938, $2,500.00; August 1, 1938, $2,500.00; February 1, 1939, $2,500.00; August 1, 1939, $3,000.00; February 1, 1940, $3,000.00; August 1, 1940, $3,000.00.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and with an order duly entered upon the records of the Advisory Board of Washington School Township, Grant County, Indiana, authorizing and directing the issue and sale of said bonds for the purpose of providing funds for the erection and construction of a new school building for a new consolidated school district, formerly consisting of districts numbered 1, 2, 3, 4, 5, and 8, of said Washington School Township, Grant County, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than their par value.

Sale will continue from day to day until all of said bonds are sold. The right is reserved to reject any and all bids.

HARRY L. WIGGER,
Trustee of Washington School Township, Grant County, Indiana.

Lett & Lett, Attys.
Aug. 15, 1925.

# INDIANA CONSTRUCTION RECORDER

FOR ARCHITECT ENGINEER

Devoted to the Interests of the Indiana Construction and Engineering Industry

FOR SUPPLYMAN CONTRACTOR

VOL. VII INDIANAPOLIS, INDIANA, AUGUST 22, 1925 No. 21

## NEED RECOGNIZED FOR INCULCATION OF HIGHER STANDARDS IN THE GENERAL CONTRACTING FIELD.

### Earnest Builders of the Country Anxious to Instill Principles in Contracting Circles That Will Make For Better Relationships And Inspire Confidence.

One of the big and outstanding efforts of the sincere and serious minded contractors of the country during the past few years has been directed toward raising the standard of the building contracting business by the institution of recognized business methods not only in the conduct of the business itself but in the relationship between it and the allied building interests with also a further aim, that of inspiring the confidence of the public in building affairs.

Among those who are working for the accomplishment of the above is the Associated General Contractors of America, a chapter of which has just been chartered at Indianapolis. Its position as to the conduct of general contracting is clearly set forth in the following article:

During its comparatively short life, the Associated General Contractors of America has achieved among the older professional and industrial organizations, a position of confidence and respect, which it earnestly desires to maintain. This position has been attained principally by persevering effort to promote scientific construction methods, to rid the industry of improper practices and to eliminate waste in its operations. Scrupulous avoidance of any action which might not prove compatible with the public interest or with the rightful interest of other industries, together with the practice of opening all conventions and directors meetings to the public have helped to demonstrate that its purposes are sound and worthy.

So far the guiding principles of the Association, though understood by those who have participated in its activities, have not been clearly enunciated and recorded so that the membership itself, as well as those outside the industry, could know definitely the standards of business conduct for which the organization is striving. The time has now come, however, when these principles should be clearly declared. As an Association, it recognizes and seeks those benefits which accrue from compliance with high ethical standards.

#### Function of Ethics

The function of ethical standards for a society such as this one, is essentially twofold; first, to establish principles of business conduct to be observed by the members in their relations with each other, and second, to establish principles to be observed in their transactions with those who utilize their services. In either sense they represent the minimum requirements for fair competition and honorable dealing.

The philosophy of ethical conduct is not new, nor is it unfamiliar to those men who have grasped the purposes of this Association. It is not necessary therefore, to dwell upon our obligation to declare and follow what years of commercial experience have indicated as sound ethical practice. There are, however, certain practical considerations involved in this matter, which every contractor, and in fact every business man, should recognize.

#### Practical Considerations

The business structure of America founded upon private initiative, has grown so complex that successful government of business conduct by legislation is not only undesirable but practically impossible. Industries and individuals, in order to retain the benefits arising from this free initiative, and to avoid the hampering burdens of regulatory legislation, must themselves accept responsibility for fair and intelligent self-government. Such government does not require a profound knowledge of law and legal procedure, but merely the courage to abide by self-imposed restraints and principles which the intelligent fair-minded majority of any industry clearly understand. Especially in construction, which affects so fundamentally the entire country, is this courage needed.

The Associated General Contractors of America realizes that the vital bearing of the construction industry upon the well-being, comfort and safety of the entire public, injects into the contractor's function an element of professional responsibility founded upon honor and trust. This responsibility requires, among other things, that we seek to improve construction methods, management and service, to eliminate uneconomical and improper practices, and to build responsibility throughout our industry. It surely cannot mean less than the establishment of construction service which will give to the investing public an assurance of skill and faithful performance.

#### Acceptable Principles

There are a number of principles to which the members of this Association can subscribe, but which have not yet been clearly formulated. We can accept without reservation the principle recognized by fair-minded men in every industry that contracts whether written or oral should be carried out according to their bona fide intent, and that disagreement concerning their intent should be settled, if possible, by impartial arbitration.

The attitude of contractors toward their workmen is an element of ethics or fair dealing, and we recognize the vital relation of the welfare and success of contractors to that of their workmen. They should, in their dealings with labor, be guided by principles of justice and fairness, recognizing in this relation high standards of conduct and craftsmanship.

The Associated General Contractors of America is striving to limit its membership to contractors who qualify as to **skill, integrity and responsibility,** and whose dealings are honorable and ethical; and it is perhaps superfluous to

## TESTS OF BUILDING STONE BRING FORTH IMPORTANT INFORMATION

### Effort Made to Get Data on Weathering Ability and Effect of Waterproofing

The investigation of the weathering properties of building stone, consisting of actual freezing and salt crystallization tests, has been continued. Although the process of comparing the resistance of stone to actual freezing is very slow and laborious, it is believed that considerable information as to the weathering qualities has been secured. The series of exposure tests to determine the disintegrating effects of efflorescence under actual conditions of exposure has begun to yield some interesting results. It has been shown that excessive amounts of rain water leaching through limestone masonry can produce disintegration in as short a time as one year. The tests were designed to determine whether a surface treatment of colorless waterproofing will prevent efflorescence under severe conditions of leaching. Some water-proofing materials appear to be beneficial in this respect.

## SCHEMES FAVORED AND ENDORSED BY ARCHITECTS CONTINUE TO SPREAD THRUOUT THE COUNTRY

### Indiana Cities Show Progressive Spirit By Joining Up With Those That Have Adopted Zoning Laws

Zoning and city planning, in which members of the Indiana Society of Architects have been deeply interested for several years, continues to grow in favor throughout the country. According to information from Washington, D. C., government statistics show that among the 47 cities adopting zoning ordinances in 1925 there are four Indiana cities, Elkhart, Gary, Mishawaka and Evansville, that just came thru this week.

The number of zoned municipalities now totals 367. Their combined population is more than 26,000,000.

In four years the number of zoned municipalities has increased more than seven times, according to the division of building and housing of the department of commerce which points to only 48 cities and towns with a combined population of 11,000,000 in September, 1921.

Twenty-seven of the 33 largest cities in the United States now have adopted zoning ordinances, the latest being Denver. Hartford, Conn., and New Bedford, Mass., are among the cities of over 100,000 population, which joined the zoned cities' list since January 1, last.

During the first six months of this year zoning legislation was enacted by Arizona, Idaho, Maine, New Hampshire and Utah. Four of these states used the "standard act" of the department of commerce in drafting their laws.

The ordinances adopted by Elkhart, Gary and Mishawaka are designated by the U. S. Department of Commerce as "comprehensive," that is, they regulate use, height and area of buildings.

## BRICK PROVES ITS LASTING ENDURANCE

### Many Famous Landmarks Preserved to Posterity by Well-Known Clay Product

Since the earliest dawn of civilization brick has served the world well. Time has proved it to be the one imperishable building material, supreme through all the ages. Europe has been a land of brick houses for hundreds of years and America is now emerging from the "wood age" and leadership in tremendous fire losses. Throughout Europe are magnificent brick buildings hundreds of years old, but still as substantial and even more beautiful than when they were built. Brick is preserving the landmarks of our history. The Old South church in Boston, Faneuil hall in the same city. Independence hall in Philadelphia, the Betsy Ross house, and a host of other historic buildings, all built of brick, are standing as firmly as on the day they were finished.

## ARCHITECTS BUSY ELIMINATING OLD DISORDERLY GARRETS AND MESSY DINGY CELLARS

### Utility a Big Feature Now in Sections of Home Formerly More or Less Catch-Alls

In this day of conservation of space the oldtime cellar, with its dust and general air of disorder is becoming a thing of the past due to the architect who by careful designing is converting the basement to utmost utilitarian purposes. The architect is today working on the theory that there is no room in the modern scheme of things for so much waste space as the oldtime householder took as a matter of course in his garret and cellar. The oldtime attic under the guiding hand of the architect, and by virtue of proper insulation has now become a boys' room and the oldtime cellar, by virtue of the same influence and under the spell of the modern heating plant, can easily become the most attractive of dens or a poolroom. There are furnaces today which are so attractively designed and so easily taken care of that they add rather than detract from the basement, and are the pride and not the shame of the house owner.

## ARE YOU GETTING YOURS?

### NEED RECOGNIZED

(Continued from Page 5)

suggest that no individual possessing these qualifications would attempt to injure the professional reputation, prospects or business of a competitor.

**Need of Interpretation**

Thus in a measure may be outlined some of the fundamental conceptions of construction ethics which we realize must be clearly expressed and generally accepted if this industry is to achieve its rightful place in the industrial world. Mere acceptance of the principles, however, no matter how sincerely accepted does not assure practical application in the daily transactions of business. Individual minds make individual interpretations and, unless there is some elucidation of principle the many minds do not meet and the principle fails in application. Otherwise we should need only the Golden Rule to govern all human activities.

In developing ethical standards, choice lies somewhere between the shortest possible statement and a complete, explicit set of rules attempting to cover all eventualities of the industry. Each of these conceptions has found favor within the membership of the Association. Approval has already been given to the Golden Rule, and certainly all sound ethical codes must rest upon that inspired foundation, but to go no further would leave this very practical industry at the mercy of individual interpretation and consequently without any standard rules of conduct.

Yet at this time it seems undesirable and well nigh impossible to elaborate upon specific points and to develop a comprehensive structure which would completely provide for all questions and phases of the contracting business. This must develop slowly out of experience, if at all.

No code will be final except in its fundamental principles. Our rules of practice will inevitably be modified or added to as experience develops. As ideas on conduct crystallize, various rules which now are merely suggestive may become mandatory, or may be abandoned as it appears to the best interests of the contracting business and the building construction industry as a whole.

## ORGANIZATION AND CURRENT NEWS

### JULY BUILDING PICK-UP TAKEN TO PRESAGE BUSY FALL SEASON

**Encouragement Given By Gains Shown Last Month Throughout the Nation**

A prospect of continued activity in the building industry during the coming fall, is indicated by heavy increases in July permits, according to the national monthly building survey of S. W. Straus and Company, building financiers.

The total in 377 cities and towns was $387,936,257, compared to $274,901,173 in July last year. This was an increase of more than $113,000,000 for 1925.

Of this volume, the 25 leading cities reported 65 per cent, showing that the large centers of population are rapidly re-building in accordance with the popular demand for modern buildings of all types. It is no longer a question of "over-built" or "under-built" conditions, but rather a nation-wide movement to tear down obsolete structures and erect new ones, which will meet the standards and requirements of today.

One hundred and eight eastern cities covered by the survey show a July gain of 65 per cent, the highest of any region. The southern cities, 73 reporting, were second in proportionate gain, having an increase of 38 per cent. The Central West,, 116 cities reporting, had a gain of 29 per cent and the Pacific West, 80 cities, a gain of three per cent.

Many leading cities showed heavy gains. Only four among the volume leaders fell short of July, 1924; Los Angeles, Washington, Baltimore and Milwaukee. New York had a gain of 121 per cent, all boroughs contributing. Philadelphia had a gain of 176 per cent and for the first time displaced Chicago in second position. Chicago was third, with a 46 per cent gain, and Detroit fourth, with a gain of 36 per cent. The leading Southern cities held their boom positions, Hollywood leading the whole country, with a gain of 2382 per cent and Tampa 740 per cent, over July, 1924. Miami Beach was second in proportionate gain with 545 per cent. Other outstanding gains among the larger cities were in San Francisco, Kansas City, Mo.; Toledo, St. Louis, Newark, N. J.; St. Paul, Milwaukee, Pittsburgh, Rochester, Columbus, Ohio, and Buffalo.

### BUILDING MATERIAL SUPPLY MARKET QUOTATIONS HOLD STEADY

**Steel and Lumber Active**

Cost of construction during July was very little changed from that of June. For the most part, prices were maintained at previous levels, though in a few isolated instances there were minor downward fluctuations.

The steel industry witnessed a much better month than it had anticipated. The low stocks and curtailment in proportion has left it ready for gradual improvement. In fact, mill operations are already increased and buying during the month was distinctly more satisfactory. A $2.00 Pittsburgh equivalent continued as the ruling quotation.

Lumber shipment continued to exceed orders. In Southern pine there has been something of a stiffening in price, but present levels are still low. Demand has improved, but wholesalers are refusing to accept orders for future delivery as they feel that the curtailment in mill activities is going to mean more profitable prices in the very near future.

The downward movement in Douglas fir prices was shown to be definitely halted and while no advances of consequence were recorded the trade is quite optimistic as the big inventory is being rapidly depleted and most mills are still running at greatly reduced capacity. In other words, price movements were mixed and small in size.

Linseed oil continued to decline. Wire nails, reinforcing bars, sand and gravel prices were unchanged.

### EXPECTED TO AID HOME BUILDERS

**Deliberations At International Building Congress to Afford Relief in Financing of Small Homes Is the Belief of Returned Delegates**

Members of the American delegation appointed by Secretary Kellog to attend the Fourth International Congress of Building and Public Works held at Paris in June, are back home and have outlined the benefits which builders of small homes in this country may expect to obtain from a world-wide movement initiated at the conference.

Bankers of the forty countries, represented at the Paris conference, are to be asked to devise a means of supplying prospective home owners with a safeguarded form of investment security that will be sound, elastic and more liquid than the present form of security applied to building operations.

The entire movement, in which the strength of the International Chamber of Commerce has been enlisted, is inspired by the expressed belief of the 760 delegates to the conference that under present general banking practice only a limited amount of the savings and thrift accumulations of those who desire to build homes are made available over a protracted period for building purposes.

## EVANSVILLE

### A YEAR'S EFFORT CROWNED WITH SUCCESS

**New Zoning Ordinance to Have An Important Bearing On Future Building Operations**

A city zoning ordinance was unanimously passed by the Evansville city council Monday night. The action followed more than a year of intensive preparation through the city plan commission and the city's zoning engineer, Harland Batholomew of St. Louis.

There was no opposition of any kind to the ordinance. Its passage had been assured several months before when City Attorney John R. Brill, after raising one or two questions as to the constitutionality of the ordinance, approved it when it was rewritten with a few technical changes.

**Divides in Districts**

The ordinance divides the city into various "use" districts, in which, in the future, only certain classes of buildings can be erected, its primary purposes are to maintain uniformly presentable residence districts where factory smoke and odors are reduced to a minimum; to build up specific factory districts where industries will be centered, along transportation and more efficiency thus developed; to improve the general tone of all localities; to regulate and limit the height of buildings erected in the future, and to determine the areas of front yards.

Begun as a part of the work of the city plan commission, the ordinance has been worked out by engineers or others connected with Bartholomew's office. Experts from the office first studied the city minute'y, settling as far as possible the question of the direction of future growth and building up a map of districts.

**Had Several Revisions**

A public hearing on the ordinance was held December 10, 1924, and the ordinance shortly afterwards was prepared in its second revised form. It was again revised in March, 1925, and was rewritten at the suggestion of City Attorney Brill about two months ago.

Although there are numerous districts falling into each of the above outlined classes, some of the more important are:

**Definite Classifications**

"A" residence districts; "B" residence districts; "C" commercial districts—small sections running along important streets, both in the downtown section and in outlying neighborhoods. These are districts for stores.

"D" light industrial districts—a large area northeast of the city wharf, and other smaller areas scattered thruout the city.

"E" heavy industrial districts.

The ordinance, although it cannot affect buildings now standing, will have a vital effect on all future building. It will not, however, work any injustice, as provision is made for a board of zoning appeals which will consider cases in which proposed builders feel they should be allowed special leeway.

Enforcement of the new measure comes within the province of the city building commissioner, Edward C. Kerth. Enforcement will be carried out in the same manner as of the building code—through the issuance of permits to build in certain localities. No building can be done until permits have been obtained from the city building inspection department.

## INDIANAPOLIS

### PRESIDENT JOHN GEIGER OF BUILDERS BOWLING LEAGUE ISSUES CALL FOR THE SEASON'S GET-AWAY

**All Teams Eager to Get Into Action**

There is one unusual movement in the Indianapolis building field not to be found in many localities, and it exerts a splendid influence in building up relationships betwen men in the construction business that is far reaching for good and harmony. Reference is made to the Builders Bowling League, also known as the A. C. E. S. (architects, contractors, engineers and supply men). It includes in its personnel men associated with all branches of building construction and affords an opportunity for social personal contact over a whole winter's period that can not be equaled thru any other channel. Business prejudices, selfishness and petty obstacles that sometimes creep into organizations are crowded out of the bowling league by good fellowship and sportsmanship. There is no place for jealousies in the sport of bowling and no one who harbors such spirit can go far in twenty-eight weeks of bowling. The result has been that a fine acquaintanceship has been established thru the agency of the league that reaches out and embraces the business relationships of the bowling architects, contractors, engineers and supply men.

The approach of fall has once more aroused the bowlers to the anticipation of action and preparations are now underway for the opening of the league season Friday, September 4, 6 P. M., at the Central Bowling Alleys.

As heretofore, there will be eight five-men teams and all captains are urged to get their teams lined up. The aggregations composing the league this year will be; Hugh J. Baker & Co., Brant Bros., Central Supply Co., Geiger & Peters, Indianapolis Electric Supply Co., Thumbtacks, Wege-Stanford, Walter W. Wise.

John Geiger of the Geiger & Peters Co., is president of the league and W. H. Dwyer, Central Supply Co., is the secretary.

### LABORITE TRIAL THAT WILL BE FOLLOWED WITH INTEREST

The trial of John J. McNamara, secretary-business agent of the local union of Structural and Ornamental Iron Workers at Indianapolis, is scheduled to begin on September 14. The indictments against McNamara were returned in Criminal Court by the Grand Jury of Marion County on October 9, 1924, and include four counts charging blackmail and alleging that McNamara by threats and intimidation attempted to obtain "certain pecuniary advantages" in the employment of union iron workers on different buildings; that he threatened to injure the person and property of certain designated persons in an effort to compel them to employ union iron workers in certain cases, and in another instance to compel the discharge of certain persons and the employment of union iron workers in their stead. The indictments do not charge him with sabotage.

## HAMMOND

### ELASTICITY REMARKABLE

You have watched, now and then, haven't you, someone stretch a rubber band farther and farther and farther, until you thought it would break, and still the elasticity continued even under greater strain? Well, it would seem the building industry was capable of such a degree of elasticity and in view of conditions one is inclined to wonder just how much more strain it can endure before the break comes under the applied force of ever advancing wage rates.

The boosting, started by the building trades some years back, was viewed with concern by many who freely predicted that the industry could not stand further wage increases. However, one advance was followed by another until it seemed the limit of endurance had been reached. The scales soared to $10.00 per day and it was thought that was the peak that would exert a strong influence in retarding active operations. Much to the surprise of those on the inside, building construction work went right along. Came further wage tilts and scales mounted to $12.00 per day. Quite some few held their breath. The expected lull, crash, or whatever was expected failed to materialize, instead, things moved right along just about as usual. At present some of the trades are commanding from $15.00 to $20.00 per day, 50% to 100% more than several years ago, still, building goes on.

On the other hand men employed in the mills, on the railroads and in other industries are receiving but half as much per hour as many building trades mechanics, and in a great many instances the formers' occupations are much more hazardous than those of the builder. Further, many mill workers and railroadmen have to undergo longer periods of training before they become sufficiently efficient to command top wages.

And yet the building trades mechanics are not to be criticised, it is but human to get all one can when the getting is good, in other words, to make hay when the sun shines, and just so long as the building public who invests its money in the construction field is willing to meet the wage demands made upon it, "pay the freight" as it were the building industry will not suffer. But, when the public bucks, then look out for the snap of the rubber band, and, when that time comes the recoil is liable to sting labor a pretty good lick, leaving it with high wages but no work upon which to collect.

### THEN AND NOW

**Quite a Change in the Wage Situation**

It is not so many years ago, in fact many a contractor of today who was then on the firing line as a craftsman can easily recall the time, when carpenters and other building trades mechanics were glad to collect in their pay envelopes for a whole week's work, a sum not far exceding the wage now prevalent for two days' effort, and, too, in those by-gone days it was a ten-hour shift. In addition, men vied with each then for artistry in their work, it was not so much a case of just putting in time.

It is true times have changed, they always do, and there is no denying the fact that the Unions have bettered the pay of their members, and yet, while the men are better off financially, have they not been robbed of the incentive to work, a pride in their craft, by the wealth of restrictions that hedge in production, that lower competition, and take from the rank and file an initiative that makes work worth while?

### HAMMOND BUILDING JOTTINGS

Architects A. C. Berry & Co. are receiving bids for the construction of a store and living rooms for A. H. Tapper at Van Buren street and 15th avenue.

The above firm also has a set of plans ready for contractors for the erection of a third story to the Brooks Community building on Morton avenue in East Hammond.

Architects Buckley & Skidmore awarded the contract for an addition to and the remodeling of the Reformed Church at Lansing, Ill., to Morris Tanis for $20,000.

Architect Mac Turner awarded the contracts for the remodeling of the fronts of the Louis Rothe building, E. State street, for $8,000, and the Jacob Diamond building, $6,000 to Bayliss & Million, also the contract for the Lawrence Cox building on W. State street, to Rufus Danner for $10,000.

Architects Hess & Greenwood awarded the contract for the Nicholson residence on Vine street, to Cochran & Hawk for $14,000. They also have plans out for a one and one-half story brick residence on the south side for the Associated Owners, a realty and building firm, and plans for a one and one-half brick residence on the south side for W. G. Paxton.

---

Work on the new million dollar theatre on E. State street is moving rapidly along. The contractors have the basement and first floor almost completed.

---

Contractors Miller & Yarbaugh are erecting a four apartment building at the corner of Jackson and Standard avenue.

E. E. COLE.

## STILL AFTER THE IRRESPONSIBLE CONSTRUCTION CONTRACTOR

### Standard Questionnaire Advocated by Which to Secure Adequate Information on Qualifications of Bidders

The tremendous increase in irresponsibility and inexperience in the construction industry prompted the Joint Conference on Construction Practises to attempt to work out a plan under which this evil might be minimized. A series of meetings were held which resulted in the adoption of a number of forms including a financial statement, which indicates the bidders' financial standing, an experience questionnaire designed to reveal his past record, and a plan and equipment questionnaire giving certain information with respect to his qualifications for undertaking a specific project. The Conference several months ago at a meeting in Washington, D. C., adopted a resolution to the effect that each committee represented should transmit the questionnaires and financial statement forms to their respective societies for the purpose of obtaining their approval and recommendations for use of the forms.

With few exceptions the laws governing public contracts stipulate that such contracts shall be let to the lowest responsible bidder. Unfortunately there has been no recognized standard of responsibiilty with the result that the term "responsible bidder" has come to mean any one who can furnish a surety bond. That the furnishing of a bond does not necessarily indicate responsibility is generally known and the surety company that writes a bond has not presumed to guarantee that the bidder whom it bonds is responsible. The bonding company merely guarantees that the contract obligations will by some means be fulfilled.

The forms are unqualifiedly recommended by the Joint Conference for use in connection with the award of either public or private contracts and it urges that they be given an immediate and thorough test.

# Sealed Proposals

### HOSPITAL (ADDITIONS)
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Trustees of the Soldiers and Sailors' Orphans' Home Knightstown, Indiana, will receive sealed bids at the office of the Trustee in the Executive Building at the Home, located three miles south of Knightstown, and in Rush County, Indiana, until 3 o'clock p. m., Wednesday Sept. 9, 1925 for the erection and completion of additions and alterations to the present hospital Building and heating, plumbing, and electrical installation all in accordance with the plans and specifications heretofore adopted therefore by the said Trustees, and which are now on file in the said office.

The estimated cost of the work under this contract is $13,000.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid shall be accompanied by a certified check for $300.00 made payable to the Treasurer of the Soldiers and Sailors' Orphans' Home, and will be held by him as a guarantee of good faith that said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid for the due performance thereof, if his or their bid or bids are accepted. The checks of unsuccessful bidders will be returned immediately after the award of the contract. Should the successful bidder fail to enter into a

## SCHOOL HOUSE
## NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee and Advisory Board of Pipe Creek School Township, Madison County, State of Indiana, will receive sealed bids at the office of the Trustee in the City of Elwood, Indiana, up to noon of the 28th day of August, 1925, and that said bids will be opened at the school building in the Town of Frankton, Indiana, at 1:30 P. M. of said day; for the furnishing of all material and performing of all labor for the remodeling and construction and completion of an addition to the school building in said Pine Creek Township in the Town of Frankton.

Plans and specifications prepared by Henkel & Hanson, architects, are now on file in the office of the Trustee in the City Building at Elwood, Indiana. Copies of the same will be furnished to contractors on deposit of the sum of fifteen ($15.00) dollars with the architects, said deposit to be returned on the filing of a bona fide bid by such contractor and the return of the plans and specifications on the day of the opening of the bids. Heating, plumbing and electric wiring plans must be returned within days from the receipt thereof.

All bids shall be made and submitted on Form Number 96—bidding blanks. A certified check of three per cent of the bid must accompany the same, the deposit of the successful bidder to be forefeited as liquidated damages on failure to enter into an agreement for the construction. Contractor to furnish solvent bond equal to one hundred per cent of the contract price. Work to commence immediately and to be prosecuted diligently to completion within a period of one hundred days from the letting of the contract.

The right is reserved to reject all bids.

Bids are to be submitted as follows:

(1) On General Contract.

(2) On Heating and Ventilation.

(3) On Plumbing.

(4) On Heating, Ventilating and Plumbing combined.

(5) Electric Wiring.

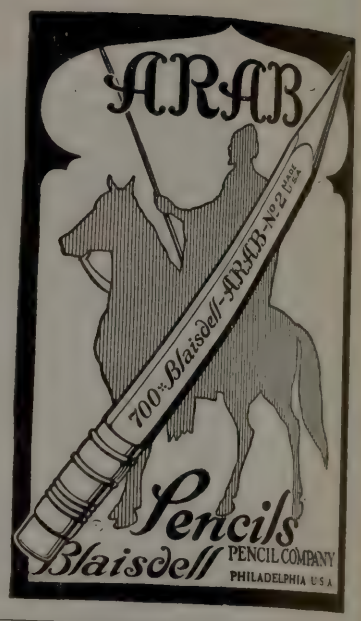
## SCHOOL BONDS
## NOTICE OF BOND SALE

Notice is hereby given by the Trustee of Washington School Township, Grant County, in the State of Indiana, that sealed bids will be received by him at the Law Offices of Lett & Lett, Rooms 501, 502 and 503 Glass Block, Marion, Indiana, up to the hour of 2:00 o'clock p. m., of Monday, August 31st, A. D., 1925, for the sale or purchase of Forty-seven Thousand ($47,000.00) dollars of school bonds of Washington School Township, Grant County, Indiana.

Said bonds will be 94 in number, dated September 15th, 1925, of Five Hundred ($500.00) dollars each, payable at the First National Band, of Marion, Indiana, bearing interest at the rate of five (5%) per cent per annum, payable semi-annually, on the first day of August 1926, and on the first day of February, 1927, and on the same dates of each and every year thereafter until fully paid, and maturing as follows, to-wit: August 1, 1926, $500.00; February 1, 1927, $500.00; August 1, 1927, $500.00; February 1, 1928, $500.00; August 1, 1928, $1,000.00; February 1, 1929, $1,000.00; August 1, 1929, $1,000.00; February 1, 1930, $1,000.00; August 1, 1930, $1,000; February 1, 1931, $1,000.00; August 1, 1931, $1,000.00; February 1, 1932, $1,000.00; August 1, 1932, $1,500.00; February 1, 1933, $1,500.00; August 1, 1933, $1,500.00; February 1, 1934, $1,500.00; August 1, 1934, $2,000.00; February 1, 1935, $2,000.00; August 1, 1935, $2,000.00; February 1, 1936, $2,000.00; August 1, 1936, $2,000.00; February 1, 1937, $2,000.00; August 1, 1937, $2,500.00; February 1, 1938, $2,500.00; August 1, 1938, $2,500.00; February 1, 1939, $2,500.00; August 1, 1939, $3,000.00; February 1, 1940, $3,000.00; August 1, 1940, $3,000.00.



Said bonds have been issued in strict compliance with the laws of the State of Indiana, and with an order duly entered upon the records of the Advisory Board of Washington School Township, Grant County, Indiana, authorizing and directing the issue and sale of said bonds for the purpose of providing funds for the erection and construction of a new school building for a new consolidated school district, formerly consisting of districts numbered 1, 2, 3, 4, 5, and 8, of said Washington School Township, Grant County, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than their par value.

Sale will continue from day to day until all of said bonds are sold. The right is reserved to reject any and all bids.

### NOTICE TO BIDDERS
### LIBRARY BUILDING ADDITION

Sealed proposals for an addition to the Library at Indiana University, also for plumbing, heating, and wiring for same, will be received by the Trustees of Indiana University, at the office of the Architect, Robert Frost Daggett, 922 Continental Bank Building, Indianapolis, up to one o'clock p. m., Tuesday, September 8th, 1925. Plans and specifications can be seen at the offices of the Architect, and the undersigned.

John W. Cravens,
Secretary, Board of Trustees.
Bloomington, Indiana.
August 17, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received up to two o'clock p. m. on Monday, the 14th day of September, 1925, at the office of the Board of Trustees of the school Town of Argos, Marshall County, Indiana, the same being in the school building in said town of Argos, for the construction of an addition to and the re-modeling of said school building. Full details, plans; specifications and data for all of such addition and re-modeling are on file at the office of the undersigned, where the same are open to the inspection of all persons interested. The same are also on file at the office of Garriott and Rammels, Architects, Masonic Temple, Logansport, Indiana.

All bidders will be required to file their bids on forms required by the State Board of Accounts of Indiana, and to accompany such bids with proper affidavits.

Each bidder will be required to file with his bid his certified check in a sum not less than 5% of his bid, payable to the order of the Board of Trustees of the School Town of Argos, Indiana, conditioned to secure the entering into of a proper contract and the giving of a proper and sufficient bond in not less than the amount of the contract by such bidder in the event that he be awarded such contract.

The successful bidder will be required to enter into a contract in a form and give a bond with surety to the approval of such Board, requiring the completion of such work within a time to the satisfaction of such Board and each bidder may state his different bids, if he so choses, for completion of such work at such dates as such bidder cares to fix. Due consideration will be given to such dates and amounts in making award of such contract.

Attention is called to the fact that various alternates are provided for, and bids are requested based upon the use of all alternates fixed.

The estimated cost of such addition and re-modeling is $35,000.00. The right is reserved to reject any and all bids. All bidders must produce satisfactory proof of their experience, ability, readiness to begin work, facilities in equipment, labor and material, and power to finance such work, in case the same is requested by the Board.

Dated at Argos, Indiana, this 15th day of August, 1925.

## "B60" Series Hot Blast Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T .U's. Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX HOT BLAST SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 800 sq. ft. to 25,000 sq. ft. steam

# The BULL DOG FLOOR CLIP

*BULL DOG Floor Clip*
*For 2x2 sleeper. Actual size*
*Also made for 2x3 and 2x4 sleepers.*

## Anchors Wood Floors to Concrete With or Without a Fill

THE BULL DOG FLOOR CLIP,* a one-piece floor anchor, as shown above, is all ready to set in the concrete. The top tabs folded over (as shipped) are out of the way and forgotten. They are left in this position until the time comes to place the sleepers, when the top tabs are raised perpendicular with a chisel, or the claw of a hammer, the sleepers inserted between the tabs, leveled and nailed in place. (See illustrated "Six Quick Steps" for simple method of installation.) Sent on request.

Note the amount of metal embedded in the concrete. This, together with the triple lugs through which the wet concrete can pass, provides perfect anchorage. The 2" and 3" clips are twenty-gauge and the 4" clip is eighteen-gauge, galvanized sheet metal.

You actually save $50.00 to $60.00 per thousand square feet in laying wood floors over concrete by using Bull Dog Floor Clips. The solid one-piece construction feature of Bull Dog Floor Clips is one point in their favor. The large anchorage surface is another. The simplicity of installation is still another. There are many other points of merit that recommend the Bull Dog method of floor anchorage to good architects and contractors.

## If a Fill Is Required You Continue to Save

Bull Dog Juniors are used where building requirements demand a fill. They are the same design as regular Bull Dog Clips and half the width. Made in the same sizes, for 2, 3 and 4-inch sleepers. Write for samples.

FOR SUPPLYMAN CONTRACTOR

VOL. VII INDIANAPOLIS, INDIANA, AUGUST 29, 1925 No. 22

## ETHICAL PRACTICE INTRODUCED INTO THE BUILDING CONTRACTING FIELD.

### Effort Made To Institute Working Principles of a High Order To Place Contractural Industry In a More Estimable Position.

Contracting like other lines of business has suffered and gathered unto itself a certain odium now and then as a result of methods employed by some unscrupulous and irresponsible builders who to gain their point, to get by as it were, have resorted to sharp practices utterly disregarding the consequences that might reflect upon the business as a whole and work to its disadvantage. To overcome those blighting influences the better element of contractors are striving constantly to infuse higher principles of business into the contracting field, to create better relationships between the builders themselves and between the contractors, the owner clients and the allied interests with which they deal.

To that end a set of rules of ethical practice embracing advanced and unimpeachable working principles has been adopted by the Associated Building Contractors of America by which members are to be governed both for their own good and that of the industry.

These rules, the result of careful thought and study, are not held to be complete or perfect but are considered a good starting point and offer a frame work which appears fairly adequate to meet current demands and upon which a safe ethical structure may in time be developed.

#### I. Owners and the Public

Fair and bona fide competition is a fundamental service of our industry to which clients and owners are entitled. Any act or method in restriction thereof is a breach of faith toward this Association and a betrayal of its principles.

But the competition cannot serve its legitimate purpose unless it operates under conditions alike fair to owner and to contractor.

Observance of ethical conduct toward the contractor by those who utilize his competitive bidding will be encouraged in proportion as he himself abides by the ethics of fair competition. Only when he respects the code of this Association can he reasonably ask others to respect it.

Ethical conduct with respect to competitive bidding is defined in the following paragraphs:

1. Competitive bids preferably should be submitted only when a definite time and place for the opening of all proposals has been fixed, at which all bidders or their representatives are permitted to be present.

2. The contractor's professional knowledge is the result of his training and experience and if he is called upon for preliminary estimates or appraisals it is proper that he should be paid in the same manner that engineers and architects are paid for similar service.

3. Bidders should neither seek nor accept information concerning a competitor's bid prior to the opening, nor by any method suppress free competition. It is equally improper for the owners to use bids in an effort to induce any contractor to lower his figures.

4. On private work, if all competitive bids are rejected, new bids should not be submitted within 60 days unless warranted by a substantial change either in the work to be performed, or the market, or other basic conditions affecting cost.

5. The amount of a bid should not be altered after the opening except when substantial change is made in the work, or when further bidding on alternate items is requested. In event of such change or further bidding, the contractor should bid only on the items specified and should increase or decrease the amount of his bid only in proportion to the change or alternate involved. Any reduction of a bid disproportionate to such change or the submission of any alternate which in effect produces such a disproportionate reduction, constitutes unfair competition. This shall not be construed as prohibiting the low bidder from decreasing his bid.

6. Contractors should co-operate in advising architects, engineers and owners with respect to the relative costs of various alternates while plans are being prepared and thus seek to reduce the number of alternates to a nominal maximum.

7. When bids are solicited and received by an owner on a lump sum basis, no competitor other than the low bidder should solicit the work on a percentage basis, or any other form of cost-plus contract, provided however, that any competitor shall have the right to accept the work on a percentage basis if tenedered him without guaranteed maximum cost or at a guaranteed maximum cost not less than his original bid.

#### II. Engineering and Architectural Professions

Local and national co-operation in matters of mutual concern should be the basic policy of members of this Association in their relations with the engineering and architectural professions; the purpose of this co-operation being to establish a clear conception of respective functions and responsibilities, to guard against uneconomical or improper practices, and to carry out constructive measures within the industry.

Ethical conduct toward architects and engineers demands the following:

1. Support should be given to all efforts of these professions to maintain and extend high standards of conduct.

2. Contractors should give full credit to the value of the services rendered by

## INDIANAPOLIS

***Church, Parochial School, Sisters House and Rectory:** $350,00.00, (Plans completed on 1st unit to consist of combination auditorium and gymnasium, 6 room school, & Sisters Quarters, estimated cost $125,000.00). Ready for bids in a few days, 13th and Bosart Sts., Indianapolis. Archt. Henkel and Hanson, 108 Heineman Building, Connersville, Indiana. Owner, Little Flower Parish (R. C.). Rev. Father Charles Duffy, 950 Prospect St., Indianapolis. Face brick over hollow tile, stone trim, struct. steel, comp. roof, steam heating, ventilating system, plmg, electr. wiring, concrete work, steel sash, maple floors, oak & yellow pine trim, art glass. Main church to be erected 1926.

***Colored High School Building:** $500,000. "New Colored High school" adjacent to School No. 17 on North West St. Archt. Harrison and Turnock, 500 Board of Trade Bldg. Owner, Board of School Commissioners, 150 N. Meridian St. Plans about completed. Owner will adv. for bids soon. Brick, concrete and steel, fireproof.

***Office Building:** 8 sty. & bas. 80x55, N. Delaware. Archt. Herbert Foltz, 704 J. F. Wild Buldg. Owner, Lumber Insurance Agency, 518 N. Delaware St. Owner receiving bids to close in a few days. The following contractors are figuring G. C. Leslie Colvin, Continental Bank Bldg., E. C. Starthman Co., Meyer-Kiser Bank Bldg., Schlegel and Roehm, 602 Lexington Ave., Lynn B. Millikan, 501 N. Delaware, Cornell Engineering & Constr. Co. 2611 Cornell, John A. Schumacker Co., 818 Sst. Clair, R. W. Bauman Constr. Co., Service Constr. Co. Castle Hall Bldg., Wm. P. Junclaus, 825 Mass. Ave., Latham and Walters, State Life Bldg., J. G. Karstedt Co., 1027 Lemcke Bldg.

***University Library (addition)** $325,000.00. "Indiana University" Bloomington, Ind. Archt. Robert Frost Daggett, Continental Bank Bldg., Indianapolis., Mechanical Engineer, Charles R Ammerman, Continental Bank Bldg., Indianapolis. Owner, Board of Trustees, Indiana University, Bloomington, Ind. Bids close Sept. 8th, at 1:00 p. m., at the office of the architect. The following contractors are figuring general contract: Cornell Engineering Co., 2611 Cornell Ave., Indpls., E. A. Carson, 406 Broadway, Logansport, Ind., English Bros. Co., Champaign, Ills., State Constr. Co., 1201 E. 30th, Indpls., John A. Schumacker Co., 818 E. St. Clair, Indpls., E. C. Strathman Co., Meyer-Kiser Bank Bldg., Indp!s., Wm. P. Jungclaus Co., 825 Mass. Ave., Indpls.

***Armory Building:** $400,000.00, 4 sty. & bas. 102 195 Penn. between Walnut and St. Clair. Private plans. Owner, Indiana National Guard, William H. Kershner, Adj. General, State Capitol, Indianapolis, general contractor, Ostrom Realty & Constr. Co., Peoples Bank Bldg. Indpls. Plans in progress. Expect to start work in 10 days. Brick, concrete and steel, stone.

***Insurance Office Building:** $250,000, 3 sty. & bas., 75x120, St. Joseph and Meridian Sts. Archt. McGuire and Shook, 320 Indiana Pythian Bldg. Owner, Supreme Lodge Knights of Pythias (Insurance Dept.), Sam Wade, Pres., Indiana Pythian Bldg. Plans in progress. Bids in 30 days. Brick, concrete and steel, terra cotta trim.

***High School:** $500,000.00, 3 sty. & bas., 148x229, (27 class rooms, aud., gymn., art rooms, manual training & domestic science depts., laboratories), West Side, Indianapolis. Archt. Vonnegut, Bohn and Mueller, Indiana Trust Bldg. Owner, Board of School Commrs., 150 N. Meridian St. Plans about completed. Owner will adv. for bids soon.

***Boys Club House and Gymnasium:** Laurel St. and English Ave. Archt. Pierre and Wright, 1133 Hume Mansur Bldg. Owner, Boy's Club Association, Arthur Wolff, Pres., 449 S. Meridian St. Preliminary plans in progress. Mature this winter. Brick.

***Church and Sunday School:** $100,000, 47th and Central. Archt. Herbert Foltz, 704 J. F. Wild Bldg. Owner, Meridian Heights Presbyterian Church, Rev. Thomas R. White, Pastor, 4720 Park Ave., Orville F. Shattuck, Chmn. Bldg. Comm., 5211 Central Ave. Plans nearing completion. Bids this Fall.

***Theater and Club Building:** 19th and Alabama Sts. Archt. Pierre and Wright, 1133 Hume Mansur Bldg., Indianapolis. Owner, Little Theater Society of Indiana, John Reynolds, Pres. c/o Indianapolis Chamber of Commerce, Robert Wild, Treas. c/o J. F. Wild State Bank. Plans in progress. Bids soon. Brick.

***Residence and garage:** $12,000.00. Archt. Pierre and Wright, 1133 Hume Mansur Bldg. Owner, Carl F. Everleigh, c/o archt. Archt. receiving bids. Brick veneer.

***Apartments (19) and Stores (3):** $55,000.00, S. Talbott and Palmer Sts. Archt. Everett H. Crabb, State Life Bldg. Owner, Albert O. Vollrath, 117 E. Palmer St. Owner receiving bids. Stucco over frame.

***Residence and (3) Car Garage:** 2 sty. & bas., 31x70, Washington Boulevard near 38th. Archt. Frederick Wallick, 308 Hume Mansur Bldg. Owner, Harry Goldstein, c/o Goldstein Bros. (Dept. store), Delaware & Wash. Sts. Plans about completed. Ready for bids.

***Residence:** $11,000.00, Edinburg, Indiana. Archt. Pierre and Wright, 1133 Hume Mansur Bldg., Indianapolis. Owner, R. E. Cutsinger, Edinburg, Indiana. Plans completed. Owner ready for bids soon. Brick veneer.

***Country Residence and Garage:** 2 sty. & bas., Liberty, Indiana. Archt. Wilson B. Parker, 507 Board of Trade Bldg., Indianapolis. Owner, Walter Bossert, 703 Continental Bank Bldg., Indianapolis. Plans completed. Owner ready for bids in a few days. Frame.

**Residence:** $6,000.00, 5000 block on Kenwood. Archt. Ed. Doeppers, City Hall. Owner and builder, Cartmell, Burcaw, Moore, Inc., 513 Continental Bank Bldg. Owner builds. Stucco.

***Court House:** Interior rem.), 5 new court rooms, $42,204.75. Archt. Donald Graham, 1126 Hume Mansur Bldg. Owner, Board of County Commrs., Harry Dunn, (Aud.), Court House. Bids in under advisement. Low bidder on general contract, State Construction Co., 1201 E. 30th, $31,840.00. Low on heating and ventilating, Hayes Bros., 236 West Vermont St., $19,600.00. Low on wiring, C. L. Smith Electric Co., $2,450. Low on interior decorating, Hugo Ranja, 1252 Wright St., $1,472.50.

***County Infirmary:** (repair), $13,000. Archt. Donald Graham, Hume Mansur Bldg. Owner, Board of County Commrs. Harry Dunn, Auditor. Bids in under advertisement. Will award general con-

## WAR MEMORIAL CONTROVERSY AT INDIANAPOLIS UNFORTUNATE FOR THE ARCHITECTURAL PROFESSION

### Action of Project's Architects Under Fire

A lamentable situation has arisen at Indianapolis, centering around the great Indiana World War Memorial, that is indeed unfortunate for the architectural profession in that it has focused attention upon conditions that don't reflect to the best advantage upon the profession, giving rise to suspicion in the public mind that produces an influence that will react disadvantageously for some time to come, not only upon the profession but upon the building industry. It is just such unsavory situations cropping out now and then that undo all the good constructive effort that has been accomplished by hard, long tedious work and makes future endeavor harder than previously. Somehow there is an inclination upon the part of most human beings to give sparingly of credit to positive action, rather, they just accept it as a matter of fact and in the accepting are not overly enthusiastic. Yet allow a negative condition to arise and it is seized upon with a relish, gloated over, and not allowed to be forgotten. The influence of the latter situation is far reaching and has a blighting effect upon whatever of confidence may have been built up through conscientious, sincere, crusading toward the establishment of good will.

Recently complaint was registered with the State Board of Accounts relative to an alleged restriction of the specifications covering the reinforcing steel for the foundation work for the main War Memorial Plaza Building and the Accounts Board held up the letting pending an investigation. The latter revealed the fact that the steel specified was a patented article in which the architects of the War Memorial, Walker and Weeks, Cleveland, Ohio, and their supervising engineer, A. H. Tashjian, were financially interested. Tashjian is president of the Rivet Grip Steel Co., whose product was specified, Walker is vice-president, and Weeks is secretary and treasurer. Mr. Weeks, in Indianapolis, Wednesday, admitted his firm's connection as above set forth.

It is alleged by Chief examiner Orr of the Accounts Board that the price per ton of rivet grip steel is $97.00 per ton while other reinforcing steel is $55 per ton, and the cost—had rivet grip steel been used would have been $30,000 in excess of that had other reinforcing steel been employed in the foundation work. New plans and specifications were ordered and Mr. Orr now claims that the new plans submitted have been changed considerably, "loaded up" on concrete requirements that will more than take up the $30,000 it was contended could be saved if other steel was used in place of the patented article specified.

As a result of the interest taken by the Board of Accounts in this huge building project, estimated to cost $10,000,000, for which the Indiana tax-payers will pay, it has been recommended by Mr. Orr to the War Memorial Commission that the arcihtects be dismissed, or, if contract obligations prevent such action that a disinterested architect or engineer be employed to pass upon the drawings and specifications to determine whether the work contemplated is structurally economical in the employment and distribution of materials.

So far the Memorial Commission has taken no action but a meeting of all members is to be held September 3, and that gathering will be watched with interest.

Relative to the new plans and specifications that have been submitted Architect Weeks said it would be hard to tell what would be the effect of the new specifications until he had received bids from contractors.

There are so many things which figure in, he said, that it would be futile to attempt to estimate the difference. He said the difference in the steel process used might or might not be reflected in the ultimate cost of the building. He said, however, that the elements of material, steel, concrete and labor would vary with the different kinds of steel. He said it is true that steel made by the Rivet-Grip process costs more than steel made by other processes, but said such a comparison was unfair because more labor would be required with the other steel.

To architects the most distressing feature of the whole affair is the fact that every effort was made to handle this great memorial project from an architectural standpoint that would shed credit on the profession. A regular regulated American Institute of Architects competition was held for the selection of an architect, T. M. Kimball, Omaha, Neb., past president of the A. I. A., was selected as architectural advisor, and plans were duly submitted. However, at that time there was some dissatisfaction at the rebuffs numerous

## ARE YOU GETTING YOURS?

### WAR MEMORIAL

(Continued from page9)

Indiana architects received when seeking to enter the competition and quite a few found it almost impossible to secure any information regarding the details of the affair. Came the selection of the architect, and the announcement of the choosing of the firm of Walker and Weeks, Cleveland, Ohio, members of the A. I. A., was accepted with gratification by the profession generally as a token that the project would be carried through to completion in full accordance with the high ethical standards as prescribed by the Institute, thus allaying any suspicion that sometimes enshrouds public projects.

Regarding the ethical standards above referred to, a direct declaration put forth by the A. I. A., says, "The architect should not directly or indirectly engage in any of the building trades. If he has any financial interest in any building material or device he should not specify or use it without the knowledge and approval of his client."

In another place under the canon of ethics the institute says that it is unprofessional for an architect: "(1) To engage directly or indirectly in any of the building or decorative trades," and "(3) to accept any commission or substantial service from a contractor or from any interested party other than the owner."

Regardless of the outcome of this entanglement the shadow caused by this unfortunate development will linger for sometime and despite the fact that no Indiana architect is involved, nevertheless, its effect will be felt by the state profession because the public is not prone to forget when such circumstances intrude themselves.

## ORGANIZATION AND CURRENT NEWS

### BIG NATIONAL CONFERENCE FOR BUILDERS CONTEMPLATED

**Sponsored by National Association of Building Trades Employers Will Be Open to All Contractors**

The most important action taken by the Executive Committee of the National Association of Building Trades Employers at its last meeting held in the Old Colony Club, Hotel LaSalle, Chicago, on August 12th was the adoption of a resolution to call a national conference some time this Fall to discuss conditions in the construction industry.

The conference which will be open to contractors throughout the country, regardless of whether or not they are affiliated with the National Association will be similar to the one held in Cleveland on January 5th, 1925, at which time the principle matter considered was the demand for the five-day-week.

The conference held last January, which was attended by representative contractors from the majority of the leading cities of the country was a success. It served to focus the attention of the entire construction industry of the country on the uneconomic demand of certain crafts to institute the short working week, with the result that the majority of the trades decided to abandon their efforts to put the five-day-week into operation this year.

The need for frequent gatherings of contractors to discuss conditions generally in the industry was clearly demonstrated at the former meeting and led the members of the Executive Committee to decide to call a conference for this Fall before any agreements were negotiated for next year. In most cities where contracts are made with labor organizations the demands are presented prior to the first of the year and in many instances the agreements are made on or before January 1st. For this reason it was decided to hold the conference early in the Fall in order that contractors might be fully advised as to probable conditions in the large cities.

In addition to a general discussion of conditions in the industry for next year there will be a number of other important issues brought up at the conference such as the probability of the five-day-week movement being revived once more and many other matters of vital importance to employers of labor in the building industry. The time and place of holding the conference will be determined upon in the near future and further announcements made.

### BRICKLAYER-PLASTERER DISPUTE

**Attempts to Arbitrate Fail**

The latest developments in the controversy between the bricklayers and plasterers comes from Washington to the effect that both contestants are still in a belligerent mood and issuing statements defining their particular feelings and position in the matter. All efforts to have the dispute adjusted by arbitration have up to the present time been futile, the bricklayers refusing to submit their side of the controversy to an umpire until the plasterers agreed to certain conditions which they exact. The plasterers for months have expressed a willingness to submit their case to arbitration and have not exacted any conditions excepting that the dispute as a whole shall be acted upon, they agreeing to accept and abide by any decision made.

The refusal of the bricklayers to submit the case to an umpire early in July prompted the general contractors whose work was tied up all over the country to seek some redress in order that they may get their plastering done. After several conferences they decided to make an agreement with the International Plasterers Organization for the employment of their members. The agreement provides that the plastering work now being done by the so called bricklayer plasterers in disputed territory shall be finished by the men who are now doing the work. In Florida and certain districts in New York and New Jersey, the bricklayer plasterers are doing work. The agreement they say also provides that any new work let in this territory

must be done by members of the Operative Plasterers International.

According to a recent report more that 90 million dollars worth of construction work was being held up on account of the dispute, the plasterers refusing to work for contractors on any of their jobs anywhere who were employing bricklayer plasterers in disputed territory. After the agreement was made by the general contractors with the plasterers all of the men were ordered back to work. The dispute between these two trades has been going on for several years, the real cause perhaps being unknown to many. A statement issued by the bricklayers is quoted which they submitted to a labor department conference as a counter proposal to be used as a basis for arbitration:

The proposal calls for prior withdrawal by the Operative Plasterers union of charters granted to new local unions since Jan. 1 in Florida, with restoration of the agreement in effect between the unions in 1911.

In insisting on these conditions as a basis for arbitration, the bricklayers' union took the position that it was on the defensive in the dispute and that its territory had been invaded by the Operative Plasterers.

The question suggested by the contractors to be considered in the arbitrating of the matter were designed to determine responsibility for the entire dispute, which is based on alleged abrogation of the 1911 and other agreements between the unions.

The question read: "Was the Operative Plasterers and Cement Finishers' International association justified in considering the 1911 agreement abrogated after being notified by the Bricklayers, Masons and Plasterers' International union that they had abrogated the two agreements governing artificial stone and the plastering of walls to receive tile, and would refer these two questions to the national board for jurdisdictional awards?

"After being notified by the Bricklayers, Masons and Plasterers' International union that the two agreements governing artificial stone and the plastering of walls to receive tile were considered abrogated and no longer in effect by the Bricklayers, Masons and Plasterers' International Union of America was the action of the Operative Plasterers and Cement Finishers' International association in establishing locals in the cities and towns in contention in the state of Florida justified or not?—The Chicago Building Construction Employers' Association's Monthly Bulletin.

## PRESENT UNIT COST COMPARED WITH LAST YEAR

### Take Your Choice

The index of building costs compiled by the Federal Reserve Bank of New York indicate that the average expense of building this year has been slightly higher than a year ago, while the cost index of the Engineering News Record reflects a decline of more than 5 per cent. The marked disparity between these two indexes is probably due to the varying importance assigned to the different materials entering into the average. The index of the Federal Reserve Bank is based on the wholesale price index of building materials published by the United States Department of Labor, which gives great weight to the price of lumber, and very little to the price of structural steel. On the other hand, this index is considerably more inclusive than the other, which is based on prices of only a few of the most important materials. The two indexes ascribe about the same importance to the cost of labor—approximately 40 per cent of the total.

The average cost per square foot of floor space during the first five months of this year and corresponding period last year, by classes of building, is as follows:

| Classification | 1925 | 1924 |
|---|---|---|
| Commercial | $5.39 | $5.17 |
| Educational | 6.51 | 5.77 |
| Hospitals and Institutions | 7.92 | 6.83 |
| Industrial | 6.91 | 6.78 |
| Military and Naval | 5.78 | 6.60 |
| Public Buildings | 7.68 | 6.85 |
| Religious and Memorial | 8.63 | 7.44 |
| Residential | 4.87 | 4.58 |
| Social and Recreational | 8.22 | 5.62 |
| Average | $5.47 | $5.06 |

—National Asso. Building Trades Employers Semi-Monthly Bulletin.

## HEAVY TIMBER MILL CONSTRUCTION BULLETIN

### Data of Interest To Architects and Contractors Is now Available

Six plates of details of Heavy Timber Mill Construction with illustrating text made up the latest number of the "Lumber and Its Utilization" series, published by the National Lumber Manufacturers Association. This bulletin, "Details of Heavy Timber Mill Construction," is designed particularly for architects, engineers, general contractors, mill superintendents and others responsible for this type of construction. The plates include two of details of Standard Mill Construction, one of Semi-Mill Construction with stirrups, one of Semi-Mill Construction without stirrups; one of Laminated Mill Construction and one of Miscellaneous Details.

So far as is known, standard construction details are not elsewhere available in simple form. These details are based upon a careful field examination of recently erected buildings built in conformance with well established design principles, and as consequence they reflect current practice in its highest and best form.

The new bulletin may be had by writing to the National Lumber Manufacturers Association office in Washington, D. C.

# INDIANAPOLIS

## POSTAL SERVICE FEELS INFLUENCE OF BUILDING EXPANSION

### Recent Survey Gives Good Idea of the Construction Trend

The effect of the new building construction work that has been going on this summer in Indianapolis is readily apparent in a survey just made public by the local post office. This survey reveals a steady growth and sure development of the city.

The postal statistics show that since March 1597 new homes have been started including eighty-two now under construction. Back in March there were but 775 residences being built which means 822 have been started since then. an average of 164 per month which means a good activity in the house construction field.

Also investigation has shown that 425 new office rooms are being constructed and 131 new places of business.

This is another channel whereby the influence of building construction work on the city readily demonstrates itself and indicates the development.

### MUST HAVE BEEN OF A VERY LOW TYPE

**New Field Entered by Bandits**

Here's a job that ought to be watched. A local newspaper at Indianapolis in mentioning some construction work upon which the Marion County Commissioners had received estimates advanced this startling information, "A. A. Mitchell submitted the lowest of five bandits for the work at the county infirmary." Sounds like there was a safe to be cracked or some other sort of nefarious work to be done.

## HAMMOND

### LABOR REPRESENTATIVES AFTER MEETING WITH CONTRACTORS OFFER AID IN ATTEMPT TO KEEP BUILDING GOING

**Temporary Halt Results From Action of Lathers**

It may be that a way out of the annoying nad unfavorable situation that has arisen over the attitude assumed by the lathers has been found. Some weeks ago those craftsmen arbitrarily boosted their own wages at a moment's notice and things were thrown all askew.

A few days ago in order to clear up the muddled situation the General Contractors Association held a special meeting with representatives from the Building Trades Council at which conditions were thoroughly discussed. The said representatives promised the contractors to go into the details of the matter and advised they would do all in their power to remedy the situation and would seek to furnish men to take care of the work now in hand.

### BROADCASTS THAT HE WAS NOT GREATLY IMPRESSED

**Radio Failed to Make a Convert**

The secretary of the B. T. E. A., finding some heavy hours on his hand last week took a spin over to Chicago. There he paid his respects to the contractors associations and the B. & M. Mutual Casualty Co., and found everybody busy nor was everyone down hearted over fall prospects. The ride nor the calls had not consumed all the day so the radio show attracted. The secretary says everyone to his own choice but he is glad he was not assigned to that kind of a horse to ride. If the walls had ears in the olden days surely the air these times has a lot of tongue and can make a lot of noise.

### INNOVATION STARTED AT HAMMOND

**Spanish Type House Sans Lumber Makes Its Appearance**

Buildings of modern times are like clothing, furniture, hair dressing, etc., the fashion changes. A new firm has broken over the Hammond building horizon, known as the Building and Realty Service Co., Inc., with them they have brought a type of Spanish stuccoed bungalow devoid of timber, almost. Even the interior of the structure started for L. Hirsch in South View is minus woodwork except for a few doors that wont cost much over $20.00. This concern is also preparing plans for ten other such bungalows to be erected at Elmhurst, Ill.

Someone must have taken the lumber shortage seriously.

### CALUMET BUILDING PROGRESS

Architect Mac Turner, Hammond, awarded the contract to the Building & Realty Service Co., for the construction of a $50,000 hotel and store building. It will be known as the Oliver Anderson building. The contract does not include the heating and plumbing.

Plans are being prepared by the Neilson Development Co., for a store and apartment building on Calumet ave., Whiting. The owner is Fred Gastarich, that city.

Harry B. Olney, Indiana Harbor, was awarded the contract for the erection of a $12,000 garage.

Joe Matlon, landed the contract for John Broskovic's store and flat building in Whiting. The contract price was approximately $24,000.

Frank Crossinant, Harvey, Ill., awarded the contract to Leo Reuth, Hammond, for the construction of a four-room store building.

### ETHICAL PRATICE

(Continued from page 5)

the architect and engineer and neither undermine nor disparage their functions or usefulness.

**III. Sub-contractors and those Who Supply Materials**

The operations of the contractor are made possible through the functioning of those agencies which furnish him with service or products, and in contracting with them he is rightfully obligated by the same principles of honor and fair dealing that he desires should govern the actions toward himself of architects, engineers and client owners.

Ethical conduct with respect to sub-contractor and those who supply materials requires that:

1. Proposals should not be invited from any one who is unqualified to perform the proposed work or to render the proper service, or to whom, in event that his proposal should be the lowest received, the contractor would be unwilling to award the contract.

2. The figures of one competitor shall not be made known to another before the award of the sub-contract nor should they be used by the contractor to secure a lower proposal from another bidder.

3. The contract should preferably be awarded to the lowest bidder if he is qualified to perform the contract, but if the award is made to another bidder, it should be at the amount of the latter's bid.

4. In no case should the low bidder be led to believe that a lower bid than his has been received.

5. When the contractor has been paid by a client owner for work or material, he should make payment promptly, and in just proportion, to sub-contractors and others.

**IV. Operating in Foreign Territory**

The conduct of any member operating within the jurisdiction of a local chapter of which he is not a member and the conduct of members of that chapter should comply with the following:

1. The non-chapter member should ascertain from the local chapter the prevailing scale of wages for the various crafts and should not offer employment at rates in excess of those established.

2. Should a non-chapter member have difficulty in securing a sufficient number of workmen, he should so notify the local secretary, who will take immediate steps to assist him.

3. It is the duty of the local chapter to investigate immediately the difficulties cited and to provide in good faith every assistance that it renders to its own members under similar circumstances.

4. It is the duty of the non-chapter member to abide by the suggestions of the local shapter and co-operate with it without disrupting the prevailing scale of wages.

5. Should the measures undertaken by the local chapter and co-operate with it tion, the entire matter may be placed before the Executive Board of the National Association for its ruling, and such ruling shall be final.

# Sealed Proposals

### HOSPITAL (ADDITIONS) NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Trustees of the Soldiers and Sailors' Orphans' Home Knightstown, Indiana, will receive sealed bids at the office of the Trustee in the Executive Building at the Home, located three miles south of Knightstown, and in Rush County, Indiana, until 3 o'clock p. m., Wednesday Sept. 9, 1925 for the erection and completion of additions and alterations to the present hospital Building and heating, plumbing, and electrical installation all in accordance with the plans and specifications heretofore adopted therefore by the said Trustees, and which are now on file in the said office.

The estimated cost of the work under this contract is $13,000.

All bids must be in writing on Form No. 96 as prescribed by the State Board of Accounts, delivered sealed, and must in every respect conform to the laws of the State of Indiana.

Each bid shall be accompanied by a certified check for $300.00 made payable to the Treasurer of the Soldiers and Sailors' Orphans' Home, and will be held by him as a guarantee of good faith that said bidder or bidders will enter into a contract and execute an acceptable bond for the full amount of his bid for the due performance thereof, if his or their bid or bids are accepted. The checks of unsuccessful bidders will be returned immediately after the award of the contract. Should the successful bidder fail to enter into a contract and execute such bond, then he or they shall forfeit the full amount of said certified check as liquidated damages for the use and benefit of the proper fund of the said Soldiers and Sailors' Orphans' Home.

Copies of said plans and specifications may be obtained from the office of H. M. Griffin, Architect, 105 McFarlan Building, Connersville, Indiana, upon the deposit of $10.00 for each set

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee and Advisory Board of Pipe Creek School Township, Madison County, State of Indiana, will receive sealed bids at the office of the Trustee in the City of Elwood, Indiana, up to noon of the 28th day of August, 1925, and that said bids will be opened at the school building in the Town of Frankton, Indiana, at 1:30 P. M. of said day; for the furnishing of all material and performing of all labor for the remodeling and construction and completion of an addition to the school building in said Pine Creek Township in the Town of Frankton.

Plans and specifications prepared by Henkel & Hanson, architects, are now on file in the office of the Trustee in the City Building at Elwood, Indiana. Copies of the same will be furnished to contractors on deposit of the sum of fifteen ($15.00) dollars with the architects, said deposit to be returned on the filing of a bona fide bid by such contractor and the return of the plans and specifications on the day of the opening of the bids. Heating, plumbing and electric wiring plans must be returned within days from the receipt thereof.

All bids shall be made and submitted on Form Number 96—bidding blanks. A certified check of three per cent of the bid must accompany the same, the deposit of the successful bidder to be forefeited as liquidated damages on failure to enter into an agreement for the construction. Contractor to furnish solvent bond equal to one hundred per cent of the contract price. Work to commence immediately and to be prosecuted diligently to completion within a period of one hundred days from the letting of the contract.

The right is reserved to reject all bids.

Bids are to be submitted as follows:

(1) On General Contract.
(2) On Heating and Ventilation.
(3) On Plumbing.
(4) On Heating, Ventilating and Plumbing combined.
(5) Electric Wiring.

Dated this 6th day of August, 1925.

# *Maximum roof with minimum steel...*

ASIDE from their safety, their durability and their freedom from maintenance expense, Federal fireproof roofs possess another inherent advantage: They require less steel than other types rendering similar service. Note the supporting steel structure for the Federal Cement Tile roof on this building of the Rockwood Manufacturing Company of Indianapolis, Indiana. The long-span, light weight but strong steel-reinforced precast slabs permit minimization of the weight of the entire sustaining structure.

Federal Cement Tile are scientifically made under conditions which compel uniformity of product. There are four general types: interlocking tile for pitched roofs (plain or with glass inserts) and flat and channel sections for flat surfaces. Made, laid and guaranteed by the

## ACTION OF WAR MEMORIAL ARCHITECTS CONDEMNED

### Practice Employed Termed Unethical

Unfortunately for the architectural profession a most unfavorable form of publicity was directed its way through the charges made by the State Board of Accounts against the Cleveland architects, Walker and Weeks, who have the commission to prepare plans for and supervise the construction of the Indiana War Memorial. Those charges were the result of complaints filed with the Accounts Board to the effect that the specification for the foundation of the main building were restricted in the matter of reinforcing steel to the use of a patented material in which the architects were financially interested. An investigation proved the contention and when the plans were ordered changed to allow for open competition the Accounts Board alleges the quantities were increased making the cost excessive.

Since the architects for the work are members of the American Institute of Architects and were selected through the agency of a regulated competition as approved by the A. I. A., the allegations made against them caused a big sensation and it was almost unbelieveable that such practice as alleged had been employed.

While architects naturally withheld judgment until a thorough investigation could be made and a hearing given the accused architectural firm, nevertheless, the circumstances as described were privately condemned, and the fact was bemoaned that any architect or architects would so jeopardize his and their profession.

There were many architects, contractors, engineers and others, who, for the good name of the building industry, secretly hoped that conditions were not as unfavorable as alleged.

However, the charges made by the Accounts Board have been substantiated as regards the specifying of the patented reinforcing steel in which Walker and Weeks are interested, and the recommendation that a disinterested architect or engineer be employed to check the plans and economical use of material has been followed.

The members of the board of trustees of the Indiana World War Memorial decided at a meeting Thursday, September 3, that Walker & Weeks of Cleveland, O., plaza architects, had been unethical in drafting original specifications for the main Memorial building and approved the employment of Prof. W. K. Hatt of Purdue University to check the revised specifications of the architects.

The board, after a closed meeting which lasted for more than five and a half hours at the Memorial headquarters, announced that it would not seek to discharge the Cleveland architectural firm, but would continue an investigation of the Plaza situation.

In a formal statement issued after the meeting, the trustees went on record as feeling that the action of the architects in drafting the original specifications to include a kind of steel in which the architects were financially interested was "unethical" and that the use of such steel in the Plaza was "unlawful."

The statement of the board reviewed the program of obtaining the architects for the Plaza. It further pointed out that one of the staff of the architectural firm, Walker & Weeks had patented a new kind of reforcing steel, and that he and members of the firm organized a company for placing the steel on the market.

Reference was made to the fact that "some $4,000 worth of this steel, not specified by name, but meeting the general specifications was used in the legion building without the knowledge of the trustees."

A summary of the finding of the Memorial trustees is as follows:

"1. That the original specifications were not objectionable in failure to provide for competitive bidding on more than one kind of steel, inasmuch as the specifications could have been met by several suppliers, but were objectionable in the inclusion of a kind in which the architects were interested.

"2. That the action of the architects was unethical and the use of their steel unlawful.

"3.That, however blameworthy the action of the architects, their primary motive back of it is claimed by them to have been to serve not their own interest but that of their client by making available to it what they regarded as a superior method of construction."

During the deliberations of the Memorial trustees Mr. Weeks and Mr. Walker remained in an outside room. Following the decision of the board they were called into the conference room and a formal reading of hte conclusions of the board was made. The architects declined to make any statements.

Another investigation of the Plaza architectural tangle is scheduled, the members of the state board of registration of professional engineers and land surveyors are to meet to consider a complaint filed with the board in whch revocation of the Indiana certificate of the Cleveland firm and its members was demanded. The complaint was filed in the name of Clarence B. Joseph of the S. J. & S. Sales Company, and was presented by Russell T. MacFall and Ira Chase Koehne, attorneys.

In the event the state board of registration does revoke the license of the Cleveland firm, it would not permit that firm to practice in Indiana, thus complicating the case still further, it has been pointed out.

All of which makes a bad mess and links a most undesirable situation to a project the motif of which is unalloyed patriotism and a tribute to the highest degree of Americanism.

## ARCHITECTURAL FIRM CHANGE ANNOUNCED

### New Connection to Maintain Offices at Indianapolis and Logansport

Hubert Marion Garriott and William Gregory Rammel have severed connections with the firms Allen and Garriott, Indianapolis, and Allen, Garriott and Rammel, Logansport, Ind., and will continue the practice of architecture under the name of Garriott and Rammel, Architects and Engineers, with new offices at 1151-52 Consolidated Bldg., Indianapolis, and 4 Masonic Bldg., Logansport, Ind. New catalogs and samples are desired in both offices.

ORGANIZATION AND CURRENT NEWS

## STILL A THREAT

### Five-Day Week Demand Not Disposed of, Just Dormant and Likely to Crop Out Again

Although building trade unions have made no fight for the five-day week this year, there are many indications that the demands will be pressed later on. Agitation for the shortening of the working week is going on in several labor journals and bulletins, and a survey conducted by the New York World shows that such working conditions are gaining in factories and commercial houses, especially in big department stores during July and August.

The World also reports that the movement is spreading in many other establishments. Most of the employes who have been granted the five-day week according to this report have not pressed demands through unions, the shorter week being freely granted by employers. Gains have chiefly affected sedentary workers.

Dr. Eugene Lyman Fisk, of the Life Extension Institute, New York, has been widely quoted as saying, "For clerks, in stores, and other people having sedentary occupations, the five-day week is potentially a good thing. It gives them a chance to get out doors and range around. They need all the air and sunshine they can get."

In the garment trades and some other strongly organized industries, Saturday has in many cases been eliminated from the number of working days. These tendencies cannot but affect the attitude of the building trades unions. These latter have only been prevented from pressing demands for a shortening of the working week by the attitude of the organized contractors, who assumed the initiative at the Cleveland meeting called by the National Association of Building Trades Employers, by condemning the shorter week because of the scarcity of mechanics, the prevalence of bonus payments, and the great amount of overtime work being done in the industry.

Since none of the craft locals that have secured the five-day week have reverted to 44 hours of work and since the agitation for the universal adoption of the shorter week continues it is evident that contractors should be prepared for the eventual formulation of demands to this purpose. It is only by increasing participation in and support of their organizations that contractors can meet this situation as it is only by unified action that the builders will ever be able to successfully protect themselves and the building industry from demands of the above nature that are brewing and will in time assume formidable shape and prove a real menace to a healthy continuation of building operations. —(Bulletin of the National Building Trades Employers' Association.)

## ATTEMPT TO "SNOWBALL" WAGES AGAIN ON

### Warning Sounded to Builders

A number of the larger cities throughout the country are once more reporting that certain of the trades are beginning the pernicious practise of "snowballing" wages. This is particularly true in the case of the plasterers. An excellent opportunity was afforded this craft to take this questionable means of increasing the weekly pay when the men returned to work after having been on strike in certain sections. Contractors are urged to take a firm stand on this issue and refrain from paying bonuses to any craft. The practise of offering higher wages than the going rate never did and never will produce more mechanics. The only thing that it does do is to increase the cost of building, upset conditions in the industry generally and engender a spirit of unrest not only in the ranks of the craft affected but all along the line.

## MAKING STRONGER CONCRETE

### Less Water and Greater Strength

Water is an important ingredient in concrete. Experiments just completed at the Bureau of Standards, Department of Commerce, show that this is just as true with the new quick-hardening high-alumina cements as with Portland cement.

The bureau finds it important to select sand and gravel in proper size gradation since less water is required to make the concrete workable and a greater strength results. The old rule, to use the least amount of water which will make the concrete workable, is found to hold with the new high-alumina cement. In one experiment a decrease of 1 per cent of water was found to increase the strength as much as 26 per cent.

The research is part of the program of the materials laboratories of the bureau upon the useful properties of materials and how they may be enhanced.

A gravel concrete made with the new quick-hardening high-alumina cement generally develops as high a strength in 24 hours as a similarly proportioned Portland cement concrete would develop in 28 days. This quick-hardening feature is notably valuable where ground rentals are high, equipment elaborate, or construction difficult, or wherever delays in waiting for the concrete to attain its strength would be costly.

# EVANSVILLE

## SURPRISING SPURT INJECTS ITSELF INTO BUILDING FIELD

### City Experiences a Fine Construction Period During August

A new impetus got behind local building endeavor in August and when the month was over had sent the largest monthly volume of business thru the city inspection department since that recorded for March 1924. The latter volume was due to the fact that people took advantage of the opportunity of securing permits that month before the new fire zoning ordinance went into effect which would prevent certain frame

construction work being done under the restrictions therein provided for certain specified districts. At that time 143 permits were issued for frame residences alone, and the total estimated valuation of the entire month's business mounted to $549,274. Last month the building work was not induced by any special cause and yet it ran up to $501,455.

Building Commissioner Ed Kerth's records for August, when closed on the night of Aug. 31, showed that 316 permits had been granted for a total estimated valuation as above set forth, this as against 304 permits totaling $252,-427 recorded for the preceding month, a gain of 98.6%. Then, again, the August 1925 figures show a gain of 46 permits and 56.6% in estimated valuations over the record of the corresponding period in 1924.

There were 44 new homes started with an estimated cost of $207,380 or an average of $4,712 bettering last month's record of an average of $3,321 a house last month.

An unusual amount of remodeling and repair work helped to swell the total.

# FT. WAYNE

## CONTRACTORS SEEK TO AID THE PROSPECTIVE BUILDER

### New Finance Plan Arouses Renewed Interest in Contemplated Projects.

Sensing the hesitancy prospective builders have entertained with regard to going ahead with their contemplated building projects, particularly residential work, because of seemingly necessary excessive financing arrangements, the leading contractors in the local construction field evolved a plan recently which promises to save from six to ten percent on the cost of a project.

Already there is evidence that the new finance scheme on building is going to be a big factor in encouraging more building.

The interested contractors who are among the leaders of the city have banded together in a co-operative effort to finance building projects and contend a saving of from six to ten dollars can be saved on every $100 expended for home building or other construction work.

Not only on the larger jobs but on the smaller remodeling or repair work, does the new finance plan inaugurated by the contractors offer the easiest and most convenient terms with the trust companies on such work as porches garages and other things with just as much ease and facility as on the larger and more pretentious contracts.

Divested of its heavy executive expense and high salaried salesmen, home building as many conceive it, has been bereft entirely of its burdens.

## REALTOR PINS FAITH TO INDIANA

### Florida Fails to Sweep Ft. Wayne Man, Who Should Know, Off His Feet

One hears "Florida" at every turn now days and there is not a section in Indiana of any consequence or size who has not felt the influence of the magic lure that has sprung up far below the Mason-Dixon line away down in that south-east peninsula.

Therefore, particularly interesting is the comment of P. E. Johnson, Secy., of the Appraisal Board of the Ft. Wayne Real Estate Exchange who has just returned home from the boom land of the far away southern clime who said:—

"Back Home Again—to Indiana" is the slogan which will ring in the not far distant future in the heart and mind of many a Hoosier who is lured to Florida these days.

Just at this time there is considerable talk among real estate owners as to whether they should put their surplus money into more real estate locally, or employ local real estate men to go to the Florida peninsula and select for them a part of the so-called choice buys there.

A trip to Florida has shown me that with greatly increased prices for food products and living accommodations, only those of wealth can afford to remain there any considerable time. The geographical location of Florida, so far removed from the center of real agricultural activity, will, it is predicted, mean a continued increased cost of living there. While the increased cost of necessities in Florida is admitted, the increased cost of manufactured goods is likewise apparent, due to greater transportation charge for longer hauls.

It should be remembered very few purchasers of real estate in Florida are buying property for their own use. It is safe to say that in 95 per cent of purchases the ultimate consumer is not in sight, those who buy wishing to unload on someone else at a higher price.

How long will the present conditions last? That is the question that everyone is asking. No one can answer it, but, it is conceded by many that unless one has plenty of money to gamble away in Florida, Indiana and her various cities offer excellent opportunities for safe investments in real estate with the finest security in the world behind it—productive farms and diversified industrial activities.

Right here in Indiana are bountiful advantages and for those who are looking for real sound investments there are great opportunities."

## DECREASE SHOWN

### August Building Business Drops Behind That of July This Year and August, 1924

Late summer building operations locally slipped up to some extent in August and failed to measure up to the pace set during the most recent preceding months.

The total estimated valuation of the new work approved at the city building inspection department amounted to $789,300. This was $37,615 or 4.5% behind the July 1925 total, and $307,169 or 28% in arrears of the figures for August, 1924.

# GARY

## ANOTHER MILLION DOLLARS AND OVER MONTHLY BUILDING RECORD TURNED IN

### Gary Going Big

Given "the breaks of the game," as they say in baseball—meaning a little opportunity here and there, luck, as it were—and Gary will crowd most of the Indiana cities off the map this season as far as building operations are concerned.

After bowling along at a good pace that rolled up a $7,000,000 total for the first six months of 1925 she tripped in July and was set back a bit, but she got her second wind in August and forged ahead again at increased speed turning in a monthly volume of new building work that estimated at $1,291,060.

Building inspector Herbert Erickson

freely predicts that the city will do over $12,000,000 of new building construction this season, that is, permits will be granted by his department for that amount of work. Added to that volume will be $20,000,000 worth of construction work by the big steel mills which do not come under his jurisdiction. That should give Gary a $32,000,000 building season for 1925, a wonderful record if attained.

# HAMMOND

## PROPAGANDA STARTED FOR A MUCH NEEDED STRUCTURE

### New City Hall Proposed for the City

An agitation of a construction nature in need of which Hammond has been for years, has at last been launched and it is to be hoped that it will not be long before it will reach a stage of maturity. Reference is made to the proposal that has been suggested that the municipality erect a city building that will be a credit to Hammond which has grown and is still growing rapidly.

If there is one thing needed here it is an up-to-date City Hall capable of adequately accommodating the various departments of the city government. It it a shame and almost unbelievable that a city of Hammond's size and apparently progressive spirit would be content to have her municipal offices housed as they are. There is only one place in town in worse shape and that is the depot of a certain well known railroad.

It seems strange that with a Board of Health, a City Planning Commission, a Welfare Association and many other official and semi-official organizations, to say nothing of the Chamber of Commerce, that no one ever saw fit to concern himself about a decent and imposing municipal building. However, at last, evidently some one with some civic pride, and alive to the necessity, has awakened. Possibly since attention has been focused on the present eye-sore enough civic interest can be aroused that will wake for this much needed proposed structure.

## FATAL BUILDING COLLAPSE

### Serious Accident Occurs at Hammond

Every now and then cities are visited by building construction tragedies and horrors that take their toll of lives and maim and seriously injure those whose lives are not snuffed out. Hammond had her call last week and was visited by one of the worst building accidents that has happened in her history in a long time.

The excavating for the new Anderson Hotel on Calumet Ave., had been completed and the concrete for the foundation was being poured when the structure on the adjoining lot, a two-story affair collasped and slid into the hotel excavation. As a result of the crash one workman was killed, three others were seriously injured and two more slightly hurt.

It is alleged that the excavations for the hotel went below the adjacent building and that sufficient shoring and underpinning was not done to protect the latter structure. An investigation is now under way to determine the exact cause of the accident in order to place the blame.

There are those who have come forward once more to advocate the licensing of contractors as a preventative measure against accidents of a similar nature contending that if a contractor was licensed more care would be exercised in construction work as a means of assuring his responsibility and thus his license would be protected.

## CALUMET BUILDING PROGRESS

Witter Bros., Whiting contractors, have the foundation in for another two story brick apartment building at the corner of Davis and 114th St., Robertsdale.

B. S. Graves is erecting a two story store and apartment building at Conkey Ave. and Garfield St. The estimated cost is $25,000.

Hess & Greenwood, Hammond architects, have plans out for a one and half story brick bungalow, 40x48 at Crown Point, for Wm. Whitaker, to cost $5,000.

Archt. Mac Turner, Hammond, has plans ready for bids on a two story and basement brick garage and sales room for Wm. Love and E. Champaign on Sibley St. He also has plans for remodeling the Spragia Bldg., on S. Hohman St., and the remodeling of a one story brick building at State and Oakley Ave., for P. W. Meyen.

John F. Rahn, general contractor of East Chicago, has about completed the foundation for the $300,000 Elks Club bldg., at East Chicago. The contract for the superstructure will be let in the next week or ten days.

E. E. COLE.

# INDIANAPOLIS

## NEW BUILDING WORK FOR AUGUST ESTIMATED CLOSE TO THREE MILLIONS OF DOLLARS

### Fifty Per Cent of the Work Had to Do With Alterations and Repairs

One of the lowest totals of building permits issued for any month this season was turned by August and yet the estimated cost of the new work approved by the city building inspection department ran up close to $3,000,000.

Despite the non-development of any large projects of notable consequence last month's building volume was 23.16% ahead of that for July this year and only 12.68% in arrears of the total for August 1924.

Just half of the number of permits issued during the month were for alterations and repairs and, strange though it may seem, the estimated cost on these was exactly fifty per cent of the total estimated cost on the month's volume of business. Approximately 20% of the new projects started during the month were residences and the cost of these was 30% of the total estimated cost of all the work approved by the building inspection department.

An analytical survey of the permits granted together with the estimated costs shows the following:

| Classification | Per. | Est. Cost |
|---|---|---|
| Alt. & Repairs | 434 | $1,404,832 |
| Business Bldgs. | 21 | 181,600 |
| Industrial Bldgs. | 1 | 1,000 |
| Miscellaneous Work | 225 | 64,823 |
| Public Bldgs. | 5 | 293,000 |
| Residences | 182 | 864,409 |
| Total, August, 1925 | 868 | $2,809,664 |
| Total, August, 1924 | 1,550 | $3,218,000 |

**Residence:** $4,290.00, 1126-29 Comer. Owner and builder, R. G. Bean, 1128 Cornell. Frame.

**Residence:** $4,500.00, 4842 E. 10th. Owner, Gustave C. Suess, 1130 N. Keystone. Frame.

**Residence:** $4,950.00, 5628 Winthrop. Owner, James Hodgson, Jr., Holliday Bldg.

**Residence:** $4,200.00 3232 Brookside Parkway. Owner, E. L. Cothrell, Fletcher Trust Bldg. Day work. Frame.

**Residences:** (2 doubles) $4,550.00 each. 905-7 and 965-67 N. Linwood. Owner, O. H. Guype, 610 N. Linwood. Frame.

General Builders Supply Company
Merchants National Bank Building
Indianapolis, Indiana.

1925 at the Office of said Trustee, at his residence, in said Washington Township, Shelby County, Indiana, receive sealed bids for the erection, construction and completion of repairs to and an addition to the present school building in the Town of Flat Rock, in said Washington Township, all in accordance with the drawings, plans and specifications therefor, adopted and approved by the said Trustee and the Advisory Board of said Township, and as prepared by Allen & Garriott, architects and engineers, National City Bank Building, Indianapolis, Indiana.

All bids must be on forms prescribed by the State Board of Accounts and must be accompanied by a certified check for not less than three per cent of the gross bid submitted, payable to the said Trustee of said Washington Township, Shelby County, Indiana, and shall be forfeited to the said Washington School Township as aggrieved and liquidated damages, in the event that the successful bidder fails to enter into a contract for the work bid upon and to give the proper surety bond within ten days from the acceptance of such bid; and upon his executing contract and giving bond the check of the successful bidder will be returned. Checks of unsuccessful bidder will be returned.

The right is reserved to reject any and all bids and to take the time provided by law for the investigation of such bids and the qualifications of the bidders by the Township Trustee and Advisory Board and State Board of Tax Commissioners.

Bids will be received on said work as a whole or the separate branches thereof.

Within ten days from the acceptance of bids the successful bidders will be required to enter into a written contract to construct and complete the work covered by the bids, including the furnishing of all material and the performance of all work in conformity with the said drawings and specifications on file in said Trustee's office and also furnish at the same time proper bond with approved security.

All branches and the whole of the work herein mentioned must be completed on or before the first day of June, 1926.

The Advisory Board of said Township shall attend the opening of the bids and the letting of the contract and will consult with and advise said Trustee as to which is the lowest and best bid.

Plans and specifications will be furnished bidder upon making a proper cash deposit for the return of same.

Dated this 27th day of August, 1925.

Delmon Clark,
Trustee of Washington School Township, Shelby County, Indiana.

# INDIANA CONSTRUCTION RECORDER

FOR ARCHITECT ENGINEER

Devoted to the Interests of the Indiana Construction and Engineering Industry

FOR SUPPLYMAN CONTRACTOR

VOL. VII INDIANAPOLIS, INDIANA, SEPTEMBER 12, 1925 No. 24

## MUST COMMAND AND DEMAND SUPPORT OR QUIT

### Most Contractors Associations Are Too Lenient With Members,—Too Lax in Enforcing Member ship Responsibility

The sooner contractors associations impress upon their members that there are obligations to be lived up to and then enforce such responsibility the better it will be for all concerned. As it is generally, an association is formed and everybody is enthused, certain rules are made and unanimously endorsed and adopted. Everything goes along fine for a time and then since no outward trouble develops some of the members sort of lose interest, fail to pay dues, and leave the officers and some of their sincere colleagues to carry on. Thus most associations, crippled from lack of finances and co-operation muddle along in name only getting nowhere, and when times of stress arise are too weak to assert themselves because no solidarity has been established for lack of preconceived and worked out plans.

The members who just dropped away don't pay the agreed upon dues nor do they resign, they just fall out and let things drag. However, when labor troubles or other annoyances arise they rush back to the association for succor and expect it despite the fact that they haven't supported the organization.

Now, that is going to be the story right along until more back-bone is put into association endeavor. If that backbone, earnestness to enforce membership responsibility, disrupts the organization it had better be that than the emaciated, weak, helpless groups of men, called organizations, now in existence.

That associations with constitutions and by-laws have rights that can be enforced has been proven. Only recently the Building Trades Employers Association at Hammond went after a recalci-

(Continued on page 11)

## OPERATIONS IN BUILDING FIELD HOLD CLOSE TO THE JULY LEVEL BUT DROP BELOW THAT SET IN AUGUST, 1924

### Six Cities in Indiana Last Month Made Gains While Five Developed Losses

Summing up the building construction returns from eleven Indiana cities where official figures on operations are kept the totals for August compare favorably with those for July this year both running just about on a par. There were 89 more permits issued during the preceding month but the estimated valuation of the lesser issuance was 1.87% more than the July valuations. A further comparison of the August figures with those of the corresponding period a year ago however, reveals the fact that the business last month was not up to that of August, 1924. There were 279 more permits granted this year in August than last but evidently the projects were smaller in nature as the valuation on the entire month's volume was 10% less than the August 1924 total.

This falling off is traceable mainly to the two cities, Indianapolis and Ft. Wayne, who usually turn in big totals and carry the burden of boosting the state cities' totals. These two in August failed to come thru as substantially as expected, the combined loss for the two, as compared with the valuations of the corresponding period in 1924 amounting to $1,878,447, too large a handicap for the other nine cities to make up, At that the others made up $1,195,654 of the deficit.

Six of the cities developed gains ranging from 42.5% to 208% while five of them recorded losses all the way from 8.9% to 55.8%. Elkhart led the way in gains with 208% to be followed by Hammond, 94.6,% Gary, 73.5,% Evansville, 56.6%, South Bend, 42.99% and Richmond, 42.5%. Those in the loss column were: Muncie, 8.9%, Ft. Wayne, 28%, Terre Haute, 41.2%, Indianapolis, 51.9%, Kokomo, 55.8%.

The official figures reported by the eleven building inspectors for August of both years are:

| | 1925 | | 1924 | |
|---|---|---|---|---|
| Cities | Per. | Est. Val. | Per. | Est. Val. |
| Elkhart | 42 | $ 96,585 | 13 | $ 31,350 |
| Evansville | 316 | 501,455 | 255 | 320,171 |
| Ft. Wayne | | 789,300 | | 1,096,469 |
| Gary | 283 | 1,291,060 | 198 | 743,760 |
| Hammond | 171 | 716,125 | 151 | 367,415 |
| Indianapolis | 1629 | 1,646,722 | 1550 | 3,218,000 |
| Kokomo | 32 | 20,435 | 56 | 49,780 |
| Muncie | 78 | 70,775 | 94 | 77,745 |

## ANENT ARCHITECTURAL EDUCATION

**Report Submitted at Annual Meeting of the Illinois Society of Architects**

IRVING K. POND, Chairman
Committee on Education

This has been a marked year in the history of Architectural Education. The great conference in London, last fall, engineered (conferences to be effective must be engineered—not architected) by the Royal Institute of British Architects was highly successful in bringing together educators and professors and practitioners of architecture from many countries. Interesting papers were presented and exhibits from many architectural schools, domestic and foreign, (our American exhibit in this case being among the foreign,) were hung and duly admired. The exhibits of our schools received and deserved recognition and favorable comment and our papers were listened to with respect. Similar exhibits can be seen every day in the various exhibitions held and in the pages of the architectural press, which were presented. But it takes more than reading papers intelligently and viewing or producing examples of school work to give a man an architectural education—at least to make a man an educated architect—and above all to make an educated architect a man. The end of all education is to make men.

In the architect the man and the artist must combine. The man will dictate the content—the artist will dictate the form. Architectural education today, it would seem to some who have read the papers and viewed the exhibits, is more concerned with developing in the student facility of presentation than with establishing a cultural background from which a worthy content shall emerge clarified in crystalline form. Of course, the processes of education should never cease; that is, the individual to the very end should always be undergoing the processes of education, but that does not mean that the individual is never to outgrow school methods and ideas. There should come a time when the thing itself and the form in which it is to be realized —in which the spirit is to be embodied— should outweigh any question of presentation. With literature form and presentation are one; with architecture, which is builded form, form bears no relationship to pictorial presentation. There is no connection between the two except as pictorial presentation may operate to deceive the uninitiated and to sway the emotions of a technical jury. It has recently been my privilege to scan the question propounded to the architectural adviser in a competition of wide importance and not one question bore upon the form or character of the proposed structure, but almost entirely was a request for a modification of prescribed dimensions or limitations to the end that the drawings might be axially balanced and so be made more telling and effective as presentations. Can the aim of architectural education and practice sink lower?

But to return to the abstract:—Your committee had intended to study architectural education in relation to general education; even to indicate that and how architectural education could become a constituent part of general education; but that the Committee has not accomplished. However, a study was made along those lines and it is to be hoped that some broad-minded publisher may be found who is willing to broadcast it from his presses. It certainly can not harm an innocent and not altogether incredulous reading public although like most theories and pronouncements on education, general or technical, it may do no particular and easily definable or readily discernible good.

## ANOTHER ENDORSEMENT OF VIEW TAKEN BY ARCHITECTS ON CITY PLANNING

**Scheme Makes for Better Citizens Thru Improved Living Conditions Is Theory of English Planner**

Lay out cities properly and the people will be happy and healthy. Scientific planning will diminish social unrest and check crime.

This is the theory of Charles B. Reed, an Englishman, who holds the title of town planner for the Federated Malay states and has come all the way to the United States to talk with officials of the Department of Commerce.

"If the cities of a country are laid out so that the streets are wide and clean, with residential and industrial sections separated, and squallid and unsanitary buildings prohibited by law the people have much better opportunity for health and comfort," Reed said.

"Congested cities and prevalent slums are breeds of anti-social forces. Scientific planning of towns and cities should be a national consideration."

It is in the Malay states, Reed explained. He should know, for his post as town planner is a public office, and he has wide powers. He has had experience with the problems he is now facing in various parts of the world.

He is also authorized to investigate any town and to order streets widened, or to require separation of industrial and residential sections, and make other changes he thinks necessary.

An admirer of Washington, Reed said it demonstrates what can be accomplished in building a city scientifically, beautifully, and sanitarily. He hopes his ideas will be adopted in the United States in building cities yet to be, as well as improving those that exist.

Indianapolis

## ORGANIZATION AND CURRENT NEWS

### MUST COMMAND

(Continued from page 5)

trant member who snapped his fingers at the rules and regulations of the organization and though the matter was carried through several courts the B. T. E. A., won everytime on the affirmative verdict and then on the appeals that were taken by the defendant.

Again another organization, The Building Construction Employers' Association of Chicago took the bulls by the horns and decided to make a test case and see if the agreement signed by the members would stand in Court. This agreement provided that the members should abide by the Constitution and By-Laws of the association, the rules and edicts of the Executive Board. It also obligated the member to make his report for work done promptly and to pay any dues owed in accordance with the rules and By-Laws.

Some few of the members in recent years saw fit to neglect to pay their dues or make any reports and letting them run along month after month, permitted an accumulation which seemed more than they felt warranted in paying, the result being without tendering any resignation in the regular manner they drifted along and felt that inasmuch as they were not paying any dues, that they did not belong to the association. They simply quit of their own accord without regard to the rights of the organization or their just obligations which they assumed when becoming a member of the association. The organization never has coerced a member to make them stay and any member who has tendered his resignation in the proper way, paid his dues in full, has always without question been relieved of his obligations to the organization. The peaceful conditions of the industry during the past three years has lured some contractors into the belief that it was not necessary for them to belong to any organization in their trade, never taking into consideration the fact that this condition was brought about by the organization in conjuncton with other bodies and that the prosperity they were enjoying was due solely to the efforts of those whom they felt disposed to repudiate without first meeting their just obligations.

Early in the year after due notice was sent out, a suit was started against a member of the organization for an accounting and the payment of such dues as would be shown by their books as owing to the association. The last report was made by the member nearly three years ago, the suit was contested by the attorneys of the association for several months. The last demurrer filed by a leading firm of attorneys for the defendants was overruled by the Judge sitting on the case. The final result was that the defendants through their attorneys, submitted an accounting of their books, determined the amount of work they had done, settled up, paid the association by check and the suit was dismissed.

The outcome of this suit established the fact that the members applications and agreements are good and that the members are liable under them for the full measure of any obligation they may owe the association.

Though these procedures are undesirable, nevertheless, they are necessary. if associations are to be what they are purported to be, and if they can't command respect, support, and discipline what reason is there for their being?

---

### SEES STEEL CENTER MOVING WEST TO INDIANA

**Abolishment of "Pittsburgh Plus" Scheme Expected to Benefit Calumet District Greatly**

A significant statement from the Chicago Journal of Commerce on the steel situation goes to the bottom of the economic adjustment which has begun to manifest itself in the wake of the abolishment of "Pittsburgh Plus," to the advantage of the Calumet region.

This journal says: "It is understood that the steel corporation (United States Steel Corporation) plans to scrap a number of important but obsolete mills in the Pittsburgh district in the near future."

This statement is interpreted to mean that these mills will be rebuilt in the Calumet district as the logical result of doing away with the Pittsburgh freight rate on Chicago-produced steel.

The plant being built by the Youngstown Sheet & Tube Co. and the purchase of a plant site by the Jones & Laughlin Steel Corporation, are only the first steps in a huge migration of steel interests to this region, which must follow in order to equalize the "supply and demand" principle which is the basis of all commerce.

"Pittsburgh Plus" was originally intended to regulate supply and demand. In the east there was a large demand and little supply. The reverse was true of the Great Lakes region. In order to commensurate this unnatural condition, the steel interests conceived the idea of charging Pittsburgh freight rates for steel, no matter where it was delivered.

With "Pittsburgh Plus" abolished, the supply and demand principle will see to it that the steel interests will henceforth be centered in the Chicago district, where the demand for the product is greatest.

A report is current here and in the east that the United States Steel Corporation plans to build a large alloy steel bar mill in the Chicago district. Judge E. H. Gary, chairman of the board, has made no official statement concerning the report, but New York advices indicate that he will do so in the near future. The rumor is that the new mill will be electrically equipped and modern in every respect.

It is a known fact that a number of the mills in the Pittsburgh district have become obsolete, and there is a strong

belief that many of them will be scrapped, and rebuilt in the Calumet district. This, at least, is the logical conclusion. Any other action, it is thought, would be foolish.

Another indication that the steel center is moving here is the announcement that the Inland Steel plans to spend $2,000,000 on 77 additional coke ovens and in electrically equipping the No. 1 side of the Indiana Harbor plant. These plans were tentatively announced recently. The Inland is also building its fourth blast furnace in this district, which will add greatly to the production capacity of the leading western independent.

## FOUNTAIN OF YOUTH BACKED OFF THE BOARDS

### Poor Ponce De Leon Was Born Too Soon

While much talk and some action concerning establishing of a five-day week in the construction industry is being found in all parts of the country it is interesting to give attention to developments that came out of the campaign for a 44-hour week in the printing trades.

One of the claims made by the printers' union in connection with this campaign was that the reduction of the working week from 48 hours to 44 hours would prolong the life of a printer nine years. The Employing Printers of America took great interest in this statement and made a keen study of this life-lengthening problem. The result was that the following material appeared in their bulletin.

"Work 44 hours at 48 hours pay, and gain 9 years.

"Work 40 hours at 48 hours pay, and gain 18 years.

"Work 36 hours at 48 hours pay, and gain 27 years.

"Work 32 hours at 48 hours pay and gain 36 years.

"Work 28 hours at 48 hours pay, and gain 45 years.

"Work 24 hours at 48 hours pay, and gain 54 years.

"Work 20 hours at 48 hours pay, and gain 63 years.

"Work 16 hours at 48 hours pay, and gain 72 years.

"Work 12 hours at 48 hours pay, and gain 81 years.

"Work 8 hours at 48 hours pay, and gain 90 years.

"Work 4 hours at 48 hours pay, and gain 99 years.

"No work at 48 hours pay, and live forever.

"By following out this line of reasoning, one cannot but think that the sole reason for a printer dying is that at some time in his early youth he was indiscreet enough to work.

"In looking back over the records of aged people, we have come to the conclusion that Methuselah was surely a printer and never worked at the trade.

"Of course to insure the above recipe working out satisfactory, one must be certain that the shorter work week carries with it the pay of 48-hour week. That is the real secret of its success." —A. G. C. News Letter.

## JUST A LITTLE RETROSPECTION

### Six Years of Organization Effort in the Calumet

The Building Trades Employers Association of the Calumet District was organized April 6th, 1919, for the purpose of promoting the interests of the contractors engaged in the Building Industry in the Calumet region, and to protect the contractor from unfair conditions in conducting his business.

To provide an accurate record of men engaged in the contracting business, who are truly representative, and to protect him against disreputable contractors or others.

To provide united action through a central body, for collective bargaining between employers and employees.

To arrange trade agreements that will insure no stoppage of work during the building season.

To prevent if possible strikes and lockouts, and adjust all trade disputes by arbitration.

To insist on the keeping of all agreements both in letter and spirit.

To provide just and equitable relationship between employer and employees.

To discourage unfair methods, in both the taking and letting of contracts, thereby insuring a square deal to all members.

To inculcate better fellowship, and a more co-operative spirit between all contractors and members.

#### Opposition Encountered

We were immediately met with concerted opposition by Organized Labor, who though being organized themselves refused to grant the contractors the same right, and immediately undertook to break up and disrupt the working of the association, refusing to recognize the right of the contractors to organize, or to deal with them as an association, but claiming the right to make wage scales and working conditions without consulting the contractors or allowing them a voice in the matter.

After several strikes and bitter struggles which cost both the unions and contractors a great deal in time and money, an agreement was finally reached in 1921, which resulted in a better understanding between the unions and the contractors. Since that time agreements have been reached without much loss of time, and by an agreement finally made with the carpenters, carpenter contractors may use the tools in the trade without the necessity of carrying a carpenter's card, and with the plumbers' union six months during the summer season, with the bricklayers, carpenters and laborers, that there shall be no cessation of work but that all disputes that may arise shall be settled by arbitration.

#### The Result of Affiliation with the Associated Building Contractors of Indiana

Through the state contractors' association keeping men at the sessions of the legislature we have been able to defeat the passage of several bills that would have been detrimental to the interests of the contractors.

One of which was a bill to require an inspector on all brick buildings to be paid by the contractor. Two others to increase the compensation insurance

rates, and make them uniform with the old line companies.

**New Aid and Further Progress**

With the aid of the architects and the union headquarters the contractors have succeeded in having a bill passed for a uniform building code.

Through quarterly meetings throughout the state by the contractors' associations, a better undersanding, a more co-operative and a more friendly feeling has been arrived at among the contractors, and problems of interest to the contractors have been met and solved.

**Benefits Far-Reaching, Not Limited to a Few**

A few public spirited contractors whose aim is the betterment of the contracting business, and the upbuilding of the industry as a whole have borne the burden that was necessary to bring about this condition and the contractors at large have reaped the benefits.

Like all similar organizations the weak members that did not have the courage and stamina to keep in the ranks fell by the wayside, but the contractors with courage and business ability have stood solidly together with the aim of bettering the contracting business, the building up of the industry as a whole, and have borne the burden necessary to bring the present bettered conditions, and now from current indication it would appear that the luke warm outsiders are beginning to awaken to the advantage that the B. T. E. A., offers. Possibly the effort has not been in vain, but it has taken a long time to convince and unceasing effort.

# HAMMOND

## A STRANGE PROCEDURE

**Chamber of Commerce Would Replace Collapsed Structure by Public Donations**

As an aftermath to the building collapse that happened in Hammond several weeks ago the Chamber of Commerce got busy, appointed a special committee and started in out to solicit subscriptions for the replacement of the structure that went down. Some donations were received, the lumber and material supply yards are donating material and it is rumored some of the Labor Unions will donate their services along various craft lines.

All of this is very noble and is a fine thing for Mr. Hudson, the owner of the wrecked building, who was in no way to blame for the catastrophe. However, it looks as if a precedent is being established that will be hard to live up to. Surely some one was at fault, and if so Mr. Hudson would have had plenty of recourse for damages. Just to replace a building by such procedure after a serious affair of such a nature is unusual and smacks somewhat of the placing of a premium on carelessness. Why not go to the bottom of it all first and then act?

So far the result of the coroner's investigation has not been made public. Either the papers have not been able to secure the information, or, for some unknown reason did not see fit to publish it.

It is not so much the new building that interests as it is to know what caused the old one to crash without warning.

## HAMMOND BUILDING JOTTINGS

Bernard S. Graves, successor to Rhoads & Graves, contractors, has the foundation in for a six-room frame bungalow on Vine St., Hammond.

Contractor J. Wesley Reed is building a six-room frame bungalow at Standard ave. and Monroe st., for himself.

Archt. Mac Turner, Hammond, let the contract for remodeling the second story of the Sam Tagey building to Guy Young for $15,000. The same architect is making plans for remodeling the front of the Hotel Mee and installing glass partitions on the lobby floor.

Archts. Hess & Greenwood awarded the contract for the McEwen dwelling on Moraine ave., to Geo. P. Pearson & Son at $15,000. They are preparing plans for a one and half story brick dwelling 40x38 on Forest ave., for Irving Betz. Est. cost $14,000.

The new sidewalk is in place and the fence taken down around the new bank building which adds greatly to its appearance and relieves a badly obstructed and dangerous corner.

Hughes & Dalkross who have the contract for erecting the plant of the Union Tank Works in north Hammond sub-let one of the brick buildings to Rufus Danner & Co, for $30,000.

# Sealed Proposals

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that the Trustee's of the Little Flower Parish School will receive sealed proposals on the General Construction of a School to be erected at 13th and Bosart St., at Indianapolis, Ind., until the hour of 10:00 A. M. Wednesday, September 23rd, 1925 at the Catholic Community Center, 1004 N. Penn. St., Indianapolis.

Also for the installation of Heating, Ventilating, Plumbing, Sewerage disposal, and Electric Wiring, all in accordance with the drawings, plans and specifications, prepared by Henkel & Hanson, Architects and Engineers, of Connersville, Indiana, and Bevington & Williams, 523-25 Indiana Pythian Bldg., Indianapolis, Heating and Plumbing Engineers.

Bids may be submitted on form 10 or 96 of public bidding blanks or on private bidding blank forms. Each General bid must be accompanied by a certified check of not less $1,000.00. Other bids shall be accompanied by a certified check of not less $300.00, checks of unsuccessful bidders will be returned.

Signed: Rev. Chas. Duffey, Pastor,
Henkel & Hanson, Architects
and Engineers.

---

### SCHOOL HOUSE
### NOTICE TO CONTRACTORS

Notice is hereby given that Wm. B. McGuirk, Trustee and the Advisory Board of Harrison Township, Vigo County, Indiana, will receive sealed bids at the office of said Trustee, located at 321½ Ohio St., Terre Haute, Indiana, until 2 o'clock p. m. on the 26th day of September 1925 at which time and place said sealed bids will be opened, read and considered for the construction of a new school building on land owned by said township, described as follows: Lot No. 4, in Geo. Glick Sub., in Section 35, Township 12 North, Range 9 West, in Harrison Township, Vigo County, Indiana.

The building is to be reinforced concrete skeleton construction, fireproof throughout, with curtain walls; being basement and two stories in height, with a one story auditorium attached. Also included is the installation of plumbing sewers, heating and ventilating, and installation of electrical wiring and other electrical apparatus for said building for use of said township. All shall be in strict accordance with the plans and specifications as provided therefor, and as further approved by the State Board of Health and the State Board of Accounts.

Estimated cost of building and equipment as outlined, $125,000.00.

The plans and specifications are on file for inspection of the bidders at the office of the Trustee, 321½ Ohio St., Terre Haute, Ind., and at the office of Shourds-Stoner Co., Architects and Engineers, 510 Tribune Bldg., Terre Haute, Ind. Copies are available to bidders for use at their own office upon deposit with the Architect or Trustees of $15.00 to guarantee submission of bid and safe return of same on or before opening of bids.

Separate bids will be received as follows:

1. For general construction of new school building less linoleum floor covering.
2. For linoleum floor covering applied as specified.
3. For the combined general construction of new school building and for linoleum floor covering applied as specified.
4. For the installation complete of heating and ventilating system as specified.
5. For the installation complete of plumbing and sewer systems as specified.
6. For the combined installation of heating and ventilating and plumbing and sewer systems, as specified.
7. For the installation complete of electrical wiring and electrical apparatus as specified.

All bids shall be accompanied by the certified check of bidder in sum equal to at least five per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to trustee.

All bids and proposals to be upon forms as prescribed by the state board of accounts, including necessary noncollusion affidavit. Unless bids are accompanied by above mentioned certified check and made out upon the forms above mentioned the bid will not be considered. Bidder's bond will not be accepted in lieu of certified check.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety company bond, to the trustee in a sum equal to the full amount of the contract or contracts. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in the specifications.

The Trustee and Advisory Board reserves the right to reject any and all bids.

Dated this 1st da yof September, 1925, Harrison School Township, Harrison Township, Vigo County, Indiana.

1925 at the Office of said Trustee, at his residence, in said Washington Township, Shelby County, Indiana, receive sealed bids for the erection, construction and completion of repairs to and an addition to the present school building in the Town of Flat Rock, in said Washington Township, all in accordance with the drawings, plans and specifications therefor, adopted and approved by the said Trustee and the Advisory Board of said Township, and as prepared by Allen & Garriott, architects and engineers, National City Bank Building, Indianapolis, Indiana.

All bids must be on forms prescribed by the State Board of Accounts and must be accompanied by a certified check for not less than three per cent of the gross bid submitted, payable to the said Trustee of said Washington Township, Shelby County, Indiana, and shall be forfeited to the said Washington School Township as aggrieved and liquidated damages, in the event that the successful bidder fails to enter into a contract for the work bid upon and to give the proper surety bond within ten days from the acceptance of such bid; and upon his executing contract and giving bond the check of the successful bidder will be returned. Checks of unsuccessful bidder will be returned.

The right is reserved to reject any and all bids and to take the time provided by law for the investigation of such bids and the qualifications of the bidders by the Township Trustee and Advisory Board and State Board of Tax Commissioners.

Bids will be received on said work as a whole or the separate branches thereof.

Within ten days from the acceptance of bids the successful bidders will be required to enter into a written contract to construct and complete the work covered by the bids, including the furnishing of all material and the performance of all work in conformity with the said drawings and specifications on file in said Trustee's office and also furnish at the same time proper bond with approved security.

All branches and the whole of the work herein mentioned must be completed on or before the first day of June, 1926.

The Advisory Board of said Township shall attend the opening of the bids and the letting of the contract and will consult with and advise said Trustee as to which is the lowest and best bid.

Plans and specifications will be furnished bidder upon making a proper cash deposit for the return of same.

Dated this 27th day of August, 1925.

Delmon Clark,
Trustee of Washington School Township, Shelby County, Indiana.

Brick, reinforced concrete floor and roof constr., struct. steel, cut stone trim, terra cotta ornaments, pressed steel stairs, face brick, glazed brick, hollow tile book vault, steel sash, metal skylights, metal toilet partitions metal weatherstrips, marble, slate, tile and terrazzo work, vault door, ash hoist, linoleum, steam heating system. The following general contractors are figuring: Schlegel and Roehm, 602 Lexington Ave.; Leslie Colvin, Continental Bank Bldg.; E. C. Strathman Constr. Co., Meyer-Kiser Bank Bldg.; William P. Jungclaus Co., 825 Mass. Ave.; R. W. Bauman Co., 319 Bates St.; Cornell Engineering & Constr. Co., 2611 Cornell Ave.; Service Construction Co., Castle Hall Bldg.; John A. Schumacher Co., 820 E. St. Clair St.

**Parochial School:** (addition) $100,000.00, 5 class rooms, manual training shop, domestic science room, combination auditorium and gymnasium, Eastern Ave., near North St. Archt. Henkel & Hanson, 108 Heinemann Bldg., Connersville, Ind. Owner, St. Philip Neri Parochial School Rev. George J. Smith, Pastor, 650 North Rural St., Indianapolis. Plans in progress. Brick, stone trim, comp. roof, extension to present steam heating system.

***School:** (8 rooms grade school, and 2-room addition to school), Bedford, Ind. Archt. The Elmer E. Dunlap Co., 1050 N. Delaware St., Indianapolis. Owner Board of Education, M. P. Abbott, Supt., Bedford, Ind. Plans completed. Owner will advertise for bids shortly. Brick.

**Church:** $175 000.00, (1st unit consists of an auditorium and gymnasium), Lorain, Ohio. Archt. L. H. Sturges, 527 Board of Trade Building. Owner, Church of Christ, A. W. Cinniger, Chairman Building Committee, Lorain, Ohio. Architect selected. Bedford stone.

**Offices and (4) Stores:** $15,000.00, 2 sty. & bas., 50x78, 15th and Illinois. Archt. Bacon and Tislow, 31 West Ohio St. Owner, Eugene H. Darrach, Pres. The Darrach Co. (Investments) 307 Meridian Life Building. Plans in progress. Stucco over hollow tile or cinder Block, steam heat comp. roof.

***Apartments (130) Stores (20) Garages (110):** $300 000.00, New York and Keystone. Private plans. Owner, Forest Row, Inc., 407 Peoples Bank Bldg. Owner receiving bids. Brick, hollow tile & stucco.

***Salesroom and garage:** $25,000.00, 1 sty., 80x120 Rushville, Ind. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Otto Bussard, (garage) Rushville, Ind. Archt. receiving bids. Brick, steel, steel sash, comp. roof, steam heat.

***Insurance Administration Building:** $250,000, 3 sty. & bas. 75x120, St. Joseph and Meridian Sts. Archt. McGuire and Shook, 320 Indiana Pythian Bldg. Owner, Supreme Lodge Knights of Pythias, (Insurance Dept.), Sam Wade, Pres., Indiana Pythian Building. Plans about completed. Archt. ready for bids in a few days. Brick, concrete and steel, terra cotta trim, elevator, steam heat, Tile & marble work, concrete vault vault door, comp. roof.

***Court House:** (rem.). Archt. Donald Graham, Hume-Mansur Bldg. Owner, Board of County Commissioners, Court House, Indianapolis. Previous bids were rejected. Archt. will prepare new plans for extensive remodeling. Definite data later.

***Residence and garage:** $18 000.00, Bloomington, Indiana. Archt. Thornton and Rodecker, College Ave. and Fairfield, Indianapolis. Owner, George Talbott, Bloomington, Indiana. Plans nearing completion. Brick.

***Residence (rem. & add.) garage and Servants Quarters:** $7,500.00, 500 Campbell. Archt. Thornton and Rodecker, College Ave and Fairfield. Owner, William Vogel, care of architect. Plans in progress. Stucco addition.

***Residence:** $10,000.00, 2 sty. & bas., Edinburg, Indiana. Archt. Pierre and Wright, 1133 Hume Mansur Bldg. Owner, R. E. Cutsinger, Edinburg, Indiana. Plans in progress. Rather indefinite as to when bids will be taken. Brick. (Correspondence care of architect.)

***Residence:** $12,000.00 Watson Road. Archt. Pierre and Wright, 1133 Hume Mansur Bldg. Owner, Carl F. Eveleigh, c/o Eli Lilly & Co., 730 South Alabama St. Revising plans. Brick, slate roof, furnace. (All correspondence care of architect.)

***Cold Storage Building:** $15,000.00, 1 sty., 60x120, Kokomo, Indiana. Archt. H. Ziegler Dietz, State Savings and Trust Bldg., Indianapolis. Owner, Mike Mascari (fruits), Jefferson and Pennsylvania, R. R., Kokomo, Ind. Plans completed. Rather indefinite as to when bids will be received, probably spring. Brick, cold storage doors, comp. roof, refrigeration cork insulation, tanks.

***Residence:** $7,500.00, Shelby and Brunswick Sts. Archt. Clarence T. Myers, 412 Penway Bldg. Owner Myron J. Gardner, (electrician) Central Insane Hosp. Owner receiving bids. Brick veneer.

**Viskalt MEMBRANE ROOFS**

*Pliant Under Stress*

*Tile, Slate and Asphalt Shingle Roofing*

*Sheet Metal Work*

**Ralph R. Reeder & Sons**

24th & CORNELL — INDIANAPOLIS

**Residence:** $25,000.00, 2 sty. & bas., 44th and Meridian. Archt. Osler and Burns, Penway Building. Owner, Miss Alexander, 1516 N. Penn. St. Plans completed. Brick veneer, slate or tile roof, steam heat, tile & hardwood floors.

**Power House:** (miscellaneous piping and new smoke breeching) "Indiana University Power Plant" Bloomington, Ind. Engineer, Charles R. Ammerman, 925 Occidental Bldg., Indianapolis. Owner, Board of Trustees, Indiana University, Bloomington, Indiana. Bids close Sept. 22nd at noon, at the office of Provost S. E. Smith, 1008 Merchants Bank Bldg., Indianapolis.

### Contracts Awarded

***Administration Building and Laboratories:** $60,000.00, 2 sty. & bas., 50x100, near Greencastle, Indiana. Archt. McGuire and Shook, 320 Indiana Pythian Building, Indianapolis. Owner, Indiana Portland Cement Co., Continental Bank Bldg., Indianapolis. General contract awarded to Service Construction Co., Castle Hall Bldg., Indpls. Heating and plumbing let to Roland M. Cotton Co. 1720 East Tenth St., Indpls. Reinforced concrete.

***Apartment Building:** (28 apts.), $100,000.00, 3 sty. & bas., 30th and Meridian. Private plans. Owner, Mrs. James B. Howard, 420 Board of Trade Bldg. General contract awarded (without competition) to Lynn B. Millikan, 501 N. Delaware St. Plans in progress. Start work soon. Brick, concrete and steel.

***Motion Picture Theater and Stores:** $100,000. 4213 College Ave. Owner, Clyde Realty Co., G. A. Reed, Pres., 111 Monument Circle. Private plans. General contractor, Ostrom Realty & Constr. Co., Peoples Bank Bldg. Wrecking bldg. on site at present. Start excavating shortly. Brick.

**Apartments:** (22), rem. from building at 21st and Boulevard Place. Private plans. Owner, Mrs. Russell Sullivan, 1431 N. Meridian. General contractor, Ostrom Realty Co., People Bank Bldg. Start work shortly. Work will consist of new steam heating plant, new floors, baths, plumbing, incinerator, in-a-door beds, built-in-features, refrigerators, ranges.

***Church:** (will roof over 1st floor joists for temporary church), $17,000.00, New York and Oxford Sts. Archt. Charles Byfield, Peoples Bank Bldg. Owner, St. Mathews Evangelical Luthern Church, Rev. Louis G. E. Fackler, Pastor, 1918 Hoyt Ave. General contract let to Brandt Bros., Indiana Trust Bldg. Brick, concrete.

**Apartment Buildings:** (4) 8 apts. each $100,000.00 (2) about completed (2) start work soon. West 28th near Meridian. Archt. Clarence Hughes, 911 East 44th . Owner, Everett M. Schofield, 806 State Life Bldg. Owner builds. Brick veneer.

***Girls Double Building:** $75,000.00 "Indiana Masonic Home," 2 sty. & bas., 50x100, Franklin, Ind. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Grand Lodge, F. and A. M., N. Illinois and North Sts., Indianapolis and Indiana Masonic Home, Franklin, Indiana. General contract awarded to Roy Bryant, Franklin, Indiana. Start work at once. Brick, stone trim.

**Sub Post Office Station:** $40,000.00 2 sty. & bas., at 1028 Virginia Ave. Owner Fountain Square Realty Co., Thomas N. Wayne, c/o Indianapolis Light and Heat Co. Lessee Indianapolis Postoffice, Robert H. Bryson, P. M. Brick. Start work ta once.

**Residence:** $11,000.00, 5767 N. Penn. Owner, Alvis D. Ambrose, 326 East 47th. Archt. and contractor, Harvey E. Rogers, 5250 N. Delaware St. Brick veneer and frame.

**Foundry:** (fire rebuild), $10,000.00. Owner, Peerless Foundry Co., 1853 Ludlow. Contract let to W. A. Sides, 121 Garfield.

### INDIANAPOLIS BUILDING PERMITS

**Residence:** double) $6,260.00, 3465-67 Kenwood. Owner, M. L. Carr, 5679 Washington Boulevard. Owner builds. Frame.

**Residence:** (double), $5,250.00, 2451-53 N. Harding. Owner, David Baker, c/o contractor. Contract let to Norman Lee, 1133 Oxford St. Frame.

**Duplex Residence:** $6,700.00, 620 E. St. Clair. Owner, Ethel and John W. Stokes 224 East North St. Contract let to J. C. McDonald, 802 Shelby St. Frame construction.

## ONE OF THE WORST CANKERS IN THE BUILDING INDUSTRY

### Should Be Eliminated

The jurisdictional strike has no apologist. It is perhaps the most harassing and wasteful practice in which trade unions have persisted. As practised in the building trades, it is against the interests of workers and employers alike and imposes high tribute upon rent payers. It is not even defended by the naitonal unions themselves and has been openly condemned by the Federation. This decision should ultimately lead to the conclusion that strikes of this kind can find no room within the law. They are without standing socially, economical'y, legally, morally.

The merits of jurisdictional strikes have been so thoroughly examined and found so completely lacking and without justification on any basis of consideration that there should be an end of them. They should not be accepted in principle and avoided by arbitration. They should be condemned unreservedly by every honest man and outlawed wherever they raise their heads. **If the trade union movement is not moral enough to see that this should be done, strong enough to do it, for what socially good work is it strong enough?**

And it does seem reasonable to suppose that an employer if left to himself will secure the most efficient labor for the particular job he has in hand. If left alone therefore nobody's award could better the matter. If it affects the situation at all it can only be for the worse.—Law and Labor for June.

## FINE GROUND CEMENT MAKES STRONG CONCRETE

### What Government Research Over a Period of Ten Years Reveals

New light on how fine-grinding of cement makes concrete stronger is given by a ten-year research just completed at the Bureau of Standards, Department of Commerce. Experiments prove that fine-grinding makes concrete stronger, especially if greater amounts of cement are used with the sand and gravel. The same increase may be obtained as economically through the use of more cement.

The research is part of a larger program of bureau research on useful properties of materials and how they may be enhanced. That fineness is a vital characteristic of Portland cement has long been known, but data were lacking as to the exact effect of such fineness on Portland cement over long periods of time. These data are now available.

Ten years ago test cylinders of concrete were made up of five brands of cement and Potomac River sand and gravel. These were first kept in moist air 28 days, then exposed to Washington weather for periods up to 10 years. Specimens broken after 6 months and 1, 2, 3, 5, and 10 years showed greater strength compared with similar specimens made of normal cement. The older specimens showed less increase, but the result is conclusive; fine grinding of the cement increases the strength of the concrete, especially with rich mixes.

As the industry grew, the fineness has increased until at present under the national specification or quality standard 78 per cent passes through a standard cement sieve having 40,000 openings per square inch.

## BUSINESS EFFECT OF HOME BUILDING OPERATIONS FAR REACHING

### This in Face of the Fact That Some Say Those Figures Don't Mean Anything

"Building and construction activities in this country absorb nearly one ton in every five of the production of iron and steel, being exceeded in steel consumption only by the railroad industry. Building operations interest us not only because they thus provide an important part of the steel market and affect the steadiness of our operations, but also because of their connection with the desire each of us has to own a home," said H. G. Grace, President of the Bethlehem Steel Corporation in commenting on building and home ownership activities.

"Since the World War, building operations throughout the country have increased from three and one-half billions of dollars in 1919 to over five billions in 1924. Delayed building has been credited for much of this activity, but it is possible that new factors have now entered the building industry which are just as important as delayed building held over from the war.

"Increased buying power during the past ten years, has made it possible for people in this country to realize to an increasing extent the desire to own their homes. Home building has accounted for nearly one-half of building operations during the past year. It is not only a question of housing, but of more and better housing. A demand has grown for additional space, for modern conveniences, for room, for gardens and space for children to play in safety. New houses have been and will be required to meet this demand.

"In the home building program, the automobile has played a large part, having made possible the acquisition of better homes in locations away from congested centers. The building program has been accompanied by need for new roads, more miles of street car tracks, more motor buses, more railroad cars loaded with manufactured goods.

"All of these activities have given a background to general prosperity and have had a stabilizing effect on industry. The conditions are of such a fundamental nature that building activity with its accompanying demand for steel products and other manufactured goods of all kinds should continue for some years to come."

ORGANIZATION AND CURRENT NEWS

## REAL LOYALTY TO THE BUILDING INDUSTRY

### Thruout the Country It Is This Self-Sacrificing Spirit Only That Keeps Building Going

An article in the Builders' Record, the official publication of the Building Trades Employers Association of Boston, to the effect that the Committee of Seven has met almost daily since March in order that every contractor in the city might conduct his business under stabilized conditions is, we believe, of sufficient general interest to warrant calling the attention of the contractors of the country to it. The members of the Boston committee are all busy men, yet at considerable personal sacrifice to themselves were ready and willing to meet and devote more time in seeking to find a solution to the immediate labor problems in the building industry of that city than they did to their own business over a period of months. Suppose that when these men were asked to serve on this important committee they had refused, would the Building Trades Employers Association of Boston be in a position to report today that peace and harmony reigns in the building industry of that city?

What has taken place in Boston this summer is taking place in New York, Chicago, Philadelphia, Cleveland, Pittsburgh, Kansas City, St. Louis, Cincinnati, and in fact every city of the country. Men, conscious of the obligations they owe to the great industry of which they are an integral part, are spending countless hours of time in order that conditions may be stabilized and made better, not only in their own particular city, but also in their state and in the nation.

The unfortunate point to be considered is that only in rare instances are the efforts of these men appreciated by their associates. We find the average contractor member of an association, whose only active support is the payment of dues, which is frequently done under protest, too prone to criticise and complain about the way in which the affairs of the organization are being conducted.

The purpose of this article is to urge that more contractors take an active interest in the general association movement in order that the burdens of the various loyal "Committees of Seven" may be lessened. It is well to consider from time to time what conditions would probably be like in this industry if those public spirited contractors, who through the years have borne the brunt of the battle, would suddenly decide to quit. This is not a pleasant situation to contemplate and the chances are that it will never be brought about, but in order to insure against its happening, we urge that every contractor re-dedicate himself once more to the task of bettering conditions in the construction industry. (Semi-Monthly Bulletin of The National Building Trades Employers Association).

## WOULD FRAME UNIFORM NATIONAL LIEN LAW

### U. S. Secretary of Commerce Hoover Names Committee For That Purpose

The appointment by Secretary of Commerce Herbert Hoover of twelve qualified men as a committee to draft a standard state mechanic's lien act is announced in a statement issued by the Department of Commerce. At the request of several national organizations, the department has undertaken to prepare an act suitable for adoption in the different states.

Mechanics' lien laws provide that contractors, subcontractors, mechanics, laborers, architects, material men and others who have contributed toward the construction of a building may obtain a lien on the property if they are not paid for their services within a reasonable time. The owner of the property then has to pay promptly or allow his property to be sold by the court to settle the claims. One class of cases where lien laws play an important part arises when an irresponsible contractor defaults or goes into bankruptcy, leaving obligations due to workers, material men and subcontractors. Under the provisions of a lien law these creditors may obtain payment from the owner of the property on which the work was performed.

The state laws vary greatly and therefore cause confusion and expense to organizations doing business in several states, and to workers who move from one state to another. Dissatisfaction has been aroused in a number of states by laws whose provisions are said to be unfair to one or more of the different groups concerned, or to be difficult to construe.

In order to frame an act which will be as fair as possible to all the different groups it was felt that they should be represented in deciding on the general principles to be embodied in the act and that the best possible legal advice should be obtained in connection with phrasing it. The committee that Secretary Hoover has brought together accordingly includes representatives of the principal groups including some whose interests are those of the owner.

When a preliminary draft of the act is completed, it will be sent for criticism and suggestions to interested organizations and individuals, including a special new committee of the National Conference of Commissioners on Uniform State Laws of which Charles V. Imlay, a member of the Hoover committee, is chairman.

The committee has held two meetings, but in view of the large amount of work required to draft such a model law, involving an extensive study of existing statutes and court decisions in regard to them, no date has been announced for completion of the preliminary draft.

Among those on this important committee are representatives from American Institute of Architects, American Engineering Council, American Federation of Labor, Associated General Contractors of America, National Association of Builders Exchanges, Division of Building and Housing, U. S. Dept. of Commerce, National Retail Lumber Dealers Association, and other organizations interested in building construction.

## GREATER ORGANIZATION EFFORT NEEDED AMONG BUILDERS

### Not Enough "Tie-In" Amongst the Contractors of the Various Crafts

The importance of maintaining a strong national organization of Employers in the building industry is more apparent every time a meeting of the National Board for Jurisdictional Awards is held. Every dispute and every subject which is discussed when the Board is in session concerns the interests of both the general and sub-contractor and yet they are most conspicuous by their absence. At the last several meetings of the Board, Kansas City and Chicago were the only cities represented by contractors.

The general contractors are pretty well organized at the present time but do not embrace all those engaged in building construction. The sub-contractors are all well organized in individual trade units, but are not affiliated to function in the interest of all. Some effort is needed to get them all together co-operating for the benefit of each and every branch of the industry.

## MORE TO IT THAN JUST SKIMMING OFF THE CREAM

### In Fact It Isn't All Cream

The Boss walked up to a darkey on the job, who was shoveling mortar into a hod and slithering off the edge drips as skillfully as a kid licks cream from a cone.

There was something familiar about the actions of the man that piqued the Boss' curiosity, and he soon saw it was Sam back on the job—the best hodcarrier in the burg.

"Hello, Sam," says the boss. "I thought you quit and went contracting last year?"

"Yessir."

"How come you are back carrying hod? I thought you had it all doped out about the contracting business, and everything was all very plain to you?"

"Dat's so, an' dat's what I said den, but I knows a lot different now. Say, Boss, the things I don't know about de contractin' business would fill dis hod if every one was a grain ob sand; and de things I done learn ain't many, but dey's a-plenty."

"How so?"

"Well, in de fust place, a man don't git ebery job he figgers, cause dey's a lot ob others figgerin de same job.

"In de secon' place, if he figgers de job so low dat he gits it, mebbe he don't make nothin' outin it.

"An' in the third place, if he gits de job on a low figger and kin make money outin it, I'll say he's a danged smawt man, an dat am sumpin I ain't anything of.

"It takes brains to be a money makin' contractor. Dat's de reason I's here carryin' de hod for you an' makin' money, 'stead ob starvin' tryin' to be a contractor—I's got mo' muscle den brains. 'Sides I know where my money is comin' from now."

"Mort," came the cry from above.

"Comin," and he sped up the ladder as if it were play. When he came down the Boss was still there.

"Say, Boss, six months ago I said it was all very plain to me how easy it was to be a Contractor, but it's a dawggon sight plainer to me now."—(Bulletin of The Associated Builders of Chicago.)

# EAST CHICAGO

## TOTAL ESTIMATED VALUATION OF NEW BUILDING CONSTRUCTION WORK FOR CURRENT YEAR TO DATE MOUNTS TO CLOSE TO FOUR MILLIONS OF DOLLARS

### Twin City, of the Calumet District, Making a Fine Showing

August building permits in the Twin City (East Chicago and Indiana Harbor) were a few thousand dollars short of the half million dollar mark, according to the figures made public by Building Commissioner Henry Brainbridge. It was a slight drop from the average of other months, five of which showed construction costs exceeding the half million dollar mark.

Permits issued for business buildings, led as usual over other type of construction with a total cost of $282,900. Apartment building construction came next with $108,485, and dwelling construction concluded the list with $64,630.

While several million dollars have been appropriated by Twin City industries for big expansion programs, most of which is now under construction, no permits have been issued in the building commissioner's office for the work.

It is said that industrial heads will apply for permits to cover all construction the last month of this year when the estimated costs will have been computed.

The following tabulation records the monthly classification of building permits issued during the first eight months of the current year:

| Month | Business | Manufacture | Apartment | Dwelling | Public |
|---|---|---|---|---|---|
| January | $ 34,700 | $ 90,695 | $ 8,000 | $ 2,312 | |
| February | 101,900 | | 379,625 | 63,300 | |
| March | 75,750 | 9,000 | 294,600 | 123,400 | |
| April | 273,500 | 161,500 | 123,500 | 160,245 | |
| May | 101,900 | | 127,500 | 133,475 | $ 151,000 |
| June | 316,834 | | 101,500 | 114,870 | |
| July | 100,800 | | 78,375 | 95,620 | |
| August | 282,900 | | 108,485 | 64,630 | |
| | $1,288,084 | $ 261,195 | $1,221,585 | $ 767,652 | $ 151,000 |
| Total | | | | | $3,689,516 |

### ORDINARY CARE

**Two Words That If Heeded Will Mean Much Toward the Life of Your Construction Equipment**

Ordinary wear and tear is a common expression on a construction job. It usually is taken to mean the effect on equipment of every day use. Ordinary care is an unusual expression. It would probably be interpreted to mean less than good care.

Few men handling machinery realize, however, that even the simplest piece of equipment should have more or less constant attention. General overhauling at times is customary on even the worst managed jobs. But there are few superintendents who insist that equipment be given the regular oiling and adjustment that it needs. Even those who do require such attention, have difficulty in finding men who have any mechanical sense.

With everything possible done by machinery these days, the situation requires that the superintendent who gets results must make sure that his machine runners look after their equipment properly. Most runners have to be shown how and when to lubricate and to adjust machines that are new to them. Once shown, it is the superintendent's job to check up regularly to see that instructions are being followed.

One organization weakness that crops out even in the best of large concerns is that a new man is not properly instructed about his machine. A piece of equipment may be giving fine service with an experienced runner. When he leaves, the new man too often is shown only the main features of the machine. He is rarely taught how to give his machine the ordinary care it needs all the time. The result is that his machine soon goes bad. Then he gets the blame, when it really should be laid to the man in charge of the job. It is up to him to be certain that his men know what they ought to do, and then to see that they do it.

As the amount of equipment used on construction work increases, and with the increase comes more complicated machinery, this idea of constant care—ordinary care—must be driven home. Equipment builders are doing all they can to design machinery that requires a minimum of attention. But lubrication and adjustment will always be required. It is up to the superintendent to see to it that his equipment gets this ordinary care.—Successful Methods.

## HAMMOND

### GOING GOOD

**Construction Activity Locally Moving Along Briskly**

Hammond's building permits hit their old stride in August, almost reaching three-quarters of a million dollars in estimated valuation, with no particularly large jobs, according to figures given out from the office of Building Inspector Henry Vis.

One hundred and seventy-one permits with total valuation of $716,125, were granted. This practically double the total for August, 1924, when 151 permits representing $367,415 were taken out. It is also very close to the July figures of 126 permits which totaled $774,600.

### TURNING OUT BETTER

**More Enthusiasm Being Manifested in Meetings**

A new interest in meetings seems to have come with the arrival of fall. The General Contractors Central Council held a regular monthly session last week that was well attended and at which some interesting discussions developed. Among other things taken up were preliminary proposals and suggestions covering various details to be considered and worked out before new working agreements are gone into for next season.

### LEGAL ELEMENT CREEPS IN TO HINDER BIG CONSTRUCTION PROPOSITION

**Street Widening Project Hits a Concrete Snag**

There are many difficulties to be encountered in widening a city street, some seen and others unforseen, Hammond has encountered both and the end is not yet. The most recent obstacle is a concrete building on State street that not only presented a physical barrier but also threatens to involve a legal entanglement.

The contractors for the street widening process made satisfactory progress until they reached the Cox building, a reinforced concrete structure and then real trouble began. According to the plans it was necessary to move all structures along a given distance back twenty-six feet. When the Cox structure was reached, it was found

that the reinforced concrete had adhered so solidly to the adjoining building that separating the two was next to impossible. It was then decided to cut twenty-six feet off the front of the obdurate Cox structure. This involved herculean effort, also chisels and sledge hammers, and, in the operation some of the brick was torn from the wall of the adjacent building for which the owner Joe Weis seeks $2,000 damages and has asked the court for a restraining order to stop the work to prevent further damage.

And all this because of the affinity of brick for concrete or vice-versa.

## OUTLOOK MORE PROMISING

### Contractors and Labor Representatives Seem to Have Ironed Out the Wrinkles

So far some beneficial action seems to have developed for the building situation as a result of a recent meeting participated in by the local general contractors and the grievance committee from the Building Trades Council at which the trouble with the lathers was discussed.

Some of the general contractors threatened to go into the business of doing their own lathing if the lathers didn't come down off their high-horses and since then they have not had any trouble getting men to do the work.

## EFFORT TO BUILD UP ASSOCIATION STILL UNDERWAY

### Another New Member Signs Up

The new membership effort of the B. T. E. A. is still on though not much has been heralded about it recently. Fact of the matter is everyone has been busy the past few weeks taking advantage of the propitious building weather.

Quite a few new members have been added to the association since the drive was started, the most recent recruits being Cochran and Hawk, general contractors, who entered the fold of the B. T. E. A. last week.

## CALUMET BUILDING PROGRESS

The high bid on the Elks Temple at East Chicago was $214,468.00, while the low bid was $154,212.00, some difference. All the bids were taken under advisement by the building committee who is expected to make a report soon.

Architect Mac Turner, Hammond, has plans out for a two-story brick residence, 32x70 ft., containing 10 rooms and two baths, to be built on the south side for Gus Bercoloes.

Then again, A. C. Berry, architect, Hammond, will have the plans ready September 21st for the addition to and remodeling of the German Evangelical Church on Sibley St. This project is estimated to cost $50,000.

The Neilson Development Co. awarded the contract to Joe Matlone, Whiting, at $18,000, for the construction of a store and flat building for Fred Gastarach.

***North Side High School Building:** $750,000.00. Archt. Charles R. Weatherhogg. 250 West Wayne. Owner, Board of School Trustees, H. J. Collier, Business Agent. General contract awarded to Max Irmscher & Sons, First National Bank Bldg. for $623.292.00. Electric work let to Dix-Kelly Electric Co., for $12,288.00. The board deferred action on letting the plumbing, heating and ventilating contracts until such time as a committee of the board has time to inspect samples of the fixtures to be used and reports back to the board, before the next regular meeting of the board, Tuesday, September 22. The matter of deciding whether coal or oil will be used to heat the building was also deferred until the next meeting. A red tile roof will be placed on the building instead of copper-clad shingles. A three-sixteenths inch linoleum laid over felt will be used as a floor covering, gum finish will be used throughout the building instead of oak and a veneer. swimming pool will be installed in the basement of the building. These were the only details in which the specifications and plans allowed alternates.

***Community Building** $57,002.00, Garrett, Indiana, Archt. A. M. Strauss, 705 Tri-State Bank Bldg., Ft. Wayne. Owner, City of Garrett, City Hall, Garrett. General contract awarded to A. C. SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that Wm. B. McGuirk, Trustee and the Advisory Board of Harrison Township, Vigo County, Indiana, will receive sealed bids at the office of said Trustee, located at 321½ Ohio St., Terre Haute, Indiana, until 2 o'clock p. m. on the 26th day of September 1925 at which time and place said sealed bids will be opened, read and considered for the construction of a new school building on land owned by said township, described as follows: Lot No. 4, in Geo. Glick Sub., in Section 35, Township 12 North, Range 9 West, in Harrison Township, Vigo County, Indiana.

The building is to be reinforced concrete skeleton construction, fireproof throughout, with curtain walls; being basement and two stories in height, with a one story auditorium attached. Also included is the installation of plumbing, sewers, heating and ventilating, and installation of electrical wiring and other electrical apparatus for said building for use of said township. All shall be in strict accordance with the plans and specifications as provided therefor, and as further approved by the State Board of Health and the State Board of Accounts.

Estimated cost of building and equipment as outlined, $125,000.00.

The plans and specifications are on file for inspection of the bidders at the office of the Trustee, 321½ Ohio St., Terre Haute, Ind., and at the office of Shourds-Stoner Co., Architects and Engineers, 510 Tribune Bldg., Terre Haute, Ind. Copies are available to bidders for use at their own office upon deposit with the Architect or Trustees of $15.00 to guarantee submission of bid and safe return of same on or before opening of bids.

Separate bids will be received as follows:

1. For general construction of new school building less linoleum floor covering.
2. For linoleum floor covering applied as specified.
3. For the combined general construction of new school building and for linoleum floor covering applied as specified.
4. For the installation complete of heating and ventilating system as specified.
5. For the installation complete of plumbing and sewer systems as specified.
6. For the combined installation of heating and ventilating and plumbing and sewer systems, as specified.
7. For the installation complete of electrical wiring and electrical apparatus as specified.

All bids shall be accompanied by the certified check of bidder in sum equal to at least five per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to trustee.

All bids and proposals to be upon forms as prescribed by the state board of accounts, including necessary noncollusion affidavit. Unless bids are accompanied by above mentioned certified check and made out upon the forms above mentioned the bid will not be considered. Bidder's bond will not be accepted in lieu of certified check.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety company bond, to the trustee in a sum equal to the full amount of the contract or contracts. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in the specifications.

The Trustee and Advisory Board reserves the right to reject any and all bids.

Dated this 1st da yof September, 1925, Harrison School Township, Harrison Township, Vigo County, Indiana.

VOL. VII INDIANAPOLIS, INDIANA, SEPTEMBER 26, 1925 No. 26

## LABOR LEADER IN BUILDING FIELD FOUND GUILTY OF BLACKMAIL.

### John J. McNamara of Iron Workers' Dynamite Plot Notoriety Held Responsible For Recent Labor Disturbances at Indianapolis.

Nothing having to do with building construction affairs in Indianapolis or Indiana in years had aroused the interest among those having the future welfare of the industry at heart as did the charges preferred against John J. McNamara, Business Agent for the Bridge, Structural and Ornamental Iron Workers' Union, Local No. 22, who was indicted on charges of blackmail, it being alleged that he sought to intimidate contractors and workmen so that iron workers be employed on certain work rather than other crafts.

The indictment was the outgrowth of a grand jury investigation following labor trouble at the new Elks building when various acts of violence and vandalism occurred on that project some months ago.

As an aftermath of it all a jury in the Marion County Criminal Court the past week returned a verdict of guilty against McNamara for blackmail, the penalty for which is one to five years in the state penitentiary, to which may be added a fine of $1,000. Sentence is to be imposed later by special judge Fred C. Gause.

Since the return of the verdict attorneys for McNamara have announced they will file an appeal for a new trial.

Law abiding citizens and building men have expressed gratification over the outcome of this trial and take it to mean that the day is over when one man or a certain element of men can selfishly impose by violence their desires and wishes upon others that their end may be attained regardless.

Commenting upon the verdict local papers have this to say:

"One of the hardest problems that has always been faced by organized labor is that of combating its enemies within its ranks. The conviction of John J. McNamara in Criminal Court of blackmail brings this fact once more to the attention of the police.

"Organized labor frequently is judged by the agitators and law breakers of the McNamara type. Happily, these individuals constitute only a smal minority, but their presence is often seized upon by enemies of labor to make a case.

"The McNamara case grew out of a quarrel, not between labor and capital, but between union elements. It was a quarrel that could very easily have been settled peaceably. Nevertheless, it resulted in threats and in violence such as no community could tolerate.

"Labor unions were among the first to take up the case of the Elks' Club and other outrages. They insisted—very properly—on the arrest and conviction of the persons responsible. McNamara has been convicted as a result of one of the many instances of threats of violence.

"McNamara, for years, when he was not in the penitentiary, has been a disturbing element within the ranks of labor. He has done labor an irreparable damage. He first came to public attention while he was secretary of the bridge and structural iron workers. At that time there was a long list of cases in which buildings had been dynamited, culminating in the Los Angeles Times explosion in which twenty-one persons lost their lives. McNamara was arrested among others in this case and pleaded guilty, serving a prison sentence of over nine years. After his release from prison he returned to Indianapolis, where he again took up labor activities, these activities resulting in his most recent conviction." — (Indiana Daily Times.)

Then, again, the Indianapolis News sums up the outcome of the trial as follows:

"It might have been thought that John J. McNamara, business agent of the Bridge, Structural and Ornamental Iron Workers' Union, Local No. 22, would have had enough of the penitentiary after his nine years in San Quentin, but such does not seem to be the case. Recently he was, by a Marion county jury, convicted of blackmail in connection with threats of violence, and sabotage committed for the purpose of forcing certain men from their jobs and compelling the employment of others. The threats of violence and the sabotage were proved, and there was thus no question as to the facts. As to the law, Judge Gause, in his very brief instructions, told the jury that employment may be a pecuniary advantage under the blackmail statute, and that it would be justified in a verdict of guilty if it found that McNamara used threats for the pur-

## INDIANAPOLIS

**Apartment Building:** (33 apts.), $165,000.00, 3 sty. & bas., 84x46, Miami, Fla. Archt. George & Zimmerman, 501-03 Meyer-Kiser Bank Bldg., Indpls., Ind. & Miami, Fla. Owner, Meyer-Kiser Corporation, Miami, Fla. Plans comp'eted. Hollow tile, concrete, stucco, incinerator, cabinets, mechanical refrigeration, composition ornament. Contracts awarded.

**Apartment Building:** (24 apts.), Spanish architecture, $165,000.00, 80x140, Coral Gables, Fla. Archt. George & Zimmerman, 501-03 Meyer-Kiser Bank Bldg., Indpls, Ind. & Miami, Fla. Owner, Herbert L. Moody & Co., 3370 College Ave., Indpls., Ind. Hollow tile, reinf. concrete, stucco, incinerator, cabinets, mechanical refrigerations, composition ornament. Sketches completed.

***Apartment Building:** (54 apts.), 6 sty. & bas., Louisville, Ky. Archt. George & Zimmerman, 501-03 Meyer-Kiser Bank Bldg., Indpls., Ind. & Miami, Fla. Owner's name withheld. Plans in progress. Fireproof, reinf. concrete & steel, tile, brick, incinerator, cabinets, mechanical refrigeration, composition ornament, vacuum heating, stone and terra cotta trim.

***English Residence:** 2 sty. & bas., $40,000.00, Frankfort, Indiana. Archt. George & Zimmerman, 501-03 Meyer-Kiser Bank Bldg., Indpls, Ind. & Miami, Fla. Owner, Mr. and Mrs. J. Fred Kramer, Frankfort. Slate roof, tile and brick vacuum heat, steel sash, ornamental plaster. On working drawings.

***School Building:** (additions and alterations) $165,000.00 Community Room, Stage, High School departments, Washington Township, Shelby County, at Flat Rock, Indiana. Archt. Allen and Garriott, 1007 National City Bank Bldg., Indianapolis. Owner, Delmon Clark, Trustee, Shelbyville, Indiana, Route No. 9. Low bidder on general contract, N. S. Ikerd, Bedford, Indiana, for $42,880.00. Low on heating and plumbing, Tibbetts Heating and Plumbing Co., Union City, Indiana.

**Indiana K. of P. Home for Elderly Members, Wives and Children:** $300,000.00, in Indiana, near Indianapolis; location not decided. Owner, Pythian Home Fund Committee, Harry Wade, Chairman, Indiana Pythian Bldg., Indianapolis; Elmer Bassett, Shelbyville, past grand chancellor; Thomas N. Roach of Fort Wayne; George F. Gelts of Muncie; Charles R. Howe of Greensburg and these ex-officio members: Dora B. Erwin of Decatur, grand chancellor; Carl R. Mitchell of Indianapolis, grand keeper of records and seal, and Henry Kammerer, grand master of the exchequer. Tentative sketches will be submitted to the Grand Lodge, October 6th and 7th. The first unit will take care of 50 boys, 50 girls, and 60 elderly members or their wives. Definite data later. Brick, concrete and steel.

**Comercial garage, Offices and Stores** $300,000.00, S. E. Corner Alabama and Market Sts. Private plans. Owner, Ira Holmes (attorney), American Central Life Building. Preliminary plans. Brick, concrete and steel.

***Grade School:** $170,000.00, 2 sty. & bas., School No. 78, Sherman Drive and Vermont St. Archt. Pierre and Wright, 1133 Hume Mansur Building. Owner, Board of School Commissioners, 150 N. Meridian St. Mechanical Engineer (Heating, Ventilating, Plumbing, Wiring, stack). Walter A. Breining, 511 Traction Terminal Bldg. Plans about completed. Owner will advertise for bids in two (2) weeks. Brick, concrete and steel. (16 class rooms.)

***Grade School:** $170,000.00, 2 sty. & bas. "Webster School" No. 40, Reisner and Howard Sts. Archt. Osler and Burns, Penway Building. Mechanical Engineer, (Heating, Plumbing, Ventilating, Wiring and Stack), Walter A. Breining, 511 Traction Terminal Building. Owner, Board of School Commissioners, 150 N. Meridian St. Plans about completed. Owner will advertise for bids in two weeks. Brick, concrete and steel. (16 class rooms.)

**Motion Picture Theater:** (rem. from building S. E. Corner 42nd and College) $150,000.00. Owner, Ross Lockwood, 42nd and College. Lessee, The Paramount Theater, Oscar Markum, Pres., 4314 East New York St. Plans in progress.

**Parcel Post Station:** $50,000.00, Chicago, Ill. Archt. Bass, Knowlton and Co., 312 N. Meridian St., Indianapolis. Owner, Postal Station Building Co., R. D. Brown, Pres., 341 Postal Station Bldg., Indianapolis. Lessee of Bldg. Postoffice, Chicago, Ill. Bids in under advisement. Brick.

***Churchff** $25,000. Archt. Fermor S. Cannon. Owner, Southern Ave. Bapt., Rev. C. P. Greenfield, 1422 E. Raymond. Bids in under advisement. Brick veneer.

**Subway:** 1000 feet in length, under 38th St. Boulevard, at Crown Hill Cemetery. Archt, D. A. Bohlen and Son, Majestic Bldg. Owner, Crown Hill Cemetery Assn., 34th and Boulevard Place. Taking bids. Reinforced concrete.

### Contracts Awarded

***Parochial School:** (combination auditorium & gymnasium, 6 class rooms, & Sisters Quarters), $125,000.00 13th and Bosart Sts., Indianapolis, Ind. Archt. Henkel and Hanson, 108 Hofinemann Bldg., Connersville, Ind. Mechanical Engineer, Bevington and Williams, 523 Indiana Pythian Bldg., Indianapolis. Owner, Little Flower Parish (R. C.) Rev. Charles Duffey, Pastor, c/o St. Francis Hospital, Beech Grove, Indianapolis. General contract awarded to Sullivan and Downham Constr. Co., Camden, Indiana for $107,482.00. Heating and plumbing let to Herman F. Zietlow, 548 Eastern Ave., Indianapolis for approx. $17,000.00. Bids were rejected on Electric wiring. Will ask for bids in 30 days. Brick concrete and steel, concrete floors and stairs, ash hoist, hollow tile backup, steel sash, terrazzo work, Bedford stone trim, galv. iron skylight, comp. roof, maple floors. A set of plans and specifications are on file at the office of the Indiana Construction Recorder, 312 E. Market St., Indianapolis.

**Apartment Building:** (18 apts.), $125,000.00, 3 sty. & bas., Louisville, Kentucky. Archt. George & Zimmerman, 501-3 Meyer-Kiser Bank Bldg., Inpls., Ind. & Miami, Fla. Owner, J. E. Wilson, Louisville, Ky. Plans completed. Reinf. concrete, tile, brick, incinerator,

## PLAN TO MAKE INDIANA ARCHITECTURAL EXHIBIT THIS YEAR A MEMORABLE AFFAIR

### Co-operation of All State Architects Solicited

A study of the calendar would incline one to the belief that the latter part of December or the month of January is at this time quite distantly removed, and one should hardly concern himself about the bridging span of time intervening. Then, too, one is led to wonder why the interest in that future alottment of time. Simply this, along about then the semi-annual meeting of the Indiana Society of Architects is held, and in connection with that event the Annual Indiana Architectural and Allied Arts Exhibit is put on at the John Herron Art Institute. This letter affair is an occasion for the state architects to concentrate the attention of the public upon what the architectural profession of Indiana is doing, what is actually involved in the preparation of plans, and the service rendered. Such an opportunity to more intimately acquaint the layman with architectural effort is a fortunate one and should not be overlooked or neglected by the architects. The educational value of the exhibit is not to be discounted for it materially impresses the visitor with the great mass of detail necessary to the preparation of architectural drawings which mean better buildings from a structural, a utilitarian and an artistic standpoint.

It is the intention of the Exhibits and Pageants Committee of the Indiana Society of Architects, of which E. D. Pierre, Indianapolis, is chairman, to use every means at its disposal to make this year's Architectural Exhibit a memorable and meritorious affair. That ambition is most laudable but in order to achieve its aim the Exhibits Committee must have the co-operation of the members of the Society. The exhibitors are not to be limited to just I. S. A. members, instead, all Indiana architects will be invited to submit examples of work and co-operation from non-members, will be welcomed.

It would be well from week to week for all Indiana architects to remember the exhibit, give it some thought and make up their minds to assist in this year's exhibition. Days, weeks and months speed by with almost incredible ve'ocity, therefore, an early start toward a definite display by each individual would not be amiss, will save a rush at the end and assure an exhibit of a scope far beyond any other held by the state architects and redound to the credit and benefit of the whole profession.

The late Theodore Roosevelt said, "Every man owes some of his time to the upbuilding of the profession to which he belongs." That being the case every architect should do all in his power, be it great or small, to lend his aid in the advancement of the profession of architecture, and, the proposed exhibition this year is an elegant means to that end.

## NEW BUILDING STANDARDS

### Demand Now Days Is For Better and Better Structures

It is amazing how the building movement keeps up. Figures vary, but it seems clear that this year's construction will be as great in volume as ever, and August building for the country broke all records. This year building operations are out in front of that of last year. There is no indication of much let-up.

Some cities are farther ahead than others in meeting building needs, but as they relax their strenuous efforts others forge ahead. As local deficits are made up in housing or office structures or factories or public buildings, other branches take up the slack.

It can easily be shown on paper, as it has been by experts, that the whole nation's building deficit, which developed during the war, has been made good. If that were all, there would surely be a lapse in building activity. But the figures always imply a continuation of the pre-war standards. As a matter of fact, it seems that the nation has discarded the old standards in construction as definitely as it has clothing and behavior.

Americans now demand better houses, better stores, better offices, better workshops, better churches and postoffices and theaters and bridges and paving and everything else in the way of building. So it takes more and better material, more work, more money and everything else, to meet the requirements. The building industry has to hump itself to meet the new standard. The abnormal is becoming normal.

## STRESSES THE IMPORTANCE OF THE BUILDING INDUSTRY

### A Few Facts That Are Enlightening

"More than 11,000,000 of our people are dependent for their living upon the construction industry, and 22 per cent of all the skilled and unskilled labor of the country is engaged in the building branch alone," Secretary of Labor Davis, said recently. "Some 250,000 freight cars are required to handle the materials. Our building bill is $200 per year for each family in the United States. It is truly the chief barometer of the business of the country. When construction gains, prosperity is with us. It is the great outstanding influence for good or had in our financial progress."—The Builder.

## ARE YOU GETTING YOURS?

### LABOR LEADER

(Continued from page 5)

pose of obtaining employment either for himself or third parties not named in the indictment, and unknown to the grand jurors. With the facts as proved and under the instructions of the court, the jury could, consistently with its duty, have returned no other verdict than one of guilty.

"The case was fairly tried by an able judge, a conscientious and fearless prosecutor and an intelligent jury, and without any buncombe on either side. The jury was selected in record time, all incompetent evidence was excluded, the rulings of the court were impartial, and the conduct of the attorneys was above reproach. The trial was in short just what a criminal trial should be. It ought to serve as model. That the effect of the verdict will be salutary can not be doubted. McNamara evidently had the idea—and this in spite of his bitter experience—that he could do about as he pleased, was indeed above the law.

"Shortly after the acts of sabotage at the Elks' building, which were involved in this case, all but two of the business agents of the building trade organizations in the city met and denounced such actions and pledged themselves to uphold law and order. One of the agents refused to agree to the resolution on the ground that he had no authority to do so, but his organization, the Sheet Metal Workers, met later and adopted a similar resolution. This left McNamara alone in his refusal to concur in the action, nor did he or his organization ever concur. With this exception, organized labor in Indianapolis is on formal record against such atrocious practices. The jury in the case that ended recently in the conviction of McNamara has put the community under a very great obligation, and has earned and will receive its warmest commendation. It stood for law and order, the safety of life and property, and for the rights of labor, as for those of all other citizens. As for the convicted man, he is a survival from an earlier and more evil day, a day that we believe has forever passed, as far at least as Indianapolis is concerned."

## ORGANIZATION AND CURRENT NEWS

### NEW RECORD SET FOR AUGUST BY COUNTRY'S BUILDING CONSTRUCTION OPERATIONS

#### Substantial Gains Shown in Many Localities

Last month was surely a boon for the building industry, and as the fag end of the summer season developed an unusual spurt for that time of the year. Returns from all over the country show that building operations held up well and any losses recorded in some sections were more than made up by gains in other localities which put the total volume of construction business for the whole country considerably ahead of that posted in August, 1924.

A resume of the situation as set forth by S. W. Straus, New York City, building financiers is as follows:

"August permits in 376 cities and towns established a new record for that month, with a gain of 38 per cent over August, 1924. The total was $391,458,707 a gain of $107,547,538 over August last year. Every region of the country, nearly all states, most large cities and hundreds of smaller places, showed gains.

"In the East 111 cities had a total of $188,237,946 compared to $118,114,895 in August, 1924, an increase of 59 per cent. In the Central, 111 cities, had a total of $108,593,816 compared to $89,586,270, an increase of 21 per cent. In the South 75 cities had a total of $51,062,322 compared to $33,874,457, an increase of 51 per cent. In the Pacific West 79 cities had a total of $43,564,623 compared to $42,335,547, an increase of 3 per cent.

"Seven of the twelve strictly Southern states showed gains including Alabama, Arkansas, Florida, which had a gain of over fifteen and a half million dollars; Kentucky, Mississippi, South Carolina and Texas.

"Clearwater, Fla., which is for the first time reported in the survey, had an August increase of 1166 per cent, the highest proportionate gain of any place in the country. The twenty-five leading Southern cities as a unit, had a total of $43,782,000, a gain of 7 per cent over August, 1924. Miami led in volume with a total of over $6,000,000 for the month. Houston was second in volume, West Palm Beach third, Tampa fourth and St. St. Petersburg fifth.

"Some of the notable percentages of gain were West Palm Beach, 797; Orlando, 657; Hollywood, 520; Miami Beach, 483; St. Petersburg, 238; Tampa, 207, and Houston, 145.

"Some other cities showing substantial percentages of increase were New York, 183; Chicago, 41; Newark, N. J., 185; Miami, 77; Tampa, 207; Houston, 145; St. Petersburg 238; Minneapolis, 82; Long Beach, 476; Boston, 55; Columbus, Ohio, 265; Washington, D. C., 73; St. Louis, 85, and Cincinnati, 123."

## THE OLD CONTRACTOR

### Calls Attention to Yankee Ingenuity That Has the British Plan Licked Many Furlongs

"I was reading an article by a British building trades leader," observed the Old Contractor as he lit a fresh cigar, "in which he was wanting some kind of insurance against bad weather and the winter building slump. He would have the employer chip in so much jack and the building mechanic so much jack. When the slump came along, due to winter weather, the mechanics draw on the fund for pay.

"It's a good idea on paper," the old fellow continued, "but we've found a better."

"Explain," suggested his younger associate.

"Where's your eyes during the last couple of years?" retorted the veteran. "What do you suppose all this talk about winter construction's been for. Isn't it to educate the building public to realize a house or a skyscraper can be built in winter as well as in the moist and rainy months of March and April?

"Turn your memory back to before the war. Remember when October came along, the building mechanics and the bosses gave a united sigh and said, 'Well, the leaves are falling. We had a frost last night. Pretty soon we'll have the winter with us and there won't be any building. Remember those days?"

The young contractor did.

"All right," resumed the old fellow. "What happened? Did the Yankee contractor sit down and wonder whether he'd have to pay insurance because a union demanded it? Not a bit. With the aid of the government he tackled the problem from a different direction. Remember, there's more'n one way to skin a cat.

"First of all, a lot of the material companies did some investigating to see how their stuff could best be used in cold weather. Then they passed the word along to the contractors and the Department of Commerce.

"'Bout that time Mr. Hoover began to get busy boosting winter construction. Lot of articles about it came out in the papers. Pretty soon the contractor found that when he talked winter building to a real estate owner the owner didn't balk like he used to. He'd been educated.

"This year, unless I've got another guess coming, you're going to see a lot of building going on. More even than last winter. All of which is a lot better than any half baked insurance scheme which adds to building costs. Am I right?"

"You bet you are," agreed the Very Young Contractor.—(Feature from the Monthly Bulletin of The Associated Builders of Chicago.)

## DECIDED STRENGTH SHOWN BY BUILDING MATERIAL MARKET QUOTATIONS

### Trend Mostly Upward

Pronounced upward tendencies characterized the building material market during August. In fact, August was the first month since February that the market has exhibited consistent strength over almost its entire field. The few downward movements which occurred were of minor consequence. The greater part of the market was either unchanged from July or worked to higher levels.

Of the major materials steel was the only one which did not show decided strength. This was somewhat surprising in the face of an increasing demand for structural shapes and a marked improvement in plant activity. The trade looks for a near-term upward change.

Curtailment in lumber-mill activities have finally had their desired effects. Almost every important kind of lumber was up from July. Douglas fir prices rose 6.9% and yellow pine 4.9%. While movements in other woods may not have been as marked they were plainly in evidence.

Starting materials were also strong. Sand prices increased over 6% during August with the major changes in the South and Southeastern states. Common lime showed increases, especially in the Middle West. Cement and crushed stone prices were unchanged. In Minneapolis common brick rose $2.00 a thousand, but in other cities declined slightly. Linseed oil was up nearly 7%. For the most part other materials maintained their July quotations.

## BETTER HOUSES FOR BETTER BUSINESS

### Tendency in Much House Building Leans Toward "Features" Rather Than Permanence

The worst thing about house building these days is the houses.

It is notorious that thousands upon thousands of houses are being put up by wood butchers for speculative builders who "make theirs" while the paint is still fresh and the disappearing ironing boards, the "cunning breakfast nooks" and the cute do-hickeys have the happy home buyers hood-winked.

They have gone into raptures over a hundred dollars worth of clever features any they don't know that the mortar and the concrete are mostly sand; that there are but two nails where three should have gone, that the wintry winds will blow in around every window and flocks of costly heat units will scurry up through the flimsy ceilings and out through the gaps under the eaves. They don't know that the footings aren't wide enough, that drainage is inadequate, that walls will settle and crack. They don't know that the green lumber will shrink and the putty drop out of the cracks under the beautiful paint, that the floors will creak and the stairs will rattle and the rain dribble in through the roof.

Are any of these abuses in your town?

And if so, imagine your "own your home now" campaign in 1927!

How are you going to butter your bread then?

It's high time to talk and sell better houses—Better Houses for Better Business.—Harvey Whipple in Building Materials.

## FT. WAYNE

### APPEARS AS IF CITY IS IN FOR ACTIVE WINTER CONSTRUCTION SEASON

**Scheme of Local Builders Lends Promise**

Every indication points to continued building activity this winter at Ft. Wayne according to local authorities on contracting and construction work. Many people, it is claimed, are planning new homes now and contemplate pushing the building of the same throughout the fall and winter season.

The most powerful factor contributing to the excellent outlook for fall and winter building operations is a plan, which leading Fort Wayne contractors are now offering prospective home builders of the city.

The plan now offered the citizens has had marked success in other cities and in the comparatively short time it has been in operation at Ft. Wayne has been attended with a hearty reception by prospective home builders and has proven highly beneficial for the mutual benefit and convenience of the parties building the homes and the contractors.

Not the least important of the various phases of the scheme now in effect here is that which provides for the contractor arranging the financing of the home construction through his trust company.

Not only on the larger jobs but also in the small repair work and building of porches and garages, is the new plan proving a distinct advantage and convenience.

In the past many persons highly desirous of building a home of their own have been greatly perturbed over the prospect of having to shoulder an incidental expense of financing which to them would seem prohibitive.

It is for the purpose of saving the home builder money that the leaders in the local building contracting field of Fort Wayne have united their efforts in making possible "go to the contractor direct" plan, which is proving so universally satisfactory.

The new plan saves the expense of the high-salaried salesmen and other heavy incidental expense of the "curbstone builders," which of course, in the end must be paid by the man who becomes the owner of the home.

**Leaders in Movement**

Among the prominent contractors of the city represented in the plan are David A. Arnold, J. P. Bruick, Buesching & Hagerman Co., Ernest H. Fuhrman, Fred H. Grote, W. G. Harrod, Henry J. Hoffman, Max Irmscher and Sons, Edward R. Keller, Charles Kiracofe and Sons, McMullen Brothers, Rodenbeck Brothers, W. S. Sams, A. R. Sauer, Sheets and Carlson, Joseph C. Smith, Oscar Springer, Albert Weinmann, Charles R. Wermuth and Son and John B. Wunderlin.

## HAMMOND

### ANOTHER OBSTACLE CROPS OUT TO RETARD BUILDING

**Civil Dispute Stops Big Theater Job**

If it isn't one delay in a building operation it is another, in other words, it might be said that a building operation is one long series of delays between which some construction work is done. The latest retardent to develop in Hammond concerns a controversy betweenthe city government and the local electric light company as to whom is to pay for the moving of some light-wire poles. The poles were ordered moved by the city to make room for improvements and the light company contends the city should bear the expense. There the issue hangs as each seeks to "pass the buck."

In the mean time the work on the new theater on State street has been stopped until the altercation is settled.

### STREET WIDENING PROJECT STILL HELD UP

**May Get Going Again Soon**

Speaking of delays recalls to mind that the widening of West State street

is still in abeyance pending the prying loose of a concrete building from its adjacent brick structural neighbor. The moving back of the buildings 26 feet, along the square progressed nicely until the two structures in question were reached and then the concrete adhesion factor injected itself. Everything was tried to separate the two buildings, all to no avail, and now they are wrecking the front of the structures, cutting off twenty-six feet in front. It is a tough job but should be completed shortly and then the thoroughfare widening process will continue.

## DIVED INTO DOCTOR'S CARE

### Plunge Into Surf Ends in Physician's Office

When one dives into the water there is no certainty as to just where or how he will land, a fact to which Charles Rhoads, Hammond contractor, can attest. Florida which has held a lure for Charley exercised its influence again this season and he departed for that section about a month ago. Recently the surf beckoned and Rhoads attempted an "Aileen Riggon." He dived all right but the water was shallow and put a terrible strain on his neck. It has taken several weeks of the doctor's care to straighten out the kinks in Mr. Rhoads' neck reinforcement.

## NICE CONTRACT LET AT EAST CHICAGO

### Elks to Build Fine New Club House

John F. Rahn, East Chicago, was awarded the general contract to erect the Elks' new home at Chicago and Magoun avenues of that city. The bid of $173,688 was accepted by the Elks' Building committee with the specification of guaranteed costs not to exceed the award figure.

Contractor Rahn is about to complete construction on the foundation work and expects to begin the actual erection of the main structure at once.

## HAMMOND BUILDING JOTTINGS

Prospective building work bids fair for the fall since local architects announce tentative sketches and preliminary plans in progress but none of the projects are far enough along just yet to be made public.

The bungalow building and selling game seems to be right in Bayliss and Million's line. They erected twenty-frame bungalows on Van Buren st., sold fifteen of them and have taken over the remaining lots in the next two blocks with the idea of erecting quite a few more similar structures.

Reconstruction of the Hudson building on Calumet ave., which collapsed several weeks ago has been started. However, work on the new Anderson Hotel next door, an operation alleged to have caused the Hudson building wreck, is at a standstill.

o'clock p. m. on the 26th day of September 1925. at which time and place said sealed bids will be opened, read and considered for the construction of a new school building on land owned by said township, described as follows: Lot No. 4, in Geo. Glick Sub., in Section 35, Township 12 North, Range 9 West, in Harrison Township, Vigo County, Indiana.

The building is to be reinforced concrete skeleton construction, fireproof throughout, with curtain walls; being basement and two stories in height, with a one story auditorium attached. Also included is the installation of plumbing, sewers, heating and ventilating, and installation of electrical wiring and other electrical apparatus for said building for use of said township. All shall be in strict accordance with the plans and specifications as provided therefor, and as further approved by the State Board of Health and the State Board of Accounts.

Estimated cost of building and equipment as outlined, $125,000.00.

The plans and specifications are on file for inspection of the bidders at the office of the Trustee, 321½ Ohio St., Terre Haute, Ind., and at the office of Shourds-Stoner Co., Architects and Engineers, 510 Tribune Bldg., Terre Haute, Ind. Copies are available to bidders for use at their own office upon deposit with the Architect or Trustees of $15.00 to guarantee submission of bid and safe return of same on or before opening of bids.

Separate bids will be received as follows:

1. For general construction of new school building less linoleum floor covering.

2. For linoleum floor covering applied as specified.

3. For the combined general construction of new school building and for linoleum floor covering applied as specified.

4. For the installation complete of heating and ventilating system as specified.

5. For the installation complete of plumbing and sewer systems as specified.

6. For the combined installation of heating and ventilating and plumbing and sewer systems, as specified.

7. For the installation complete of electrical wiring and electrical apparatus as specified.

All bids shall be accompanied by the certified check of bidder in sum equal to at least five per cent of his gross bid or bids, conditioned upon his entering into his written contract with sufficient and approved surety if he is the successful bidder, according to proposal. Checks to be made payable to trustee.

All bids and proposals to be upon forms as prescribed by the state board of accounts, including necessary noncollusion affidavit. Unless bids are accompanied by above mentioned certified check and made out upon the forms above mentioned the bid will not be considered. Bidder's bond will not be accepted in lieu of certified check.

The successful bidder will be required to enter into his written contract and also deliver his bond with approved surety company bond, to the trustee in a sum equal to the full amount of the contract or contracts. The successful bidder will be required by the terms of his contract to enter into the active prosecution of his work immediately and complete said work at the time mentioned in the specifications.

The Trustee and Advisory Board reserves the right to reject any and all bids.

Dated this 1st da yof September, 1925, Harrison School Township, Harrison Township, Vigo County, Indiana.

# *Maximum roof with minimum steel...*

ASIDE from their safety, their durability and their freedom from maintenance expense, Federal fireproof roofs possess another inherent advantage: They require less steel than other types rendering similar service. Note the supporting steel structure for the Federal Cement Tile roof on this building of the Rockwood Manufacturing Company of Indianapolis, Indiana. The long-span, light weight but strong steel-reinforced precast slabs permit minimization of the weight of the entire sustaining structure.

Federal Cement Tile are scientifically made under conditions which compel uniformity of product. There are four general types: interlocking tile for pitched roofs (plain or with glass inserts) and flat and channel sections for flat surfaces. Made, laid and guaranteed by the

## A MEETING OF INTEREST TO INDIANA ARCHITECTS

### Proposed Meeting at Purdue Traceable to the Early Efforts Put Forth by the I. S. of A.

The attention of all Indiana architects is directed to the Builders Conference to be held at Purdue University, Oct. 29. This will be the second affair of this nature to be held under the auspices of the above institution and it is the hope of the officers of the Indiana Society of Architects that the state architectural profession will be well represented at the approaching meeting.

The interest of the Society in these affairs centers in the fact that it was the efforts of the state architects' organization and the state contractors' association to bring about a greater degree of co-operation between achitects and contactors for the general good of the Indiana building industry that attracted Purdue's attention. The extension department of the engineering branch of the university advocated a conference of builders on a broad scope to include not only architects and contractors but also engineers and Labor. The proposition met with instant favor and resulted in the first general conference of Indiana building construction men ever held in the state. It was a most interesting affair and proved a big success. The proposed conference in October promises even greater interest and all Indiana architects should keep the affair in mind and plan to attend if they possibly can.

## SOUTHLAND LURES

### Two Indianapolis Architects Go to Florida

The Florida bug did not miss stinging the Indiana architectural fraternity and when the stinger sank in the lure could not be denied. Two Indianapolis architects felt the urge and heeded the call, packed up their things and hurried southward. W. H. Garms and John Parish were the architects who departed post-haste to get in on whatever of building was going on down there

## DOES A TREMENDOUS AMOUNT OF WORK

### Bureau of Standards Includes Building Materials In Its Operations

During the fiscal year ended June 30, 1925, the Bureau of Standards, Department of Commerce, completed 173,261 tests, according to a report to Secretary Hoover.

This represents a considerable increase over previous years; 115,729 tests having been completed in 1923, and 135,852 in 1924. The fee value of the work is $547,543.35. This is also an increase over past years; the 1923 and 1924 figures being $419,915.70 and $509,850.87, respectively. All income so received is turned back into the Treasury of the United States, the expenses incurred in the tests being absorbed by the annual Congressional appropriations for the Bureau's maintenance.

A very great variety of materials and devices were tested, including precision tapes, analytical weights, clocks, chemical glassware, electrical instruments and lamps, thermometers, sugar samples, radium, cement and concrete, fire resistant safes and roofing, aeronautic instruments, automobile tires, fusible boiler plugs, leather and paper. Almost every industry and branch of the government has been served by the Bureau.

## STATE UNIVERSITY ARCHITECT HELD NOT TO BE A STATE OFFICIAL

### Courts So Rules On Income Tax Issue

An architect employed by the Board of Regents of a state university as university architect, has been held not to be a state employee, so that his compensation is subject to federal income tax, in a ruling just made by the Income Tax Department, according to M. L. Seidman, tax expert, of Seidman & Seidman, Certified Public Accountants.

"In the particular case in which the ruling was made," Mr. Seidman explained, "an architect was employed by the Board of Regents under a ten year contract. His chief duties were to prepare and to submit to the board plans of the campus, location of permanent buildings, drives, walks, etc., and to personally supervise all the work undertaken. He was to receive as compensation an amount equal to a specified percentage of the cost of all material and labor actually wrought into all buildings erected during the life of the contract.

"The Income Tax Department held that the position occupied by the architect was purely of contractual nature and that as the Board had no right to exercise control over the manner in which the architect's work was to be performed, the relationship of the architect to the university was that of an independent agency engaged to accomplish certain specific results and not that of an employer and employee. Accordingly, the architect's compensation was held to be subject to the federal income tax."

## ARE YOU GETTING YOURS?

## CONTRACTING WOES AND HOW TO ELIMINATE THEM UNFOLDED

### Men of National Organization Repute Talk To Indianapolis Builders

Evils of contracting, handicaps encountered, suggested remedies to counteract the impediments thru improved practice and business methods, greater organization effort, and more determined insistence upon the integrity and responsibility of the contractor were some of the important features stressed at a special meeting of the Indianapolis Chapter, Associated General Contractors of America, held at the Severin Hotel, that city, Tuesday night September 29. The affair was given in honor of John W. Cowper, and W. D. Colson both of Buffalo, N. Y., Past Presidents of the A. G. C., now members of the Board of Directors who stopped off at Indianapolis on their way to Dallas, Texas, to attend the quarterly meeting of the board.

The affair began with a 6:30 p. m., dinner on the hotel roof garden after which Wm. Carper, President of the Indianapolis Chapter, who acted as toast-master, formally introduced the visitors who spoke.

Mr. Colson stressed upon the interest and pride a contractor member should cherish for his organization and do all in his power to build up the prestige of that body and make it stand forth to the public as an advocate of the best obtainable in the building field. He exhorted his auditors to act so that their organization would be looked up to, that membership in it would be a recommendation in itself, that the seal of the organization be given the greatest of publicity on business stationery and on signs about projects as that would create familiarity and the public would come to look upon it as a hall-mark of a man's ability and honest integrity. He cited various cities about the country where the contractors were profiting by such publicity because they had behind them a progressive constructive organization.

Following the above speaker came Mr. Cowper who was also introduced by President Carper. He announced this was his first visit to Indianapolis in twenty years and said he was most favorably impressed by the growth of the city, its great strides forward and the evidence on all sides of the new building construction volume that has been and is being carried on. This, he said, has greatly transformed the Indianapolis of years ago, and he predicted a bright future for the city.

Continuing, he said it was pleasing to find local contractors of such a modern progressive type, men who are deciples of organization, and referred to the Associated General Contractors of America, an association of general construction employers formed at Atlanta, Ga., in 1917, not as a price fixing, controlling body, but one whose endeavor it is to improve conditions, economics, as involved in the contracting business, and to guarantee to the public better, permanent buildings.

A great mass of problems has been put up to the organization, both locally and nationally, and conscientious endeavor has been exerted toward a satisfactory solution of them. For instance, contract forms were many and varied out of which misunderstandings, disputes and trouble grew and in an attempt to obviate such annoyances the A. G. C., finally, after much, study adopted the Standard Contract Documents of the American Institute of Architects and is advocating their universal use by all contractors.

Then, too, the A. G. C. has found that day labor work in many instances has been more or less unfair not only to contractors but the building public as well. In the first place work on such a basis is crowding the regular contractor out of business with no resultant gain to the public, and secondly such building procedure does not tend to speed up operations, rather, things are included to drag, string along, run up greater labor costs and add unnecessarily to the already heavy burden of high construction costs, the owner footing the increased bill with no better building for the money expended. Mr. Cowper held this to be a real evil to general contracting interests and contended that contractors organization members should frown upon and seek to discourage such practice.

It is developments like this and other unfair features that organizations should go into and oppose for the protection of members for it is for protection and rectification of unfavorable conditions that organizations are formed. The way to correct inimical features is thru conferences, and contractors associations should seek conferences with other in the building business and also business men so that both sides of the mooted questions could be brought out, analyzed and the objectionable points eradicated. The conference offers the avenue for getting together and when men do that it is so much easier to reach understandings.

As for the building construction business itself, the second largest industry in the state, what is needed most is the right sort of contractors, men of business sagacity, those who use real business methods. There are too many men who figure a job only to find they are too low and seek to withdraw their bids, or, if held to the job by a certified check or bond seek to "get by" somehow, someway, regardless, do anything to save their own skins. Such men are too careless, their type should find no place in the building construction field, they are a menace and really cause economic waste. They are not fair competition to the earnest contractors who have reputations to protect and seek to give honest service for money received.

Contractors organizations should set their faces against the former slip-shod contractor and seek to convince the public and prospective builders that the associations encourage in their members only the right kind of construction and at the right price.

The architect can be a big aid in assuring good work by carefully selecting his contractors to figure his projects, it is really a duty to his clients and himself. If the contractor goes bad on a job the owner suffers and the blame for the result reacts to the discredit of the architect. Contracting is no longer a guess, a hit-or-miss proposition and associations would do well to build with that idea in mind so that they could advocate to the architects that all contractors be investigated as to skill, integrity and ability and permit no contractor to take a job too large for him to handle. In that way associations could welcome investigations for their members would be qualified and the associations would command greater respect as it would mean they would stand behind their men.

But to accomplish results an association must have financial support. It does give to its members, maybe not directly or in tangible dividends but the benefit is there. One must have faith and trust in an association. Somehow contractors seem to lack those attributes, they want results first and then are willing to pay. On the other hand, in direct contrast to the employer is the building trades mechanic who pays willingly into his Union and by so doing has profited. Supposing the mechanic had held back and waited for results before paying dues, where would Labor be today? And yet the contractor is only asked to pay into his association approximately one-third as much as his employe pays into his Union.

In conclusion Mr. Cowper said he believed a better day was coming for the

contractor as the builders were apparently awakening to the advantages of organization. The A. G. C., and other associations are growing and the outlook is promising. He encouraged Indiana contractors to keep up the good work that they too may come into their own thru the support organization can offer them.

## MASON CONTRACTORS TO SEEK A GREATER ASSOCIATION

### Indianapolis Masons For State-Wide Organization Backed Up By Mason Contractors Association of U. S. and Canada

It is all very well to encourage winter building construction operations, and to some extent success has attended the advocacy, but the general public has not altogether awakened to the advantage of the scheme and when the fall comes there is a tendency toward a slackening up of activity in the building construction field. Some day there may be a great change and folks may plan to build the year around but that time is not yet, though the cessation of operations is not as wholesale as in years ago. At that, and despite the fact that some work is carried on through the winter months, most building trades employers begin at this time of the year to look forward to the next season and ponder as to what conditions may be expected. Especially is this true of the members of contractors associations who turn their thoughts to planning for the future, building their fences as it were against things that may arise to create unfavorable conditions.

Among this latter class are the members of the Mason Contractors Association of United States and Canada with which the Indianapolis Mason Contractors Association is affiliated. Now in prospecting on the future the Masons believe that organization is the best safeguard toward bringing about better building conditions and to that fundamental principle are turning their attention.

A communication under date of Septemper 29, was received this week from Walter T. McGarvey, Cincinnati, Secy.-Treas. of the M. C. A. of U. S. and Canada, to the effect that a greater organization effort is to be pushed this winter, and the Indianapolis Mason Contractors Association has espoused the scheme. Plans are to be worked out for a state-wide membership drive, and where possible local city associations are to be formed, while in the smaller localities memberships for the parent association are to be solicited.

That the endeavor is earnest is attested by the fact that some three thousand letters announcing the membership drive have been sent out all over the country and full co-operation of the International Association will be given local effort.

There are men who weigh only the first cost, initiation and dues, and can not comprehend the direct and indirect benefits that come thru the association. The sad part about it all is that the non-member participates in the benefits that accrue but fails to shoulder his individual responsibility toward the attainment of those benefits. At the same time his holding out, his aloofness, makes it just that much harder for the progressive fellows in his field to get results. He is the kind who takes and takes but never gives and yet he howls the loudest about associations never getting anywhere.

If the Indiana mason, each and every one of them, would fall in line it would give to this craft employer a solidarity and a power not to be denied, and the unity of effort would surprise with the results achieved, the working conditions brought about and the annoyances brushed aside. To the local effort would be added the aid of the Mason Contractors Association of United States and Canada and a morale inspired by the knowledge that all were working together for common good.

## PURDUE UNIVERSITY TO HOLD ANOTHER ANNUAL CONFERENCE FOR INDIANA BUILDERS

### Event Set for Latter Part of October

Another big conference for Indiana Builders is scheduled for this fall and according to present arrangements will be held October 29, at Purdue University, Lafayette, Ind., the site of last year's conference.

The gathering is again to be held under the auspices of the Engineering the Indiana Society of Architects, the Extension Department of Purdue University and is sponsored by the Associated Building Contractors of Indiana, Indiana Engineering Society and representatives of the State Building Trades Council.

Quite an elaborate program is in the making and will incorporate addresses by representatives of the above organizations, Purdue officials and other prominent men. These addresses will touch upon various subjects pertinent to the building industry and should carry an appeal to all those engaged in the architectural, engineering and building contracting fields of the state.

Definite plans have not been completed but just as soon as they are announcements will be given. This much can be said at this time, the conference will be held at the auditorium in the Engineering Building at Purdue beginning at 1:30 p. m., and continuing on thru to evening when a banquet will be held, probably at the Fowler Hotel.

Invitation to attend the conference is to be extended to all the architects, contractors, engineers and building trades representatives thruout the State thus making the gathering representative of the Indiana building industry.

## HAMMOND

## NO END TO THE CALUMET DISTRICT'S GREAT OPPORTUNITIES

### Such Is the Prediction of the Hon. Adam Bede

Prophecies when forecasting a favorable future are always acceptable, in fact most pleasing, and those concerned are prone to pass the good word on.

Therefore, since Adam Bede came to the Calumet District recently for a visit and told the folks of East Chicago that a great future was in store for the northwest section of Indiana, their and the adjacent territory of the state, the good word was most gratifying and should be an inspiration to Calumet citizens.

He said the day is not far distant when the rest of the State of Indiana will have to take off their hats to the Calumet District which is destined to develop into one of the great industrial business centers of the world. To substantiate his argument he called attention to the great steel mills now in operation, others about to be erected and innumerable improvements contemplated, the great Calumet inland harbor now being constructed where ships from all over the world can dock, all of which will bring about a great railroad center, a feature even now developing.

Some few years back such words would have seemed folly but now they ring true for gradually that great natural advantage Lake Michigan has been appreciated, the great ore fields have been brought nearer and immense mills have sprung up, great wastes have been converted into seething industrial effort, in fact, the very things Mr. Bede prophesied to a great degree is and has been steadily taking place. Who is there to dispute, with all the evidence at hand, that this is but the beginning which will grow and expand into an industrial activity the possibilities of which are limitless?

### SCORES AGAIN

**Hammond Given a Day At the County Fair, Packed the Place**

Give Hammond a chance and she always makes good. Friday a week ago the Lake County Agricultural Board set aside the day as "Hammond Day" and everybody and his dog scooted over to Crown Point to the County Fair. It was a great crowd that stormed the grounds and a fine fair presented for their inspection, recreation and approval. Everything from agricultural to manufactured products was given the once over and many then turned to the stock show, the Midway and the races. The latter furnished some good sport, and the horses looked good on the track, but, when it comes to getting somewhere we'll take an auto. There seem to be a lot more folks of that opinion, too, for the roads back home were pretty well clogged that night.

It was a big day and Hammond made good.

### CALUMET BUILDING PROGRESS

Architect Mac Turner, Hammond, awarded the contract to Guy Young for the remodeling of the Sherman Bldg.

General Contractors Cochran and Hawk, Hammond, carried away the contract for the construction of the new $75,000 Polish Catholic School at Calumet City, Ill.

Witter Bros. have started another four apartments building on Stanton Ave. and 114th St., Robertsdale.

Hammond is to have a direct paved highway to the Dunes. James Nedjl was awarded the contract for the extension of Michigan Ave. from Hammond to Gary where it will connect with Fifth Ave.

General Contractor John G. Meyers has started another eight-room frame residence on Madison St., near 15th St.

E. E. COLE.

## INDIANAPOLIS

### BOWLING BUILDERS AT INDIANAPOLIS GOING ALONG AT A GREAT PACE

**League Play Faster Than Ever**

Having gotten under way early in September for its sixth season the Builders Bowling League at Indianapolis, formerly known as the A. C. E. S., because its personnel is composed of architects, contractors, engineers and supply men, is setting a fast pace and promises to be one of the big leagues of the city before the season is over.

Each year the play has grown more spirited and individual and team averages have steadily risen under the spur of competition. Interest in the league this season is greater than ever and each Friday night there is a big crowd on hand ready for the scheduled frays. Much credit is due to President John Geiger and Secy. Dwyer for the business like and efficient way in which they have conducted the bowling organization. They both insist on promptness in reporting for play and keep things moving at all times in bang-up fashion.

The good fellowship and sportsmanship is remarkable and has served to cement the aggregation of men of the

Indianapolis building field into a great bond of friendship the value of which can not be over-estimated. The league offers a point of personal contact that is unique in that it affords an opportunity for close acquaintanceship between the men of the four big fundamental elements of the building game offering social intercourse and clean healthful recreation.

There are eight teams in the league and the players number some fifty men from various firms associated with the local building industry.

To date, after four weeks play the Central Supply Co., Geiger and Peters Co., and Brandt Bros., teams are leading the procession, tied for first place, while close behind them range three other teams ready to crowd them from their lofty positions at the first slip. It is a keen race and a hot fight and promises to continue over the remainder of the schedule.

The general average of the league play so far this season is twenty-five points higher than that of last year which gives some idea of the speed put on this season. Thirty, 290 or better individual game scores have been rolled so far in 1925 a pace that if maintained will far out distance all previous records.

Below are to be found the individual averages of all the players.

# Sealed Proposals

**ELECTRIC LIGHT FIXTURES**
**NOTICE TO CONTRACTORS**

Sandborn, Knox County, Indiana.
September 29, 1925.

Notice is hereby given that W. Cyrus Wampler, Township Trustee, and the Advisory Board of Vigo Township, Knox County, Indiana, will receive sealed proposals until one-thirty o'clock p. m. Thursday October 15, 1925, at the new High School building now being erected at Sandborn, Knox County, Indiana, for the furnishing complete of the electric light fixtures, and erecting them in place, including the fixtures and all lights and glassware and connecting to the main supply or feed wire, with the necessary independent bid for switch connection, for the Township High School building at Sandborn, Indiana.

Independent bids on each different light or kind of fixture are requested.

A certified check of 5% must accompany each proposal as evidence of good faith.

The envelope containing the proposal must be plainly marked: "Proposal for Electric Light Fixtures."

The right is reserved to reject any or all bids.

Floor plans, if necessary, will be furnished by J. W. Gaddis, Architect, Vincennes, Indiana.

W. CYRUS WAMPLER, Township Trustee, Bicknell, Indiana Vigo Township, Knox County, Indiana.

Oct. 3rd, 1925.

## "B60" Series Hot Blast Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum Number of B. T. U.'s. Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX HOT BLAST SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 800 sq. ft. to 25,000 sq. ft. steam

VOL. VII INDIANAPOLIS, INDIANA, OCTOBER 10, 1925 No. 28

## HABIT RATHER THAN INCLEMENT WEATHER IS CAUSE FOR WINTER BUILDING SLOW DOWN

### Those Who Hesitate Because of Winter Pass Up Unsuspected Advantages

Although more buildings are constructed during the winter months than ever before, yet cold weather building operations are held back and largely because of habit, according to an observer of this particular field of construction activity. In fact, investigators have found that habit has a greater influence in the slowing down of winter construction than the difficulties encountered in carrying on construction work in the winter months. They point to the fact that there is much less building in the cities of the south during the winter in spite of hte fact that the weather offers few obstacles. While construction work throughout the north during the late fall and winter has in recent years reached proportions never before dreamed of in the past, it is still true that during the period from November 1 to April 1 large numbers of men who are engaged in the building trades are out of employment most of the time.

This condition is the opportunity for the man who wishes to build, for it is reasonable to believe that when large numbers of good workmen in the various building trades are unemployed he can get better workmanship, if he starts the construction work when men are idle and the contractor can pick his men with discrimination. In the old days every operation in the construction of a building was performed on the job, but now most of the work is performed in factories and cold weather is not much of a handicap to the balance of the work that must be carried on in the open. Even concrete construction work can now be carried on safely at low temperatures.

There are about 125 working days from November 1 to March 31, and the probabilities are that during 74 days of that period the weather will be freezing or rainy during the working hours, but even during these days some portion of the day are suitable for outside work.

As for home building in the winter the construction of an ordinary home only requires a few months' time, so it is not difficult to plan the work with reference to probable labor conditions with the view of not only saving money for the owner, but insuring the completion of the new home at the earliest possible date.

## COMPETITION

### A Fine Thing When Not Bent Unfairness By Selfish Animosity

The old adage "Competition is the life of the trade," is often true but it would oftener be exemplified were is to start with the word "fair." For unfair competition is so far from being the life of trade as to be almost the death of it.

When two or more contractors allow animosity toward one another to influence them to the point of making unreasonable cuts in their estimates, they are all sufferers alike as is the foolish owner who aids and abets their quarrel by tempting each to outdo the other in the matter of wild bidding.

The bidder who finally lands the contract after one or possibly several cuts in his price, will probably break no better than even if he does not actually lose. His competitors suffer, not so much from the loss of the contract, as from the fact that they have helped to more or less establish a new standard of value as relates to their work, a standard that will scarcely enable them to sustain a reputation for quality. The owner is apt to suffer from the fact that while he has an extremely low price, it is one that will call for unusual vigilance in the matter of inspection and supervision, for the temptation to the contractor to cut short corners will be ever present, both in the matter of material and workmanship.

All of which brings us to the necessity of the application of another old adage "Live and let live," which would mean that there would be fair competition. Enough rivalry to assure the owner of a reasonable figure and a good job and at the same time give the contractor a just profit instead of dangling him on the verge of bankruptcy.

The way to bring about this better condition is for each of us to realize that everyone and anyone has the right to go in business for himself, even if he selects our particular line as the one to follow, and to show him by both precept and example that it is not the amount of competition that one encounters but the character of it, that spells success or failure.—(Monthly Bulletin of the Builders' Exchange, Buffalo, N. Y.)

## SECRETARY OF LABOR DAVIS ADVOCATES SUPPORT OF JURISDICTIONAL AWARDS BOARD

### Representative Building Men Attend Conference At Washington, D. C.

The conference called by the National Board of Jourisdictional Awards in the Construction Industry which was held in the American Federation of Labor Building in Washington, D. C., on Tuesday, September 22, was a decided success in the opinion of all of those who attended.

Approximately one hundred and twenty-five contractors, labor leaders, architects and engineers attended the meeting representing all the various international labor organizations, the Associated General Contractors of America, the National Association of Building Trades Employers, the American Institute of Architects and the Federated Engineering Council.

The federal government was represented in the person of Secretary of Labor Davis, who in a masterful address stated that the National Board for Jurisdictional Awards was a necessary agency in the settlement of jurisdictional disputes in the construction industry. He stated further that the Board must be supported as vital to the best interests of the entire industry and urged full co-operation on the part of all the elements in it.

Addresses were also made by A. E. Coleman of Chicago, President of the National Association of Building Trades Employers and R. C. Marshall, Jr., of Washington, D. C., General Manager of the Associated General Contractors of America. Both of these officials called attention to the fact that the Board had succeeded in the past in settling innumerable disputes between the trades which had resulted in a vast saving to the industry. Both of the speakers urged greater co-operation in the future on the part of all of the constituent organizations.

All of the presidents of the international labor organizations in attendance addressed the conference and once more pledged the support of their combined membership to the work of the Board. The address of John J. Hynes of Washington, D. C., general president of the Sheet Metal Workers International Alliance in behalf of greater support to the Board was especially forceful.

An attempt was made to bring the bricklayer-plasterer dispute to the attention of the Board for settlement, but both contestants seemed reluctant to place the controversy before it as there was some question as to the jurisdiction of the body in this particular case.

No definite action was taken by the conference, but it was the concensus of opinion that the meeting would result in a crystalization of sentiment in favor of the agency that has done so much to settle disputes between the trades in the construction industry.

## BUILDING TRADES LEAD IN AVERAGE HOURLY WAGE

### However Seasonable Limitations On Employment Should Be Considered In Reckoning Their Yearly Earning Ability

A report which contains the union scale and hours of labor of 894,343 organized wage earners as of May 15, 1924, has just been published by the Bureau of Labor Statistics of the United States Department of Labor. The report covers 66 important industrial cities of the country.

In all trades, taken collectively, the hourly union wage rate on May 15, 1924, in the United States was higher than in any preceding year, being 8.3 per cent higher than on May 15, 1923; 99.8 per cent higher than on May 15, 1917; 128.1 per cent higher than in 1913; 141.5 per cent higher than in 1910; and 154.2 per cent higher than in 1907.

The average hourly rate in the building trades including both skilled and common labor was 1.154 on May 15, 1924, as against $1.068 on May 15, 1923. Newspaper printers are next highest with an average of $1.111 on May 15, 1924, and $1.047 on May 15, 1923.

## HERE'S QUITE A CASH CUSTOMER

### State of Indiana Proves to Be a Fairly Steady Builder

More than $9,000,000 has been spent by Indiana on public buildings in the last 12 years, an average of $750,000 annually—records in the office of State Auditor Lewis Bowman reveal.

The largest expenditure in any one year was $2,171,729.98 in 1923, with 1924 only a little behind with over $2,000,000. The least was in 1917 when the total was $169,537.91. The million dollar mark was also passed in 1922 and 1925 will not miss that figure very much, it was believed today.

Annual expenditures over the 12 year period were: 1913, $316,443.47; 1914, $485,462.52; 1915, $376,806.90; 1916; $293,973.43; 1917, $169,537.91; 1918, $379,966.83; 1919, $230,322.32; 1920, $816,221.89; 1921, $414,644.41; 1922, $1,366,130.15; 1923, $2,171,727.98; 1924, approximately $2,060,000.

Each half million dollars represents around one cent additional on the state tax levy, Bowman says. Comparing 1917 to 1923 and 1924 revealed more than ten times as much spent in each of the latter years than the former, which meant almost four cents more on the state tax levy on each $100 valuation.

Bowman asserts that such wide fluctuations are not advisable, and has recommended to Governor Jackson and the state budget committee that tentative amounts be agreed upon for annual public building expenditures that would be fair to the state institutions. The amount he says, should be such as the state could well afford to expend over a period of years.

ORGANIZATION AND CURRENT NEWS

## EAST CHICAGO

### SLUMP SHOWN

**September Construction Slows Down Greatly**

| | |
|---|---|
| January | $ 135,207 |
| February | 544,825 |
| March | 502,750 |
| April | 718,745 |
| May | 513,875 |
| June | 533,204 |
| July | 274,795 |
| August | 466,015 |
| September | 179,750 |
| Total | $3,869,166 |

Twin City, East Chicago and Indiana Harbor, building for September was the second lowest month of the current year with permits aggregating only $179,750, according to the figures issued by Building Commissioner Henry Bainbridge.

Construction of apartment buildings and business structures fell off appreciably during the month, which is given as the cause for the low figures. Erection of dwellings was also slightly below the total of the other months.

Then, too, the fact that industries failed to apply for permits on any of their enormous expansion programs is also given as one of the contributing causes for the low mark set last month.

Building of business structures during September totalled $58,000 as against $282,900 in August. Apartment construction for the month was $48,500 compared to $108,485 for August. And erection of dwellings at $68,750 was from thirty to forty thousand dollars less than in previous months.

## FT. WAYNE

### EIGHT PER CENT LOSS REGISTERED BY BUILDING OPERATIONS

**September Volume Suffers By Comparison With Other Building Totals.**

The total estimated cost of the new building volume at Ft. Wayne for the month of September was $725,889, which was 8 per cent in arrears of the August business, and 8.73 per cent behind that of September a year ago. During the month there were but 224 permits granted for new building, 78 less than in August and 84 less than issued in September, 1924.

There were a fair number of residential projects approved, a fact that really saved the situation as there were no large projects during the month and it was the home-building movement that carried the months' business to the volume that resulted.

It was expected that the school commissioners would take out a permit last month for the large new North Side High School which action if taken would have given the city over a $1,500,000 building figure for the month, but the prospect failed to mature and the figures showed a slight slump as a result when compared with other months' totals.

The record issued at the city building inspection department office show this:

| Month | Per. | Est. Val. |
|---|---|---|
| September, 1925 | 222 | $725,889 |
| September, 1924 | 308 | 795,290 |
| August, 1925 | 302 | 789,300 |

## HAMMOND

### BOMB EXPLOSION STIRS HAMMOND

**Outrage Traceable to Labor Trouble**

Just to let folks know lest they forget, when things are inclined to move along smoothly, some vandal or vandals early one morning last week gave the citizens of Hammond an example of what may be expected in labor troubles. A bomb was set off in the entrance of L. Simpson's barber shop wrecking the front of the establishment and shattering plate glass windows across the street.

Ever since the barbers' strike a year ago Simpson, who operates the largest tonsorial place in the city, has been operating an open-shop. The recent explosion suggests but one conclusion. This outrage bears all the earmarks of a sample of what has been pulled off in Chicago labor tactics and is an indication of what may be looked for from a certain element that is included in the personnel of our law abiding labor unions. It is a warning of what may follow if we all don't cater to the powers that be.

There have been several shops bombed at Chicago but nothing of the sort was looked for at this distance as no threats had been made and everything apparently was moving along in good shape. Such lawlessness gains nothing anywhere, nor will it here. If anything it reacts from the purpose intended, and in Hammond will have a tendency to create a deep sympathy for Simpson, make more friends for him and create greater business than he has enjoyed formerly.

The honest, sincere, crusader for labor has no countenance for such methods and condemns them as heartily as any other good law respecter, he fully appreciates the fact that Labor suffers and

suffers knee'y through just such acts, a bit of which has just aroused Hammond.

### INTERESTING BIT OF NEWS FILTERS IN

**Will Mean Much Delayed Construction Work Can Now Be Completed**

According to reports reaching Hammond from Atlantic City the Bricklayers and Plasterers have reached an agreement of settlement in their dispute relative to the laying of terrazzo flooring. This is most interesting information if true it will mean that much work about the country that has been held up by the dispute will proceed now.

### HAMMOND BUILDING JOTTINGS

Bids were received Oct. 10, by the architects Smith and Childs, Chicago, for the erection of the proposed Northern States Life Insurance Co's. building, Hohman and Waltham sts., Hammond. The structure as planned will be two stories high with an area 90x100 feet. It is to be of reinforced concrete with

Work on the new theater is now moving ahead rapidly since the light poles and wires that were retarding operations have been removed.

Four air drills have succeeded in overcoming the adhesion of the concrete wall of the Cox building to the brick wall of the Weis building and the job of moving the structures back for street widening purposes can now be resumed.

Contractors G. P. Pearson & Son, received the contract for the construction of a new $8,000 store building at Van Buren and 15th ave., for A. H. Tapper.

Architect W. F. Hutton is building a new residence and garage for himself in the Illiana Addition.

J. H. McClay, contractor, was awarded the contract to build a $20,000 addition to the ice storage house in the Monon railroad yards.

Architects Hess and Greenwood, Hammond, have plans out for a store and apartment building on Oak st., for Charles Szabo. The plans provide for five store rooms and four flats.

E. E. COLE.

## INDIANAPOLIS

### INDIANAPOLIS TO HAVE A NEW BUILDING CODE

**Regulations Just Adopted Are the Result of Several Years Study and Work**

A new city building code, which Francis F. Hamilton, building commissioner, says will decrease building costs from 10 to 15 per cent was adopted by unanimous vote by the Indianapolis city council this week, following incorporation of amendments. One of the important features of the new code is that it requires skilled laborers in certain building trades to pass examinations and be licensed.

Regulations for the floor load have been reduced 20 per cent, and the amount of steel necessary for construction would be smaller through the code. It also includes regulations for plastering and utilization of stone veneer for the first time in local history. Fire escapes would yield to fire towers inside of buildings.

### AGAIN OFF

**Further Activity Decline Shown in Building Operations**

The let down in building construction operations that developed at Indianapolis in August when one of the lowest monthly totals of the year was recorded showed no tendency to reverse itself in September, in fact, the easing up process from brisk activity continued right along and the volume of new business last month ran even less than that recorded the previous thirty day period.

Except for the gradual dwindling of construction operations the month's building record was featureless no new projects of any consequence making their appearance.

It would seem from the returns of August and September that the residential building boom that had been carried on since early spring is in a fair way to subside as it dropped off consderably in August and then more so in September. It formerly was that the estimated valuations on new residences ran well over a million dollars a month, but in August the figures dropped to approximately $800,000, and last month they receded to just a little above $600,000, only 165 permits having been issued for new houses.

There was a great deal of repair and alteration work and much miscellaneous work, but individually the various projects were of such a small nature that the money involved did not amount to a great deal, the 1,257 permits granted totaling only an estimated cost of $458,874.

Industrial building work was practically nil and business structures were but thirteen for less than $200,000.

The official figures as issued by the city building inspection department are as follows:

| Classification | Per. | Est. val. |
|---|---|---|
| Alt. & repairs | 839 | $ 224,856 |
| Apartment bldgs. | 3 | 37,585 |
| Business bldgs. | 13 | 181,575 |
| Industrial bldgs. | 1 | 450 |
| Miscellaneous work | 418 | 234,018 |
| Public bldgs. | 1 | 11,750 |
| Residences | 165 | 639,328 |
| Total, Sept. 1925 | 1,440 | $1,329,562 |
| Total, Sept. 1924 | 1,759 | 2,607,980 |

### OPENS BRANCH OFFICE

**Federal Cement Tile Company State Headquarters at Indianapolis.**

Recently the Federal Cement Tile Company, whose home office is at 608 South Dearborn Street, Chicago, with works at Hammond, Indiana, has established a branch sales office at Indianapolis under the direction of Mr. C. B. Baird, who for many years has been affiliated with the company in various important capacities.

...925, for the following: Furnishing of all material, tools, drayage, and labor necessary for ...ing old steel stack and the fabricating and ...tion of new steel stack for school No. 1. ...e estimated cost is $375.

# Herringbone
## Doublemesh Lath
### walls and ceilings resist the ravages of time

IT doesn't take long for the average wall to lose its first fresh charm. A year or two—a little settling of the house—and ugly disfiguring cracks appear—lath marks that streak the ceilings or cracks that mar the symmetry of the walls and ruin the decorative effects.

That's why you find the specifications of so many modern homes, from the most modest to the most pretentious, calling for Herringbone Metal Lath. Archtects, builders and wners realize the true economy and the fire protection that Herringbone construction gives.

Herringbone is not expensive either. Its first cost now is only slightly more than ordinary wood lath. Builders say its fine mesh saves plaster, and that its large stiff, easily handled sheets of steel or Armco Ingot Iron reduce labor costs materially.

July
Thirteenth
1923

Ramspring Bumper Company,
Chicago, Illinois.

Gentlemen:

In the fall of 1911 we completed the erection of the main building of our Indianapolis factory. This building is 542 feet long and 87½ feet wide, and is covered with Federal Cement Tile roofing. This roof to date has given us but little trouble and in my opinion has proven up to their guarantee and has been satisfactory in every particular.

To date there has been but two leaks; in fact, the defects so far have been so trivial that they have hardly been noticable. There has been no maintainance expense due to the fact that what little upkeep we have had, has been taken care of by the tile company at their expense. We might also mention that our roof has been inspected by their representatives on different occasions and what few defects we have had, has been discovered by their people. The service rendered by them has been 100%.

Very truly yours,

THE SMITH AGRICULTURAL CHEMICAL COMPANY.

GMW:ML. Per. G. M. Weaver.

This letter, written more than two years ago to a concern interested in Federal Cement Tile, tells the story of Federal permanence and Federal service more convincingly than we can tell it.

Marshall, Manager, Davidson and Lord Sts. Plans in progress. Ready for bids soon. Brick, concrete and steel, steel sash, comp. roof, elevators, steam heat, concrete vault, vault door, tile work.

**Parochial School:** $60,000.00, 2 sty. & bas., South Side, Indianapolis. Archt. Herbert A. Brand, 111 West Washington Street, Chicago, Illinois. Owner, St. Paul Evangelical Luthern Congregation, Ernest Stahlhut, Chairman Building Committee, 1538 South New Jersey St., Indianapolis, Henry C. Vehling, Secy., 702 Virginia Ave., Indianapolis. On working drawings. Ready for bids in 30 days. Brick, concrete and steel, steel sash, composition roof, steam heat, steel sash.

**Freight Station:** $200,000.00, Lord St., Indianapolis. Owner, Big Four Railroad, Big Four Station, Cincinnati, Ohio. Preliminary plans in progress. Brick, reinforced concrete and steel.

***Grade School** No. 34: $140,000.00, (addition of 8 rooms, auditorium and gymnasium), corner of Wade and Boyd Ave. Archt. D. A. Bohlen and Son, 1001 Majestic Building. Owner Board of School Commissioners, William H. Book, Business Manager, 150 N. Meridian. Plans and specifications completed. Owner will advertise for bids in 10 days. Brick, concrete and steel.

***High School Group:** Shortridge North Side Side High School," $2,500,000.00. Archt. J. Edwin Kopf and Woolling, Indiana Pythian Building. Associate Architect, Herbert Foltz, J. F. Wild Building. Owner, Board of School Commissioners, William H. Book, Business Manager, 150 N. Meridian St. On working drawings. Plans will be ready for bids December 1st.

**Barracks Building,** Plainfield, Indiana, the board of trustees of the Indiana Boys' School, Plainfield, Ind., will receive sealed bids up to 10 o'clock a. m., on the 4th day of November, 1925, at their meeting at the above address for all labor and material for a barracks building (including plumbing heating and lighting), to be built according to plans and specifications being prepared by Orlando B. Little, architect, 30 Union Trust building, Indianapolis, Ind. Plans will be ready for bidders Oct. 21, 1925. Board of trustees, Indiana Boys' School, Plainfield, Ind.

FRED THOMAS, President.
FRANK C. HUSTON, Vice Pres.
PERRY DAVIS, Treasurer.
ALBERT B. SNYDER, Secretary.

***Deming Memorial Dormitory:** $100,000.00, 3 sty. & bas., 150x40 (30 Dormitory rooms), "Rose Polytechnic Institute," Terre Haute, Ind. Archt. Herbert Foltz, J. F. Wild Building, Indianapolis. Owner, Rose Polytechnic Institute, Dr. Frank C. Wagner, Dean, Terre Haute. Plans in progress. Owner expects to ask for bids about January 1st. Brick, reinforced concrete and steel. (Funds for the building were donated by the late Demas Deming, Terre Haute.)

**Hospital for the Insane:** (rewiring of 35 buildings), Richmond, Indiana. Engineer: Snider and Rotz. Merchants Bank Bldg., Indianapolis. Owner, Eastern Hospital for the Insane, Dr. L. F. Ross, Supt., Richmond, Ind. Plans in progress. Owner will advertise for bids next month.

***Miscellaneous Supplies:** Notice is hereby given that the joint purchasing committee for the correctional and benevolent institutions of the state of Indiana will receive at the office of its secretary, Room 326 State House, until 10 o'clock a. m. Wednesday, October 21, 1925, sealed bids on paints, oils, varnishes, queensware, glassware and cutlery according to a complete list specifying kind, grade and quantity now on file in the office of the secretary of the committee. Joint purchasing Committee of Indiana. Daily E. McCoy, Secretary.

***Warehouse, 3 sty., 50x100; Garage, 1 sty, 80x85; Paint room, 1 sty., 40x80; Reinforced concrete reservoir, tanks concrete paving:** South Keystone and Big Four R. R. Private plans. Owner, The Standard Oil Co. of Indiana, 802 Lord St., Indianapolis. Bids in under advisement. Probably 10 days before contracts are awarded. Reinf. concrete and brick, steel, steel sash, comp. roof.

***University Buildings:** First Unit to house 2,000 students, "Fairview Park." Archt. Robert Frost Daggett, Continental Bank Bldg. Owner, Butler College, Dr. Robert J. Aley, Pres., Irvington, Indianapolis. Plans in progress. Mature early Spring. Brick, concrete and steel.

***Church:** $125,000.00. Irvington, Indpls. Archt. Harrison and Turnock, 500 Board of Trade Bldg. Owner, Irvington Presbyterian Church. Rev. George Allison, Pastor, 254 South Ritter Ave. Preliminary plans in progress. Brick and stone.

***Residence and garage:** $15,000.00, (7 rooms). Archt. Harrison and Turnock, 500 Board of Trade Bldg. Owner, Harry E. Jordan, c/o Indianapolis Water Co. Bids in under advisement. Stucco and frame.

***Church:** $175,000.00, (1st unit consists of an auditorium and gymnasium), Lorain, Ohio. Archt. L. H. Sturges, 527 Board of Trade Building. Owner, Church of Christ, A. W. Cinniger, Chairman Building Committee, Lorain, Ohio. Plans in progress. Bedford stone.

***Apartments (19) and Stores (3):** $55,000.00, S. Talbott and Palmer Sts. Archt. Everett H. Crabb State Life Bldg. Owner, Albert O. Vollrath, 117 E. Palmer St. Owner receiving bids. No date set for closing. Bric veneer over frame. (Note change in construction. Brick veneer instead of stucco.)

***Sunday School Building:** $200,000.00, 34th and Central. Archt. J. W. C. Corbusier, B. F. Keith Building, Cleveland, Ohio. Associate architect, Robert Frost Daggett, Continental Bank Bldg., Indianapolis. Owner, Tabernacle Presby-

**Contracts Awarded**

***High School:** $522,000.00, 2 sty. & bas., 246x186. (Class rooms, auditorium, gymnasium, stage, locker rooms, manual training dept., laboratories, lecture rooms, lunch room, study halls, band room, choral room), "Thomas Jefferson Colored High School," West and 12th St. Archt. Harrison and Turnock, 500 Board of Trade Bldg. Owner, Board of School Commissioners, William H. Book, Business Director, 150 N. Meridian St. General contract awarded to Brown and Mick Construction Co., 226 East Michigan St., for $405,251.00. Heating and Ventilating let to Freyn Bros., 1028 N. Illinois St., for $52,336.00. Vacuum specialties let to Freyn Bros., $1,625.00. Temperature regulation let to Freyn Bros., $4,975.00. Stokers let to Freyn Bros., $6,090.00. Plumbing contract let to Callon Bros., 24 S. Alabama St., for $21,700.00. Electric wiring let to Hatfield Electric Co., 102 South Meridian St., for $18,784.00. Brick, reinforced concrete and steel, fireproof construction.

***High School:** $477,000.00, 2 sty & bas., 148x229, (27 class rooms, auditorium, stage, gymnasium, art rooms, manual training dept., domestic science dept., laboratories, kitchen, cafeteria, study halls, locker rooms), New West Side High School. Archt. Vonnegut, Bohn and Mueller, 610 Indiana Trust Bldg. Owner, Board of School Commissioners, William H. Book, Business Director, 150 N. Meridian St. General contract awarded to William P. Jungclaus Co., 825 Mass. Ave., for $331,862.00. Heating and ventilating and plumbing contracts awarded to Callon Bros., 24 S. Alabama St. Brick stack let to H. P. Heinicke, Inc., S. New Jersey St., Indianapolis, $2,225.00. The heating and ventilating contract included a base bid of $45,000; two boilers, $8,270; two stokers, $5,767; vacuum specialties, $1,088; temperature regulators, $6,617; air purifiers, $1,345; fire brick, $490. The plumbing bid was $19,612. The Sanborn Electric Company was the successful bidder on the electric wiring at $13,400.

***Sanitarium:** (add.), 2 bath houses, 1 sty., 80x30 each, 24 new sleeping rooms, 2 sty., 68x75x33, new toilets, new waiting room, office and general alterations, Martinsville, Indiana. Archt, Wilson B. Parker, 507 Board of Trade Bldg., Indianapolis. Owner, The Martinsville Sanitarium, Walter A. Kennedy, Mgr., Martinsville. General contract awarded to Charles F. Duncan, Martinsville, Indiana. Brick veneer. Start work shortly.

**Display and Office Room:** 1 sty., 35x45, 4020 East Washington St. Owner, The Brooklyn Brick Co., State Life Bldg. Start work shortly. Brick.

**Factory:** $17,000.00, 1 sty., 60x100, 425-27 West Vermont. Private plans. Owner, Indianapolis Plating Co., 633 Kentucky Ave. General contract let to Murphy and Isenhour, c/o owner. Brick and tile.

**Residence:** $11,000.00, 5118 North Illinois St. Private plans. Owner, J. T. Lippincott, 219 West 31st. General contract let to W. F. Parrish, 4818 College Ave. Brick veneer and frame.

**Loading Platform:** $15,000.00. Owner, Purities Baking Co., 957 West New York St. Frame.

**Apartment Building and Stores:** (16 apts., 5 stores): $150,000, 2 sty. and bas., 96x150, Tenth and Beville. Archt. Foster Engineering Service Co., 726 Indiana Pythian Bldg. Owner, Beville and 10th Realty Co., c/o Thomas D. McGee, (attorney), 605 State Life Bldg. General contractor, Foster Engineering Co., 726 Indiana Pythian Bldg. Brick. Foster unit slab system of construction, composition roof, composition floors, copper set store fronts, fan system of heating, ranges, refrigerators, kitchen cabinets.

***Church:** $13,000.00, 1 sty. & bas., 40x74, 51st and Central. Private plans. Owner, 51st St. M. E. Church, Scott Denny, Chmn. Bldg. Comm., 525 East 49th. General contract let to Simeon P. Goss, 805 East 64th St. Start work in 10 days. Frame construction.

**Store Room and Office:** $13,000.00, 2002 Madison Ave. Private plans. Owner, Campbell Oil Co., 2000 Madison Ave. General contract let to Christian Prader, 330 Sanders St. Brick and concrete block.

## WAR MEMORIAL ARCHITECTS ON THE GRILL.

### Engineers Registration Board Hears Testimony In Trial of Cleveland Architects.

**Bulletin**

**Following a lengthy executive session of the Registration Board for Engineers and Land Surveyors the Indiana license of Harry Weeks of the architectural firm of Walker and Weeks, Cleveland, O., architects for the Indiana War Memorial, was revoked. F. R. Walker, the other member of the firm, just missed having his license canceled by one vote.**

**Announcement was made by Mr. Weeks that he would appeal from the decision of the board the law providing for an appeal and review in the county circuit court.**

A trial unique in its nature in the annals of Indiana was held at Indianapolis the past week before the State Board for Registration of Engineers on charges of alleged unethical practice in the preparation of specifications for the new World War Memorial building preferred against the architectural firm of Walker and Weeks, Cleveland, Ohio, architects on the structure and demanding a revocation of their license to practice in Indiana.

The trial was an outgrowth of action taken by the State Board of Accounts some time ago when an investigation was made by the board following complaint that the specifications for the main building were of such a nature as to prevent open competition. The investigation revealed that a patented form of reinforcing steel for concrete work was specified and that the members of the firm of Walker and Weeks were officers of the company holding the patent rights on the material.

That disclosure caused Chief Examiner Lawrence F. Orr, of the Board of Accounts to hold up the awarding of the contract for the basement of the structure and also a demand upon the War Memorial Commission that the architects be dismissed from the work, or, if not that that a competent supervising architect be appointed to check all future plans and specifications of the alleged offending architectural firm.

The charges of Mr. Orr caused a profound sensation in architectural and contractural circles and amongst the laity.

When confronted with the indictment the accused architects admitted their connection with the patented article in question, but contended that the specifications did not shut out open competition.

After debating the matter the War Memorial Commission contended it would involve too much additional cost to discharge the architects but did appoint an engineer to recheck all future plans and specifications for the memorial project.

But that was not the end; charges were filed with the engineers registration board against Walker and Weeks and a demand made for a revocation of their license to practice in Indiana. That is the issue that was being threshed out the past week and the decision of the board is being awaited with interest.

The testimony developed this week brought to light the additional information that A. H. Tashjian, chief engineer of Walker & Weeks, who patented the reinforcing steel in dispute, is also the patentee of a certain type of metal wall base that the architects specified for use in the only completed unit of the memorial and it is alleged that approximately $4,300 worth of the material was used in that structure.

The prosecution introduced witnesses to substantiate the charges preferred, various field examiners of the Board of Accounts telling of their investigations and what their efforts brought forth. Several contractors, unsuccessful bidders on the proposed work, testified that because of the nature of the specifications they were unable to compete on an equal footing with those who figured on using the patented reinforcing steel in question. The submission of the prosecution testimony required one day while that of the defense took two days.

The defense thruout was along the line set forth by Samuel Dowden, attorney for Walker and Weeks, who in his opening address said that although the architects admitted the mention of Rivet-Grip steel in the specifications to be a mistake, there was no graft, nor anything illegal about the matter.

"Neither Mr. Walker nor Mr. Weeks even knew that Rivet-Grip steel had been mentioned in the specifications. until the state board of accounts called the matter to the attention of the War Memorial board of trustees," he said.

Mr. Dowden recited the history of the connection of Walker & Weeks with the War Memorial project. He declared that when the contract was let to the architects for the construction of the first unit of the memorial (the American Legion building), the contract recognized the fact that the architects owned shares in the Rivet-Grip Steel Company.

"The evidence in this case will show," he said, "that plans for the reinforced concrete work prevented the use of loose bar construction, and that rigid bar construction was necessary to stand the stress of pouring an eight-foot foundation, necessary to carry the immense weight of the main building.

**Planning of Foundation.**

"The planning of the foundation was an engineering job entirely, and as such, it was turned over to Armen H. Tashjian, an engineer in the employ of the firm. The evidence in this case will show that all the problems were engineering ones, and that it was up to the engineer to decide what type of construction was necessary.

"Mr. Tashjian had just completed work on specifications for a large suspension bridge, in which Rivet-Grip reinforcing steel was approved by the best bridge engineers in the country. For that reason, thinking to specify the best product obtainable, he called for Rivet-Grip or

In addition to increasing the surplus during 1924 the Company has returned excess premiums to the amount of $172,837.54

## ARE YOU GETTING YOURS?

American System steel. However, the specifications were not closed because of this provision, because these two are the only types of rigid construction reinforcing steel manufactured, and by including both, he included all.

"However, although we claim there was nothing illegal about the specifications, when Mr. Walker and Mr. Weeks were informed of the objections they promptly caused the local sub-contractor, to be repaid approximately $4,100 for the reinforcing steel used in the first building and, as a result, that item was taken off the contract price, so the state of Indiana lost nothing. As it was, the building was completed for $3,000 to $4,000 less than the contract price."

And such was the gist of the testimony of the defendants who also introduced character witnesses to bring out their standing as architects and expert engineering witnesses to endorse the methods employed.

The trial was brought to a conclusion on the fourth day when the closing arguments were made.

ORGANIZATION AND CURRENT NEWS

## FURTHER SLIGHT RECESSION FROM PREVIOUS BUILDING RECORDS REGISTERED IN INDIANA IN SEPTEMBER.

### Six of Nine Cities of The State Reporting Show Gains, But Losses at Indianapolis, Fort Wayne and Terre Haute Proved a Burden Too Big To Be Overcome.

A lack of development of large building projects in the various large cities of the state where construction records are officially kept continued during the month of September and though small construction work continues in good volume it is not in great enough proportion to make up for the falling off of the big work. It is much the same story that has been told month after month through the 1925 season, a condition that will set the year down as a period in which there was an abnormal shortage of large new structures.

Struggling along under that burden September rolled up better than a five million dollars building volume according to the reports from the building inspection departments of nine Indiana cities. This was 14.29% less than the August 1925 total, from the same cities, and 11.3% in arrears of the September 1924 figures. The nine cities were shy 78 permits as compared with the August issuance and 302 behind the total granted in September a year ago.

In view of loss recorded last month the fact that six of the nine cities recorded gains over the corresponding period in 1924 stands out prominently. All the smaller cities except Terre Haute showed increased building activity but the combined effort of the six was not equal to offset the handicap imposed by the losses registered at Indianapolis, Terre Haute and Ft. Wayne.

A comparison of the records of the individual cities for September 1925, and the corresponding period in 1924, puts Elkhart at the top of the list in the way of percentage gain, she registering 124% and 32 more permits issued. Next comes Hammond with 107% and 45 more permits, to be followed in this order, South Bend 77%, 56 more permits, Richmond 41.7%, 2 less permits, Evansville, 15.19%, 25 less permits, Gary, 5.4%, 28 more permit. As for losses, here they are: Ft. Wayne, 8%, 84 less permits, Terre Haute, 41.1%, 33 less permits, Indianapolis, 49%, 319 less permits.

The official figures submitted are:

| | 1925 | | 1924 | |
|---|---|---|---|---|
| Cities | Per. | Est. Val. | Per. | Est. Val. |
| Elkhart | 46 | $ 83,190 | 14 | $ 37,100 |
| Evansville | 263 | 463,909 | 288 | 402,725 |
| Ft. Wayne | 224 | 725,889 | 308 | 795,290 |
| Gary | 261 | 1,060,955 | 233 | 1,006,580 |
| Hammond | 161 | 545,620 | 116 | 263,575 |
| Indianapolis | 1440 | 1,329,562 | 1759 | 2,607,980 |
| Richmond | 68 | 119,472 | 70 | 84,280 |
| South Bend | 415 | 690,305 | 359 | 389,678 |
| Terre Haute | 202 | 124,956 | 235 | 212,255 |
| Total | 3080 | $5,143,858 | 3382 | $5,799,463 |

## BUILDERS CONFERENCE

**A big meeting of Indiana builders will be held at Purdue University, Lafayette, Ind., Thursday, October 29, under the auspices of the Engineering Extension Department of that institution.**

**The affair will be for architects, contractors, engineers and representatives of Labor for the discussion of building problems and conditions.**

## DON'T WORRY!

### Above All, Don't Borrow Trouble

Some of the old time popular songs furnish good suggestions that may be particularly applied during the hot weather.

We refer to "Never Trouble Trouble Till Trouble Troubles You," "Pack Up Your Troubles in the Old Kit Bag," etc.

This sage advice is applicable to the bui'ding business as it is to all other lines and while it is much easier to say "don't worry" than it is to obey the admonition, it is just as well not to let small matters get your "goat." You may then be better able to meet and grapple with the larger problems.

Do not pay any attention to rumors or tales intended to vex you. If a report is current that so and so has jumped the rate in wages in a certain trade, do not allow it to worry you, the chances are it is not true and if it is, remember that if you sit tight, he will be the chief and only sufferer. He can not employ a'l the men in that trade and if he has what seems more than his share of them, it will only be for a limited time, before he will realize that he has been used as a mark and by yield-

ing has weakened his standing with both employers and workmen.

If someone is trying to do you out of a contract, find out if he is doing only what you might do under similar circumstances and await your turn. If he has done something really reprehensible, consider that the incident will a ways be recalled to his disgrace and your credit.

The main thing is not to loose any sleep or pleasure or get any gray hair on account of little vexations. If dwelt upon much they are apt to grow into big ones, so forget them and remember the fellow who said: "I am an old man and have had many troubles but most of them never happened."—(Buffalo Builders Exchange Bulletin.)

## POTENTIAL MARKETS STILL IN EXISTENCE

### All Building Shortage Has Not Been Overcome Tho Some Sections Are Caught Up

Although a recent survey of building construction in 130 cities has led the U. S. Bureau of Labor Statistics to conclude that considering these cities as a unit, the building shortage caused by the war has been entirely wiped out, the survey indicates that many individual cities are still under-built as compared with their population increase and that every section of the country presents opportunity in some of its towns for unusual construction activity.

Building construction can not be shifted from city to city, as can many commodities in case of over-supply, and although an over-built city helps to bring up the general average in any construction survey, each under-built city presents in itself as good an opportunity for sales as if there were a general shortage.

The survey shows that while the population of the 130 cities, as a unit, increased an average of 11 per cent in the period from 1914 to 1924, construction increased 15½ per cent. "Construction" in this report means new construction of all kinds, no attempt being made to segregate residential from non-residential construction.

Fifty cities out of the 130 showed an average volume of new construction less than in 1914 and seventeen more showed lower rate of increase in building than in population.

Some of the cities in which the volume of construction has not kept pace with the increase in population, based on the pre-war year, are as follows, according to this survey:

| | 1914 | 11-year Average Population | Average Vol. of Construction |
|---|---|---|---|
| Allentown, Pa. | 100 | 120 | 82 |
| Altoona, Pa. | 100 | 108 | 84 |
| Brockton, Mass. | 100 | 108 | 73 |
| Cambridge, Mass. | 100 | 102 | 45 |
| Dubuque, Ia. | 100 | 101 | 70 |
| Galveston, Texas | 100 | 109 | 60 |
| Grand Rapids, Mich. | 100 | 111 | 87 |
| Kansas City, Mo. | 100 | 114 | 86 |
| Manchester, N. H. | 100 | 106 | 71 |
| Minneapolis | 100 | 112 | 80 |
| Mobile, Ala. | 100 | 109 | 56 |
| Peoria, Ill. | 100 | 107 | 56 |
| Pittsburgh, Pa. | 100 | 105 | 67 |
| St. Paul, Minn. | 100 | 105 | 64 |
| Salt Lake City | 100 | 112 | 79 |
| San Francisco | 100 | 110 | 59 |
| Savannah, Ga. | 100 | 112 | 82 |
| Seattle, Wash. | 100 | 116* | 68 |
| Superior, Wis. | 100 | 99* | 64 |
| Terre, Haute, Ind. | 100 | 107 | 80 |
| Wheeling, W. Va. | 100 | 135 | *70 |
| Worcester, Mass. | 100 | 111 | 75 |

*(In 1920) Later estimates not given by Census Bureau.

Cities in which volume of construction is shown to have far out-stripped increase in population are Knoxville, Canton, Ohio; Des Moines, Harrisburg, Jersey City, New Orleans, Oklahoma City, Pueblo, South Bend, Ind.; Topeka and Wichita, Kansas, and Yonkers, N. Y. Los Angeles shows twice the average volume of building construction over the 11-year period as in 1914 and in 1924 four times the 1914 figure, but it is one of the cities, like Akron, Denver, Detroit, Houston, Seattle and Spokane, for which on account of unusual conditions the Census Bureau does not wish to venture an estimate of population.

Doubtless in some cities 1914 was a "boom" or a "low" year and in these cases not an ideal "base" by which to draw comparison, but the general averages indicate that although the important cities of the country as a unit have wiped out building shortages, many of them are actually much underbuilt and therefore are still promising fields for the lumber merchant and other building supply men.—(Bulletin of the National Lumber Mfgrs. Assn.)

## WHERE IS LABOR'S SUPREME COURT?

### A Pertinent Question Inspired by Recent Bricklayers'-Plasterers' Run-in

The construction of fifty million dollars' worth of buildings in all parts of the country, including Chicago, has been stopped because the unions of plasterers and bricklayers are having a quarrel. The trouble began several years ago. In some of the smaller communities, particularly in the South, plasterers had no local organizations and were enrolled in the bricklayers' union. More recently the plasterers have endeavored to enroll these men in their own union.

Building contractors operating in the territory in which the dispute arose have been obliged, of course, to hire bricklayer plasterers because there weren't any plasterer plasterers to hire. These same contractors erecting a building in other parts of the country, where there are plasterers' unions, are being punished. Thus union plasterers have been forbidden to work on the Palmer House in Chicago. In retaliation we presume, union brick'ayers have been taken off the job at the new Masonic Temple.

The situation is peculiarly irritating because there is no quarrel between plasterers and bricklayers in Chicago, or between the contractors concerned and the Chicago unions. Nothing the contractors can do, nothing the owners can do, will end the difficulty. It is a quarrel between unions striving for the power which lies in numbers.

The building trades department of the American Federation of Labor supports an arbitration board to handle just such jurisdictional quarrels. Something is wrong with the constitution of the federation if it cannot force the unions concerned to submit their cases to their own board of award. If the federation itself cannot keep the peace the public will have to take a hand in settling the quarrel. That, we know, will please no one concerned.—Chicago Tribune.

## WINTRY ELEMENTS BREAK FORTH TO ENVELOP THE CALUMET

### Snow, Ice and Chilling Winds Seek to Put a Damper on Building

Contractors and building men of the

Ca umet region were given an urge to speed up their operations last week if they desire to get their projects enclosed before the cold weather settles down. The reminder that winter is not far distant came in the way of a snowy warning Friday which carried over even unto Saturday.

That which poetic minds term "the beautiful" came sifting down fitfully and gently to completely cover the ground. Then during the night an icey breath swooped down out of the north to congeal any pools of water that were standing about. It surely looked like winter with a glare of white reflecting from the topographical contour of the city and ice a quarter of an inch thick across the surface of all exposed water.

In a way it is hard to realize that the summer is over and that the sa'amanders and other aids to winter building must now be gotten out and put into commission.

---

J. H. McClay has the foundation in and most of the steel up on the new Lake County Times building on Fayette street.

## LOCAL BUILDING FOR 1925 NOW IN EXCESS OF THAT DONE DURING CORRESPONDING PERIOD LAST YEAR.

### Gain of Nine Percent Shown

The coming thru of September with a substantial volume of new building construction work at Hammond sent the city's current year building figures soaring for a nine per cent increase over the record for the first nine months in 1924. Since January 1, this year, there have been 1,108 permits issued for a total etsimated valuation of $4,742,009 as against 1,016 permits totaling $4,341,656 for the corresponding period last year.

Comparing the monthly records of the two years for the first nine months shows that seven of them in 1925 developed better building records than their individual corresponding months the preceding year. In July, 1924, new work of a large nature boosted the estimated valuation to nearly two millions of dollars for the month which added to the combined monthly totals last year imposed quite a handicap for 1925 to overcome but it has been done and by the good, steady monthly records made this year and thus the current season building business has managed to excel that of 1924 to date.

Figures for the two years supplied by City Building Inspector Henry Vis are:

| | 1925 | | 1924 | |
|---|---|---|---|---|
| Month | Per | Est. Val. | Per. | Est. Val. |
| January | 28 | $102,200 | 32 | $129,690 |
| February | 57 | 307,925 | 33 | 100,625 |
| March | 121 | 530,911 | 76 | 224,350 |
| April | 170 | 668,250 | 171 | 576,576 |
| May | 164 | 756,975 | 167 | 547,025 |
| June | 111 | 340,753 | 123 | 324,525 |
| July | 125 | 773,250 | 147 | 1,807,875 |
| August | 171 | 716,125 | 151 | 367,415 |
| September | 161 | 545,620 | 116 | 263,575 |
| Total | 1,108 | $4,742,009 | 1,016 | $4,341,656 |

### HAMMOND BUILDINGS JOTTINGS

Bids for the construction of the Northern States Life Insurance building are being tabulated at the architect's office in Chicago, and it will not be known for a few days who is to get the contract.

Wainwright & Vaughn, architects, have the plans ready for bids for remodeling and brick veneering Sam Schlessinger's residence, 104 Highland St. The estimated cost is $10,000.

Architects Hess & Greenwood, have plans ready for contractors for a one-story frame english cottage, 43x32 feet for Mr. Craig on Forrest avenue, and are drawing plans for a modern home of tile and stucco on S. Hohman street, Broadmoor Addition, for Gostlin, Meyen & Weis. The architects will receive all bids.

The bids on the Paige-Jones office and laboratory addition to the plant have been sent to the New York office for tabulation.

All the buildings on the south side of West State street are now back twenty-six feet except the one on the corner of State and Hohman, which will have to be cut off. The change makes a great improvement in the thoroughfare.

The old Reid Murdock plant that was sold to the Campbell Soup Co., but never used by that firm, and later sold to a syndicate of Hammond men, is being cut up into smaller parcels and sold. The Beckman Supply Co. purchased the southeast corner on Calumet avenue, and will open an up-to-date coal and material yard there.

E. E. COLE.

### PROBLEM PRESENTS ITSELF WITH COMING OF "THE CHARLESTON"

#### New Dance May Have Ban Placed Against It At Indianapolis

Live loads are a feature that must be considered at all times in the factor of safety when building construction is under consideration and so they have been down through the ages ever since building requirements and regulations have been in vogue.

Such loads, many and varied, have been reckoned with from all angles and now has come a new one that has city building inspectors on the qui vive. It is nothing more nor less than one of the most recent modern dances, styled "The Charleston." The gyrations required to properly perform this terpischoren effort are of such an energetic nature that they are said to rock and shake structures to such an extent that the vibrations threaten danger to an alarming extent. City building inspectors in various cities have sensed the menace and come out openly against this gymnastic effusion putting a ban on it.

The threat against this new dance has cropped out at Indianapolis where City Building Commissioner F. F. Hamilton, having been informed of the attitude by building inspection officials in other cities advises that he intends to make a personal investigation himself and may also prohibit the dance in Indianapolis. He is of the opinion that there are local dance hal's that would be unable to stand up under "The Charleston" strain and he is intent on eliminating the menace before any serious consequences result.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

## WHAT DOES IT COST THE BUILDING INDUSTRY?

### Labor Turnover in Other Channels Is An Item That Runs Into Big Money

One large manufacturer estimates that it costs him $70.00 every time he has to break in a new man. One large industry in New York finds from its records that 75 per cent of all the men employed in that industry has changed positions in the last five years.

If it costs anywhere near that figure every time a man is fired and a new one hired in the building industry somebody is paying a big bill for inefficient operation.

Labor turnover in the manufacturing business is considered a very vital thing; everything is done to stabilize the working crew to avoid this expense.

Builders haven't begun to think of this problem as yet but it will have to be taken into account. Limiting men to one activity has developed labor turnover to its highest point.

If any other industry suffered the same labor turnover that the building industry does, it would be broke in three weeks.

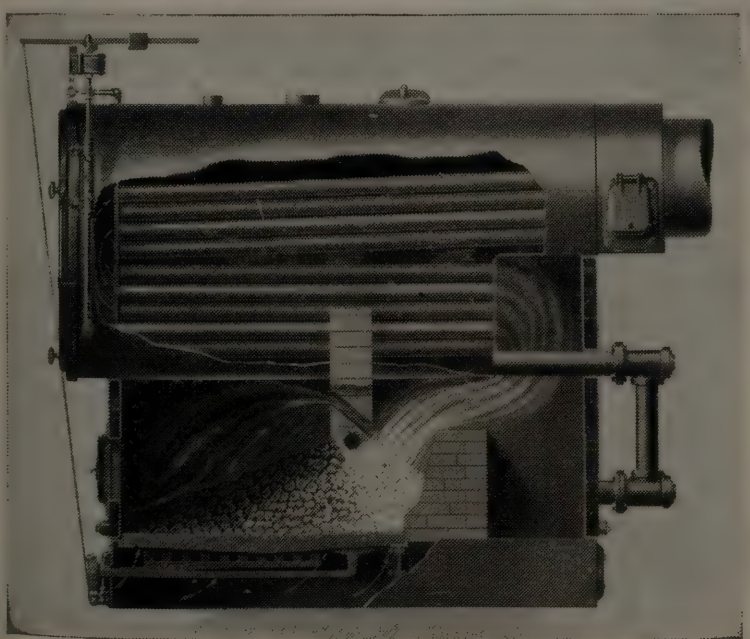
## LIKE TRYING TO LEGISLATE A MAN INTO HEAVEN

### Code of Ethics Like Law Fails If Man Is Not Square With Himself

The dictionary defines ethics as a science that treats of the principles of human morality and duty. A sort of moral philosophy.

Every man of sufficient intelligence to enable him to stay in business must necessarily have a well developed sense of what is right and what is wrong in his business as well as in his personal conduct.

That being the case, it would seem that he has no need for the aid of any man or set of men in formulating rules for his guidance. This is particularly true of the organization man for it is almost invariably the case that membership in a Builders' Exchange or other associations of the sort is, in itself, a guarantee of his business integrity and fixed habit of playing the game straight.



Yet notwithstanding this, it is coming to be fashionable for organizations of employers and business men to promulgate a set of hard and fast rules under the name of a Code of Ethics for the guidance of its members and one prominent group of contractors has recently evolved a set which is being exploited in a manner that would indicate that business ethics was with it, a thing of recent discovery.

It has been truthfully said that a man of good character is ethical without a code and a man who is inclined to shady practices will not live up to or follow one.

Why then a code? Well, for one thing, it is an excellent point when organization management wants to impress members with the extent to which their welfare is being cared for and watched over.

Most codes seem to be built on the theory that many business men are ignorant of clean methods rather than wilfully regardless of them for they lack any provision for enforcement. The fact that punishments for infractions are practically unheard of would seem to prove just that, or better still, indicate the absence of behavior calling for chastisement, which latter being the case would go far to show that codes of ethics are unnecessary.—(Exchange.)

## WANTED

**Sales Engineers:**—Young men with engineering education or practical frame building construction experience to join sales force of large building products company. Good opportunity advancement, branch sales offices. Address, Circle A Products Co., Newcastle, Indiana.

**STATMENT OF THE OWNERSHIP, MANAGEMENT, CIRLATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912**

Of Indiana Construction Recorder, published weekly at Indianapolis, Indiana, for October 1, 1925, State of Indiana, County of Marion, ss:

Before me, a notary in and for the state and county aforesaid, personally appeared Donald Campbell, who, having been duly sworn according to law, deposes and says that he is the owner of the Indiana Construction Recorder, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 411, Postal Laws and Regulation, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher editor, managing editor and business manager are:

Publisher, Donald Campbell, 312 East Market

St., Indianapolis, Indiana; editor, Donald Campbell, 312 East Market St., Indianapolis, Ind.; managing editor, none; business manager, Donald Campbell, 312 East Market St., Indianapolis, Indiana.

2. That the owner is: (if owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding one per cent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a firm, company, or other unincorporated concern, its name and address, as well as those of each individual member, must be given.) Donald Campbell, 312 E. Market St., Indianapolis, Indiana.

3. That the known, bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities, are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances or conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is ———. (This information is required from daily publications only.)

DONALD CAMPBELL, Owner.

Sworn to and subscribed before me this first day of October, 1925.

(Seal) JUNE STEELE MYERS,
Notary Public.

(My commission expires December 22, 1928).

STRAIGHT-LINE DRIVE

### *Elevator Machinery*

There are no specifications that the Kimball Straight Line Elevator Drive will not meet. This solid, compact machine has the motor bolted to the machine frame. It meets the requirements of limited space, reliable operation and durability, and it has a distinct advantage over popular machines now on the market.

Send for the Straight Line Drive Booklet. Our new catalog is just off the press. If you have not a copy, send for one.

## ALL INDIANA ARCHITECTS INVITED TO ATTEND I. S. A. BOARD MEETING AT LAFAYETTE

### To Be Held Just Previous to Big State Builders' Conference

An added attraction for architects, to the Conference for Indiana Builders, to be held at Lafayette, Ind., Thursday, October 29, under the auspices of the Engineering Extension Department of Purdue University, will be the regular board meeting of the Indiana Society of Architects scheduled for 11 a. m., the same day at the Students' Union Building at the university.

This will be the first directors' meeting of the Society under the new administration, headed by President Robert Frost Daggett of Indianapolis, and should be intensely interesting as some important matters will be up for discussion and consideration.

An invitation is extended to each and every Indiana architect to attend this meeting which will be an open one, and while only directors will have the power to vote when decisions are to be reached, nevertheless, the discussions will be open to all those attending.

The meeting, in view of the conference that is to follow in the afternoon and the evening dinner with an attractive program, should appeal to the state architects as affording a fine opportunity once more for the members of the architectural profession to get together both for a renewal of acquaintanceships and a talking over of conditions and problems that are more or less mutual.

Though there will be some routine business an effort is to be made to eliminate a routine atmosphere and substitute an air of sociability and good fellowship.

It is the sincere hope of the directors that Indiana architects will turn out at Lafayette next week in good numbers that the state architectural profession may be well represented at the conference where will be gathered those of the engineering profession, the contracting business and representatives of labor.

The conference is really an occasion of unusual nature, one that has become an institution in Indiana building circles and of a character unmatched in any other state in the Union. These features alone should appeal to the architects and inspire an urge that will make of Lafayette a mecca for them.

## WORKING TOGETHER

### Then Builders et al., Will Get Somewhere

That's what business, the building business as well as all others, has got to do sooner or later; in fact, that is what the whole world must do. The strife of the world of business which tries to get something away from the other fellow is what makes for waste.

We see this condition worked out to the Nth degree in wars. And what are wars? Largely they are based on a misconception of economics. Greed is largely at the bottom of war. Greed and intolerance account for the larger part of violent strife in the world. What has either of these grotesque notions accomplished for the betterment of the world? Our civilization is based upon the idea of the Golden Rule. And the remarkable thing is that we have made as much progress as we have while violating the principle so often. Too often we find ourselves acting on the plan laid down in the selfish man's prayer, "O Lord bless me and my wife, and my son, John, and his wife; us four and no more, Amen!"

Suppose we substitute for selfishness the principle of co-operation, and do all the good we can to all the people we can, just as long as we can. An idea shared doubtless its value. Mark that!

Let us co-operate wherever possible and do the big unselfish thing. It is bound to come back. If every contractor, engineer architect and all the rest in the building game could take this view how much easier it would be for everybody. As Artemus Ward used to say, "You scratch my back, and I'll scratch yours."—(Exchange.)

ORGANIZATION AND CURRENT NEWS

## COUNTRY BOOMING AHEAD IN BUILDING CONSTRUCTION WORK

### September Figures Register Encouraging Gains Over Past Periods With a Fine Yearly Total to Date

Evidently this is not Indiana's year to shine in building construction effort, forwhile she is going along with just a medium volume of new construction work being started other sections of the country, various states and cities are rolling up great building totals which in the end should give 1925 a fine record.

A nation wide survey of building operations and the result disclosed causes S. W. Straus & Co., New York, building financiers to comment as follows:

"Unprecedented building activities continue throughout the greater part of the country with no indications of an immediate let-up. September permits and plans filed in 369 leading cities and towns showed a gain of nearly 40 per cent over the same month last year and 17 per cent for the nine-months period ended September 30.

While gains are fairly general a somewhat spectacular situation exists in New York City where there was a 91 per cent gain over September last year. For the nine-months period, however, New York is only 11 per cent ahead of 1924.

The South again led all sections of the country. Miami established a record of unusual interest, ranking eleventh among the cities of the United States in building activities since January 1. The fourteen principal cities of Florida reported building permits of $25,582,-231 for September as against $5,447,341 for the same month last year. Birmingham, Ala., Louisville and several of the larger Texas cities also displayed great activity. The indications seem to be that the ensuing winter will witness a continuation of extensive building operations in many parts of the South.

For the first time in the history of the country, the 25 leading cities passed the $2,000,000,000 mark for the three-quarters period. In Boston more than $10,000,000 of plans were filed in September, giving that city fifth place with a gain of more than 170 per cent. St. Louis, Pittsburgh, Portland, Ore., Kansas City Seattle and Buffalo also reported greatly increased volumes of current building.

## EMPLOYING BUILDING SHOWS TO STIMULATE WINTER BUILDING

### Advantages to Be Gained Set Forth to Prospective Builder

Possibilities of greatly extending winter construction in home building as well as in the building of skyscrapers is being brought out in various kinds of building expositions in a number of cities about the country.

The displays are in accordance with findings made by the U. S. Department of Commerce after a thorough study in an endeavor to encourage a distribution of building activity over the twelve months of the year rather than to confine it to a few months. Such extension of construction operaions it has been shown will lessen the cost of construction, an item greatly affected by the traditionally seasonable character of the building industry.

An exposition to the public of the advantages of building during the slack winter period, when labor is more plentiful when bonuses are not paid, and a showing of the practical possibility of winter building with modern construction was recently held in Pittsburgh in connection with a home beautiful exposition attracting large crowds.

Architects, contractors and material men in Pittsburgh united in pointing out the advantages to the prospective builder of undertaking his work at a time when labor is not in such great demand, contractors free of the pressure of other jobs, and architects in a position to give close supervision to the work.

There were 150 booths in the exposition, showing every kind of material that goes into the making of completed structures. Information was given regarding the possibilities of each material for winter building, and the economy that results for the individual who seizes upon a slack month rather than a peak month for his own building enterprise.

## BIG CONFERENCE FOR NATIONAL BUILDERS PLANNED

### Country-Wide Invitation Extended By National Association of Building Trades Employers

What promises to be one of the most representative and beneficial conferences of building contractors ever held is scheduled to take place at the Congress Hotel, Chicago, Illinois, on Tuesday, November 17, 1925.

The conference is being called by the National Association of Building Trades Employers and will be open to all contractors and other interested in the labor problem of the construction industry regardless of whether or not they are affiliated with the Association. Invitations are being sent to the secretaries of the leading local, state and national organizations in the industry with the request that each associaion be represented with a large delegation, the members of which are thoroughly familiar with the particular problems of their community, or the specific branch of the industry they represent. Acceptances of the invitations, to date, indicate that the majority of the larger cities of the country will be well represented at the conference.

The purpose of the meeting as outlined in the prospectus which has been sent out is, "to discuss a number of mutual prob-

lems so that each city may be properly informed on the opinions and attitudes of the others regarding these vital questions in the hope that the interchange of ideas and information will better fit each city to handle its own negotiations."

Among the questions which will be discussed at the conference according to the prospectus, are the following: Wage Rates for 1926 in the Building Trades; Availability of Labor and Results of the Apprentice Training Movement; The Five Day Week in the Building Trades and Building Outlook for Next Year.

A similar conference was held in Cleveland last January and was so successful, through demonstrating the possibilities of united action on the part of contractors nationally, that it was decided to hold a meeting this Fall, prior to the opening of new wage agreements.

Obviously a conference of this character cannot establish a definite nation-wide program, but it can if representative, through the general exchange of ideas and information, crystalize a sentiment on a national basis which will be beneficial to the public, to every city represented and the entire building industry.

## BOARD VOLUNTARY

### Jurisdictional Awards Body Volunteered That Whole Building Industry Might Profit

Some of the International officers of unions affiliated with the Building Trades Department seem to fear that their interests are being jeopardized by reason of their connection with the National Board of Jurisdictional Awards. Of course, a loser in any contest invariably thinks that he got the worst of it. They usually see things only in a partisan way and cannot be expected to agree in the main with the other side. One officer thought that through the Board they were probably drifting towards compulsory arbitration.

The National Board is a voluntary organization composed of National associations who are likewise voluntary organizations. The Board was formed by a mutual understanding of all its component parts. They in turn drafted and promulgated rules for their guidance and all voluntarily agreed in subscribing to the plan to conform to these rules and any decisions made by the Board after a proper hearing of contestants and due consideration of the evidence. The decisions of the Board are only binding upon those that are signatory to the plan. It has no police power and its decisions cannot be enforced except by the influence of organizations and any power that the individual unit may have for the enforcement of its own rules upon its members. The Board of Awards is a semi-judicial body organized to do something that the building trades could not do themselves. It has succeeded in its efforts way beyond the expectations of its sponsors. It is a good worthy instrument for the prosperity and peace of the building industry and receives as it deserves the almost unanimous approval of those who are in any way connected with construction work.—(Monthly Bulletin of Building Construction Employers Association, Chicago.)

## HAMMOND

### CONTRACTORS ASSOCIATION TO EMBRACE ALL CITIES IN THE CALUMET DISTRICT PROPOSED

**Proposition Now Under Consideration**

A proposition has just been sprung for the consideration of the contractors of the Calumet region which, if it develops to maturity, will make for a complete reorganization scheme along association lines for the builders of the cities of the northwestern corner of Indiana.

The idea was suggested at a recent meeting of the General Contractors' Central Council of the Calumet District held at Hammond and was discussed at length. The new scheme has for its object greater solidarity amongst the builders of the territory and as proposed would merge the three individual city associations now in existence at Gary, Hammond and East Chicago into one central or county contractors' association with one president and one board of directors to preside over the territory.

While no definite action was taken toward forming a united organization at this time it was decided advisable to pass the idea along to the city associations, who will call special meetings in the near future to discuss the proposition, and if favorably accepted arrangements will be made for a joint gathering of the members of the three city associations for the purpose of perfecting plans for the amalgamation of the three organizations and the formation of one large central body to look after the builders' interests in labor matters and other vital problems entering into the contracting business.

Many who were present at the meeting at Hammond the past week were favorably impressed with the new scheme as proposed and were of the opinion that it was one of the most constructive moves ever advanced for the safeguarding and advancement of the builders' interests. It remains to be seen how the contractors back home at Gary and East Chicago will regard the news when it is broadcasted to them by the emissaries who attended the Hammond meeting.

### INCLINED TO BE TOO NEGLIGENT OF THEIR OWN AND THE INDUSTRY'S WELFARE

**Too Many Contractors Fail to Attach Correct Importance to Meeting Summons**

More and more, as meeting after meeting is called and attendance fails to come up to expectations one is impressed with the fact that, in the face the imporance of the problems that are constantly aris-

ing in the contractural business and demand solution, contractors are most negligent of their own interests, or those of the business, in that it is almost impossible to get many of them out to meetings. They pay their dues into their individual associations but personally fail to take any active part in the work that comes up before the organization. And yet these very men complain because labor seems to hold the whip hand when issues arise with that element.

But, why is it labor is so strong, so self assertive? It is because the men in the Labor Unions attend their meetings, follow the various situations closely, back their representatives to the limit and have a voice in the final declarations. The union mechanic not only attends meetings, he is active when given a committee assignment and is continually in joint action with his fellow colleagues in furthering the interest of the whole.

Too many contractors are "asleep at the switch" and then, when aroused wonder how it was labor was so well prepared to gain its ends.

If contractors took the same interest in their association that the labor men do in their organization endeavor they would be able to wield a real power and could obtain most anything, within reason, they desired.

---

## HAMMOND BUILDING JOTTINGS

The Neilson Development Co., Hammond, is preparing plans for a brick building, 2 story and basement, 30 ft by 60 ft. for the Chicago Heights Construction Co., Chicago Heights, Ill. It will contain two 5-room apartments.

---

The above firm is also getting out plans for a similar structure for Kaplan & Kaplan at Whiting, Ind., who contemplate erecting several such buildings.

---

Architect E. W. Bump is building a two-story brick and stucco residence, 36 ft. by 40 ft. for his own occupancy.

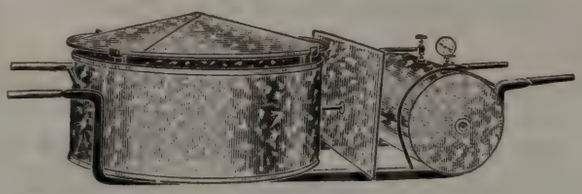
---

The architectural firm of Wainwright & Vaughn, Hammond, will transfer their offices to the new bank building as soon as it is completed. They have a suite on the eighth floor.

---

The new Lloyd building is nearing completion and the First National Bank building will be finished about December 1.

---



Steel work for the frame of the new theatre is all set and the brick work has been started.

---

Cold, disagreeable, rainy weather has imposed quite a handicap on construction efforts and has thrown the builders back in their attempt to get structures enclosed so inside work may be carried thru to completion when winter sets in.

E. E. COLE.

**Work Straight Thru the Winter**

**Reynolds Portable Furnaces**

*What Large Contractors Says*

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron, architects, engineers and contractors praise it highly.

## "B60" Series Hot Blast Smokeless Boiler

Patent Pending

The success or failure of a heating installation depends upon getting the right boiler. Next to efficiency, the matter of economy is an important point.

PROX BOILERS are built for economical service and lasting satisfaction. They are so constructed that the maximum number of heat units are generated from every shovelful of coal consumed.

**PROX HOT BLAST SMOKELESS BOILERS**

**Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.**

Capacities - 800 sq. ft. to 25,000 sq. ft. steam

# *Protecting coming generations!*

A school is a permanent institution and as a permanent institution it should be "roofed for permanence." Federal Cement Tile, made of stone concrete, is protecting future men and women all over the nation. It has become the standard roof for schools, theaters, auditoriums and all large public buildings.

Here is a roof that will outlast the building, bring freedom from repairs, is unaffected by the weather and is certain protection against fire. Federal engineers have learned through years of experience the answer to the many roofing problems. They are ready to offer their aid for the asking and assure a permanent roof.

***Grade School:** $170,000.00, 2 sty. & bas., School No. 78, Sherman Drive and Vermont St. Archt. Pierre and Wright, 1133 Hume Mansur Building. Owner, Board of School Commissioners 150 N. Meridian St. Mechanical Engineer, (Heating, Ventilating, Plumbing, Wiring, Stack), Walter A. Breining, 511 Traction Terminal Bldg. Plans completed. Owner will advertise for bids in 10 days. Brick, concrete and steel. (16 class rooms.)

***Grade School:** $170,000.00, 2 sty. & bas., "Webster School" No. 40, Reisner and Howard Sts. Archt. Osler and Burns, Penway Building. Mechanical Engineer, (Heating, Plumbing, Ventilating, Wiring and Stack), Walter A. Breining, 511 Traction Terminal Building. Owner, Board of School Commissioners, 150 N. Meridian St. Plans completed. Owner will advertise for bids in a few days. Brick, concrete and steel. (16 class rooms.)

**Factory:** (1 sty. rear addition), $20,000.00, 733-35 Virginia Ave. Archt. Fermor S. Cannon, 21 Virginia Ave. Owner, Parts Corporation (mfrs. automobile accessories) 733-35 Virginia Ave. Plans nearing completion. Bids soon. Brick, steel, steel sash, comp. roof.

***Church and Sunday School:** $25,000.00, 1 sty. & bas., Southern Ave. Archt. Fermor S. Cannon, 21 Virginia Ave. Owner, Southern Avenue Baptist Church, Rev. Charles R. Greenfield, Pastor, 1422 East Raymond St. General contract awarded to Ball and Kaufman Construction Co., 941 N. Keystone Ave. Brick veneer. Start work soon.

***Commercial Garage and (11) Stores:** $150,000.00. Garage 4 sty., 60x195. Stores 1 sty., 60x142, Market and Alabama Sts. Archt. Russell N. Edwards Co., Union Trust Bldg. Owner, Ira M. Holmes, (atty.), American Central Life Bldg. Plans completed, mature shortly. Brick, reinf. conc., steel sash, steam heat, comp. roof, concrete ramps, copper set store fronts, hollow tile.

**Court House:** (general interior remodeling). Archt. Robert Frost Daggett, Continental Bank Bldg. Owner, Board of County Commrs., Harry Dunn, Auditor, Court House. Archt. selected. Details undecided.

***Administration Building:** $100,000.00, 3 sty. & bas., 60x120, South East Corner of Eleventh and Capitol. Archt. Schlinz and Bailey, 53 West Jackson Blvd., Chicago, Ill. Owner, The Standard Oil Co. of Indiana. J. C. Marshall, Manager, Davidson and Lord Sts., Indianapolis. Ready for bids. Brick, concrete and steel, steel sash, comp. roof, elevators, steam heat, concrete vault, vault door, tile work.

**Warehouse and garage:** $150,000.00, South Harding St. Archt. Schlinz and Bailey, 53 West Jackson Blvd., Chicago, Ill. Owner, Standard Oil Co. of Indiana, Lord St., Indianapolis. Owner receiving bids to close at once.

**Bank:** (addition & rem.), $60 000.00 at Tipton, Indiana. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Citizens National Bank, R. S. Martin Cashier, Tipton, Indiana. Owner builds. Owner ready for bids soon on Heating, plumbing and wiring, bank fixtures, vault door.

**Electric Light Plant:** (improvements), Jasper, Indiana. Engineer, Charles Brossman, 1503 Merchants Bank Building, Indianapolis. Owner, City of Jasper, City Clerk, Jasper, Indiana. Owner receiving bids to close November 2nd. Work will consist of brick work, 10 ton coal conveyor, steel trussed roof, boiler setting, new stokers, new boilers.

***Sub-Station:** (addition of remodeling from Brewery), 6 sty., 50x90, new garage, 1 & 2 sty., 100x215, and new repair shop, 1 sty., 45x35. Engineer, Charles Brossman, 1503 Merchants Bank Building. Owner, Merchants Heat and Light Co., Meridian and Washington Sts. Plans in progress. Brick, reinf. concrete and steel, steel sash, tile roofing, sawtooth roof construction, fireproofing floors of old building.

**Water Works:** (add. & rem.), Batesville, Indiana. Engineer, Charles Brossman, 1503 Merchants Bank Bldg., Indianapolis. Owner, Batesville Electric Light and Water Co., Batesville, Ind. Plans in progress. Concrete reservoir, pumping equipment.

***Residence:** 2 sty. & bas., 27x37, 5100 block on N. Pennsylvania. Archt. Clarence T. Myers, 412 Penway Bldg. Owner, Hoy Donaldson, 4221 Boulevard Place. Owner receiving bids. Brick veneer over frame.

**Y. M. C. A. Building:** (interior finishing of fourth floor) dormitory rooms, additional radiation, metal lath, plastering, painting, comp. floors, at Newcastle, Indiana. Archt. McGuire and Shook, 320 Indiana Pythian Bldg., Indianapolis. Owner, Newcastle Y. M. C. A., Newcastle, Indiana. Ready for bids on separate contracts soon.

***Grade School:** $120,000.00, 2 sty. & bas., addition, 63x116 (8 rooms, aud. & gym.) School No. 34. Archt. D. A. Bohlen and Son, Majestic Building. Owner, Board of School Commissioners, William H. Book, Business Director, 150 N. Meridian St. Owner receiving bids to close November 10th, at 5:00 p. m. The following are figuring general contract: Sam A. Hickman, Martinsville, Ind.; William P. Jungclaus Co., 825 Mass. Ave., Indpls.; J. G. Kardstedt, Lemcke Bldg., Indpls.; Brandt Bros., Indiana Trust Bldg., Indpls.; Schlegel and Roehm, 602 Lexington Ave., Indpls.; E. C. Strathman Constr. Co., Meyer-Kiser Bank Bldg., Indpls.; Service Construction Co., Castle Hall Bldg., Indpls.; Leslie Colvin, Continental Bank Bldg., Indpls.; Cornell Engineering Co., 2611 Cornell Ave., Indpls.

***Dairy Plants:** $60,000.00. Private plans. Owner, Sugar Creek Creamery Co., 337 West New York St., Indianapolis. All previous bids rejected. Probably mature about March 1st. Brick, conc. & steel.

**Residences:** (10) $7,000.00 each at Coral Gables, Florida. Archt. Thornton and Rodecker, Fairfield and College, Indianapolis. Owner, G. B. Clippinger, c/o Fletcher American Co., Indianapolis. Plans in progress. Stucco, tile roof, Italian style of architecture.

**Viskalt MEMBRANE ROOFS**

**Residence and garage:** $30,000.00, Cleveland, Ohio, Lakewood. Archt. Thornton and Rodecker, Fairfield and College, Indianapolis. Owner, P. E. Selby, Cleveland, Ohio. Plans in progress. Stucco.

**Residence:** $10,000.00, 55th and Central. Archt. Thornton and Rodecker, Fairfield and College. Owner, Horace B. Coldwell, 116 East 51st St. Plans about completed. Frame and stucco, comp. roof, furnace, tile & hardwood floors.

***Residence and garage:** $18,000.00, Bloomington, Indiana. Archt. Thornton and Rodecker, College and Fairfield, Indianapolis. Owner, George Talbott, (furn.), Bloomington. New plans in progress. Not mature before March 1st. Brick veneer, Italian style of architecture, clay tile roof.

**Apartment Buildings:** (2) 9 apts. each, $22,000 each, Vero Beach, Florida. Archt. W. H. Garns, Fletcher Trust Bldg., Indianapolis. Owner, Henry Langbahm, Vero Beach, Florida. Plans in progress. Frame and stucco.

**Apartment:** (8 apts.), $22,000.00, Del Ray, Florida. Archt. W. H. Garns, Fletcher Trust Bldg., Indianapolis. Owner, Del Ray Properties Co. Inc., Del Ray, Florida. General contract let to Bert Strickler, Vero Beach, Florida.

**Apartment:** (8 apartments), $22,000.00 Melbourne, Florida. Archt. W. H. Garns, Fletcher Trust Bldg., Indianapolis. Owner, E. E. Southerland, Melbourne, Florida. Contract let to Bert Strickler, Vero Beach, Fla.

**Hotel:** $50,000.00, 1st unit, Vero Beach, Florida. Archt. W. H. Garns, Fletcher Trust Bldg., Indianapolis. Owner, T. A. Ryburn, Vero Beach. General contractor, Bert Strickler, Vero Beach, Florida. Stucco.

**Arcade Building:** $40,000.00, Vero Beach, Florida. Archt. W. H. Garns, Fletcher Trust Bldg., Indianapolis. Owner, Hon. Mr. Campbell, State Senator, Vero Beach. Plans in progress.

**Municipal Auditorium:** Orlando, Florida. Archt. Krug & Parrish, 30 E. Church St., Orlando. Owner, City of Orlando, c/o The Mayor, Orlando. Bids close Nov. 25, at 10:00 a. m. Indpls. Contractors desiring to figure, get in touch with Mr. Parrish, (formerly of Indpls.).

### Contracts Awarded

**Hotel:** (add.) (banquet room, 1 sty. 55x80); $40,000.00, Huntington, West Virginia. Archt. H. Ziegler Dietz, State Savings and Trust Building, Indianapolis. Owner, Pritchard Hotel, Huntington, W. Va. General contract let to C. W. Hancock & Son, Huntington, W. Va. Brick.

***Apartments (16) and Stores (8):** $100,000.00, 10th and Beville. Archt. and Contractor, The Foster Engineering Co., Indiana Pythian Bldg. Owner, The Kelley Estate, c/o Thomas D. McGee, (atty.), 605 State Life Bldg. On foundation. Brick, Heating and plumbing let to Brooks Co., 2423 Central Ave.

***Warehouse, Garage, Tank Room, Reservoir:** $150,000.00, S. Keystone and Big Four R. R. Private plans. Owner, The Standard Oil Co., of Indiana, Davidson and Lord Sts., Indianapolis. General contract awarded to R. W. Bauman Construction Co., 619 S. New Jersey St., Indianapolis. Brick, reinf. concrete and steel.

***Armory Building:** $400,000.00, 4 sty. & bas., N. Penn. between St. Clair and Walnut. Archt. Harrison and Turnock, 500 Board of Trade Bldg. Owner, Indiana National Guard, William H. Kershner, Adj. General, State House. General contractor, Ostrom Realty & Construction Co., Peoples Bank Bldg. Start work shortly. Site has been cleared. Brick, reinf. concrete and steel.

***Paint Room, Barrell Room, Warehouse, Boiler Room, 5 Platforms:** $100,000.00, South Keystone and C. C. C. & St. L. R. R. Owner, Standard Oil Co. of Indiana, Lord St. General contract let to R. W. Bauman & Co., 619 S. New Jersey St. Brick, steel.

***Garage:** (for company's cars and trucks), $20,000.00, 1 & 2 sty., South Keystone and C. C. C. & St. L. R. R. Owner, Standard Oil Co. of Indiana, Lord St. Contract let to R. W. Bauman & Co., 619 S. New Jersey St. Brick and steel.

***Office Building:** $185,000.00, 3 sty. & bas., 75x120, St. Joseph and Meridian Sts. Archt. McGuire and Shook, 320 Indiana Pythian Bldg. Owner, Knights of Pythias Lodge, Insurance Dept., Sam Wade, Pres., Indiana Pythian Bldg. General contract awarded to E. C. Strathman Construction Co., 712 Meyer-Kiser Bank Bldg. Brick, concrete and steel. Excavating. Struct. steel let to Robert Berner Struct. Steel Co. Htg. & plmg. let to Callon Bros. Co. Wiring let to Sanborn Electric Co. Brick work let to Leon Joyce, 3220 Fall Creek Blvd. Terra cotta let to Indpls. Terra Cotta Co. Excavating let to J. C. Douglas, Court House, all of Indianapolis.

## REAL TYPICAL AMERICAN HOME BUILT HERE TO BE SENT TO FRANCE FOR EXHIBITION PURPOSES

### Should Interest French Housewives With All Its Conveniences

The most unusual American ambassador ever sent to France to keep alive the firm friendship between the peoples of the two countries will soon set sail for Paris.

This ambassador, having taken up quarters in the Grand Palais, in the American section of the international exhibition of household appliances and labor saving devices, will demonstrate to the men and women of France how American inventive genius and commercial enterprise have driven drudgery from the home and increased its comforts and luxuries. The ambassador's official title will be the "American home."

The formal opening of the American home—work on which was begun in May and which, after remaining on exhibition for one month, will be dismantled, shipped to France with all its equipment and furnishings and reconstructed in the Grand Palais—took place in Brooklyn, October 7. The opening was accompanied by an elaborate housewarming party given by the American committee of the international exhibition and attended by men and women of international prominence.

#### Thirty Firms in Project

The American home was built and equipped as a co-operative enterprise of more than 30 of the foremost manufacturers and trade associations in the country. No expense was spared to make the American home typical of the best America has to show Euorpe in the art of equipping and furnishing a home.

The original idea of the American home grew out of the report made by Albert Broisat, general commissioner of the American section of the commission, who was sent to this country last spring by the department of public instruction of the French republic, under whose auspisies the exhibition is to be conducted.

"The French people know that you Americans have mastered the art of getting your household and office work done with a minimum of human drudgery," said Broisat, "but they do not know how you manage this. The French housewife who still does her washing, ironing, cooking, sewing, scrubbing and cleaning with her own hands has much to learn from the American woman who uses little electrical servants for such work. And European employers have much to learn from the American business man who uses in his office, as well as in the factory, machines which reduce human labor to minimum."

Following Broisat's report an American committee of prominent businessmen was organized. Plans for the American section of the exhibition were considered, and it was finally decided the United States could be represented by a typical American home which would serve as a model in beauty of architecture and furnishing and in perfection of mechanical appliances of all that this country has to give to France.

#### Shown Here One Month

The American home will be on exhibition in the United States one month. It will then be dismantled and sent with all its equipment and furnishing to Paris, where is will be reconstructed in the Grand Palais. Here it will remain on exhibition a second month. At the end of the time, when the international exhibition has closed, the house will be given as the gift of the American people to the French citizen who has made the greatest contribution to humanity in recent years. The house will then be dismantled for the last time and once more reconstructed on a site selected by the fortunate French citizen.

The home is a two-story, shingle structure with 10 rooms and four baths. Only colonial and early American furnishing and decorations are being used for the interior.

## TIME RIPE FOR INDIANA ARCHITECTS TO TURN ATTENTION TO ANNUAL STATE ARCHITECTURAL EXHIBIT

### A Little Concerted Effort Can Make the Affair a Great Credit to the Profession

"If winter comes, can spring be far behind."

That line carries in its suggestion a seasonable admonition to the architectural profession in that if spring is not far behind the coming of winter, architects would do well to encourage building, open the way for the new construction season that will bud, then blossom with the coming of spring.

It is in the winter that prospective builders begin to think of building when the weather warms up again, and since they are in the mood then a fine opportunity presents itself for the architect of Indiana to place before said prospective builder, thru the agency of the annual I. S. A. Architectural Exhibit, the meaning of architectural service, its worth, and what is involved in that service.

There is no better time than now for the architects to begin thinking and planning for this year's exhibit to be held about mid-winter at the John Herron Art Institute, Indianapolis. Photographs of work executed should be made before the weather gets bad to lend bleakness to the landscape. As for plans, there will be dull days soon in architects' offices and during that spell why not get up exhibit sketches, etc.?

The committee in charge this year is anxious to make the exhibit a worthwhile affair, but this can only be accomplished with the co-operation of the members of the Indiana architectural profession, and it is sincerely hoped that each architect will appreciate his duty to his profession and feel the urge to submit an exhibit or exhibits and then do his bit to boost this outstanding event on the I. S. A. calendar.

## ORGANIZATION AND CURRENT NEWS

### ACTUAL EFFORT BEING DIRECTED TO THE PRODUCTION OF TRAINED APPRENTICES FOR THE BUILDING INDUSTRY

**Cleveland, O., Takes Advantage of Federal Act and Is Making Real Progress In a Much Discussed Direction**

Much has been said about encouraging apprentices, considerably more has been written on the same subject and every once in awhile tangible evidence creeps out that someone, somewhere, is actually doing something for the rehabilitation of the ranks of the building trades craftsmen which in years gone by have been allowed to dwindle to a point where labor shortage is a real menace when building operations assume normal proportions.

The most recent interesting piece of information having to do with this subject of encouraging apprentices emanates from Cleveland, O., where on Wednesday, December 2, at East Technical High School the second commencement of the Cleveland Apprentice School is scheduled to take place. At that time approximately 125 apprentices in five of the building trades—bricklayers, carpenters, electricians, painters and plumbers—will receive diplomas in recognition of their completion of a prescribed course of study involving practical as well as theoretical work.

The commencement is to be held at the time of the Annual Convention of the National Society for Vocational Education, which opens a three-day session on December 3rd at the Hotel Statler. It will be preceded by a special session of state vocational directors from all parts of the country.

Although apprenticeship training had been given in Cleveland for several years back, no formal commencement exercises had been held until April 10th of this year, when 150 apprentices in the bricklaying, carpenter and plumbing trades were given diplomas. It is now planned to hold two regular commencements each year in order to properly take care of those who are qualified to become journeymen.

All apprentice schools in Cleveland operate under the Smith-Hughes Act, a statute enacted in 1917 in Congress providing for the support of part-time trade schools. According to the terms of this act, every dollar contributed by the federal government must be matched by an equal amount contributed by the state or local community, or both. Additional funds needed to carry on the work of the school must be furnished by the local Board of Education. The building materials to operate the schools are furnished gratis by the local material dealers and manufacturers.

Each apprenticeship class is under the direct supervision of a joint committee composed of an equal number of contractors and union representatives, and a representative of the Cleveland Board of Education. This committee looks carefully into the qualifications of both contractor and apprentice applicant before approving an application. The application once approved, the applicant is given a permit to work and is enrolled in the apprentice school. At the end of a thirty-day trial period he will be indentured, provided his work has been satisfactory to the contractor with whom he has made application. He then enters upon a course of training lasting for three years, if in the painters trade, or four years in all others.

To develop and maintain the interest of the apprentices, instruction is offered in the practical, as well as the theoretical branches of the trade, by instructors whose practical experience as journeymen is supplemented by a course in methods of teaching. The boys are taught among other things the history of their trade, plan reading, trade mathematics and related engineering, so that at the completion of their course of study they are better qualified as mechanics than they would have been if they had received their training under the old apprentice system. Talks by men prominent in the trade, or related trades, illustrated by motion pictures, are given occasionally to broaden the minds of the students.

Every boy is required to attend school four hours per week throughout his apprenticeship period, for which time he is paid by his contractor. Willful absence from school or the job is penalized by the apprentice committee.

The sacredness of the contract relation is carefully explained to the boys and they are warned of the serious consequences attending an infraction of the rules.

To insure the apprentice steady work the year round, provision is made for a temporary transfer to another employer in case his own contractor runs short of work here. This feature of the Cleveland Plan contributes to the success of the system, since it tends to prevent boys from leaving the trade because of unemployment before the expiration of their indentureship.

Another important feature of the Cleveland Plan is the office of Director of Apprentices. The director is an apprentice co-ordinator representing the Joint Apprentice Committees when dealing with contractors or apprentices. Among his duties are the following: To see that all grievances, whether of contractors or apprentices, are adjusted either informally or brought before the committee if such adjustment cannot be secured otherwise; to keep a record of new jobs as they appear; to place boys temporarily out of work with contractors other than those to whom they are indentured; to keep a check on the boys while on the job; to visit the homes of those absent from school in order to ascertain the cause of absence; to act as recording secretary at the meetings of the apprentice committees.

Many other matters concerning the welfare of the apprentices and the successful operation of the apprentice schools are also handled by the director.

At present there are thirty-six classes being taught in the five building trades apprentice schools in Cleveland, with a total enrollment of approximately 1000 apprentices. The apprentice system as developed in Cleveland seems to be on a sound foundation and is apparently tending not only to elevate the standard of work being done in the building trades, but also to promote more cordial relations and better understanding between employer and employe.

Extensive preparations are now being made for the Commencement on December 2nd. It is probable that Wm. R.

Green, President of the American Federation of Labor, or Wm. J. McSorley, President of the International Union of Wood, Wire and Metal Lathers, and newly elected president of the Building Trades Department of the American Federation of Labor, will be present to deliver an address. Invitations to speak have also been sent to Oscar W. Rosenthal, President of the Builders' Association of Chicago and Director of the National Association of Building Trades Employers, and Franklin D. Roosevelt, President of the American Construction Council. R. G. Jones, Superintendent of Cleveland Public Schools, will act as chairman of the evening and will represent the Cleveland Board of Education, while Wm. R. Hopkins, City Manager of Cleveland, will give the address of welcome. E. L. Heusch, Supervisor of Trades and Industries, State Board of Vocational Education, will represent that Board and present the diplomas. The Federal Board for Vocational Education, which has done much to further apprenticeship training in Cleveland, will also be represented on the program.

Officials of the Associated General Contractors of America, National Association of Building Trades Employers, American Construction Council, Mason Contractors Association of United States and Canada, and other national organizations in the construction industry have been invited to attend the commencement exercises.

International labor leaders in the building industry are expected to attend, as well as delegates from state and local labor organizations, contractor associations and the various civic and business organizations of Cleveland.

The committee in charge of the arrangements is made up of W. P. Carroll, executive manager of the Building Trades Employers' Association; Howard L. Briggs, Director of Vocational Education, Board of Education, and H. L. Schwarzer, Secretary of the Carpenters' District Council.

## JURISDICTIONAL DISPUTES

### What U. S. Secretary of Labor Has to Say On the Subject and His Endorsement of the National Awards Board

Recently at an open meeting of the National Board of Jurisdictional Awards held in Washington, D. C., and attended by representatives of the building industry, architects, contractors, engineers and officials of building trades and other labor organizations, James J. Davis, Secretary of Labor for the government made the following pertinent speech.

"I appreciate your courtesy in inviting me to this important meeting of representatives of the Building Industry of the country. On the matter of jurisdictional disputes I have strong convictions and shall open my mind freely. As you know, I am a plain blunt puddler of the mills, and I am going to talk to you frankly this morning on the effect these disputes have on the building program of the entire country. In some instances it is more than a jurisdictional dispute—it's civil war between contending organizations.

I am interested in the National Board of Jurisdictional Awards. I am interested in it for a number of good reasons. And I am warmly interested.

As I see it and from information I gather, it is a representative organization. It represents every party and all parties to a jurisdictional dispute. If all parties are not in, there is plenty of room for them to get in. I am interested in this Board because it was suggested by labor and its beginnings were started by John B. Lennon, a commissioner of conciliation who was directed to do so by the then Secretary of Labor. That was in 1918. This Board has settled hundreds of these jurisdictional disputes since then, and has saved millions and millions of dollars for the American people. The whole country is interested in this Board. The need of this Board is plain to all. The whole country looks to it to save the building industry, one of the biggest industries we have, from being shot to pieces by these jurisdictional disputes. Why shouldn't we have peace in this industry, when it isn't a question of whether union labor shall have the job, but which union shall have the job?

Reading the reports of my predecessor in office, I learn that in forming this Board, Commissioner Lennon got the enthusiastic approval of architects, builders, and men of the building trades in the American Federation of Labor. The thing was a success from the start. Conferences were held in New York, Chicago, St. Louis, and other large cities of this country. The idea was to get some standardization of craft work, and progress was immediate. This Board took formal shape in 1919. As I say, in 6 years it has saved the country untold millions in the disputes it has settled. That is progress. But these disputes go right on. This Board has plenty of work yet to do. Plenty of progress remains to be made.

Some building trades have accepted the awards of this Board. Others have not come along. That means that every encouragement must be given to extending the activities of this Board of Awards. All parties should abide by its decisions. This is no "star chamber" outfit. All parties are represented here. And parties have a chance here to get up and say their say. And when an award has been handed down here, all parties should accept that award and carry it out.

I don't know of anything more disheartening to a workman than to set out in the morning not knowing whether or not he is going to get a day's pay, because one of these jurisdictional disputes may be on; I don't know of anything so disheartening to the owner of a building, the man who is paying for it, or to the contractor who employs the men to build it. All parties connected with the enterprise of raising a new building can sidestep the responsibility for these disputes, but it is usually the workman who in the end gets the blame for stoppage of work, and organized labor suffers from it.

The contractor, the subcontractor, the architect, the owner, the financial organizations paying the bills, are all innocent losers in a situation not of their making. I know many men who are anxious to build, and afraid to build, because of these jurisdictional disputes. They know full well they have only money enough to complete the building, and can't afford to pay interest charges caused by delay when two or more building trades are at loggerheads over which of them shall perform some item of work. It also affects the bond sales and maybe after a time we shall not be able to finance a building because of these disputes.

The fact is, these jurisdictional disputes have become a matter of grave concern to the whole public. The whole business and industrial machinery of the country is upset as one after the other important factors in the national building program are subjected to loss by these wrangles and stoppages of work. The loss begins with the wages of the trades in dispute. It spreads and spreads until large sections of the public are out of pocket. That sort of thing, if long continued, can slow up the building program of an entire section of the country. When loss comes in a package of that size, it has a bad effect on business generally. It is impossible to overemphasize the bad effects arising from one of these jurisdictional disputes. It is just as hard to overemphasize the importance of getting them settled and stopped as promptly as possible. And the worker himself can't get out of his part in getting them settled.

I don't know of anything that has done more to destroy the chances of or-

ganized labor to deal with large organized industrial interests than these civil wars among the unions. Organized labor has withstood destructive assaults, within and without its own ranks. It should root out the jurisdictional dispute. Here and there people are seeking to break the trade union movement in America, but so long as the trade union movement stands true to its principles and deserves the support of its membership and the public, it will get that support. It can not be destroyed. But like other movements in this or any other country, organized labor can commit suicide through internal dissension. And these jurisdictional disputes are just that form of suicide.

It can't be denied that these jurisdictional disputes supply those who are opposed to organized labor with just the propaganda they want for refusing to deal with the union.

Settle these disputes among yourselves, and without stoppage of work. That is profitable to all—to the workers, the builders, the owners.

It is only the building trades that are directly affected by these so-called jurisdictional disputes, but I don't know of anything that has done more to hurt labor in general. In talking with the head of a great manufacturing enterprise as to why his labor wasn't organized, he said to me, "We have more classifications in our industry than there are in the building trades, and if we were dealing with the several unions, their jurisdictional disputes would ruin our business. In the building industry, losses of that kind can be taken care of by directly taxing the people by increasing rents, and so on. But our competition is keen, and we have no way of making up losses that might result from jurisdictional disputes, and we can't take any such chances."

You see the bad effects of these disputes don't end with the building trades but reach out into other industries. In the long run they come right back and injure unionism itself.

I realize that with new inventions, improvements, changes in building materials and methods going on all the time, these craft disputes are bound to occur. Some of these are honest differences of opinion. If the question in these disputes were only wages, working conditions, or other matters between workers and employers, there might be reason for stoppage of work until adjustment is reached. But it the case of which craft shall perform a given piece of work, the owner or employer is not in fault. He has no part in the dispute. He has entered into contract, and tradesmen have accepted certain terms and conditions of employment.

Therefore, in all fairness the owner employer is entitled to labor's service even though the crafts have a difference among themselves. Our agreements call for unbroken work until the job is completed.

If the crafts can't agree, then the matter should go to this Board of Awards in which all are fairly represented. While the difference is being settled, work should go on. And when the Board has decided the question, the decision should be accepted. The resulting chaos if we don't set up and abide by this machinery is p'ain to all.

We cannot stop progress. Recently I visited several points in Europe and saw many buildings, but I was particularly impressed by one new form of steel construction.

Under this process a steel house is

construed in five weeks by common labor at a cost of about $2,500. I cite this simply to illustrate the changes in building that are always going on, and to emphasize the need of this Board to settle these disputes. So long as the building industry continues to progress we need to rely on this Board of Jurisdictional Awards, or we all go to destruction.

There are angles to this hold-up habit in building that I can't go into here, but in all the human elements that enter into it, the workman always gets the blame. The jurisdictional dispute is a blot on the fair name of trade unionism. Organized capital doesn't fight itself. It fights its enemies. Trade unionism should stop fighting itself and fight for its best interests. These constant stoppages are costly. They cost the worker, not only in loss of wages, but in constant assessments that the fighting may go on. Every loss caused by these disputes comes home to the worker because every additional cost to a building is paid in higher rents and purchases. These fights are even cutting down work, in frightening people from building.

Here is the case in a nutshell. Invention and change in building methods are going to go on. So long as progress goes on, jurisdictional disputes are bound to occur. The thing is to get them settled. Here in this Board of Awards is the machinery to get them settled. We all have a part in that machinery, and if we don't run it we go to destruction.

After all, the American worker is a business man. We have got to rely on his business sense to refer to this Board all matters in dispute. We must appeal to his business sense to abide by its decisions when handed down. And we appeal to his business sense, his sense of profit and loss, to stay on the job and finish the job until his difference is ended."

---

## HAMMOND

### HAMMOND BUILDING JOTTINGS

Work is under way on the big viaduct over the Lake Shore, I. H. Belt R. R. and Kennedy Ave., on the extension of Michigan Ave., Hammond, connecting with 5th Ave., Gary. This will make, when completed, a direct road to Gary, the Sand Dunes and Michigan City.

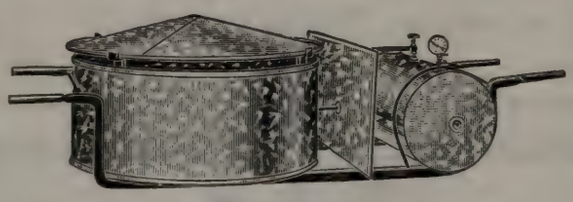
---

M. A. Dickover was awarded the contract for the remodeling of the Spragia building Hohman & Clinton Sts., Hammond, for $8,000.

---

Architect Mac Turner, Hammond, let the contract to Bayless & Million for the remodeling of the First Christian Church, Calumet and Summer Blvd.

---



Architects Hess & Greenwood, Hammond, are drawing plans for a two-story brick veneer residence on Forest Ave., for Dick Holson, estimated to cost $11,000.

---

This may be good weather for football, but building and football are not in the same class. Building had the rain curtain rung down on it last week up here.

*What Large Contractors Says*

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron. architects, engineers and contractors praise it highly.

FOR ARCHITECT ENGINEER

Devoted to the Interests of the Indiana Construction and Engineering Industry

FOR SUPPLYMAN CONTRACTOR

VOL. VII INDIANAPOLIS, INDIANA, NOVEMBER 7, 1925 No. 32

## STATE BUILDERS, ARCHITECTS, CONTRACTORS, ENGINEERS AND CRAFTSMEN'S REPRESENTATIVES HOLD INTERESTING CONFERENCE AT PURDUE UNIVERSITY.

### "Big Four" of Indiana Building Industry Guests of State Educational Institution.

It was proved again last week at Lafayette, Ind., that there is a good percentage of Indiana builders, architects, contractors, engineers and even those of Labor organizations who look after the interests of the building trades craftsmen, who are awake to the need for the advancement of constructive ideas and the exercise of greater co-operative effort between the above, for four elements that the building industry may be carried on more efficiently both as to contions and in the way of improved facilities.

Such is the conclusion derived from attendance at the Third Annual Indiana Builders Conference at Purdue University, Oct. 29, held under the auspices of the Engineering Extension Department of that institution, and endorsed by the Associated Building Contractors of Indiana, the Indiana Engineering Society, the Indiana Architects Association and the Building Trades Council of Indiana. While the crowd was not as large as might have been anticipated, nevertheless it was a fine representative assemblage of the "Big Four," and manifested great interest in the proceedings. There were twenty cities of the state represented at the conference sessions during the afternoon and the meeting room at the Students Union Building on the university campus was filled to overflowing. That evening approximately one hundred and fifty builders, many accompanied by their wives, partook of an excellent dinner served in the large assembly hall of the Union building, and later enjoyed excellent talks by Edward C. Elliott, President of Purdue University; W. K. Hatt, head of Civil Engineering at Purdue and Member of the Building Code Committee of the U. S. Department of Commerce, and Alfred M. Hogston, State Fire Marshall of Indiana. Dr. W. F. King, Secy., of the Indiana State Board of Health and Chairman of the Advisory Committee of the Administrative Building Council of Indiana, acted as toastmaster. Entertainment features of a delightful nature, consisting of vocal and instrumental music were furnished by Purdue students, and contributed greatly to the enjoyment of the evening.

An informal dinner was served at noon in the cafeteria at the structure where the conference was held, being attended by the visiting delegates and serving to bring them together thus affording personal contact that removed any feeling of strangeness that existed, and building up an enthusiastic spirit for the afternoon session. Following the dinner the delegates were escorted around the university and over the campus on a tour of inspection, a trip that was greatly appreciated by many of the visitors who had never been to Purdue before.

Promptly at 2:30 p. m., the conference was called to order by W. A. Knapp, Professor in Charge, Engineering Extension Department of the university, who introduced A. A. Potter, Dean of Engineering at Purdue, who welcomed the builders and explained to them the institution's interest in the building industry. He recounted Purdue's engineering courses and set forth what is being done in the way of experimental work. In closing he expressed his pleasure in having the builders present at the university and said he hoped they would return again at no great distant date for similar meetings.

Professor Knapp, then turned the meeting over to Architect Fermor S. Cannon, Indianapolis, Chairman of the Advisory Committee of the State Building Council, who after responding to Dean Potter's welcome took the chair and presided throughout the remainder of the afternoon.

A most interesting paper, illustrated by a large descriptive chart to which the speaker frequently referred, was read by DeWitt Moore, Indianapolis engineer, member of the Advisory Committee of the above council. His talk covered the organization of the council and how it functions. In a most enlightening and forceful manner he explained to his auditors how the council had been built up, what it proposes to do, and what its function will mean to Indiana when it really gets to functioning. Those present were greatly impressed by the message brought to them and expressed great confidence in the effort that is being put forth to better regulate building as to standard minimum requirements.

The next speaker on the program was John H. Owens, Secy., of the Advisory Committee of the new state building body, who gave a most comprehensive report on the progress that has been made to date to get the proposed regulations and requirements whipped into shape. It was surprising to many to learn that such good headway had been made, and one and all marveled at the scope of the work and the efficient way in which those therein engaged had managed to master the great amount of detail involved until they are now able to present to the building industry of the state tangible evidence that these standard building requirements, once dreamed of, are now soon to become a reality.

Since the new order pertaining to Indiana building is the direct result of a great co-operative effort that has been exercised by the fundamental building interests, the architects, contractors, engineers and the building trades mechanics, an effort extending over a period of several years, and will stand as an example of what may be accomplished through co-operation, a monument as it were, it was but fitting that attention be directed to the line of action where those of different branches in the building construction industry, yet allied in a com-

***Water Works Filtration Plant:** $75,-000. Engineer, Pierce-Gree'y and Hanson, 9 No. Michigan Ave., Chicago, Ill. Owner, City of Bloomington, Lynn B. Lewis, mayor, Bloomington, Ind. Plans in progress. Owner expects to advertise for bids in 30 days.

***Fraternity House:** $80,000, 4 sty. and bas., 45x80. Archt., The National Fraternal Corp., Madison, Wis. Owner, Kappa Sigma Fraternity, C. M. Bolser, Chmn. Bldg. Comm., Bloomington, Ind. Plans completed. Owner ready for bids in two (2) weeks. Bedford stone exterior, slate roof, steam heat, tile and hardwood floors.

***Grade School:** $100,000, 2 sty. and bas., 12 class rooms, combination auditorium and gymnasium, Bloomington. Archt., Alfred Grindle, 122 No. Wa'nut St. Owner, Board of School Trustees, Roy Pike, Pres., Bloomington. Plans about completed. Owner will advertise for bids in 30 days. Brick, steel, steam heat, comp. roof.

**Sorority Houses (4) Fraternity Houses (2):** Bloomington, Ind. Architect and general contractor, Crowl Building Corp., Ralph Crowl, Madison, Wisc. Owners, Phi Omega Pi Sorority, Bloomington; Theta Chi Sorority, Bloomington; Chi Omega Sorority, Bloomington. Delta Gamma Sorority, Bloomington; Beta Theta Pi Fraternity, Bloomington. Delt Chi Fraternity, Bloomington. Plans in progress. Projects will probably mature about March 1st. Brk-, stone.

## DECATUR

**Creamery:** (addition and rem.), $40,-000.00. Owner, The Cloverleaf Creamery Co. Start work shortly. Brick.

**Factory:** 1st unit, 1 sty., 40x60. Owner, Dick Burdg & Co. (sale distributers of Reliance Ice Machine Co.). Starting work. Brick.

## EVANSVILLE

***Catholic Orphanage:** $500,000.00, Vincennes, Indiana. Archt. Shopbell. Fowler and Thole, Furniture Bldg., Evansville. Owner, St. Vincents Orphanage, Vincennes, Indiana. Archt. receiving bids to close November 12th. The following contractors are figuring: M. J. Hoffman Constr. Co., Evansville; Tri-State Contracting Co., Evansville; Scarborough-Davies Constr. Co., Evansville; Willis Bros., Carlisle, Indiana; John A. Keller, Vincennes.

***Residence:** $10,000.00. Archt. Anderson and Berendes, 108 S. 4th. Owner, Louis Holzgraf, c/o Citizens Trust & Savings Bank. Low bidder on general contract: George Graul, 2409 Fourth Ave. Brick and hollow tile.

***Chamber of Commerce Building:** (remodeling old Evans Hall, 5th and Locust Sts.), $45,000.00. Archt. Harry E. Boyle & Co., Furniture Bldg. Owner, Evansville Chamber of Commerce, Evansville. General contractor, Jacob Bippus and Son, $36,633. Plumbing, S. A. Schmitt Co., $2,845.00. Heating, Gottman-Weber Co., $2,369.00. Wiring, Anderson & Veatch Co., $1,512.00. The exterior of the building will be stuccoed. The remodeling interior according to present plans will provide an auditorium seating 500 people, with a stage 26 feet by 120 feet, two banquet halls, each seating 150 people; and 15 office rooms. Start work Nov. 10.

## FORT WAYNE

**Apartment Building:** (20, 5-room apts.), 2 sty. & bas. Archt. Burkett and Moses, 519 Standard Building. Owner, Rudisill Apartment Co., care of architect. Plans in progress. Brick veneer, vapor heating, incinerator, comp. roof, tile baths. Archt. ready for bids in a few days.

**Oil Building:** $30,000, 1 sty. and bas., 51x100. Private plans. Owner, The General Electric Co., 1635 Broadway.

## I. S. A. DIRECTORS HOLD INTERESTING MEETING AT LAFAYETTE

### Set February 5 and 6 As Date For Semi-Annual Session

The board of directors of the Indiana Society of Architects met in regular session Oct. 29, at Lafayette, Ind., eight of the ten members being present. The meeting was held at the Students Union Building at Purdue University through the courtesy of the Engineering Extension Department of the university, being called to order by President Daggett at 11 a. m., of the day upon which the State Builders Conference was held at Purdue under the auspices of that institution.

It was the first session of the board since the annual convention in June and the general spirit of the meeting was to devise ways and means by which a greater interest can be aroused in the Society. It was the concensus of opinion of not only the directors but also of the other architects present that the I. S. A., has done and is doing a big part in furthering the cause of the architectural profession in the state, and should have the support of all the architects in Indiana. How to arouse that support is the problem facing the directors.

A report from Secretary Fermor S. Cannon showed quite a few of the members are considerably in arears in their dues and have showed no inclination to meet that obligation. A lengthy discussion relative to the matter was gone into and it was decided to appeal once more to the delinquents and endeavor to impress upon them the need of the Society for support.

As it is the organization for several years has stood forth to the building industry of the state, as the official representative of the Indiana architectural profession, and in that position has been called into various building councils with other interests. It has sought continually to represent the whole rather than the interests of a few architects and through its fairness in its dealings, and its manifest interest to advance not only the profession but the building industry has established a confidence for the profession amongst other building interests of which all Indiana architects may feel proud, and yet which few of them appreciate.

The disadvantage under which the Society labors is that it has to function at long distance from most of the members of the profession in that it covers the entire state and has been unable to establish a close personal contact between all members and itself, hence, few of the architects actually realize the earnestness of the effort being exerted, the important office the Society is filling. Arguments to the contrary not withstanding the organization has broken down many old barriers that once existed and has placed the profession out in the open where, when important vital matters come up, it is given consideration and is ca'led upon for counsel and advice. Right now an architect is chairman of the Advisory Committee of the Administrative Building Council of Indiana which is forming new Standard Building Requirements and Regulations for the state and in the formation of those documents the voice of the state architectural profession is constantly heard. When completed these documents will mean better architectural features for structures and every architect in Indiana will profit as will the public, the contractor and the engineer.

It is such constructive effort as that, that the Society is putting forth continually and as the official representative of the profession surely it is deserving of support of the entire state body of architects.

It requires money to carry on, to put the profession out where it belongs, where it can speak for itself and protect its own interests in addition to counseling where necessary. There is but one way to secure the funds necessary to maintain the position the Society has attained and that is through the channel of dues which are nominal. Surely after what has been done, after ten years of hard and sincere effort, the architects of Indiana will not forfeit the position the profession has gained by allowing the Society to lapse into ennui for want of financial support.

Reference was made to the semi-annual meeting as a means to revive interest in the Society, and it was voted that instructions be forwarded to the Entertainment Committee to give some early thought to the program with the idea of getting together an inspirational divertisement that would well repay all visitors for the effort spent in journeying to the meeting. As a means to that end the Entertainment Committee, of which Wilbur Shook, 320 Indiana Pythian Bldg., Indianapolis, is chairman, will be pleased to receive suggestions from any Indiana architect that same may be considered, and every effort will be made to give to the architects th kind of a program that will appeal.

Since Director MacLean of the John Herron Art Institute has proffered the use of certain galleries at his institution to the Society for the month of February for the Annual Architectural Exhibit, the directors of the I. S. A., voted to accept that offer and decided to hold the semi-annual meeting Feb. 5 and 6, and at that time formally open the big

## ARE YOU GETTING YOURS?

exhibit. Chairman Ed Pierre, Indianapolis, of the Exhibits and Pageants Committee has been advised to arrange his plans accordingly.

It was suggested that the scope of the exhibit be broadened this year to include the allied arts associated with architecture in the execution of plans for buildings, and in the equipment and furnishings of the latter. If the architects will but take the proper interest in this affair and assume their responsibility in putting it across the event can be made a memorable one for it will carry not only an artistic but an informative appeal for the public:

### STATE BUILDERS

(Continued From Page 5)

mon cause, can get together and work for the good of the whole industry. Salient talks on the subject were made by A. E. Kemmer, Lafayette, representing the Associated Building Contractors of Indiana, Warren D. Miller, Terre Haute, representing the Indiana Society of Architects, and Charles W. Kern, Indianapolis, representing the Building Trades Council of Indiana. They all referred indirectly to what had been accomplished, the principle of give and take involved, and implied that much of the dissention, strife and misunderstandings that arise in the industry can be eliminated if the builders as a whole will but heed the golden rule. get together and thresh out their problems above board and in a spirit of fairness not on'y to themselves but to the other fellows as well.

Among the cities represented, and builders, architects, engineers, and labor men present, were: Anderson—P. M. Patton, C. M. Shaffer; Attica—L. L. Johnson; Bluffton—E. I. Brown; Crawfordsville—C. O. Beeson; East Chicago—R. C. Clark, H. B. Olvey, John F. Rahn; Evansville—C. L. Troutman; Ft. Wayne—Max Irmscher, N. U. Miller, W. S. Sams, George Schack, R. L. Thayer, A. H. Witte; Frankfort—R. W. ### CONTRACTORS NATIONAL CONFERENCE AT CHICAGO TO GO THORGUGHLY INTO PERTINENT PROBLEMS OF THE BUILDING INDUSTRY

#### Builders of the Entire Country Invited to Attend

Between now and next spring practically every city in the United States will be faced with labor negotiations for the coming year. Indications are that we will all be confronted with many serious problems in the making of new agreements.

Among some of the major problems of the industry are the following:

(1) What is the building outlook for 1926?

(2) Is the present labor supply adequate to meet the demands of the industry and will it meet the requirements of next year?

(3) Will wage increases for 1926 be justifiable? Demands for advances have already been made in certain localities.

(4) Does the present apprentice training movement meet the needs of the industry?

(5) What of the effort of labor to extend the Five-Day-Week? Will advances in this direction in certain trades extend to others unless checked at this time?

(6) What can be done to eliminate those restrictive practices in labor agreements which unnecessarily and unjustly increase building costs?

These are only a few of the many questions which contractors are obliged to face and in which there is a mutuality of interest.

It is considered imperative that a conference be held of employers in the building industry, from representative cities, to discuss these mutual problems so that each city may be properly informed on the opinions and attitudes of the others regarding these vital questions, in the hope that the interchange of ideas and information will better fit each city to handle its own negotiations.

The Executive Committee of the National Association of Building Trades Employers recently decided to call such a conference, which will be held at the Congress Hotel, Chicago, Illinois on Tuesday, November 17, 1925, beginning at 10:00 a. m. All contractors and association officials are cordially invited to attend the conference.

Obviously, a conference of this nature can not establish a definite nation-wide program, but it can, if representative, through the general exchange of ideas and information crystalize a sentiment on a national basis, which will be beneficial to the public, to every city represented, and the entire building industry.

A similar conference was held in Cleveland last January, the success of which demonstrated the value of frequent gath-

erings of contractors to discuss problems affecting the industry.

All those attending the conference are invited to remain over for the annual meeting of the American Construction Council, which convenes at the Congress Hotel on Wednesday, November 18th. Among the topics which will be discussed at this meeting are the following: Better Building and its Relation to the Public; Elimination of Construction Peaks and Depressions; and the Place of Commercial Arbitration in the Construction Industry.

Associations of contractors in the building industry are urged to have representatives present. Individual contractors are asked to do likewise to send representatives to the conference and in addition to these any individual contractor who may wish to is invited to be present.

### NEW MAN HEADS BUILDING TRADES DEPARTMENT OF A. F. L.

#### Ohio Man Chosen

At the recent convention of the building trades department of the American Federation of Labor at Atlantic City, William J. McSorley of Cleveland, who for a number of years has been the head of the International Union of Wood, Wire and Metal Lathers, was elected president to succeed George F. Hedrick. Mr. Hedrick was not a candidate for re-election having recently been chosen to head the Brotherhood of Painters, Decorators and Paperhangers of America. W. J. Tracey was re-elected as secretary of the department to succeed himself. Heretofore both the president and secretary were elected for a term of one year, but the present incumbents will serve for a term of three years.

## HAMMOND

### AN AFTER THOUGHT

#### Conclusions Drawn From the Lafayette Conference

Speaking from the standpoint of one who had the opportunity for personal observation, the pleasure of participating in the affair and was in a position to feel the pulse of interest that throbbed throughout the course of the afternoon and evening proceedings, the thought occurs and lingers to the effect that the Associated Building Contractors of Indiana, as an organization, can feel justly proud of the annual state builders conference held last week at Purdue University, Lafayette, Ind. While the A. B. C. was but a part of the conference, nevertheless, these meetings, that are occurring annually now having become practically an established institution in the field of the building industry of Indiana, are indirectly traceable to the indefatigable effort that the state contractors association has devoted to the promulgation of the organization ideals. It was thru the agency of the A. B. C. that co-operation was established with the Indiana Society of Architects for the general betterment of the building the advancement of constructive ideas for industry. This effort was further extended both by the contractors and the architects until the engineering profession and the representatives of organized labor were incorporated in the broad scheme of co-operation. And as a result of the endeavor the attention of Purdue University was drawn to it finally developing in the last few years into the annual builders conferences, one of which was held October 29, to draw

more than a hundred architects, contractors, engineers and labor representatives.

There was but one disappointing feature to the interesting event and that was that there were not more in attendance. It is really hard to understand why so many contractors, and it is only fair to include architects and engineers, are so short-sighted and lacking in interest that they can't give an infinitesimal part of their time to these periods when the various phases of the building business are taken up for consideration in open forum.

It so happened at Purdue University last week that the progress made by the Administrative Building Council of Indiana relative to the formation of Standard State Building Regulations and Requirements was gone into thoroughly, and the information brought out was of great value, and surprising in its scope. There is a time coming when every one in Indiana having to do with the preparation of plans and their execution will come within the jurisdiction of these new regulations and requirements, and the opportunity to get first hand information from the men who have been engaged in the compiling and codification of the new building requirements was of real value.

If the men of acknowledged calibre who were on the program and who also compose the various committees of the Administrative Building Council are willing to serve without compensation and give their time to the setting forth of their endeavor that the building industry may be advanced it would seem that the contractors who are vitally interested, also the architects, should be glad for the chance to become conversant with what is going on and would lend their co-operation by attending these special meetings held particularly for their benefit.

Because of the short-sightedness of many builders and their lack of interest in those things that are vital because they are mutual, the building industry has been forced to muddle along, detour around barriers that should never have been raised, contend with selfish individualism, put up with petty strife for lack of co-operation, and fail of deserved recognition as one of the greatest industries in America. And all this simply for the reason that the men of the building industry as a whole can not be converted to the idea and the possibilities of getting together. That the builders of Indiana are not converted is evidenced by the attendance at Lafayette last week. A few over a hundred turned out when there should have been at least three or four hundred present.

Let it be hoped that the lethargy that keeps men asleep at the switch will pass off some of these days in the near future and that building instead of being sidetracked or having to cautiously proceed may gather unto itself a full head of the steam of progress and speed on down a clear track with every man of the industry on the qui vive, encouraging the momentum, and doing everything possible to keep the right of way open.

## LOCAL CONTRACTORS FAVOR SUGGESTED MERGER

### Vote Endorsement of the Scheme to Consolidate Contractors Associations Into One County Organization

The proposition advanced recently in which it was suggested that the contractors associations of the three largest cities in the Calumet District, namely Hammond, Gary and East Chicago, be merged into one big county organiza-

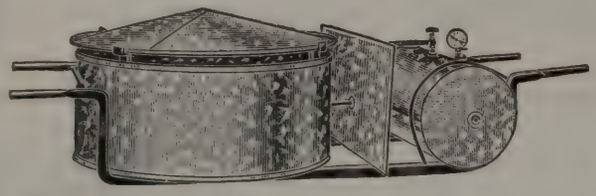
tion has been received favorably by the builders of the first named city, and it is rumored that the move is regarded in the same light in the other cities which points to some action sooner or later along the proposed lines.

At a meeting of the Building Trades Employers Association, Hammond, a few days ago the members discussed the advisability of the proposed merger and the concensus of opinion was that it would be a good move. However, there were different views advanced as to what should be done in order to assure the consummation of the scheme. Finally a resolution was introduced and adopted favoring the proposed amalgamation of the individual city associations into one big county organization. That was about as far as the Hammond contractors could go at this time except that it was agreed the local association should appoint representatives to attend a joint meeting with representatives from the other cities to work out plans for the formation of the proposed county association. Further it was voted that this joint meeting should be called just as soon as possible if the word received from East Chicago and Gary is favorable.

There is little doubt felt but that the one big organization would be in a position to tackle many vexing problems that arise and work them out to satisfactory solutions. It can and will be made a virile institution if the Calumet contractors will get behind it both morally and financially and regard it as a business proposition. It will take united effort and co-operation to put the scheme across, but, it is worth all of that in view of the benefit it would afford the Calumet builders and the building industry of the district.

## A SHOW-DOWN

### Association Forced to Exercise Its Right



It so happened that one member of the B. T. E. A. of Hammond, who had gotten considerably in arrears in the matter of dues decided that the best way to square the debt would be to resign, just drop out as it were. That would have been fine for him, but the Association happened to be concerned in the matter also, and as the officers were not willing to accept that manner of canceling the debt they took it upon themselves to demonstrate to the delinquent member that he had another guess coming.

When no attention was paid to statements and summons for a settlement the account was placed in an attorney's care who proceeded to bring court action, brought the aforementioned member before the bar of justice and there he was forced to "dig down" and "settle up".

It was not the most desirable action that the association would have sought but it was forced by the member himself and it was the only way possible to convince him that he had assumed a responsibility that had to be met.

Some will say it is such procedure that makes association enemies, maybe so, but unless members of associations are willing to abide by the agreements they make when they come in how can organizations exist, how can they function? If they are forced to enforce their rights, and such enforcement hurts the cause, why not have a show-down and cease pussy-footing around, employing a weak-kneed policy that in the end can not but undermine the whole foundation of the organization structure? No association can prosper that can't command respect, elicit loyal support and inspire good will within its ranks.

**Reynolds Portable Furnaces**

*What Large Contractors Says*

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron. architects, engineers and contractors praise it highly.

# Sealed Proposals

**COURT HOUSE REMODELING**
**NOTICE TO CONTRACTORS**

Notice is hereby given that the undersigned Board of Commissioners of the County of Knox, State of Indiana will receive sealed bids at the County Auditor's Office at the Court House in the City of Vincennes in said County until one o'clock p. m., on Monday, December Twenty-first, 1925, for the Remodeling of the Knox County Court House located on the square bounded by Seventh and Eighth, Busseron and Broadway Streets in said City.

Estimated cost of said improvement $125,000.00. Plans and Specifications for the above work are now on file at the Auditor's Office and elsewhere as required by law. The work will be divided into three classes to-wit: General Contract, Heating, Plumbing and Ventilating, and Electric Wiring. Bidders may bid on any of the above classes or on the work as a whole.

Each bidder shall file his bid in a sealed envelope plainly marked with the name and address of the bidder and the class or classes of work bid upon.

Each bidder must file with his bid, certified check for 3% of the amount of the bid and his bond for the full amount of his bid with two good free holders as Surety thereon, to the approval of the undersigned Board or with Surety Bond with some good Surety Company duly authorized to do business in Knox County and to the approval of said Board which Bond shall be conditioned not only for the faithful performance of his contract if awarded to him but for the payment of all debts incurred in said work and for all other conditions required by law and such Board. Each bidder shall also file with his bid his Affidavit of Non-Collusion as required by law.

Bidders desiring to bid on all or any part of the above work may obtain plans, specifications and bid forms complying with the above requirements by application to the office of the Architect and Engineer, John B. Bayard, located at the corner of Third and Main Streets, in the city of Vincennes, Indiana.

Payments on the above work will be made on certificates issued by the Architect based on 85% of the value of the material and labor forming a part of the building and material stored on the premises which in the opinion of the Architect is properly protected from damage or loss, and the balance 30 days after the acceptance of the above work by said Commissioners. The said Board of Commissioners hereby reserve the right to reject any or all bids submitted for the above work.

Dated at Vincennes, Indiana, this 4th day of November, 1925.

Board of Commissioners of The County of Knox, in the State of Indiana:

JOHN A. ELLIOTT, Pres.,
ANTHONY HESS,
EDWARD F. BROCKSMITH.
GEO. W. DONALDSON, Auditor.

Nov. 7, 14, 21, 28, Dec. 5, 12, 1925.

**SCHOOL BONDS**
**NOTICE OF BOND SALE**

Notice is hereby given by the Trustee of Washington School Township, Grant County, Indiana, that sealed bids will be received by him at the law office of Lett & Lett, Rooms 501, 502 and 503 Glass Block, Marion, Indiana, up to the hour of 2 o'clock p. m., of Saturday, November 28th A. D., 1925, for the sale or purchase of Forty-One Thousand ($41,000.00) Dollars of School Bonds of Washington School Township, Grant County, Indiana.

Said bonds will be 82 in number, dated January first, A. D., 1926, of Five Hundred ($500.00) Dollars each, payable at the First National Bank of Marion, Indiana, bearing interest at the rate of Five per cent (5%) per annum, payable semi-annually, on the First day of July A. D., 1926, and on the first day of January, A. D., 1927, and on the same dates of each and every year thereafter until fully paid, and maturing as follows, to-wit: The first two (2) of said bonds shall become due and payable on the first day of July, A. D., 1926, and a

D., 1930 and a like number of three (3) of said bonds shall become due and payable on January and July first thereafter respectively, up to and including the final payment thereof on January first, A. D., 1941.

Said interest shall be evidenced by coupons attached to said bonds, and said bonds shall be signed for and on behalf of said township by said trustee, together with the coupons thereunto attached.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and with an order duly entered upon the records of the Advisory Board of Washington School Township, Grant County, Indiana, authorizing and directing the issue and sale of said bonds for the purpose of providing funds for the erection and construction of a new school building for a new consolidated school district, formerly consisting of districts numbered 1, 2, 3, 4, 5 and 8 of said Washington School Township, Grant County, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than the par value.

Sale will continue from day to day until all of said bonds are sold. The right is reserved to reject any and all bids.

HARRY L. WIGGER,
Trustee of Washington School
Township, Grant County, Ind.
Lett & Lett, Attorneys.

## "B60" Series Hot Blast Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum Number of B. T. U.'s. Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

**PROX HOT BLAST SMOKELESS BOILERS**

**Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.**

Capacities - 800 sq. ft. to 25,000 sq. ft. steam

A few of the many smaller buildings that have been "roofed for permanence" are shown on this page. Federal Cement Tile is made for flat and pitched surfaces.

# —and on smaller buildings, too

## —fire proof Federal Roofs have prooved cheaper than the inflammable kind

A MAN who knows how to figure roof costs once said of an inflammable roof:

"It isn't cheap, it only **looks** cheap." And that is an unanswerable argument for Federal Cement Tile.

There seems to be an idea prevalent, particularly among builders of small structures, that the cheaper the appearance of a roof and the more unsightly it is, the lower its cost.

In the files of the Federal engineering department there is an abundance of proof that a Federal Roof is actually more economical than the ugly, inflammable kind.

Since a Federal Roof is fire proof, it saves in insurance rates. Steam, gases, rain, snow and the other destructive forces that ruin other roofs merely season and strengthen this concrete tile—as a result, maintenance is wiped out. More surprising still to many owners of smaller buildings is the fact that even the first cost of Federal Cement Tile compares very favorably with covered wood roofs, particularly when installed on pitched surfaces.

Read the story of Federal Cement Tile in the boiled down catalog "Covered With Federal." Learn the advantages of the unequalled manufacturing facilities of the Federal plant. Remember that the roof comes last in building but first in importance.

## THE ARCHITECT'S PLACE IN THE SCHEME OF CO-OPERATION

### Some Direct Shots by a Member of the Profession From Terre Haute

One of the most pleasing and striking features of the recent Conference for Indiana Builders held at Purdue University, that impressed itself on one who has known the building business for a score of years, was the freedom with which the architects, contractors, engineers and representatives of labor intermingled, met as men to men, friends, and gave to the atmosphere of the gathering a delightful breath of congeniality. It was all so noticeable, for a decade or so ago it would have been impossible to have gotten all the architects, let alone the others, together with such a display of friendliness. The change that has come over these four great elements in the building industry can be traced directly back to organization effort. That has slowly but surely broken down old barriers of jealousy, misunderstandings and petty grievances amongst those of the same line of endeavor, brought them closer together in a common cause for the advancement of their porfessions and businesses; further, through a spirit of co-operation the various organizations have been drawn together and in that accomplishment the men themselves have been brought into personal contact and learned to understand each other, those of the other fields of effort.

It was but natural that mention be made to this changed condition of affairs and thus it was that the subject of "Co-operation in the Building Industry" was discussed. The taking care of this topic for the architectural profession was turned over to Warren D. Miller, Terre Haute, who, though at times was inclined to read a pretty strong indictment against architects for the practice some of them employ, proved himself fair in acknowledging that all was not perfection in the profession even though it was a hard statement of facts for him to make. However, it was plainly evident as to the class of architects to whom he referred and no one can contradict his assertions.

Mr. Miller said:

"Co-operation in the building industry as it is understood by me, is the big and chief factor in any successful building project. The true meaning of the word co-operation may not be understood by the public at large—their feeling and understanding being that the greater the chasm between the architect and contractor, the better their interests are protected. Probably from some past experiences and examples they may be justified in having reached such a conclusion, but this is not the true meaning of Co-operation in the Building Industry.

For best results there has to be harmony among all professions and trades connected with the job—architect, engineer, mechanic and craftsman; to secure such a condition, each has to feel his obligation and do his best whatever it may be.

To start with, the Architect must turn out complete plans and details and thorough and well-written specifications —not specifications with vague generalities embodying the world with a fence around it—a criticism which is many times justly made. It is not fair for the Architect to hide behind vague and rambling clauses, thereby passing the obligations which are justly his to the contractor or mechanic to interpret, allowing an opening for himself to come back at all times and translate his specifications as he sees fit.

The Architect, in my mind, should assist and explain his plans and specifications in his supervision rather than permit work to proceed which he knows is misunderstood. Supervision is far better in preventing errors than in showing authority by causing work to be torn out.

The Architect, of course, is human and many times is in error and has to depend on the co-operation of the contractor or mechanic to help him out of such errors, and in such cases and under such conditions where the corrections can not be made without additional cost the Archtect should assume the financial obligation for his error if it can not be justly taken care of with an 'extra for addtonal work,' for whch extra the owner has never before paid. It should not be expected of the contractor to make these corrections, taking money out of his own pocket where he has in no way been to blame. I mean by this that it is up to the architectural profession to turn out better and better plans and specifications with accuracy the fundamental object. It is a disgrace for some of the plans that go from men who call themselves architects, to contractors to be figured with the expectation that the contractor will assume duties that are justly the Architect's, and covering things of which the contractor has no possible way of getting the intent or meaning.

The Engineer and Architect are so closely allied that it is absolutely necessary for them to co-operate almost as one party in the designing of the building and in laying out the structural, heating, plumbing and wiring work, otherwise the building would be a hodge-podge in this day of specialization.

The Contractor, in turn, must enter into a contract with the idea in mind, and heart, to give the best that he is capable of giving in accordance with the

## ARE YOU GETTING YOURS?

class of work intended without equivocation or chicanery.

The Contractor should not require supervision in the term as is generally interpreted, but he needs it in the sense of help to better the finished project.

Allied to these and upon whom the actual results depend are the mechanics and the craftsmen. It would be a sad project indeed if we should attempt with the best plans and specifications ever drawn and with the contract awarded to a most financially responsible contractor to build a high class building if the men actually executing the work were untrained or inexperienced. You can imagine the results. Many a client will remark that he has the plans and specifications to go by, and why should he necessarily wory about the Contractor as long as he can give bond, or the class of men employed as craftsmen, but we know that it takes all of these professions and trades tied into one to produce the best for the client. I doubt if there is a single one here who could bake a pan of biscuits with the three best recipe books laid out before him without having had experience previously—it is clearly out of the question.

We have to start with the one who plans or designs, call him what you will; next we have to have the one to financially back with an organization the actual construction, and last, but by no means least, we have to depend upon the trades and craftsmen for the finished results.

Now when there is not harmony and good will, there is bound to be friction and trouble, and it is the client's project which actually pays in the results when there is not co-operation."

## ARCHITECTURAL FIRM CHANGE AT INDIANAPOLIS

### J. Edwin Kopf Forms Association With John A. Deery

Announcement is made by Architect J. Edwin Kopf, formerly of the architectural firm of J. Edwin Kopf and Wooling that hereafter he will be associated with John A. Deery, the new architectural association to be known as J. Edwin Kopf and Deery, architects and engineers, 401-406 Indiana Pythian Bldg., Indianapolis.

## ORGANIZATION AND CURRENT NEWS

## THE ADMINISTRATIVE BUILDING COUNCIL OF INDIANA

### It's Organization and How it Functions

If any one who was at the conference for builders at Purdue University, Lafayette, Ind., a short time ago had been entertaining the thought or imprtssion that co-operation in Indiana amongst the builders, the "Big Four," comprising the architectural, contractural, engineering and labor interests, was merely a theory for preachment, an idealistic fantasy, surely he must have been converted to the realization that it is an actuality, a tangible working principle that has been put into operation and is being practiced.

In the first place the fact that those of the "Big Four" would assemble from all corners of the state for a conference was proof that a co-operative bond had been welded, and then as the spirit of the meeting manifested itself in the associations of those men, their eager attitude to meet on a common level and reach out for better things for the whole industry that its interests might be advanced, the impression was further driven home that the builders, all of them, regardless of their professional or business classifications, are undeniably co-operating, not selfishly but for the good of the whole industry and the public as well.

As evidence that this spirit of co-operation is not exactly new but has been in operation for some time was shown conclusively by DeWitt Moore, engineer, Indianapolis, who read a most interesting paper on the Administrative Building Council, a State body made possible by legislation through the agency of co-operation as practiced by the Indiana builders.

The speaker calling attention of his auditors to what had been done by the builders through unity of action said:

"The law creating the Administrative Building Council and providing for it's organization clearly states the purpose of the Act as the safeguarding of the people of Indiana so far as relates to safe and sanitary building construction, maintenance and repairs. This is certainly of sufficient importance to every citizen of the State to command attention but it is doubtful whether in general there is any comprehensive understanding as to what is intended and how it may be attained.

The public is not accustomed to think of the Building Industry as a whole, as a unit, as a complete organization but rather to classify those engaged in building as architects, contractors, engineers and craftsmen each serving in a well understood capacity. It should be noted that the building industry as we are considering it in this conference refers to those actually engaged in building and not to material or supply manufacturers and dealers. To intelligently plan for safe and sanitary construction and obtain it, reguires the co-operation of these groups. Such a working co-operation is created by the Administrative Building Council of Indiana.

**Public Failed to Profit Because Organization Effort Was Mostly Individualistic**

The Arlhitects, the Engineers, the Contractors and the Craftsmen each have their organizations that for years have been striving for better building and accomplishing much good but largely within their own field of work. The public has failed to profit completely because good ideas have lacked universal adoption. Again, perfectly good proposals, intended solely for betterments in the art of building, are approved, even praised, and then filed and forgotten because they lacked a plan or program to put them into operation.

**Those Who Do Are Those Who Really Count**

The one big, outstanding, universal feature in our admiration of Herbert Hoover is that he gets thing done. He creates things based upon his own ideas but he is not slow to adopt the good thoughts of others, and then he does not stop but at once begins active plans to bring the desired results. This is what the whole world admires, the ability to accomplish results.

The Administrative Building Council

is planned to accomplish results and it has already demonstrated that it can succeed. Here then is the work of the Council; to carry out the purpose of the Act and secure by research, analysis and deliberation those standards which will result in safe and sanitary construction at a reasonable cost and then, when approved see to it that the building public, the citizens and all employees are safeguarded by such standards through plain, easily understood rules for construction.

**Better Buildings For Less**

This was all planned when Senate Bill 140 was prepared and submitted to the legislature and the four organizations of the Building Industry stand committed now, as they did then to the motive back of the program which was, and is, better building for the same cost or for a less cost. This striving for progress in the art of building was so intense that the architects, engineers contractors and craftsmen organizations cheerfully co-operated and members were appointed to serve without compensation. This spirit of co-operation continues increasingly so that we may well anticipate early results and a general approval. Again we pause to give credit to Herbert Hoover. He, perhaps, was not the only builder with ideals and an imagination as to the economics of building construction but he did have the courage and the initiative and the position to lead and the records of the Council show how quickly the Advisory Committee grasped the opportunity to secure the needed data and information that he was obtaining through the Building Code Committee of the Department of Commerce.

It is quite sure that the citizens of Indiana do not appreciate what this committee is doing and has done for them through the research work of experts leading to recommendations for the elimination of waste and improvements in building construction. We may further wonder how many know that Indiana is represented in this ascertainment of facts by our own Prof. Hatt of Purdue University.

Further, it is safe to say that few know that Indiana is, so far as we know, the only state to plan to profit by this work. Why should we fail to profit? The intention at Washington is to accomplish that which is for the good of the people and for this reason alone the work should have our support, but, away beyond this, to us as builders, is the wealth of material made available. The great industries of the country, the experts, the specialists, the vast resources of the Government and appropriations have been at the command of this department and it's Building Code Committee. Our own Administrative Building Council can not hope to, even in a small way, duplicate such assistance and co-operation. There is no doubt that the work of our Council can be expedited if some funds were available but the spirit of the Indiana Builders is, as in the beginning, to serve their state without compensation for their time and effort.

**Not a Central Bureau of Control**

Now I want to bring out some of the things the Administrative Council will not, or can not, support or approve. The motive back of this program of work is safeguarded by the law and the By-Laws and this is important as to the results to be secured.

This is not a central bureau control of building in Indiana. Instead it is a helpfull source of information for the local officials of the State upon whom rest the responsibility for the safeguarding of the people of their communities.

The Rules and Regulations are not laws in the sense of "you must" and "you can not." Instead minimum standards are provided so that safe and sanitary construction may be common practice. The individual or the community may go beyond such minimums at their discretion. To drop below the standards is a loss in our standard of life.

Arbitrary action, criticism and censure is not contemplated, instead, through the Council, the citizens of Indiana have available the advice of experts in building. The enforcement of standards is considered as a remote possibility. Why should it be required when only proven common-sense regulations are promulgated.

If these things are true then why is it necessary that Rules, Regulations, Standards and Orders be promulgated as laws? Because it is necessary to establish minimum standards as set out by rules, regulations and orders and there can be but one set of minimum standards and those as fixed by authority.

These standards, published by the state, are the measure of safe and sanitary building and are also the test of the ability of the Builder. Again attention is called to the use of the word "Builder" as meaning the architect, the engineer, the contractor or the craftsmen. The test of ability to serve and serve well applies to all. Plans, computations, management and workmanship. The control by rules and regulations to produce standards applies to all.

**Lack of Co-operation is Cause For Most Poor Construction**

What is the cause of inadequate or imperfect construction? There can be but two reason for no man willfully plans or builds for a failure.

The architects, the engineers, the contractors and the mechanics have well developed standards of good design and workmanship the result of theory and practice. Therefor only two things can occasion poor construction, either actual incompetency or lack of co-operation. Incompetency is rare, noticeable, and therefor if permitted to exist is properly chargeable to the second reason, so, after all there is only one reason, lack of co-operation.

The standards as promulgated are therefor a measure of that co-operation that the public has a perfect right to expect from the Building Industry.

The standards, are by a provision of the Law, to be recommended by an Advisory Committee composed of three architects, three engineers, three contractors and three mechanics and it is a fundamental that this be done by co-operative work. When rules and regulations are prepared by co-operation they will succeed in application by the same process.

This is sound doctrine. The experience of the Council shows that the spirit of co-operation was with us all the time. All that is necessary is a means to put it to work.

---

# HAMMOND

## NOW SEEKING TO GET COUNTY CONTRACTORS ORGANIZATION GOING

**Preliminaries Started**

The builders of the Calumet District are quite busy these days, not so much with building as with new organization plans. It has all come about through the proposed scheme that has for its objective the formation of a county contractors' association that would include in its membership the builders of East Chicago, Gary, Hammond, Indiana Harbor and other towns and cities in the county. Meetings are becoming quite a regular occurrence, first here then there. One was held in Hammond on November 5 at the B. T. E. A. rooms, attended mostly by the general contractors, and another session took place at the Gary Y. M. C. A., November 10, at which further steps were taken to perfect the contemplated body.

When plans are consummated it is the intention to employ a regular sec-

retary at a steady salary. It is admitted that it will take some pretty strong financing to carry the proposed organization if it really is to be effective, and while some of the contractors have been reluctant about "digging down in their jeans" deeply to to float the proposition, nevertheless, it is thought there will be enough backing to get things started in the near future.

There is little question but that a big central contractors' organization would be a fine proposition not only for the contractors, but for the building industry and would be beneficial all around—if the builders will support it as they should. There is one feature about the scheme, it must be thoroughly organized, no half-baked interest will count; those who join up must make up their minds to go all the way or not start; all petty individual jealousy, grievances, and bickerings must be shunted into the discard and there will have to be unity and co-operation or the effort will fail. Every member must be willing to put his shoulder to the wheel and not be content to just join and then expect "George," the other fellow, to do all the rest.

## CITY BOUNDARY EXTENDED

### Officials Annex Adjacent Territory Toward Which Gary Was Casting Its Eyes

The city of Hammond not to be caught asleep got the jump on Gary, her sister city, and at a special meeting of the city council last week annexed fifteen square miles of territory lying south and southeast of the city limits. The section taken in includes the towns of Highland and Munster and is traversed by the Ridge road, a thoroughfare that in a short time promises to be the best residence section of the city.

A tip found its way to the mayor of Hammond imparting the information that the Gary city council was looking upon the above territory with envious eyes and was on the verge of annexing it. As a result there was the special council meeting at Hammond and the action to grab off the district in question.

On the face of things it looks like a wise move, for had Hammond not taken advantage of the situation, and had Gary been successful in its annexation contemplation, Hammond would have been bottled up with no future chance for expansion southward.

## HAMMOND BUILDING JOTTINGS

Architects Wainwright and Vaughn, Hammond, have plans out for a two-story brick dwelling, 28x28 ft. with garage attached, for Goslin, Meyn and Weis. These architects have awarded the contract for the construction of a $40,000 school building at Minnooka, Ill., to William Glasgow of that city.

The contracts for the John Jarnowski building (store rooms and dance hall) were awarded by Architects A. C. Berry & Co., as follows: Masonry to Stanley Milda; carpentry to Chris Hanso; structural steel to United Boiler and Foundry Co.

Architects Hess and Greenwood have completed plans for a $10,000 residence for Contractor Guy Young.

B. S. Graves, contractor, is erecting a $15,000 reinforced concrete and stucco English residence in Broadmoor.

**Residence:** (5 rooms). Owner, Albert Grissom. Contractor, Luhring Lumber Co. Work started.

**Residence:** Willard Ave. and Mulberry St. Owner, E. Horn, c/o contractor. General contractor, Luhring Lumber Co. Work started. Brick.

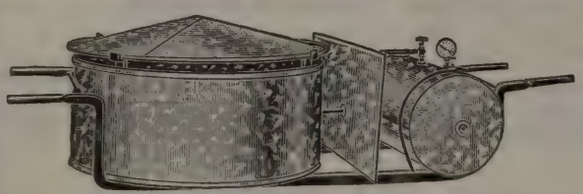
**Residence:** (Colonial design), 4 rooms, Runnymeade Ave. Owner, Albert Scherer. Contract let to Luhring Lumber Co. Frame.

**Factory and Boiler House:** $60,000.00, 1 sty., 200x350x60, West End. Archt. Alfred E. Neuchs, Old State Bank Bldg. Owner, American Woodcraft Corp. (Furniture), 702 West Pennsylvania Ave. Plans completed. Owner, builds and awards separate contracts. Start work soon. Brick, comp. roof, steel sash.

***Office, Storage and Plant:** $75,000.00. Private Plans. Owner, Ohio Valley Roofing Co., 226 Divisions St. General contractor, M. J. Hoffman Construction Co. Steel let to International Steel and Iron Co. Excavated. Brick, 3 sty., 105x156.

**Residence:** $10,000.00. Private plans. Owner, Norman E. Gatsch, c/o Luhring Lumber Co. Owner taking bids. Stucco.

**Residences:** (2) $6,500.00 each. Owner, J. Magazine, S. 10th St. Contract let to Jacob Schmidt, 1312 E. Franklin St. Frame.



***Junior High School:** (add.), $175,000.00, Gymnasium, cafeteria & Manual Training Dept. (Reitz High School). Archt. Jos. C. Llewellyn Co., 38 South Dearborn St., Chicago, Ill. Associate architect, Charles L. Troutman, 410 American Trust Bldg., Evansville. Owner, Board of School Trustees, Daniel Wertz, Pres.; H. R. Henderson, Business Manager, 7th and Vins Sts., Evansville. Plans in progress. Owner will not advertise for bids before March 1st. Brick, concrete and steel.

***Junior High School:** (adjoining Bosse High School), $125,000.00. Archt. Jos. C. Llewellyn, 38 South Dearborn St., Chicago, Ill. Associate archt. Charles L. Troutman, 410 American Trust Bldg., Evansville. Owner, Board of School Trustees, H. R. Henderson, Business Manager, 7th and Vine Sts., Evansville. Plans in progress. Mature about March 1st. Brick, concrete and steel.

***Stadium:** (seating 4000 persons), $90,000.00, 50x325, "Benj. Bosse School." Archt. Jos. C. Llewellyn, 38 South Dearborn St., Chicago, Ill. Associate architect, Charles L. Troutman, 410 American Trust Bldg., Evansville. Owner, Board of School Trustees, H. R. Henderson, Business Manager, 7th and Vine Sts., Evansville. Plans in progress. Mature about March 1st. Brick, reinf. conc.

***Residence:** $20,000.00. Archt. Alfred E. Neucks, Old State Bank Bldg. Owner, Louis Levi, Washington Court Apts.

## Work Straight Thru the Winter

## Reynolds Portable Furnaces

*What Large Contractors Says*

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron. architects, engineers and contractors praise it highly.

# Sealed Proposals

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given, that the School City of Terre Haute, Indiana by its Board of School Trustees, will receive sealed bids until 7 o'clock P. M. on December 7, 1925, at the office of said Board in the Administration Building at Terre Haute, Indiana, for remodeling and erection of basement and two story additions of reinforced concrete construction to the Booker T. Washington School, located at Thirteenth Street and Franklin Street, Terre Haute, Indiana. The total estimated cost of such building work is $88,000.00

Separate bids will be received for general construction work and for the installation of heating and plumbing systems.

All bids must be submitted on forms as prescribed by the State Board of Accounts, with a non-collusion affidavit. Each bid must be accompanied by a certified check of four per cent (4%) of the amount of the bid as a guarantee that he will enter into a written contract and give surety bond, if contract be awarded to him, within ten days after notification thereof. The certified check should be made payable to the School City of Terre Haute. Should said bidder fail to enter into said contract, he shall forfeit said sum to the School City of Terre Haute.

Plans and specifications of said building work are on file at the office of said Board of School Trustees, and additional plans and specifications may be obtained for individual use of bidders from said Board of School Trustees, or from Johnson, Miller, Miller and Yeager, Architects, 30 North Fifth Street, Terre Haute, Indiana.

The said Board of School Trustees reserves the right to reject any or all bids.

Dated November 5th, 1925.

SCHOOL CITY OF TERRE HAUTE, INDIANA,
By Lillian J. White,
President of the Board of Trustees of the School City of Terre Haute, Indiana.
Attest: William F. Mendenhall,
Secretary of the Board of Trustees of the School City of Terre Haute, Indiana.
McNutt, Wallace, Harris & Randel, Attys.
Nov. 14th, 21st, 28, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

### COURT HOUSE REMODELING
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Commissioners of the County of Knox, State of Indiana will receive sealed bids at the County Auditor's Office at the Court House in the City of Vincennes in said County until one o'clock p. m., on Monday, December Twenty-first, 1925, for the Remodeling of the Knox County Court House located on the square bounded by Seventh and Eighth, Busseron and Broadway Streets in said City.

Estimated cost of said improvement $125,000.00.

Plans and Specifications for the above work are now on file at the Auditor's Office and elsewhere as required by law. The work will be divided into three classes to-wit: General Contract, Heating, Plumbing and Ventilating, and Electric Wiring. Bidders may bid on any of the above classes or on the work as a whole.

Each bidder shall file his bid in a sealed envelope plainly marked with the name and address of the bidder and the class or classes of work bid upon.

Each bidder must file with his bid, certified check for 3% of the amount of the bid and his bond for the full amount of his bid with two good free holders as Surety thereon, to the approval of the undersigned Board or with Surety Bond with some good Surety Company duly authorized to do business in Knox County and to the approval of said Board which Bond shall be conditioned not only for the faithful performance of his contract if awarded to him but for the payment of all debts incurred in said work and for all other conditions required by law and such Board. Each bidder shall also file with his bid his Affidavit of Non-Collusion as required by law.

Bidders desiring to bid on all or any part of the above work may obtain plans, specifications and bid forms complying with the above requirements by application to the office of the Architect and Engineer, John B. Bayard, located at the corner of Third and Main Streets, in the city of Vincennes, Indiana.

Payments on the above work will be made on certificates issued by the Architect based on 85% of the value of the material and labor forming a part of the building and material stored on the premises which in the opinion of the Architect is properly protected from damage or loss, and the balance 30 days after the acceptance of the above work by said Commissioners. The said Board of Commissioners hereby reserve the right to reject any or all bids submitted for the above work.

Dated at Vincennes, Indiana, this 4th day of November, 1925.

Board of Commissioners of The County of Knox, in the State of Indiana:

JOHN A. ELLIOTT, Pres.,
ANTHONY HESS,
EDWARD F. BROCKSMITH.
GEO. W. DONALDSON, Auditor.

Nov. 7, 14, 21, 28, Dec. 5, 12, 1925.

### SCHOOL BONDS

D., 1941.

Said interest shall be evidenced by coupons attached to said bonds, and said bonds shall be signed for and on behalf of said township by said trustee, together with the coupons thereunto attached.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and with an order duly entered upon the records of the Advisory Board of Washington School Township, Grant County, Indiana, authorizing and directing the issue and sale of said bonds for the purpose of providing funds for the erection and construction of a new school building for a new consolidated school district, formerly consisting of districts numbered 1, 2, 3, 4, 5 and 8 of said Washington School Township, Grant County, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than the par value.

Sale will continue from day to day until all of said bonds are sold. The right is reserved to reject any and all bids.

HARRY L. WIGGER,
Trustee of Washington School Township, Grant County, Ind.

Lett & Lett, Attorneys.

# HOLORIB

PATENT APPLIED FOR
TRADE MARK
INSULATED ROOFS

*HOLORIB INSULATED ROOF on Danceland, Cleveland's beautiful ball room. The architect estimates that contract was completed thirty days under schedule due to Holorib roof construction. Insulation applied under the Holorib principle is protecting the building.*

*APPLICATION OF HOLORIB ROOF deck, insulation and waterproofing going forward as one continuous operation. Holorib Insulated Roofs can be applied under any weather conditions, freezing temperatures are not a barrier.*

## Does Your Roof Leak Heat?

Holorib insulated roofs are built to supply maximum insulation. They keep rooms cool in summer and warm in winter. They stop fule waste and completely prevent condensation and decay.

A complete Holorib unit consists of a steel supporting sheet self-reinforced by closed triangular ribs, each rib a complete girder beam. This supporting member is insulated and waterproofed under Holorib specifications.

Having the lightest permanent deck in existence, a Holorib Roof pays for itself by allowing minimum weights of structural members from foundation up.

# INDIANA CONSTRUCTION RECORDER

FOR ARCHITECT ENGINEER

Devoted to the Interests of the Indiana Construction and Engineering Industry

FOR SUPPLYMAN CONTRACTOR

VOL. VII INDIANAPOLIS, INDIANA, NOVEMBER 21, 1925 No. 34

## WELL KNOWN CONTRACTOR STATES THE CASE AS HE SEES IT

### Makes Further Plea For More Intensified Co-operation in the Building Industry

The building business in its various ramifications, in fact, the whole construction industry, is a complex thing; where other industries are centered, that is, the effort is centered under one roof and hundreds of thousands and even millions of dollars' worth of products are turned out, in the building industry, the effort is flung far and wide and each individual project is a unit unto itself. Upon each unit centers the effort of distinct and different interests, all of which must work in harmony and unity, must co-ordinate if the operation is to be facilitated. Much of the economic waste in the building industry is directly traceable to a lack of co-ordination of effort on the part of the four fundamental elements of a building project, the architects, contractors, engineers and labor. It is but proper that there should be differences of opinion, but, on the other hand, each element should be amenable to a change of opinion if shown to be wrong. No one interest is paramount to the detriment of the others. That is the issue to which those of the building industry should awaken, and the avenue to that awakening is thru co-operation which will create proper understanding of the value of each element to the other and all of them to the whole.

Thus it came to pass that the words of A. E. Kemmer, Lafayette contractor, who spoke at the Builders Conference at Purdue University recently, were most timely.

The speaker took for his theme "Co-operation in the Building Industry," saying:

"The building industry as we view it is composed of those who are engaged in actual practice and construction, namely: Architects, engineers, contractors and mechanics. 'More than 11,000,000 of our people are dependent for their living upon the construction industry. Some 250,000 freight cars are required to handle the materials. Our building bill is $200.00 per year for each family in the United States. It is truly the chief barometer of the business of the country. When construction gains, prosperity is with us. It is the great outstanding influence for good or bad in our financial progress.'

**What Is the Purpose of Industry**

Shall we cling to the conception of industry as an institution, primarily of private interest, which enables certain individuals to accumulate wealth, too often irrespective of the well-being,

(Continued on Page 11)

## GREAT BUILDING TOTAL ROLLED UP IN INDIANA DURING THE MONTH OF OCTOBER

### Impressive Gains Registered Over Records of September This Year and the October 1924

Accompanied by little Elkhart, four of Indiana's largest cities came through fine in October with substantial monthly new building construction totals, offset losses recorded in six cities, and ran up a 32% gain over the October 1924 figures. And in addition to that performance last month's building volume for the state was 42.7% in advance of the September total this year.

The October figures which ran up to and over $7,000,000 made a grand total for a fall building month when ordinarily new construction work begins to ease down. This sum was made possible only through the spurt put on at Indianapolis where permits for over $2,000,000 were taken out, at Ft. Wayne and Gary where the estimated valuations were well over $1,000,000 in each city, and at South Bend who turned in over $700,000 for the month. Though there were 609 less permits issued in October 1925, than during the corresponding period in 1924, there was quite an increase in the size of the projects started making for a big gain in the estimated valuation column.

The relative standing of the eleven cities in the matter of gains over and losses from the figures of Oct. 1924, is as follows: Gain, Ft. Wayne, 114%; Gary, 108%; South Bend, 86;% Elkhart, 37%; Indianapolis, 17%. Loss: Hammond, 16%; Richmond, 29%; Kokomo, 33%; Evansville, 47%; Muncie, 47%; Terre Haute, 65%.

These are the returns for the Octobers of this and last year as submitted by the various city building inspector.

| City | 1925 Per | 1925 Est. Val. | 1924 Per. | 1924 Est. Val. |
|---|---|---|---|---|
| Elkhart | 44 | $ 77,180 | 15 | $ 56,200 |
| Evansville | 255 | 223,601 | 329 | 428,686 |
| Ft. Wayne | 268 | 2,706,365 | 288 | 798,768 |
| Gary | 230 | 1,472,635 | 210 | 707,946 |
| Hammond | 106 | 430,611 | 145 | 514,825 |
| Indianapolis | 1505 | 2,446,205 | 1831 | 2,078,707 |
| Kokomo | 47 | 47,335 | 67 | 71,005 |
| Muncie | 53 | 48,505 | 108 | 94,498 |
| Richmond | 59 | 74,250 | 64 | 104,067 |
| South Bend | 449 | 710,221 | 410 | 382,620 |
| Terre Haute | 184 | 105,552 | 342 | 300,839 |
| Total | 3200 | $7,342,460 | 3809 | $5,538,161 |

## ANENT THE ANNUAL ARCHITECTURAL EXHIBIT

### Time Has Arrived For the State Architects to Consider the Nature of the Offerings to Be Displayed

Another week can now be checked off the calendar, a situation of little importance except from the standpoint from which viewed. To some it may mean nothing beyond the fact that time moves on and on indefinitely, regularly, unerringly; to others it may bear significance as it may mark the passing or the approach of an event.

And so to some Indiana architects the week may have sloughed off, a discard into the past, to others it may have meant more than that, but, it should have to some extent awakened the state architectural profession to the fact that in passing it brings the Annual Architectural Exhibit of the Indiana Society of Architects just that much closer and has cut down the preparation time of prospective exhibits in like proportion.

This state architectural exhibit is a chance for display that architects in few states outside of Indiana have the opportunity to take advantage of. It is an opportunity, if the architects would but appreciate the fact, for, once a year the John Herron Art Institute throws open its galleries gratis for the use of the Indiana architectural profession, and the members are afforded an occasion to place before the public various exhibits that set forth the intricate effort involved in architectural service and practice.

There is one feature to the exhibit that the architects may fail to appreciate and that is that those who visit an art gallery are those who are in a position to judge architectural art, are possible prospective clients of a desirable class who may, thru the appeal of the exhibit, more quickly feel the urge to build the project they may have in contemplation.

It is a laudable venture and worthy of the support of the entire state profession. The better the exhibit the greater credit reflected on those of the architectural field.

This year it is proposed to include in the exhibit displays of the allied arts as employed in the designing and construction of buildings a move that should increase considerably the scope of the affair and lend to its attractiveness.

The exhibit is to be held during the month of February and is to be formally opened on the fifth of that month, at which time the members of the Indiana Society of Architects will be in Indianapolis in attendance at the semi-annual meeting of the organization.

All Indiana architects are urged to give serious thought to the prospective exhibit and make an effort to submit individual exhibits, the nature of which are to consist of sketches, plans, photographs of executed work and color renderings.

## MAKING IT TOUGH FOR THE OUTSIDER

### Milwaukee Architects Would Keep Work At Home

Sixteen of the prominent architectural firms of Milwaukee have followed the lead of Los Angeles architects and formed an association for the purpose of supplying architectural service to the city and the state.

The plan of operation provides for the securing of the services and plans most desired by the public bodies concerned and is intended to discourage a tendency to employ architects from outside the city. The association will undertake to handle only public work of the largest magnitude and will operate along the same lines as the architects association in Los Angeles which has proven to be very satisfactory.

## WINTER BUILDING GREAT, THEORETICALLY

### Bad Weather and Lack of Work Only Things That Interfere

Seasonable employment and winter construction are favorite slogans of the Department of Commerce as well as of some of the national organizations related to the building industry and they have a winning sound as something newly discovered for the amelioration of the terrible (?) living conditions of the building mechanic and laborer.

The New York Building Congress has been studying the subject from another angle; that of benefit to the contractor and it has discovered that winter construction holds these advantages:

1. Labor bonuses are eliminated.
2. Labor turnover is reduced.
3. Spread in overhead expense of contractors throughout the year reduces organization and equipment costs.
4. Tendency of contractors to lower their margin of profit with the idea in mind of securing sufficient work to keep their organization intact during the winter months.
5. Seasonal discount on materials.
6. Seasonal rates by transportation companies in order to relieve the congested periods.
7. Saving of interest and taxes on investments lying idle.
8. Earlier returns on investment.

We wonder if this study led to the discovery of the fact that the principle bar to Winter construction in this climate, is the disinclination of men to work in bad weather and the absence of the necessity for their so doing.

When the philanthropists who are so interested in the subject find a way to have the pay go on even when the work stops, they will have solved the question to the entire satisfaction of that class of workmen who yearn for a five-day week but it will be a solution lacking in popularity with the employer and owner.—(Bulletin of the Buffalo, N. Y., Builders' Exchange.)

ORGANIZATION AND CURRENT NEWS

## WELL-KNOWN CONTRACTOR

(Continued from Page 5)

health and the happiness of those engaged in its production? Or shall we adopt the modern viewpoint and regard industry as being a form of social service, quite as much as a revenue producing process? Is it not true that any industry, to be permanently successful, must insure adequately remunerative employment under proper working conditions, a fair return upon the money invested, and to the community a useful service.

### What Are the Relations Between the Parties to Industry?

It is frequently maintained that the parties to industry must necessarily be hostile and antagonistic, I am convinced that the opposite is true; that they are not enemies but partners; and that they have a common interest; and that success cannot be brought about through the assumption by any one party of a position of dominance and arbitrary control; rather it is dependent upon the co-operation of all four. Partnership, not enmity, is the watchword.

### Basic Principles Always Applicable

The basic principles governing the relations between the parties to industry are practical and applicable and should be adhered to if the industry is to progress and attain the position it is rightfully entitled to. The question which we are often confronted with is how to establish personal relations and co-operation in regards to industrial problems. The answer is not doubtful or questionable, but absolutely clear and unmistakable; it is, through adequate representation of the four parties in the councils of industry.

### The Duties of the Builder

The duties of the builder are much more difficult than one would on first thought imagine. It is a subject that every one is familiar with and yet, if you were asked, what is the duty of the builder? It would be simply necessary to imply the moral law. The definition of the term "Builder" in the sense that we use it is that it embodies those engaged in the industry in actual practice and construction and as it will be implied in this subject to be inclusive of the four as hereinbefore mentioned. The definition of the word "Duty" in the sense that we builders understand it, and as it may be applied to the subject, is as follows: At their earliest inception, associations and societies were formed when two or more men banded themselves together for mutual protection against common enemies, oppression for revenge, or for defense. Later, such associations resolved themselves into commercial organizations for solely selfish purposes.

Today we are endeavoring to have associations (such as ours) serve an unselfish purpose and for the general welfare of the public. When our forefathers formed associations for protective or aggressive measures, each of the persons joining would take an oath of allegiance. They were very formal in their ritual and discriminating with regards whom they permitted to become one of their number.

With this explanation, the subject of 'What is the Builder's Duty Towards the Public," will be treated both as individuals and collectively as members of an association.

Broadly speaking, **the builder's duty to the public** should be to encourage and foster ideals of service to the building and general public as a basis of all worthy enterprises. If we are to organize solely for self, our association cannot endure, neither can it remain respectable or confine itself within decent ethical standards.

**The builder's duty toward the public** should be an active one in all matters, whether, civic, economic or political, and the moral welfare of the community should always be of paramount importance.

It is the builder's civic duty to keep a watchful eye on all attempted legislation, whether national, state or municipal. His peculiar knowledge and experience especially fit him to exercise a tremendous influence in encouraging helpful legislation to keep building cost within economic limits, and discourage the enactment of laws that are vicious and contrary to good public policy.

Everyone engaged in the building industry should participate in those movements for public welfare in which his training and experience qualify him to give competent and disinterested advice. We individually, as well as an Association, should support public officials in the proper enforcement of building codes and safety regulations and should take an active interest in the formulation and improvement of such codes.

### Interchange of Ideas Among Builders

The builder should co-operate with his colleague in his profession by exchanging freely ideas and business methods found helpful by experience. All builders should meet one another not only in the course of business, but socially also, with the thought of creating the best of relationship and good will among them. Through this each builder will render a distinct and valuable service to himself and his colleagues and the general public will be the gainer.

### The Builder's Creed

The builder's business standards should have in them a note of sympathy for our common humanity.

The builder's business dealings, ambitions and relations should always cause him to take consideration as his highest duties as a member of society.

In every position in business life, in every responsibility that comes before him, his chief thought should be to fill that responsibility and discharge that duty so that when he has ended each of them he shall have lifted his level of the ideals and achievements of his industry a little higher that he found them."

## THE KICK IN STATISTICS

Since 1850 our population has doubled more than twice.

The national wealth has become forty times greater.

Value of imports has become twenty-five times greater.

Iron industry values have become eighty times greater.

Measured in ton miles railroad traffic is 400 times greater.

And our fire losses have increased something more than 700 per cent.

Strange some one hasn't accused the architects, contractors and material men of being back of these fires to create more building.

# HAMMOND

## ADVERSE WEATHER CONDITIONS AND PREDICTIONS HAVE EFFECT ON BUILDING ACTIVITY

### Volume Slumps During the Past Few Weeks

Locally building operations in general have dropped away considerably the past month. This condition is due in a great measure to the inclemency of the weather which for days at a stretch made building effort practically impossible. Then again there has been a noticeable quiet in the development of new projects as many prospective owners have called a halt on further proceedings in view of the fact that there is so much talk forecasting a hard, cold winter and they are loath to start things in the face of prospective disadvantages.

There is a gleam of hope, however, as realtors and other interested parties are strong in their assertions that everything points to a big building year next season.

## OUTSIDERS SEE FUTURE IN HAMMOND REAL ESTATE

### Show Interest in Suburban Tracts

The realty market seems active enough and many Chicago realtors are buying up large tracts of land in the environs of Hammond. These tracts are being platted, streets and sidewalks are being built and a large number of the lots have already been disposed of.

## FINE RESTRICTED RESIDENCE DISTRICT TAKES ON BUSY ASPECT

### Latest Home District Developing Promisingly

One of the most promising residence districts developed in and around Hammond in years is now being improved by Gastlin-Meyn & Weise, owners of Broadmoor Addition, lying south of the Little Calumet River between the Illinois and Indiana state line and South Hohman street. The lots out there have found a ready demand and several fine homes are to be built in that section this winter or in the early spring. The district is to be a restricted one permitting only the erecting of first class structures. Fourteen attractive residences are now under construction in Broadmoor and, unless the weather takes a severe turn, more activity is looked for during the coming months.

## FREQUENTLY THE CASE

### Seems Almost Like Wanton Waste to Pave Only to Rip Up Again

Why is it that so many humans allow of systems that operate backward as it were?

Hammond has considerable new street paving which was more or less a joy to those who use the streets to any extent and, further, a credit to the city. Now, along comes the Northern Indiana Gas & Electric Co. with a lot of underground conduit for placing electric wires below the earth's surface and starts ripping up the street pavement. Certainly the pavement will be replaced but whoever saw a street ever put in as good shape as it was before the trench work was started? All this should have been done before the thoroughfares were paved.

## HAMMOND BUILDING JOTTINGS

General Contractor Leslie Colvin, Indianapolis, has completed the new Lloyd ten-story office building and is moving his equipment back to the capital city.

Township Trustee Eric Lund has started his new two-story brick residence in Broadmoor on the Circle.

Architects Wainwright & Vaughn have awarded the separate contracts for the Gostlin, Meyen & Weise residence in Broadmoor as follows: Mason work to Grantfield & Dickison; carpentry to The Indiana-Illinois Construction Co.; concrete to Herman & Roherman; steel to Union Foundry Co.

Buckley & Skidmore, architects, are preparing plans for a one-story and basement brick store building, 30 ft. by 95 ft. on Summer Blvd., for Stanley Kolanko.

Architects Hess & Greenwood are preparing plans for a one and one-half story brick veneer L-shaped dwelling 67 ft. by 40 ft., garage attached, in Woodmar, for Cleighton Belman. They will be ready for bids after December 1.

E. E. COLE.

# INDIANAPOLIS

## PACE GROWS FASTER IN BUILDERS BOWLING LEAGUE

### General Individual Average Increase of Six Pins Shown During Past Few Weeks of Play

**League Standing**

| Team | W. | L. | Per. | T.Av. |
|---|---|---|---|---|
| Brandt Bros. | 25 | 8 | .758 | 823 |
| Asbestos & Asphalt Products Co. | 24 | 9 | .727 | 855 |
| Wege-Stanford Marble & Tile Co. | 21 | 12 | .636 | 835 |
| Geiger & Peters | 17 | 16 | .515 | 807 |
| W. W. Wise | 17 | 16 | .515 | 851 |
| Central Supply Co. | 15 | 18 | .455 | 821 |
| Indpls. Electric Supply Co. | 13 | 20 | .394 | 793 |

A month more of bowling by the builders league players at Indianapolis has served to speed up the pace perceptibly resulting in quite a shifting of team positions, six of the eight aggregations switching around, three climbing higher, three slipping and the two at the bottom holding stationery.

The Brandt Bros. team jumped from third place a month ago to the top of the heap their rise being easily traced to the improvement of team average which over the month arose 66 pins. From sixth place to second is the record of the Asbestos and Asphalt Products Co., representatives who have been pegging along consistently with just enough reserve punch to fight off their opponents. This crowd added 27 pins to their team average over the last month.

Just behind the second placers rides the Wege-Stanford outfit which climbed up two notches in position, a gain attributable to an increase of 31 pins in average.

And then come the slippers. Geiger and Peters slumped from second place to fourth, though they did swell their average from 807 to 814. The Walter Wise crowd eased back into fifth position from fourth and in so doing dropped their gait as a team, 24 pins.

The biggest flop and tumble was taken by the Central Supply gang who hurtled from first place clear down into the sixth berth, showing an average

shrinkage of 19 pins and winning but a third of their games while diving.

No one jostled the Indianapolis Electric Supply team who added 24 pins to their average game pinnage, 10 won and 14 lost to their record, and kept out of the cellar easily since the Hugh J. Baker crowd maintained their early season performance and so far have been unable to crash thru to a single victory. The tail enders have been game thru it all and have shot some good scores only to lose out by slight margins. These are the hard luck boys, for when they do put on a spurt it so happens their opponents do too and gyp them out of victories. Their team average went up five pins during the past few weeks, which shows "the fire-resistive boys" are resistive alright, can stand the heat and keep going. It takes more to be a loser than it does to be a winner, that is when you can come back and fight like these boys do.

The secretary's records to date reveal the following statistical playing data: Hugh J. Baker & Co. 0 33 .000 715

Reynolds Portable Furnaces

*What Large Contractors Say*

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron. architects, engineers and contractors praise it highly.

**Draftsman**—Experienced, one capable of carrying plans thru from sketches to completed plans. Must be neat and efficient in effort. Good position for right man. State experience, and salary desired, also send samples of work. Address Architects Sutton and Routt, Drawer D, Department A-17, Ft. Lauderdale, Florida.

# Sealed Proposals

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Terre Haute, Indiana, by its Board of School Trustees, will receive sealed bids until 7:30 o'clock p. m., on December 18, 1925, at the office of said Board in the Administration Building at Terre Haute, Indiana, for erection and completion of a two story fireproof building composed of school rooms, auditorium and gymnasium, and to be located on the school property at Twenty-fifth Street and Poplar Street, Terre Haute, Indiana. The total estimated cost of such work is $675,000.

Separate bids will be received for general construction, heating, plumbing and wiring.

All bids must be submitted on forms as prescribed by the State Board of Accounts, with a non-collusion affidavit. Each bid must be accompanied by a certified check for four per cent (4%) of the amount of the bid as a guarantee that he will enter into a written contract and give surety bond if contract be awarded to him, within ten days after notification thereof. The certified check should be made payable to the School City of Terre Haute. Should said bidder fail to enter into said contract, he shall forfeit said sum to the School City of Terre Haute.

Plans and specifications of said building work are on file at the office and said Board of School Trustees, and additional plans and specifications may be obtained for individual use of bidders from said Board of School Trustees, or from Johnson, Miller, Miller and Yeager, Architects, 30 North Fifth Street, Terre Haute, Indiana. A deposit of $25.00 to the Architects shall be required to insure the return of plans and specifications.

The said Board of School Trustees reserves the right to reject any or all bids.

Dated November 16, 1925.

Schoou City of Terre Haute, Indiana.
By Lillian J. White,
President of the Board of Trustees of
School City of Terre Haute, Indiana.

Attest: William F. Mendenhall,
Secy. of the Board of Trustees of the
School City of Terre Haute, Indiana.

McNutt, Wallace, Harris & Randel, Attys.
Nov. 21st, 28th, Dec. 5th, 12th, 1925.

### SCHOOL BONDS
### NOTICE OF BOND SALE

Notice is hereby given by the Trustee of Washington School Township, Grant County, Indiana, that sealed bids will be received by him at the law office of Lett & Lett, Rooms 501, 502 and 503 Glass Block, Marion, Indiana, up to the hour of 2 o'clock p. m., of Saturday, November 28th A. D., 1925, for the sale or purchase of Forty-One Thousand ($41,000.00) Dollars of School Bonds of Washington School Township, Grant County, Indiana.

Said bonds will be 82 in number, dated January first, A. D., 1926, of Five Hundred ($500.00) Dollars each, payable at the First National Bank of Marion, Indiana, bearing interest at the rate of Five per cent (5%) per annum, payable semi-annually, on the First day of July A. D., 1926, and on the first day of January, A. D., 1927, and on the same dates of each and every year thereafter

until fully paid, and maturing as follows, to-wit: The first two (2) of said bonds shall become due and payable on the first day of July, A. D., 1926, and a like number of said bonds shall become due and payable January and July first thereafter to and including the payment of January first, A. D., 1930; and three (3) of said bonds shall become due and payable on the first day of July, A. D., 1930 and a like number of three (3) of said bonds shall become due and payable on January and July first thereafter respectively, up to and including the final payment thereof on January first, A. D., 1941.

Said interest shall be evidenced by coupons attached to said bonds, and said bonds shall be signed for and on behalf of said township by said trustee, together with the coupons thereunto attached.

Said bonds have been issued in strict compliance with the laws of the State of Indiana, and with an order duly entered upon the records of the Advisory Board of Washington School Township, Grant County, Indiana, authorizing and directing the issue and sale of said bonds for the purpose of providing funds for the erection and construction of a new school building for a new consolidated school district, formerly consisting of districts numbered 1, 2, 3, 4, 5 and 8 of said Washington School Township, Grant County, Indiana.

Said bonds will be sold according to law to the highest and best bidder for not less than the par value.

Sale will continue from day to day until all of said bonds are sold. The right is reserved to reject any and all bids.

HARRY L. WIGGER,
Trustee of Washington School Township, Grant County, Ind.

Lett & Lett, Attorneys.
Nov. 7-14-21, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given, that the School City of Terre Haute, Indiana by its Board of School Trustees, will receive sealed bids until 7 o'clock P. M. on December 7, 1925, at the office of said Board in the Administration Building at Terre Haute, Indiana, for remodeling and erection of basement and two story additions of reinforced concrete construction to the Booker T. Washington School, located at Thirteenth Street and Franklin Street, Terre Haute, Indiana. The total estimated cost of such building work is $88,000.00

Separate bids will be received for general construction work and for the installation of heating and plumbing systems.

All bids must be submitted on forms as prescribed by the State Board of Accounts, with a non-collusion affidavit. Each bid must be accompanied by a certified check of four per cent (4%) of the amount of the bid as a guarantee that he will enter into a written contract and give surety bond, if contract be awarded to him, within ten days after notification thereof. The certified check should be made payable to the School City of Terre Haute. Should said bidder fail to enter into said contract, he shall forfeit said sum to the School City of Terre Haute.

Plans and specifications of said building work are on file at the office of said Board of School Trustees, and additional plans and specifications may be obtained for individual use of bidders from said Board of School Trustees, or from Johnson, Miller, Miller and Yeager, Architects, 30 North Fifth Street, Terre Haute, Indiana.

The said Board of School Trustees reserves the right to reject any or all bids.

Dated November 5th, 1925.

### COURT HOUSE REMODELING
### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Commissioners of the County of Knox, State of Indiana will receive sealed bids at the County Auditor's Office at the Court House in the City of Vincennes in said County until one o'clock p. m., on Monday, December Twenty-first, 1925, for the Remodeling of the Knox County Court House located on the square bounded by Seventh and Eighth, Busseron and Broadway Streets in said City.

Estimated cost of said improvement $125,000.00. Plans and Specifications for the above work are now on file at the Auditor's Office and elsewhere as required by law. The work will be divided into three classes to-wit: General Contract, Heating, Plumbing and Ventilating, and Electric Wiring. Bidders may bid on any of the above classes or on the work as a whole.

Each bidder shall file his bid in a sealed envelope plainly marked with the name and address of the bidder and the class or classes of work bid upon.

Each bidder must file with his bid, certified check for 3% of the amount of the bid and his bond for the full amount of his bid with two good free holders as Surety thereon, to the approval of the undersigned Board or with Surety Bond with some good Surety Company duly authorized to do business in Knox County and to the approval of said Board which Bond shall be conditioned not only for the faithful performance of his contract if awarded to him but for the payment of all debts incurred in said work and for all other conditions required by law and such Board. Each bidder shall also file with his bid his Affidavit of Non-Collusion as required by law.

Bidders desiring to bid on all or any part of the above work may obtain plans, specifications and bid forms complying with the above requirements by application to the office of the Architect and Engineer, John B. Bayard, located at the corner of Third and Main Streets, in the city of Vincennes, Indiana.

Payments on the above work will be made on certificates issued by the Architect based on 85% of the value of the material and labor forming a part of the building and material stored on the premises which in the opinion of the Architect is properly protected from damage or loss, and the balance 30 days after the acceptance of the above work by said Commissioners. The said Board of Commissioners hereby reserve the right to reject any or all bids submitted for the above work.

Dated at Vincennes, Indiana, this 4th day of November, 1925.

Board of Commissioners of The County of Knox, in the State of Indiana:

JOHN A. ELLIOTT, Pres.,
ANTHONY HESS,
EDWARD F. BROCKSMITH.
GEO. W. DONALDSON, Auditor.

# *Economy dictates its use*

Viewed from any roofing standpoint, Federal Cement Tile is economical. Its first cost is low compared with materials giving similar service in point of time and general satisfaction. It is steel reinforced for strength, light in weight, thus permitting of a light supporting structure. Time will not affect it. Is is impervious to the element and absolutely fireproof. Being precast it arrives at the job in box cars ready to be erected regardless of weather conditions. And once in place it makes a permanent roof —no maintenance, no further expense.

Federal Cement Tile is adaptable to all roof requirements of both industrial and non-industrial buildings. Federal has been standard with the largest users of fireproof roof units for nearly a quarter century.

Reynolds Portable Furnaces

*What Large Contractors Say*s

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron. architects, engineers and contractors praise it highly.

## CATCHING UP

### Country Made Big Strides In Building In the Last Few Years

The United States will enter 1926 with the building situation well over one year behind requirements, States Building Age and National Builder, following an extensive survey of 700 cities and towns. The survey discloses that there is still considerable shortage of homes and other buildings in cities of over 25,000 population. This shortage, plus normal requirements, according to the report, must be made up before normal conditions can again prevail in the construction industry. The report shows that there is need for approximately 220,000 small one-family houses costing less than $5,000 and for 100,000 single family dwellings costing from $5,000 to $10,000.

## BELIEVED WAGE PEAK REACHED IN BUILDING FIELD

### Conclusion Based On Survey of National Conditions

Notwithstanding the immense amount of building construction going on throughout the country, there are indications that the wage peak has been reached, according to a national building labor survey made by S. W. Straus & Co. Conditions in the building trades are summed up as follows:

(1) National movement for higher wages seems definitely checked for present.

(2) Wage rates show greater stability although there is still some slight upward tendencies.

(3) No indication of a general movement to reduce wages and only few cities report any downward revision of scales.

(4) Longer agreements being signed by contractors that will tend to stabilize the industry.

(5) Except for several jurisdictional disputes, labor is fairly tranquil.

(6) Building labor is well employed and only an occasional shortage of skilled craftsmen is reported.

(7) Bonus payments and practice of contractors bidding against each other for men have largely disappeared.

(8) Unskilled labor maintains high rates, although supply being increased by slackness of factory employment.

(9) Bulk of common labor supply needed for building industry being furnished by Canada and Mexico as immigration laws have considerably reduced supply from Europe.

(10) Apprenticeship schools steadily increasing supply of skilled building craftsmen.

## HERE IS A CHEERING ECHO

### New Note Sounded By Labor

Almost without exception, press reports emanating from the recent convention of the American Federation of Labor bore some reference to a new note that had never before been heard at a labor gathering. Article after article appeared in the leading daily papers of the country to the effect that labor was beginning to realize that productivity and not the cost of living should be the real basis of wages. The reports stated, further, that labor was becoming more tolerant in its attitude toward labor saving devices and that in the future there would be less opposition to methods which decreased production costs through the substitution of machine labor for hand labor.

During the closing days of the convention a new wage policy was formally adopted by the Federation in which production and not the cost of living will be the real basis on which wages will be adjusted. In commenting on this new plan, President Green said, "This action places American labor in a most advanced position on wage theories. It may be regarded as the annunciation of a new idea."

Employers of labor have time and again expressed the opinion that low production, rather than high wages, constituted the biggest problem in industry. Unless the recent adoption of the new policy on the part of organized labor is an empty gesture, we are going to witness in the future a very decided change in the attitude of labor toward the industrial problems of the country.

## GOVERNMENT RETURNS INDICATE THAT WINTER BUILDING IS GETTING AHEAD

### More Cold Season Construction Work Being Done Than Formerly Was the Order

Responses to a questionnaire sent out by the U. S. Department of Commerce show that the winter depression in construction is being gradually leveled out. During the last two years winter building has shown a decided increase over that of former years, which proves conclusively that the agitation in behalf of year-round construction is producing definite results. Investigation and experience has shown that except in the most northern sections and during extreme weather, work can go ahead about as rapidly and profitably as in summer.

ORGANIZATION AND CURRENT NEWS

## LABOR THROUGH ONE OF ITS REPRESENTATIVES ENDORSES CO-OPERATION IN THE BUILDING INDUSTRY

### Holds Such Action a Great Agency In Facilitating Construction Operations

The architect, engineer and contractor each having expressed his views on and his conception of what "Co-operation in the Building Industry" meant to the business when the Builders of Indiana were gathered at Purdue University, Lafayette, recently in annual conference it remained for Labor to express its views on the subject since its representatives were among those present.

The task devolved upon Charles W. Kern, Indianapolis, of the State Building Trades Council who said:

"That co-operation in industry means much to all concerned is recognized by those who have given careful unbiased consideration to the subject. Let me quote from an address of Mr. William Green, President of the American Federation of Labor, a recognized conservative authority on industrial relations, delivered before the Harvard Union recently:

"In the domain of industry and industrial endeavor there are numerous factors which play a part in the plan of commodity production and distribution. Some of these are inconsequential, some important and some indispensable. The outstanding and primary factors in all industrial enterprises are capital and labor. Both are essential in industry and each is dependent on the other. Between them there is an interdependence so fixed and irrevocable as to make complete success attainable only through understanding and co-operation. If there might or could exist between these two prime factors a proper regard for the functional service of each, within their recognized spheres of jurisdiction, then the age long conflict between these two forces would be terminated? This would be a most happy and desirable accomplishment; for with understanding, goodwill and co-operation established between these basic, indispensable factors in industry all other elements could be developed and utilized to the highest points of efficiency. It is to these problems of industrial co-operation and understanding that modern tradesunionism is addressing itself."

No doubt the building industry has made more progress along this line than has many other lines of endeavor, and this may be attributed somewhat to the nature of the business. In most industries work is carried on in such manner that direct supervision is possible over each operation of each employe, with repeated inspections as parts are completed and assembled. Such a system of supervision and inspection is impractical if not impossible in the various branches of building construction. Of course supervision and inspection are maintained on most building projects but the nature of the work is such that much dependence must be placed in the ability of the craftsmen to execute their work properly at all times. This need for co-operative effort from the employe has prompted employers to assist in the development of the mechanic to the point of trustworthyness, not only as regards mechanical ability but to the point of realization that only through his honest, efficient, best efforts can all the interests of the industry be advanced.

That employer who values the finished product of his efforts above anything else and takes just pride in the fact that only the best has entered into it, is the employer who values most highly the co-operative effort of his employes.

In order to secure and maintain the co-operation of his employes he must give especial attention to their needs. In addition to fair wages and reasonable hours he must see that every possible precaution is taken to protect their lives, and to safeguard their health while on the job. Freedom from needless, irksome working rules helps to cultivate the spirit of co-operation in the worth-while employe. His efforts along this line are of course regulated by his competitive relationship with other employers in the industry. However through collective bargaining processes of organized workmen with organizations of employers may be brought about uniform wage rates and working conditions so that the competitive relationship of employers is maintained upon a sound and stable basis. The assurance of complete success through the medium of collective bargaining must be predicted upon a mutuality of interest in the industry.

There is no power that can be invoked which will prevent the workers from organizing into trade unions. They will unite for mutual protection and in the interest of their common welfare. Trade unions are here. They cannot be gotten rid of. Why then is it not much better to work with them than to fight with them.

Where the right of workers to organize is conceded and collective bargaining is practiced the possibilities of serious strikes are minimized, especially so when those interested have learned the advantages of co-operation. Where the workers are denied the privilege of acting or speaking collectively through their chosen representative a spirit of revolt manifests itself, and the possibilities for co-operative effort are reduced to a minimum if not entirely removed.

There are many problems yet unsolved in the Building industry and they are peculiar to the industry. Some of these questions are discussed at times by those outside of the industry without actual knowledge of the situation, usually in the way of destructive criticism without effort to suggest a solution. The daily press takes pleasure in holding up for comparison the hourly wage of the building craftsmen with that of the factory mechanic, but seldom if ever mentions the contributing factors that drag down his average yearly earnings. Hours and days lost on account of weather conditions. Days and weeks lost through unemployment on account of the seasonal activities in building construction. But while the industry is not responsible for these conditions it is only through the cooperative effort of all who are a part of the industry that they can be solved. The workman individually and through his representatives stand ready to lend whatever help he can to the end that industrial controversy shall be minimized, complete understanding, co-operation, and mutuality of interest in the management and conduct of the building construction industry shall prevail.'"

## CONCRETE PRODUCTS MANUFACTURERS TO HOLD ANNUAL MEETING

### Affair Scheduled at Cleveland in January

All arrangements have been made to hold the next annual convention of the Concrete Products Association in Cleveland, on January 27, 28, 29, 1926. Headquarters of the convention will be in the Hotel Cleveland.

In view of the growing importance of concrete products in the building field, a large attendance is expected at the meeting. There are at present some 10,000 manufacturers of concrete products operating in this country. Plans have been made to receive delegations from every state in the Union.

**Many Educational Features**

This year there will be many varied kinds of concrete products represented at the annual convention. Concrete block, brick, tile, pipe and other structural units are now being made in large quantities in practically every state and the annual meeting is the open forum for the discussion of the problems and practices intimate to the industry.

A tentative program has been prepared with papers dealing with advertising, selling, manufacturing processes, plants and equipment schedules for presentation.

**Industry Gaining in Importance**

The concrete products business from a standpoint of importance to building is comparatively new. Use of these materials only a few years ago was confined to rural builders and some isolated enthusiasts who declared that concrete could be used for all types of construction and ornamentation.

The convention this coming year will meet with the knowledge that its production in terms of common units has passed all competitors, even that of common clay brick. Other products such as trimstone, pipe and ornamental garden fixtures has grown proportionately. Millions of dollars are represented in invested capital and yet the industry is only in its infancy.

It is planned to make the annual meeting the place where all problems connected with the manufacture of concrete products can be discussed and the latest practices explained. Through these means the general standard of the industry can be raised still higher and the advantages of these products in home building, structural construction, and other fields brought to the attention of users.

## AT LEAST BOYS SHOULD BE TAUGHT A TRADE IN SCHOOL

### Why Not the Building Trades?

To overcome the increasing shortage of skilled building trades workers Gerhardt Meyne, Chicago building contractor, advances the suggestion that the rudiments of each building trade should be taught in the public schools.

It is all too well known that the shortage of mechanics is becoming more acute each year he says, and is about to reach a climax that will be a menace to the building industry of the country.

"It is just as essential to prepare young men to handle the future of the nation's building industry as it is to prepare youths for professional careers, Mr. Meyne contends.

"The states owe that debt to the tax paying public. There should be tryout tests, say in the sixth and seventh grades, and if the student showed an inc'ination toward building work he should be encouraged and taught the trade he desired to learn.

"When the student completed his 'paper work' he then could be apprenticed to some building contractor to learn the practical end of the work."

Thus equipped boys would not be turned out of school with but a "sheep skin," instead, in addition to that highly prized document they would have a knwledge of a remunerative trade that if followed would give them a sustenance and a security that just ordinary positions in the commercial world could not guarantee.

# EVANSVILLE

## BUILDING OPERATIONS HOLD ACTIVE TO BRISK

### Home Construction In Good Volume

Despite the well advanced fall weather, the plane, saw and hammer are being used to good effect in the construction of homes, the volume of which, according to local building men, means a good business this late in the season.

The gauge of local building, the number of permits issued for new work, shows up well according to City Commissioner of Building Ed C. Kerth. The number of permits issued for new homes in the city, for November is encouraging, involving construction costs of about $74,000. Of the total $177,000 in building permits issued for this month, so far, the remaining $103,000 is for factory building, store, warehouse construction and repair work.

At this stage of the month it is believed that the November record will equal that of the corresponding month of last year. The uncertain weather of October had a depressing effect on local building, but this month activities became more brisk.

In addition to the home building and larger structural effort there has been considerable alteration, addition and repair work.

# FT. WAYNE

## COLD WEATHER FAILS TO STOP LOCAL BUILDING

### Good Volume Underway and Prospects Promising

Fort Wayne, each succeeding winter season, gives evidence of closer attention to the advantages of carrying on construction work throughout the cold months.

In this it is keepink pace with other live cities throughout the country.

Work is going forward on the North Side high school; the Cal-Wayne building, at Calhoun and Wayne, covered with great stretches of canvass to exclude the cold, is creeping upward story by story and presents much the same appearance as did the Keenan hotel during the winter of its construction. The great number of buildings, the construction of which has just been started in Fort Wayne will be enlarged by many others, including the $250,000 plate shop and welding building of the Western Gas Construction company and a factory building of the General Electric company. Work on one of the large buildings of the International Harvester company is under way at the present time. During the cold months, quite a number of fine residences will be built, among them a $30,000 home for Mr. and Mrs. Edward Morris, on Rudisill boulevard, and another of similar cost for Mr. and Mrs. Robert Leary, on Forest Park boulevard.

# HAMMOND

## UNUSUALLY ATTRACTIVE GATHERING OF BUILDERS AT CHICAGO

### Representative Building Contractors of the Nation Present

As a meeting of interest to contractors the one recently held at the Congress Hotel, Chicago, by the National Building Trades Employers Association exceeded

the general run of such gatherings. It was well worth going miles to attend and the large numbers of builders from large cities all over the country who were in attendance were well repaid for their effort to get there.

A fine program had been arranged and everything was kept moving at a lively rate making for a snappy, well regulated, order that never permitted of a draggy moment. It was quite in contrast to the customary nature of such gatherings and reflected great credit on the association that was behind the affair.

The papers read and the discussions indulged in were to the point and full of live substance that should prove of benefit to any contractor who was privileged to be an auditor. Particularly interesting were the reports regarding the building conditions around the country and those relating to the labor situation.

All the visiting builders who attended the meeting were the guests of the Building Construction Empolyers' Association of Chicago, at a delightful luncheon served in the Balloon Room at the Congress Hotel.

## HAMMOND BUILDING JOTTINGS

Architects Buckley and Skidmore awarded the contract for the Williams & Brennan auto laundry building at State and Sibley Sts., to Chas. E. Swardon of Roseland, Ill., at $33,000. This laundry will be equiped with a belt conveyor same as the Ford plant that will take the auto through the laundry and bring it out completely washed and dried in 20 minutes.

H. P. Downey & Son, road builders, are building a one story brick warehouse and shop, 50x155, at Calumet and Kenwood Ave.

Wainwright-Vaughn & Co., architects, are preparing plans for a two story and basement brick and stone chapel and administration building, 45x70 for the Elmwood Cemetery, Hammond.

Geo. P. Pearson & Son, general contractors, have just completed remodeling the Brothers Clothing Co., place on Hohman St., at a cost of about $7,000. It is one of the finest show window fronts in the city.

Contractor Rufus Danner has just completed cutting off 26 feet from the State St., end of the Hohman Block, corner of State and Hohman Sts. This completes the widening of west State St., which is now ready for the pavement.

Two blocks of buildings on East State St., have been moved in line with the new theater building now under construction. Only a few more buildings remain to be moved to complete this improvement.

A fire Saturday morning gutted the DeLux theater on Hohman St. The interior was almost entirely destroyed, entailing a loss of from $40,000 to $50,000.

It seems that the plasterers have a rule that a certain number of coats of plastering must be applied regardless of the owners wishes. One would suppose that the man paying the bills would have the right to determine what he wants, but it don't appear so in this particular case that was called to our attention. E. E. COLE.

# Sealed Proposals

## SCHOOL HOUSE EQUIPMENT

### NOTICE TO BIDDERS.

1. Sealed bids will be received by the Trustees of the School City of Wabash, Indiana, at the City Hall in Wabash, Indiana, for the equipment of the following departments: laboratories, commercial, art, shops, music, library, window shades, gymnasium, cafeteria and kitchen, private offices, lockers, linoleum, class room and lighting fixtures.

In submitting proposals the bidder is to agree to deliver and set up said articles in the New High School, Wabash, Indiana, on or before date to be determined.

2. Bids will be received until 10 A. M., December 16, 1925, and then opened for consideration.

3. All bids will be made upon proposal blanks prepared by the School City, which blanks will be supplied upon application.

4. Proposals shall be presented in sealed envelopes which shall be plainly marked to indicate the character of work bid.

5. Where more than one Article is mentioned the bidder shall state the price of each article separatly, unless otherwise stated. The board reserves the right to accept any part of any bid at prices stated therein or reject any and all bids.

6. Where name of brands or manufacturers are given it is for the purpose of indicating quality or kind and bidders may offer articles, of equal quality or efficiency, but in so doing, must give the name or names of kind offered. The right is also reserved by the board to require samples to be submitted if practicable, for the purpose of permitting the Board, by itself or representatives, to make inspection and comparison of the Article or Articles offered and those delivered. The samples submited by the successful bidder shall remain in the possession of the Board until delivery of the goods and may be delivered or installed as part of the order.

7. For information and for plans and specifications, consult the City School's Architects and engineers, J. Edwin Kopf and Deery, 402 Indiana Pythian Building ,Indianapolis, Indiana.

Plans and specifications are also on file in the offices of the Trustees where same may be inspected.

## SCHOOL BUILDING
## NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Terre Haute, Indiana, by its Board of School Trustees, will receive sealed bids until 7:30 o'clock p. m., on December 18, 1925, at the office of said Board in the Administration Building at Terre Haute, Indiana, for erection and completion of a two story fireproof building composed of school rooms, auditorium and gymnasium, and to be located on the school property at Twenty-fifth Street and Poplar Street, Terre Haute, Indiana. The total estimated cost of such work is $675,000.

Separate bids will be received for general construction, heating, plumbing and wiring.

All bids must be submitted on forms as prescribed by the State Board of Accounts, with a non-collusion affidavit. Each bid must be accompanied by a certified check for four per cent (4%) of the amount of the bid as a guarantee that he will enter into a written contract and give surety bond if contract be awarded to him, within ten days after notification thereof. The certified check should be made payable to the School City of Terre Haute. Should said bidder fail to enter into said contract, he shall forfeit said sum to the School City of Terre Haute.

Plans and specifications of said building work are on file at the office and said Board of School Trustees, and additional plans and specifications may be obtained for individual use of bidders from said Board of School Trustees, or from Johnson, Miller, Miller and Yeager, Architects, 30 North Fifth Street, Terre Haute, Indiana. A deposit of $25.00 to the Architects shall be required to insure the return of plans and specifications.

The said Board of School Trustees reserves the right to reject any or all bids.

Dated November 16, 1925.

Schoou City of Terre Haute, Indiana.
By Lillian J. White,
President of the Board of Trustees of
School City of Terre Haute, Indiana.
Attest: William F. Mendenhall,
Secy. of the Board of Trustees of the
School City of Terre Haute, Indiana.
McNutt, Wallace, Harris & Randel, Attys.
Nov. 21st, 28th, Dec. 5th, 12th, 1925.

## COURT HOUSE REMODELING
## NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Commissioners of the County of Knox, State of Indiana will receive sealed bids at the County Auditor's Office at the Court House in the City of Vincennes in said County until one o'clock p. m., on Monday, December Twenty-first, 1925, for the Remodeling of the Knox County Court House located on the square bounded by Seventh and Eighth, Busseron and Broadway Streets in said City.

Estimated cost of said improvement $125,000.00. Plans and Specifications for the above work are now on file at the Auditor's Office and elsewhere as required by law. The work will be divided into three classes to-wit: General Contract, Heating, Plumbing and Ventilating, and Electric Wiring. Bidders may bid on any of the above classes or on the work as a whole.

Each bidder shall file his bid in a sealed envelope plainly marked with the name and address of the bidder and the class or classes of work bid upon.

Each bidder must file with his bid, certified check for 3% of the amount of the bid and his bond for the full amount of his bid with two good free holders as Surety thereon, to the ap-

proval of the undersigned Board or with Surety Bond with some good Surety Company duly authorized to do business in Knox County and to the approval of said Board which Bond shall be conditioned not only for the faithful performance of his contract if awarded to him but for the payment of all debts incurred in said work and for all other conditions required by law and such Board. Each bidder shall also file with his bid his Affidavit of Non-Collusion as required by law.

Bidders desiring to bid on all or any part of the above work may obtain plans, specifications and bid forms complying with the above requirements by application to the office of the Architect and Engineer, John B. Bayard, located at the corner of Third and Main Streets, in the city of Vincennes, Indiana.

Payments on the above work will be made on certificates issued by the Architect based on 85% of the value of the material and labor forming a part of the building and material stored on the premises which in the opinion of the Architect is properly protected from damage or loss, and the balance 30 days after the acceptance of the above work by said Commissioners. The said Board of Commissioners hereby reserve the right to reject any or all bids submitted for the above work.

Dated at Vincennes, Indiana, this 4th day of November, 1925.

Board of Commissioners of The County of Knox, in the State of Indiana:

JOHN A. ELLIOTT, Pres.,
ANTHONY HESS,
EDWARD F. BROCKSMITH.
GEO. W. DONALDSON, Auditor.

Nov. 7, 14, 21, 28, Dec. 5, 12, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given, that the School City of Terre Haute, Indiana by its Board of School Trustees, will receive sealed bids until 7 o'clock P. M. on December 7, 1925, at the office of said Board in the Administration Building at Terre Haute, Indiana, for remodeling and erection of basement and two story additions of reinforced concrete construction to the Booker T. Washington School, located at Thirteenth Street and Franklin Street, Terre Haute, Indiana. The total estimated cost of such building work is $88,000.00

Separate bids will be received for general construction work and for the installation of heating and plumbing systems.

All bids must be submitted on forms as prescribed by the State Board of Accounts, with a non-collusion affidavit. Each bid must be accompanied by a certified check of four per cent (4%) of the amount of the bid as a guarantee that he will enter into a written contract and give surety bond, if contract be awarded to him, within ten days after notification thereof. The certified check should be made payable to the School City of Terre Haute. Should said bidder fail to enter into said contract, he shall forfeit said sum to the School City of Terre Haute.

Plans and specifications of said building work are on file at the office of said Board of School Trustees, and additional plans and specifications may be obtained for individual use of bidders from said Board of School Trustees, or from Johnson, Miller, Miller and Yeager, Architects, 30 North Fifth Street, Terre Haute, Indiana.

The said Board of School Trustees reserves the right to reject any or all bids.

Dated November 5th, 1925.

## JURISDICTIONAL AWARDS BOARD HELD TO BE A BENEFICIAL INFLUENCE IN THE NATIONAL BUILDING CONSTRUCTION FIELD

### Its Power However Is Swayed By the Way Those a Party to It Abide By Their Gentlemen's Agreement

WITH an attendance of nearly one hundred the National Board of Jurisdictional Awards opened a special conference at Washington, D. C., recently. The chairman announced that the purpose of the conference was to take stock as it were and ascertain the sentiment of those elements who were signatory to the plan. what effect it had upon the building industry and what if any objection there was to the work that the Board was performing.

He stated that there were many rumors to the effect that the Board contemplated ceasing to function and the recent decision in Ohio on the metal trim decision had apparently created a feeling that the decisions of the Board were illegal and naturally had a discouraging effect upon the minds of many who were in favor of the plan and wanted to see it continue as an instrument of good for the building industry.

The chairman pointed out that the Board was a voluntary one, created by mutual agreement among the parties forming it and that its decisions were not binding upon any one who was not a party to it, directly or indirectly except those affiliated with organizations parties to the plan.

Secretary of Labor Davis addressed the conference and in his remarks clearly emphasized the importance of a Board of this kind. He prefaced his remarks with the declaration that he was familiar with the origin of the Board which he had found in the records of his department when John B. Lennon had started out in 1918 to promote the Board. He said that he was also conversant with the actions of the Board, knew of the good work it had accomplished, had a general idea of the progress it had made upon construction work by its decisions and was very much in favor of it, its necessity to the building interests, the contractor, owner and workmen and urged its continuance as an instrument for the stabilizating of conditions in the building industry.

Secretary Davis cited conditions before the Board was formed, the difficulty of adjusting trade disputes, the losses of both time and money to all interested, and the confidence a body like the Board of Awards instilled in the minds of the building public. He stated it was a necessary adjunct to organized labor in the building industry and must be fostered for the good of organized labor and the building industry in general.

Following Secretary Davis, General R. C. Marshall, Jr., of the Associated General Contractors of America addressed the conference. He was followed by A. E. Coleman, President of the National Association of Building Trades Employers, both of whom represented organizations who were signatory to the plan of the Board and were represented by membership upon the Board. Speaking for the contractors both stated that their respective organizations believed that the Board was doing a great deal of good and compared conditions in construction work before the Board was organized and at the present time.

President Green of the American Federation of Labor addressed the conference and made an interesting talk upon the subject of organized labor. President Hedrick of the Building Trades Department of the American Federation of Labor also expressed his views upon the subject, stating that the Board has been a great instrument for peace in the industry. Following these gentlemen, a number of international presidents addressed the meeting. The most outstanding talk was made by John J. Hynes of the Sheet Metal Workers. He was emphatic in his declaration that a wonderful service had been given the building industry by the Board that his organization wanted it to continue to carry on until all strife had been eliminated on work throughout the country. He stated that as his belief that should the Board for any reason cease to function and not be supported by organized labor and the other interests affiliated with it, that it would be a calamity, that it would go back into the old rut of "chaos" and that it would be many years before a similar body would be organized.

## NOMINATIONS FOR APPOINTMENT TO ADVISORY COMMITTEE OF STATE BUILDING COUNCIL SUBMITTED TO GOVERNOR FOR APPROVAL

### Four Men Named

The names of the nominees for appointment to the advisory committee of the Administrative Building Council have been submitted to Governor Ed Jackson for approval, since the terms of four of the present incumbents expire January 1.

The state building council law provides that the advisory committee be composed of members recommended by the building trade organizations. The names of Robert Frost Daggett, Indianapolis architect, nominated by the Indiana Society of Architects for reappointment; Joseph G. Hayes, Indianapolis, nominated by the Associated Building Contractors to succeed Max Irmscher, Ft. Wayne; Charles W. Kern, Indianapolis, nominated by the State Building Trades Council to succeed himself and W. K. Eldridge, Indianapolis, nominated to succeed Clifford Shopbell by the Indiana Engineering Society.

## INDIANAPOLIS ARCHITECTS ASSOCIATION MEMBERS HAVE A MERRY TIME

### To Meet Again December 9 For Annual Election

Those Indianapolis architects who failed to respond to the invitation to be present at the six P. M. dinner gathering at the Athenaeum, November 25, the affair marking a resumption of the regular monthly meetings of the Indianapolis Architects Association, missed a jolly social time during which the moments sped all too fast and it was near midnight before anyone realized it.

Last spring interest lagged in the meetings and it was decided to call them off thru the summer period and early fall. However, now that the cold weather has arrived, President Kurt Vonnegut decided to get the members together once more to consider the advisability of continuing the city architects association. To that end the meeting was called last week.

A delicious dinner was served in a private dining room, the best to the recollection of the writer, who has attended these functions for several years. There was a warm spirit of fellowship on tap, which went far to lend to the joviality of the evening.

It was strictly informal with no speaker or other special features for a program and the discussions that were indulged in were more or less personal and interesting from an architectural standpoint. The subjects were not deep and complex, rather they had to do with those things pertaining to regular everyday practice, problems and conditions.

Finally the topic of future meetings came up and it was held that the social value of them meant too much to the local profession to allow them to go by default. It was unanimously agreed that every effort shou'd be made to continue the meetings and stir up a renewed interest in them. Various forms of programs were gone into from which evolved a scheme that seemed to meet with general approval. It was thought best to dispense with an attempt to secure special speakers for the present, and, instead substitute a plan for round-table discussions. The idea would be to appoint a special chairman each month to lead the discussion, who would be permitted to select and present his own subject which might deal with some current event of particular interest, architectural matters, building conditions, various phases of art or most anything that would arouse enthusiasm and make the meetings generally attractive.

Another meeting is to be held next Wednesday, December 9, in all probability at the Athenaeum again. Special interest attaches to this affair in that at that time the annual election of officers for the ensuing year will be held.

As a wind-up to the November 25th meeting the architects found their way into the bowling alleys where their sporting blood was aroused and a series of games was proposed. When Otto Mueller stepped forth to disport some immaculately white bowling shoes he was dubbed a ringer and was brazen enough to substantiate the charge by outc'assing all those present and leading his White Team to a double victory over the Blacks.

And the contests, they were hilarious affairs. The boys did manage to cease laughing long enough now and then to deliver the ball and each effort thus directed brought forth peels and billows of more laughter. The foresight of the Scherrer brothers who moved the spectators' benches back was just in time for "Bert" Foltz became so eager in his quest for pins he let the ball get away from him to fly backward toward the crowd. Following that episode Foltz was given all the room possible for future activities. Kurt Vonnegut, toward the end, was forced to rest each time after carrying the ball from the rack to the deck. He swears the fellows kept switching heavier balls for his use. No prizes to date have been received from the American Bowling Congress for any high scores posted. One attendant at the Athenaeum was heard to remark: "As bowlers those fellows are all good architects."

## LEBRUN TRAVELING SCHOLARSHIP COMPETITION YEAR 1926

### Preliminary Announcement

The Executive Committee of the New York Chapter of the American Institute of Architects, as Trustees of the Traveling Scholarship, founded by Pierre L. Le Brun, announces a competition for the selection of a beneficiary. The programme will be issued about December 30th, 1925, calling for drawings to be delivered about March 2nd, 1926.

The following excerpts from the Deed of Gift explain the award and conditions:

"Fourteen hundred dollars * * * is to be awarded, * * * , to some deserving and meritorious architect or architectural draughtsman, resident anywhere in the United States, to aid him in paying the expenses of an European trip, lasting not less than six months."

"The selection of the beneficiary of the Scholarship is to be by means of a competition * * * and the drawings called for * * * are to be submitted for examination and judgment to a jury consisting of at least three practicing architects, no one of whom is to be connected with any school or atelier for the teaching of architecture. In making the award the jury is to give a full and careful consideration to the records of qualification filed by the competitors as well as to the comparative excellence of the drawings submitted."

"Any architect or architectural draughtsman, a citizen and resident of the United States, not under twenty-three or over thirty years of age, who shall, for at least three years, have been either engaged in active practice, or employed as an architectural draughtsman and who is not and has not been the beneficiary of any other travelling scholarship, shall be eligible to compete."

"Every competitor must be nominated by a member of the American Institute of Architects who shall certify in writing that the above conditions are fulfilled, and that in his opinion the competitor is deserving of the scholarship. No member of the Institute shall nominate more than one (1) candidate."

"Every competitor must engage to remain, if successful, at least six months abroad and to devote well and truly that length of time to travel and the study of architecture otherwise than by entering any school or atelier or attending lectures, it being intended that the benefit derived from this traveling scholarship shall supplement school or office experience."

"The successful competitor shall write from time to time, but not less than once every two months, to the New York Chapter of the American Institute of Architects, giving an account of the employment of his time."

All those wishing to enter the competition should arrange at once for nomination by a member of the American Institute of Architects. Nomination blanks can be had of the Secretary of any Chapter, A. I. A., or of the Le Brun Scholarship Committee. Nominations should be sent, so as to be received before January 1st, 1926, to Le Brun Scholarship Committee, Room 1618, 19 West 44th Street, New York.

JULIAN CLARENCE LEVI,
Chairman.

ORGANIZATION AND CURRENT NEWS

## BUILDING LABOR WAGES NOW HIGHEST IN THE HISTORY OF THE CONSTRUCTION INDUSTRY

### No Hope For Revisions Downward Indicated

According to a survey of the labor situation in the building field it would appear as if there was to be a determined effort on the part of organized labor to maintain present wage scales and working conditions, giving little or no prospect for any general downward revision of wages next season. This is the conclusion reached by the research bureau of G. L. Miller & Co., New York, bui ding construction financiers.

The survey was based largely on data gathered at the convention of the Building Trades Department of the American Federation of Labor of Atlantic City, N. J., at which 860,000 organized building craftsmen of the country were represented.

Building labor conditions were summarized as follows:

(1) Wage scales now highest in history of building industry and still higher rates appear in prospect for some localities.

(2) Building crafts plan to maintain wages and working conditions attained during building prosperity period.

(3) Labor is fairly tranquil and little interference to building operations from strikes and lockouts expected during the next few months.

(4) Labor officials condemn interunion strife and lay plans to eliminate as far as possible jurisdictional strikes.

(5) Sentiment for shorter work day growing but campaign for five-day week appears to have been indefinitely postponed.

(6) Building unions urge strict fulfillment of contracts but declare for elimination of anti-strike and anti-sympathy strike clauses in agreements.

(7) Settlement of long-standing jurisdictional fight between Bricklayers and Plasterers Unions gives impetus to building activity.

"Organized building workers believe that the present prosperity in the building industry will continue indefinitely," the survey states, "and have decided to employ their full strength in maintaining present wages which are the highest ever paid in the history of the industry.

"Reports and statements by the leaders of organized labor in the Building Trades convention indicated that they were unanimously determined to oppose any attempt to reduce wages at this time. To this end it was decided to strengthen the building unions by renewing efforts to unionize the entire construction industry.

"Labor officials indicated that they would also continue striving for higher wages, but mainly devote their efforts toward getting an upward revision of wage scales in some of the smaller cities, where building craftsmen receive somewhat less than the maximum wages prevailing in the larger centers."

Thus one is left to judge for himself the attitude Labor will assume when it meets with the contractors the coming winter and spring to negotiate new wage scales. To all intents and purposes at this time everything points to a continuation of high construction costs on the labor side for 1926.

## GETTING RESULTS

### Effort to Induce Year Around Building Seems to Be Accomplishing the End Desired

The building season is gradually being lengthened as the result of a drive undertaken by the Construction Industries in co-operation with the Department of Commerce. This fact has been established through a survey made by the Division of Building and Housing of the Department at the direction of Secretary Hoover to determine what results were being obtained. Reports from contractors in sixteen large cities show that payrolls and material purchases were relatively larger in the winter months of 1924 than in those of 1923. The 1923 figures in turn showed an increase over 1922. Payrolls and material bills are measures of building activity which follow actual work very closely.

The large number of contractors who answered the Department's inquiry gave figures showing for each month the percentage of the year's total. Practically all replies had the same trend, making an average fair statement of conditions as given. Changes in general business conditions and a difference in the weather undoubtedly had some share in the result. But making allowance for such factors, a distinct improvement in the relative amount of winter building is apparent.

There are already favorable indications for the coming winter. The figures of the past few months for contracts awarded for all classes of construction have proved to be the highest ever known. Many of the operations represented by these contracts will undoubtedly be carried over into the cold weather.

All groups in the building industry are trying earnestly to bring about a more equal distribution of work throughout the year. Their efforts are bringing results. More and more people are becoming convinced that winter construction is both practical and economical. The growth of this belief is certain to result in steadier employment and more efficient construction service.

## HOUSING ESSAY PRIZES

### Better Homes for Brain-workers Worldwide Movement

In an effort to encourage better housing for intellectual workers, the International Federation of Building and Public Works with headquarters at 17 Avenue Carnot, Paris, France, announces the organization of an international essay competition for which Willard Reed Messenger, of New York has offered $1,000 in prizes. The first prize will be $500; the second prize $300; the third prize $200.

Participants should submit their papers typed in French or English not exceeding four to five thousand words

which may be accompanied by sketches, not later than January 15th, and prizes will be awarded the following month.

Papers should include the four following divisions, states the official announcement just issued from Paris:

1st. Administrative or legislative measures for facilitating the construction of houses intended for the middle classes or intellectual workers.

2nd. Financial policy,—loans, amortization, etc.

3rd. New construction methods intended to reduce the cost of building, together with sketches.

4th. Conclusions.

The data submitted and sketches must bear some legend or pseudonym and be sent with an enclosed plain, sealed envelope bearing only the legend on the outside and containing enclosed the name, address and profession of the competitor, which will be opened only after the winners have been selected by the Jury of Judges.

The Jury will include at least two American members, three members will be named by the International Federation and three by the French National Federation, and three members named jointly by these two organizations. The Jury will choose its own president.

# LAFAYETTE

## LOCAL A. B. C. ELECTS NEW OFFICERS

### Association Quietly Sticking to the Job and Doing Its Bit to Encourage Building

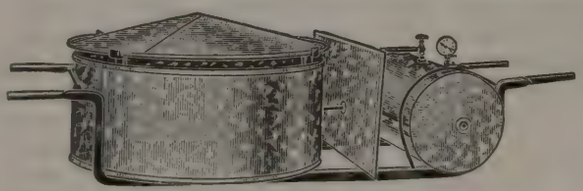
While not making much noise the Associated Building Contractors of Lafayette are riding along smoothly, sticking to the saddle, and keeping in close touch with conditions in their territory. The membership has held together well and is working at all times to encourage conditions that will protect and further the interests of the local building industry.

Though Purdue University carried thru a most successful and interesting State Builders Conference recently at Lafayette the A. B. C. of that city, as an organization, did all in its power to co-operate in the affair to make it a memorable event, the membership appreciating the coming to Lafayette of representative builders from all corners of Indiana.

At a meeting a few days ago these officers were elected for the ensuing year: S. H. Bylsma, President; August Fischer, Vice-President; G. C. Goodhart, Secretary and Treasurer. These men will assume office the first of the year.

# EVANSVILLE

## MONTH'S BUILDING SHOWS A SLIGHT INCREASE



### November Outstrips October

Increase in the amount of building for November is indicated in the statistical report for the month just compiled by Commissioner Edward C. Kerth. The total for the month of November, $229,141, is approximately $7,000 above the amount for October.

The increase is in decided contrast to the customary falling off in building activities at this time of year, Kerth said. The only indication of this tendency is to be seen in the lowering of the average price of residences from $3,500 to $2,950 and the decrease in electrical and plumbing jobs by approximately one-half.

Large industrial building projects had

Work Straight Thru the Winter

Reynolds Portable Furnaces

*What Large Contractors Says*

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron. architects, engineers and contractors praise it highly.

a prominent part in the record for the last month. Among the large buildings started were Holt and Brandon Ice company plant, value $30,000; Ohio Valley Roofing company plant $58,000; F. V. Cadick warehouse, $5,000; and Crescent City Coal company building, $10,000.

## FT. WAYNE

### LAST FOUR YEARS DEVELOPS THE GREATEST BUILDING ACTIVITY IN THE CITY'S HISTORY

**Tripling of Previous Quadrennial Record Is What Has Been Accomplished**

That the great reduction made in the city tax rates during the last four years and also the vast amount of public improvements made by the city during the same period has in part been the incentive for the erection of homes and business and institutional structures is evidenced by figures in the offce of Herman Korte, city building inspector, which show that the total estimate of the building done during the last four years more than triples the estimate for the preceding four years. In each of two years of the present administration the building estimate was several hundred thousand dollars greater than that of the entire previous four years.

The estimate of the building done in Fort Wayne during the past three years and eight months is $42,838,675 while that for 1918, 1919, 1920 and 1921 totals only $10,871,608. The greatest total for one year in the present term was in 1923, when the work was estimated at $11,853,643. The highest for any one year of the previous term was $4,799,750.

Many persons have been attracted here from other cities while others, who had never owned a home, built new dwellings with the result that many public and intsitutional buildings followed.

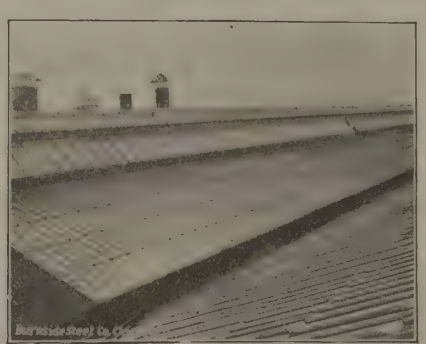
The record for the present year has not been itemized but the figures for the past three years show that 315 store buildings have been erected as compared with the 52 of the previous quadrennial and permits have been issued for 4,749 residences during the present term as compared with 1,850 of the preceding term.

## HAMMOND

### LOOKS LIKE PAINTERS ARE FIXING TO INJECT A LITTLE REVERSE ENGLISH.

**Preparing To Demand That All Glazing Be Done On the Premises.**

If the local painters have their way the high cost of construction is due for another boost along about March 1st.



With things going along nicely and folks getting the impression that labor costs in 1926 would run about on a par with those of 1925 since none of the crafts had so far shown an inclination to tilt them it remained for the painters to take the initiative and that is what they are about to do.

This craft has decided that January 1st notification is to be sent to the bosses informing them that after sixty days from that date all sash will have to be glazed on the premises of the job

where they are to be used. The painters are well aware of the fact that such procedure will add more cost to the glazing, in fact about double, and they also know that the work can't be done as efficiently on the job as in a shop or mill but those things don't mean anything to the painters, except that it will throw more work their way. They also know that it would be much more convenient for the contractor to get his sash delivered glazed and thus prevent delays, but, again that don't interest the painter who controls glazing and is set on having a big say as to where it is to be done and thus create more employment for "the boys."

The contractors, lumber yards and mills are very much opposed to the new proposition and are voicing a loud protest, it remains to be seen if they will do more than just squawk. If the above three interests will organize their opposition and bring pressure to bear upon the painting contractors this uncalled for and purely selfish action on the part of the craftsmen should be nipped in the bud.

The General Contractors Council has called a meeting for December 7, and invited the planing mill and lumber yard owners to send in representatives to talk the matter over.

### HAMMOND BUILDING JOTTINGS

Berry & Co., architects, have the revised plans for the remodeling and addition to the Emanuel Lutheran Church on Sibley street, ready for contractors to figure.

---

The Building & Realty Service Corp. is erecting a two-story brick and tile factory building, 160 ft. by 160 ft. with a one-story 90 ft. L south of 21st avenue, near the Little Calumet River for the Indiana Herb Gardens. The estimated cost is $40,000.

---

Contractor J. H. McClay has the Lake County Times building on Fayette street under roof. A call around the architects' offices didn't yield much encouraging information relative to winter building. There is considerable talk of building but not many plans are being drawn.

---

Anderson & Windell, who have the contract for the Northern States Life Insurance Bldg., have the foundation work about completed.

---

The cold weather has put quite a crimp in building. The mercury registered 14 degrees above zero Saturday morning.

E. E. COLE.

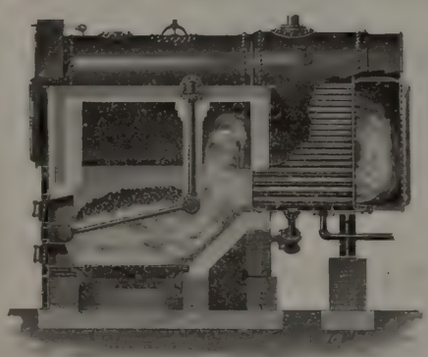
## INDIANAPOLIS

### BEST BUILDING MONTH SINCE JUNE.

Notwithstanding the fact that the 1925 building season has run on into the late fall and is right on the threshold of winter, building operations have kept right on, and the volume of new construction work approved by the city building inspection department during the month of November was the greatest monthly total recorded since June.

Last month's total estimated valuation on new work for which permits were granted ran 10.43% ahead of the same item posted for the corresponding period in 1924, and was 103.19% in excess of the October 1925, figures.

An analytical classifications of the new work approved in November shows the following:



| | | |
|---|---|---|
| Add's and Repairs | 628 | $ 313,950 |
| Business Bldgs. | 12 | 1,175,600 |
| Industrial Bldgs. | 3 | 132,000 |
| Miscel'aneous | 154 | 50,015 |
| Public Bldgs. | 6 | 401,000 |
| Residences | 97 | 628,942 |
| Total | 900 | $2,701,507 |

# Sealed Proposals

## SCHOOL HOUSE

### NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received until the hour of 10 A. M., December 28, 1925, for the construction of the superstructure of St. Phillip Neri Roman Catholic Parochial School, Rev. Father George J. Smith, 550 N. Rural St., Indianapolis, Ind.

Also bids are to be received at the same time for the installation of heating, ventilating, plumbing, sewerage and electric wiring, all in accordance with drawings, plans and specifications, prepared by Henkel and Hanson, architects and engineers, Connersville, Ind., and Bevington and Williams, heating and plumbing engineers, 523-25 Indiana Pythian Bldg., Indianapolis, Ind.

Plans can be secured from the architects by depositing $25.00, same to be refunded upon the safe return of the plans and specifications.

Each general bid must be accompanied by a certified check of not less than $1,000.00. Other bids shall be accompanied by a similar check of not less than $300.00. Checks of unsuccessful bidders will be returned.

Estimated cost, $90,000.

## SCHOOL HOUSE

### NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received to January 2, 1926, for the general construction of St. Gabriel's Roman Catholic Parochial School, Rev. Father T. S. Mesker, 232 W. Ninth street, Connersville, Ind.

Also bids are to be received at the same time for the installation of heating ventilating, plumbing and electric wiring, all in accordance with the drawings, plans and specifications prepared by Henkel & Hanson, architects and engineers, Connersville, Ind., and Bevington & Williams, 523-25 Indiana Pythian Bldg., Indianapolis, Ind., heating and plumbing engineers.

Plans can be secured from the architects by depositing $25.00, same to be refunded upon the safe return of the plans and specifications.

Each general bid must be accompanied by a certified check of not less than $1,000. Other bids shall be accompanied by a similar check of not less than $300. Checks of unsuccessful bidders will be returned.

Estimated cost, $100,000.

## COURT HOUSE REMODELING

### NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Commissioners of the County of Knox, State of Indiana will receive sealed bids at the County Auditor's Office at the Court House in the City of Vincennes in said County until one o'clock p. m., on Monday, December Twenty-first, 1925, for the Remodeling of the Knox County Court House located on the square bounded by Seventh and Eighth, Busseron and Broadway Streets in said City.

Estimated cost of said improvement $125,000.00. Plans and Specifications for the above work are

now on file at the Auditor's Office and elsewhere as required by law. The work will be divided into three classes to-wit: General Contract, Heating, Plumbing and Ventilating, and Electric Wiring. Bidders may bid on any of the above classes or on the work as a whole.

Each bidder shall file his bid in a sealed envelope plainly marked with the name and address of the bidder and the class or classes of work bid upon.

Each bidder must file with his bid, certified check for 3% of the amount of the bid and his bond for the full amount of his bid with two good free holders as Surety thereon, to the approval of the undersigned Board or with Surety Bond with some good Surety Company duly authorized to do business in Knox County and to the approval of said Board which Bond shall be conditioned not only for the faithful performance of his contract if awarded to him but for the payment of all debts incurred in said work and for all other conditions required by law and such Board. Each bidder shall also file with his bid his Affidavit of Non-Collusion as required by law.

Bidders desiring to bid on all or any part of the above work may obtain plans, specifications and bid forms complying with the above requirements by application to the office of the Architect and Engineer, John B. Bayard, located at the corner of Third and Main Streets, in the city of Vincennes, Indiana.

Payments on the above work will be made on certificates issued by the Architect based on 85% of the value of the material and labor forming a part of the building and material stored on the premises which in the opinion of the Architect is properly protected from damage or loss, and the balance 30 days after the acceptance of the above work by said Commissioners. The said Board of Commissioners hereby reserve the right to reject any or all bids submitted for the above work.

Dated at Vincennes, Indiana, this 4th day of November, 1925.

Board of Commissioners of The County of Knox, in the State of Indiana:

JOHN A. ELLIOTT, Pres.,
ANTHONY HESS,
EDWARD F. BROCKSMITH.
GEO. W. DONALDSON, Auditor.

Nov. 7, 14, 21, 28, Dec. 5, 12, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Terre Haute, Indiana, by its Board of School Trustees, will receive sealed bids until 7:30 o'clock p. m., on December 18, 1925, at the office of said Board in the Administration Building at Terre Haute, Indiana, for erection and completion of a two story fireproof building composed of school rooms, auditorium and gymnasium, and to be located on the school property at Twenty-fifth Street and Poplar Street, Terre Haute, Indiana. The total estimated cost of such work is $675,000.

Separate bids will be received for general construction, heating, plumbing and wiring.

All bids must be submitted on forms as prescribed by the State Board of Accounts, with a non-collusion affidavit. Each bid must be accompanied by a certified check for four per cent (4%) of the amount of the bid as a guarantee that he will enter into a written contract and give surety bond if contract be awarded to him, within ten days after notification thereof. The certified check should be made payable to the Johnson, Miller, Miller and Yeager, Architects, 30 North Fifth Street, Terre Haute, Indiana. A School City of Terre Haute. Should said bidder fail to enter into said contract, he shall forfeit said sum to the School City of Terre Haute.

Plans and specifications of said building work are on file at the office and said Board of School Trustees, and additional plans and specifications may be obtained for individual use of bidders from said Board of School Trustees, or from deposit of $25.00 to the Architects shall be required to insure the return of plans and specifications.

The said Board of School Trustees reserves the right to reject any or all bids.

Dated November 16, 1925.

Schoou City of Terre Haute, Indiana.
By Lillian J. White,
President of the Board of Trustees of
School City of Terre Haute, Indiana.
Attest: William F. Mendenhall,
Secy. of the Board of Trustees of the
School City of Terre Haute, Indiana.

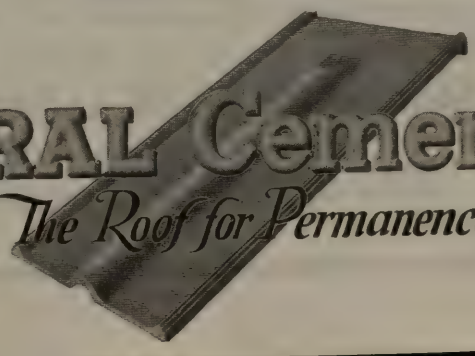
# "Roof Permanence"



## —the result of Federal Service

ONLY by years of study of roof requirements have modern Federal roofs been made possible. The service which emanates from broad experience embracing every conceivable roof problem marks Federal roofs unmistakably as superior. That indefinable something which comes from knowing, which goes into Federal Cement Tile along with the aggregate, which is erected into the finished roof structure and which finds expression through prolonged roof-like is what distinguishes Federal roofs from the ordinary.

Federal service is Federal experience. It is freely available to architects, contractors and owners for aid in the best handling of specific matters pertaining to roofs. Aside from all the intrinsic qualities of Federal Cement Tile, the service which accompanies it entitles it to special consideration.

## MEETING OF DISTINCT INTEREST HELD BY INDIANAPOLIS ARCHITECTS

### Kurt Vonnegut Again to Head Local Architects Association, All Other Officers Re-elected

A new interest apparently has been aroused in the Indianapolis Architects Association as was evidenced by the turn-out of the members of the profession at the regular monthly meeting and the annual election Wednesday night, Dec. 9, at the Athenaeum, the attendance being one of the best of the whole year. There was a snappy enthusiasm about the whole affair resulting in discussions that were extremely pertinent to the profession and practice, bringing out various individual ideas for an interchange of constructive suggestions that should start the Indianapolis architects to thinking and in time develop moves that should prove mutually beneficial in a more or less degree to all members of the local profession.

The customary dinner at six-thirty o'clock, formed a delightful preliminary to the program for the evening and was enjoyed by a fine representative delegation of city architectural profession.

As the big feature of the affair came the annual election which resulted in an entire re-election of the current administration no opposition being offered. The officers who will continue in office are: President, Kurt Vonnegut, Vice-President, Wm. H. Eldridge, Secy. Treas., Clarence Myers, Directors, August Bohlen and Robert Frost Daggett.

### New Scheme of Procedure to Be Followed This Year

It will be the aim of the administration during the coming year to make the I. A. A. monthly meetings especially attractive to the membership by inaugurating some new orders in the program scheme by instituting discussions with a definite plan back of them, for instance, the appointment of a committee or a speaker to propose its own subject and assume the leadership on same. Freedom will be given those in charge to select any topic they may think worthy of consideration, deal with what it may, with the idea that when all is said and done those in attendance may depart feeling that the evening has been worth while. It is the intention not to make these discussions trite and dry along technical lines, rather to infuse into them a bright, attractive, practical vein that will make for illuminating diversion.

### City Building Commissioner Talks On Revamped Building Code

In view of the fact that the new Indianapolis Building Code recently passed by the city council is attracting much attention from the building fraternity at present Francis F. Hamilton, Building Commissioner, who was a guest of the association Wednesday night, spoke on the new document stressing upon various new features of the code, remarks that were particularly interesting to the architects and were well received. Especially did he refer to the new provision that would place all electrical inspection under the supervision of the city building inspection department rather than in the province of the Indiana Inspection Bureau a body maintained and sponsored by fire underwriters. Many of the architects were of the opinion that the building commissioner is right in his attitude and that the work should be handled by the city building inspection department.

### Endorse Removal of Churches From War Memorial Site

And then again, another subject that is current in Indianapolis these days and is stirring up much action amongst civic bodies who have the interest of the city at heart, the one dealing with whether the two churches on the Indiana War Memorial site should be removed to allow for the proper execution of the Memorial Plaza scheme, was gone into at length by the assembled architects. It was the concensus of opinion that since millions of dollars are being spent on this project which will be a thing of magnificent beauty when completed it is but meet that the churches be removed and that the county commissioners carry through the scheme to buy the church properties. It was unanimously agreed that the architects association lend its support to the move that will secure the removal of the church edifices from the plaza site and at the same time recompense the two congregations for their properties.

### Architects Take Stock On Their Position In Home Building Field

Attention was next directed by chance to the recent completion of an ideal home scheme whereby five artistic homes, each of a different style of architecture, Spanish, Italian, French, English and Colonial, were constructed along fire-resistive methods in a local suburban district, and Ed Pierre of the architectural firm of Pierre and Wright, who designed and supervised the houses volunteered some interesting information concerning the entire project. This eventually led around to home construction debate which brought to the fore the architects' position in this field.

Present home building methods and practices that fail of architectural merit and service, a trend that is resulting in more or less inferior structures, with prospective owners paying dearly for their houses, and holding the bag, as it were, were discussed in detail and caused the architects to focus their attention on the position in which the architect finds himself placed today in the home building field. He has lost ground in that field it was admitted and it is a situation he must acknowledge and face.

### Must Do Something to Inpress the Value of Good Building Construction

It is now up to the architects as a profession to bring to the attention of the public the value of good construction; it must be done somehow in some way that the architects themselves must work out, though at this time the channel or channels to be followed are extremely vague. It was felt that al-

In addition to increasing the surplus during 1924 the Company has returned excess premiums to the amount of $172,837.54

## ARE YOU GETTING YOURS?

though the architect may have lost out, still, he stands in a good way to "come-back" because of the "grief" that much of the stock plan and hurriedly built houses will bring to the owners through faulty and skimpy construction. And the more the architects can do now to stress upon architectural service in the way of design, plans, specifications and supervision making for better construction, and impressing that upon the public, the better off every one will be, the owner, the architect, the contractor and the community at large, especially the owner as he will get full value for his money and the community will profit immeasurably from the beauty and permanency of its new homes. This is one of the architect's greatest problems, how to reach the ninety per cent of the population who build homes, the other ten per cent takes care of itself and goes to the architect for its buildings, its churches, schools, commercial and industrial structures, but the home owner don't know, he don't appreciate or realize the chance he takes when he builds. He wouldn't take his savings and gamble on some other proposition, but, because he don't realize the chance he takes in building, he will take his little pile, his all, and even more, and gamble on a prospective home.

It is things such as this of a constructive nature to which the association expects to devote its attention this year, but in this effort the architects must co-operate and lend their ideas and support; the way to do that is to attend the monthly meetings and enter into the spirit of the gatherings, it is in that way only that the association may become aggressive and give back to the individual member that something that he expects.

A good start was made Wednesday night all it needs now is impetus. The next meeting is to be held Wednesday, Jan. 6, for which a good program, at this early date, is in prospect.

## ANNUAL ARCHITECTURAL EXHIBIT PLANS NOW IN THE MAKING

### Final Success Depends Solely Upon the Interest the Members of the Profession Are Willing to Put Into It

The question that confronts the Exhibit and Pageants Committee of the Indiana Society of Architects right now is, "Will the Indiana architect make the Annual Architectural Exhibit a success?"

This committee is more than eager to make the Indiana architectural display this year an excellent and praiseworthy affair and is working hard to that end, but it will be all to no avail if the architects individually fail to aid in the matter. The entire profession of Indiana must get back of this move, enter the spirit of the thing, take a pride in it and submit displays, otherwise, the exhibit will fall short of its purpose.

Here is an opportunity at the disposal of Indiana architects to center attention of the public on the profession and give to said public a concrete evidence both in plans and photos of executed work just what is involved in architectural service. Further, a recognized art gallery, the John Herron Art Institute, Indianapolis, has thrown open its doors and placed at the disposal of the Indiana architects, gratis, the use of its galleries for the exhibit, an environment and atmosphere of dignity and refinement. It is an opportunity not to be overlooked or discounted and every architect should feel a pride in it and also an urge to do his utmost to make a success of the venture.

In addition to the architectural features there will be exhibits of the allied arts associated with building which will greatly increase the scope of the whole exhibition.

Already reservations have been made for some exceedingly interesting studies and it is time now for the architects to give some definite thought to preliminaries that will go toward exhibits that will reflect creditably upon the state profession.

## ORGANIZATION AND CURRENT NEWS

## COMMENCEMENT EXERCISES HELD FOR APPRENTICE TRAINING STUDENTS

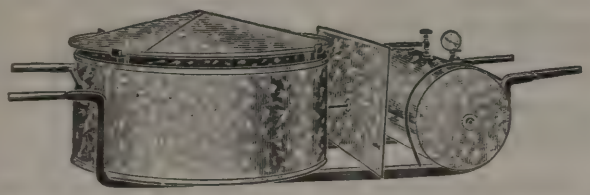
### Cleveland, Ohio Scene of Unusual Graduation Ceremonies

The second commencement exercises of the Cleveland Building Trades Apprentice School were held on Wednesday evening, December 2nd, in the auditorium of the East Technical High School, Cleveland, Ohio, at which time approximately 100 apprentices in five building trades—bricklaying, carpentry, plumbing, painting and electrical—were given diplomas in recognition of their completion of a prescribed course of study involving practical as well as theoretical work.

**Large Crowd Present**

An audience of about 2000 people, consisting not only of friends and relatives of the graduates, but also of many visitors from other states, leaders in industry, labor and education, officers of national and local contractor associations, international, state and local labor organizations and civic groups attended. A considerable number of delegates to the convention of the National Society for Vocational Education were present.

The speakers of the evening were: Wm. R. Hopkins, City Manager of Cleveland; Frank Cushman of Washington, Chief, Industrial Education service, Federal Board for Vocational Education; James J. Hoban of Cleveland, President of the Cleveland Typographical Union; Oscar W. Rosenthal of Chicago, President of the Chicago Builders' Association and Director of the National Association of Building Trades Employers; J. C. Wright of Washington, Director, Federal Board for Vocational Education; and E. L. Heusch of Columbus, Ohio, Supervisor of Trades and Industries, Division of Education, State Board for Vocational Education.



**Superintendent of Schools Presides**

R. G. Jones, Superintendent of Cleveland Public Schools acted as Chairman; the invocation was asked by the Rev. L. C. Wright, Fraternal Delegate of the Federated Churches to the Cleveland Federation of Labor; and E. L. Heusch presented the diplomas.

Addressing the graduates in an interesting manner, Mr. Hopkins said that no great civilization was possible without a large body of people who can

# Your life is in your own hands!

YOU have often noticed that even the most robust of your acquaintances have been stricken by tuberculosis. The dread disease is everywhere. No one is immune. The germs scattered by one careless case of consumption can infect a whole community.

There is only one sure escape. That is to stamp out the dread disease entirely. It can be done. The organized work carried on by the tuberculosis crusade has cut the tuberculosis death rate in half.

You can help in this great work. You can protect your life, and the lives of your family and friends. Buy Christmas Seals. The sale of Christmas Seals provides the funds to wage this increasingly successful war upon tuberculosis.

Let your every Christmas parcel, letter, and greeting card carry these cheery little messengers of health to all the world, Christmas Seals.

*Stamp Out Tuberculosis with this Christmas Seal*

THE NATIONAL, STATE, AND LOCAL TUBERCULOSIS ASSOCIATIONS OF THE UNITED STATES

work with their hands, and that the trade schools were inaugurating a new era in education.

Mr. Cushman in a splendid speech spoke of the commencement as being significant in two respects—it indicated the interest of Cleveland in the great problem of apprenticeship and also marked another milestone in our progress as a nation dealing with this problem. He pointed out that while local assumption of responsibility by a joint representative committee is essential to success in this work, it is at the same time a state and national problem. Commenting on the value of craft training, he marked that one with a trade has something which he can market; he has special knowledge and skill which he has made part of his personal equipment.

### U. S. Secretary of Labor Commends Effort

Hon. James J. Davis who was unable to be present, was represented by J. C. Wright, who read the paper of Secretary Davis. Mr. Davis congratulated the contractors, labor representatives, architects, and officials of the state and city schools upon their efforts along the line of trade training in Cleveland, and stated that the policy of giving the youth of the land the advantages of at least a high school education and a trade, which he had advocated for years, was being carried out in Cleveland. He was convinced that the theory and practice taught in the Cleveland Building Trades Apprentice School, combined with the discipline and orderly training secured, developed in the student the best that was in him, and at the same time created within him the aspiration and ambition to continue his education and training until he is in fact a "master workman." He showed that those who acquire a trade will become more useful members of society, as technically trained and educated workmen they will need but little supervision and will find greater opportunities for advancement.

### Other Speakers

James J. Hoban speaking in place of Matthew Woll, Fifth Vice-President of the American Federation of Labor, who at the last moment was unable to come, proved by history that great educational movements had been started by workers in the past, pointed out the value of technically trained men in the building trades in elevating standards of work and beautifying the city, admonished the graduates to do nothing that would injure their trade, to give a fair day's work for a fair day's pay, and to respect their calling, their employers, themselves and their country.

O. W. Rosenthal, a man of national reputation as a public speaker and an authority on building, delivered a very interesting address. To him the commencement was significant in that it represented a splendid spirit of co-operation between employers, labor organizations, the local board of education, the city, state and nation. He pointed out that the march of industry goes on, only as construction goes on. He laid down three fundamental considerations in the choice of a vocation:

1. The necessity for gaining a livelihood.
2. The opportunity for advancement, and
3. The opportunity to serve society.

He urged the graduates entering the construction industry to love their work and to hold as their motto the idea of service for their fellowmen and an interest in their work as a permanent contribution to society.

### RECORD NATIONAL BUILDING VOLUME PREDICTED FOR 1925

**Every Indication That Former High Record Will Be Surpassed**

This year's building program in the United States will reach the seven billion dollar mark, a figure that would break all existing records, according to a prediction made at the second day's session of the American Construction council's meeting at Chicago.

And while this forecast for the nation's building construction volume was being made the citizen's committee to enforce the Landis award announced that Chicago building permits for 1925 to date have exceeded those issued for the entire year of 1923, the city's greatest year.

Fred W. Armstrong, general manager of the citizen's committee, said that in 1923 the valuation of the permits was placed at $329,656,000. Those issued for this year to date amounted to $331,266,289. Armstrong predicted the total valuation of the 1925 permits for the city would reach $375,000,000.

Harry Wheeler, president of the Union Trust company and vice president of the council, asserted there is no industry in the country with so much economic importance as building.

It was announced that manufacturers of building materials and associations co-operating with the American Construction council will spend $8,000,000 next year in a national movement for better building of homes.

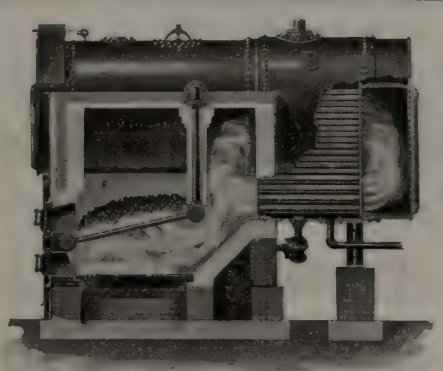
## HAMMOND

### LOCAL CONTRACTORS INCLINED TO OPPOSE GLAZING DEMAND OF PAINTERS

**Opposition Growing**

The threat of the painters union to institute steps after January 1, whereby they will insist on all glazing of sash being executed on the premises of the individual building operation has caused quite a flurry in the Calumet District. There is a rapidly growing feeling of opposition to the proposed innovation which, if put through, would add to the cost of the structure and also tend to cause delays in the completion of the project. The contention on the part of the opposition to the painters is that the planing mills are in a much better position to handle the glazing as has been the custom, thus facilitating the operation, and also that better work can be done where the sash is made than if the work of glazing is transfered to the premises of the building project.

A meeting of the General Contractors Council was held at Hammond Monday, December 7, at which the situation was thoroughly gone into in an effort to get a line on the real conditions that might develop from the proposed action of the painters.



Another meeting is to be held on December 14, by the Building Trades Employers' Association which is to be of a general nature to which all contractors and members of the organization are invited. The idea of this session is to formulate plans to meet this new issue as the feeling of the contractors is that the new order must be combatted if the building prospects of 1926 are to be preserved. It is the belief of contractors that the building industry is in no shape to have any more burden heaped upon it in the way of additional production

costs and they take it that this move of the painters is just such a burden.

Following these meetings it will better be known just what action the contractors propose to take.

## BIG STEEL MILL IMPROVEMENTS NEAR COMPLETION

### Seven Million Dollars Building Program Adds to Calumet District Volume

Various units of the Inland Steel $7,000,000 construction program are nearing early completion, and work on other units has progressed as rapidly as expected.

The new $1,000,000 blast furnace at Plant Two is almost finished at this time. About two months more are required by plant engineers to complete the project. The furnace when placed in operation will be one of the largest in the world and will greatly increase blast furnace production in this district.

One unit of the expansion program has already been finished and placed in operation. This is the new No. 6 ore bridge at the unloading wharves near the new blast furnace.

Other expansion projects which are well under way include the complete electricfication of Plant One, the construction of 74 additional Kopper By-Products coke oven, and the erection of a new tar manufacturing plant.

## NEW CITY BUILDING INSPECTOR APPOINTED

### Charles Dowdell to Succeed Henry Vis

The new city administration of Hammond has decided on a change in the building inspection department and to that end has named Charles Dowdell as chief building inspector who will assume his new duties Jan. 1.

Mr. Dowdell who was a member of the local carpenters union will succeed Henry Vis who has been chief inspector for the past eight years and raised the department to a highly efficient basis and passed upon a great volume of building that marked the greatest construction period in the history of the city.

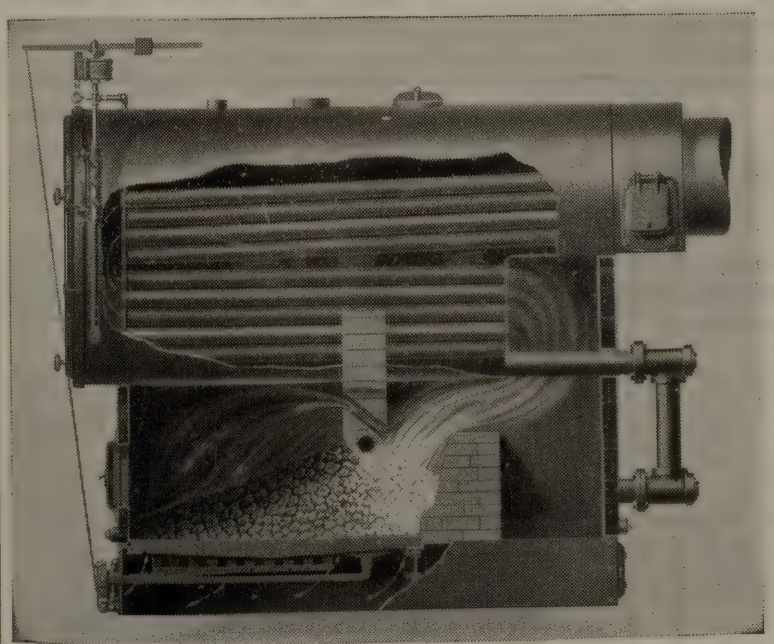
## HAMMOND BUILDING JOTTINGS

Witter Bros. are building a two story and basement brick store and office building, 25x75, for Edward Fitzgerald, at 142 Plummer Ave.

Architect Mac Turner is preparing plans for a two story brick building, 60x80 on Indianapolis Blvd. There will be three store rooms on the ground floor, and three four-room apartments on the second floor.

He is also making plans for a one story and basement brick building, 40x100 to be occupied as a restaurant at 106th and State Line st. The structure is for C. P. Rudezy.

The same architect is getting out plans for Mr. Short, a one story and basement brick garage building, 95x110 on North Columbia Ave.



Buckley and Skidmore, architects, are preparing plans for Nagel and Stoltz, Blue Island, Ill., for a one story and basement brick office building, 32x44.

They also have plans for a two story frame office building, 35x190, for the Paige-Jones Chemical Co., Marble St.

Jos. A. Scott is building a one and a half, 8 room, brick bungalow on Indianapolis blvd., Robertsdale.

# Sealed Proposals

### ELECTRIC LIGHT FIXTURES NOTICE TO CONTRACTORS

Notice is hereby given that T. R. Winemiller, Township Trustee, and the Advisory Board of Busseron Township, Knox County, Indiana will receive sealed proposals until one-thirty o'clock p. m. Monday December 21st, at the new High School building now being erected at Oaktown, Knox County, Indiana, for the furnishing complete of the electric light fixtures and erecting them in place, including the fixtures and all lights and glassware, and connecting to the main supply or feed wire, with the necessary independent bid for supply switch connection, for the Township High School building at Oaktown, Indiana.

Independent bids on each different light or kind of fixture are requested.

A certified check of 5% must accompany each proposal as evidence of good faith.

The envelope containing the proposal must be plainly marked: "Proposal for electric light fixtures."

The right is reserved to reject any or all bids.

Floor plans, if necessary, will be furnished by J. W. Gaddis, Architect, Vincennes, Indiana.

T. R. WINEMILLER,
Township Trustee, Emison, Ind.
Busseron Township, Knox County, Indiana.

December 12th, 1925.

### COURT HOUSE REMODELING NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Board of Commissioners of the County of Knox, State of Indiana will receive sealed bids at the County Auditor's Office at the Court House in the City of Vincennes in said County until one o'clock p. m., on Monday, December Twenty-first, 1925, for the Remodeling of the Knox County Court House located on the square bounded by Seventh and Eighth, Busseron and Broadway Streets in said City.

Estimated cost of said improvement $125,000.00. Plans and Specifications for the above work are

now on file at the Auditor's Office and elsewhere as required by law. The work will be divided into three classes to-wit: General Contract, Heating, Plumbing and Ventilating, and Electric Wiring. Bidders may bid on any of the above classes or on the work as a whole.

Each bidder shall file his bid in a sealed envelope plainly marked with the name and address of the bidder and the class or classes of work bid upon.

Each bidder must file with his bid, certified check for 3% of the amount of the bid and his bond for the full amount of his bid with two good free holders as Surety thereon, to the approval of the undersigned Board or with Surety Bond with some good Surety Company duly authorized to do business in Knox County and to the approval of said Board which Bond shall be conditioned not only for the faithful performance of his contract if awarded to him but for the payment of all debts incurred in said work and for all other conditions required by law and such Board. Each bidder shall also file with his bid his Affidavit of Non-Collusion as required by law.

Bidders desiring to bid on all or any part of the above work may obtain plans, specifications and bid forms complying with the above requirements by application to the office of the Architect and Engineer, John B. Bayard, located at the corner of Third and Main Streets, in the city of Vincennes, Indiana.

Payments on the above work will be made on certificates issued by the Architect based on 85% of the value of the material and labor forming a part of the building and material stored on the premises which in the opinion of the Architect is properly protected from damage or loss, and the balance 30 days after the acceptance of the above work by said Commissioners. The said Board of Commissioners hereby reserve the right to reject any or all bids submitted for the above work.

Dated at Vincennes, Indiana, this 4th day of November, 1925.

Board of Commissioners of The County of Knox, in the State of Indiana:

JOHN A. ELLIOTT, Pres.,
ANTHONY HESS,
EDWARD F. BROCKSMITH.
GEO. W. DONALDSON, Auditor.

Nov. 7, 14, 21, 28, Dec. 5, 12, 1925.

### SCHOOL BUILDING
### NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Terre Haute, Indiana, by its Board of School Trustees, will receive sealed bids until 7:30 o'clock p. m., on December 18, 1925, at the office of said Board in the Administration Building at Terre Haute, Indiana, for erection and completion of a two story fireproof building composed of school rooms, auditorium and gymnasium, and to be located on the school property at Twenty-fifth Street and Poplar Street, Terre Haute, Indiana. The total estimated cost of such work is $675,000.

Separate bids will be received for general construction, heating, plumbing and wiring.

All bids must be submitted on forms as prescribed by the State Board of Accounts, with a non-collusion affidavit. Each bid must be accompanied by a certified check for four per cent (4%) of the amount of the bid as a guarantee that he will enter into a written contract and give surety bond if contract be awarded to him, within ten days after notification thereof. The certified check should be made payable to the Johnson, Miller, Miller and Yeager, Architects, 30 North Fifth Street, Terre Haute, Indiana. A School City of Terre Haute. Should said bidder fail to enter into said contract, he shall forfeit said sum to the School City of Terre Haute.

Plans and specifications of said building work are on file at the office and said Board of School Trustees, and additional plans and specifications may be obtained for individual use of bidders from said Board of School Trustees, or from deposit of $25.00 to the Architects shall be required to insure the return of plans and specifications.

The said Board of School Trustees reserves the right to reject any or all bids.

Dated November 16, 1925.

## "B60" Series Hot Blast Smokeless Boiler

Patent Pending

Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum Number of B. T. U.'s. Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers.

PROX HOT BLAST SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 800 sq. ft. to 25,000 sq. ft. steam

# INDIANA CONSTRUCTION RECORDER

FOR ARCHITECT ENGINEER

Devoted to the Interests of the Indiana Construction and Engineering Industry

FOR SUPPLYMAN CONTRACTOR

VOL. VII INDIANAPOLIS, INDIANA, DECEMBER 19, 1925 No. 38

## PEOPLE MUST LEARN ABOUT CONSTRUCTION

### Quality and Workmanship of the Best Result of this Knowledge

The reason most people do not get entirely satisfactory service in home building is this: They don't know good construction and design from inferior construction and design; therefore they are not in a position to insist upon the best. This fact is brought out in the semi-annual statement of the American Construction council which states that although 1925 has been a record-breaking year in volume of building construction for most sections of the country, the first 10 months of the year already exceeding the total of 1924, there is still a definite scarcity of suitable houses for persons of average means. The statement calls attention to the fact that the large volume of residential construction has not yet met the country's real housing need.

City residential construction has been largely of higher priced apartment hotels and apartments of a speculative nature, and while suburban home developments of the colony type have been very active they have too frequently been high in price or very inferior in quality.

#### Planning Need Stressed

The general situation as to housing, however, is such as to call attention forcibly again to the great need for proper planning, sounder financing and better construction of homes, a condition which the council has repeatedly pointed out and already done much to remedy through its nationwide campaign for better building.

Through this movement for better building started by the council several years ago, representatives of all the component parts of the construction industry, from investor, owner or tenant to builder and mechanic, are engaged in one of the most notable co-operative endeavors of a great industry ever witnessed in modern business to deal with its relations to the public.

The council states that these efforts are receiving the hearty co-operation of the leading branches of the construction industry, some of which, following its suggestion, have already taken up the problem for careful analysis and treatment from their respective angles. In the last analysis, however, the remedying of conditions demands that the pub-

(Continued on page 11)

## BETTER THAN FIVE MILLIONS OF DOLLARS WORTH OF BUILDING TURNED IN BY INDIANA'S LEADING CITIES IN NOVEMBER

### This Surpasses Record of the Corresponding Period Last Year But Trails Total For October 1925

Taken as a whole and comparing it with the volume transacted last year the building business put across in eleven Indiana cities in November this season shows a 16.76% gain over that for the corresponding period in 1924. This information is secured from the official figures submitted by the building inspectors of those cities where an accurate tab is kept on local building operations, and gives a general idea of the trend of construction work.

There were but 2,044 permits granted in November this year as against 2,397 in the same localities during the corresponding month in 1924, which would indicate a slackening of activities, but the estimated valuations on the projects approved ran much higher in some instances thus giving to this November a most creditable showing. It was the big gains in volume at Indianapolis and South Bend that boosted things to the right side of the ledger though both Elkhart and Evansville also added to the improvement recorded. Those four cities showed an aggregate gain of $1,587,005 over the business of a year ago which offset the $803,724 loss developed in the other seven cities thus making for a gain of $783,724 over the November 1924 total estimated valuation on work for which permits were issued.

However, despite this record there seems to have been somewhat of a slackening up in building work last month from that of October this season, when the permits and valuations ran up to 3,200 and $7,342,460 respectively while in November the same items registered 2,044 permits and $5,457,221 a decline in permits of 1,156 and a 16.76% loss in valuation.

In the matter of gain Elkhart with 305% topped the list to be followed in order by these cities, South Bend, 87.9%, Indianapolis, 66.9%, Evansville, 2.9%. As for losses they ran thus, Muncie, 6.28%, Hammond, 17.7%, Kokomo, 28%, Terre Haute, 28%, Ft. Wayne, 34.7%, Gary, 47.7%, Richmond, 48.7%.

The figures as sent in by the building inspectors were:

| City | 1925 Per | 1925 Est. Val. | 1924 Per | 1924 Est. Val. |
|---|---|---|---|---|
| Elkhart | 42 | $ 64,100 | 7 | $ 15,800 |
| Evansville | 184 | 229,141 | 174 | 222,542 |
| Ft. Wayne | 114 | 450,615 | 191 | 690,330 |
| Gary | 143 | 415,160 | 132 | 794,732 |
| Hammond | 92 | 374,620 | 107 | 454,078 |
| Indianapolis | 900 | 2,701,507 | 1,179 | 1,619,137 |
| Kokomo | 29 | 83,105 | 44 | 115,843 |
| Muncie | 62 | 44,130 | 44 | 47,090 |
| Richmond | 35 | 30,805 | 35 | 60,060 |
| South Bend | 353 | 961,660 | 350 | 511,924 |
| Terre Haute | 90 | 102,378 | 134 | 141,961 |
| Total | 2,044 | $5,457,221 | 2,397 | $4,673,497 |

## NEW PLAN EVOLVED IN EFFORT TO ASSURE STATE WIDE REPRESENTATION AT ANNUAL ARCHITECTURAL EXHIBIT

### State Subdivided and District Chairmen Appointed

If scheming, planning and a definite line of action will serve to arouse interest in and bring forth displays for the annual architectural exhibit of the Indiana Society of Architects to be held at the John Herron Art Institute, Indianapolis, during the month of February, then the success of the venture is assured.

This year a new plan of procedure has been worked out by Architect E. D. Pierre, Indianapolis, chairman of the Exhibits and Pageant Committee, who is more than eager to have the annual exhibit this season outshine all previous similar affairs and to that end he would have all sections of the state represented. Just how to reach all the state architects in such a way as to expedite matters, assure no confusion nor loss of time was the problem. Finally, Mr. Pierre decided to divide the state into districts and place a chairman at the head of each district whose duty it will be to solicit the architects in his section to submit exhibits.

These various chairmen have been advised to get in touch with Architect Pierre, 1134 Hume-Mansur Bldg., Indianapolis, at once for details so that they can secure details and get busy with the architects in their allotted sections.

The method of district organization and the chairmen appointed as mapped out by Mr. Pierre is as follows:

**District No. 1**—Chairman, G. W. Allen, 721 Main St., Laporte: Lake, Porter, Laporte, Starke, Pulaski, Jasper and Newton Counties.

**District No. 2**—Chairman, E. R. Austin, care of Austin and Shambleau, 111 N. Lafayette St., South Bend: St. Joseph, Elkhart, Marshall, Kosiusko and Fulton Counties.

**District No. 3**—Chairman, Guy Mahurin, Standard Bldg., Ft. Wayne: Lagrange, Steuben, Noble, DeKalb, Whitley, Allen, Miami, Wabash, Huntington, Wells and Adams Counties.

**District No. 4**—Chairman, Walter Scholer, 301 Painters and Decorators Building, Lafayette: Benton, White, Cass, Carroll, Warren, Tippecanoe, Fountain and Montgomery Counties.

**District No. 5**—Chairman, E. D. Pierre, 1133 Hume-Mansur Bldg., Indianapolis: Howard, Grant, Clinton, Tipton, Madison, Boone, Hamilton, Hendricks, Marion, Hancock, Morgan, Johnson and Shelby Counties.

**District No. 6**—Chairman, C. E. Werking and Son, Paladium Bldg., Richmond: Blackford, Jay, Delaware, Randolph, Henry and Wayne Counties.

**District No. 7**—Chairman, Warren Miller, 30 N. 5th St., Terre Haute: Vermillion, Parke, Putnam, Vigo, Clay, Owen, Sullivan and Greene Counties.

**District No. 8**—Chairman, Alfred Grindle, Bloomington: Monroe Brown, and Bartholomew Counties.

**District No. 9**—Chairman, Karl P. Henkel, 108 Heineman Bldg., Connersville: Rush, Fayette, Union, Decatur, Franklin, Jennings, Ripley, Dearborn, Jefferson, Switzerland and Ohio Counties.

**District No. 10**—Chairman, O. L. Hill, Box 274, Bedford: Martin, Lawrence, Jackson, Orange, Washington, Scott, Crawford, Harrison, Floyd, Clarke and Perry Counties.

**District No. 11**—Chairman, Harry E. Boyle & Co., 405 Furniture Bldg., Evansville: Knox, Daviess, Gibson, Pike, Dubois, Posey, Vanderburg, Warrick and Spencer Counties.

## MORE SIMPLIFICATION

### Effort Directed to Sidewalk and Roof Glass

At a conference of building interests, technical representatives and manufacturers of glass sidewalk and roof lights, held at Washington, D. C., under the auspices of the Division of Simplified Practice, Department of Commerce, action was taken to have six sizes, two shapes and five styles replace 80 styles, 120 sizes and 10 shapes previously made in this commodity. The action will become effective March 1, 1926, but in the meantime various makers of these commodities will put the program into effect as rapidly as possible.

The meeting brought together representatives of the American Ceramics Society, National Association of Building Owners and Managers, American Railway Engineering Association, American Electric Railway Association, American Institute of Architects, and of building and safe walk code committees. E. W. Ely of the diviison who presided, read a score or more of letters from other associations who were in accord with the proposed reductions, but who were unable to have representatives present.

Davis Carpenter of Davis Carpenter & Co., New York City, chairman of the simplification committee of manufacturers, presented the program which represents an average reduction of 90 per cent.

LeRoy Kern, technical secretary of the American Institute of Architects, New York City, raised several questions from the viewpoint of the architect, to clarify the matter of thickness of glass, and of the supporting edges, and as to surfaces. These were answered by explaining that the industry is seeking in its standardization program, to provide ease of replacement. It was explained further that the policy of manufacturers has changed in the last three or four years, from one of producing something "different" to a policy of providing sizes and stocks which would permit interchangeability with a minimum of time and effort. There still exists a demand for some of the old sizes, which must be carried for maintenance until the old equipment has worn out.

Three sizes adopted, it was stated, will meet 90 per cent of today's demand; and the spacing of glass has been developed in a manner which will give the greatest strength without breaking.

ORGANIZATION AND CURRENT NEWS

### PEOPLE MUST LEARN

(Continued from page 5)

lic of the country, assisted by the intelligent leadership of the industry as a whole, must learn the essentials of right construction and then insist that they be put into practice.

**Winter Work Increases**

Present indications point toward an increasing demand for industrial buildings and replacement or alteration of out-of-date buildings of commercial and other types. Building activity has been generally pronounced in outlying districts as well as in the large centers, a tendency which is continuing. Work contracted for and contemplated for winter schedule is much greater than usual this time of the year, showing the growing belief of the public in winter work when it is properly conducted.

Labor productivity has increased and thus helped to reduce actual costs, and the stabilizing influence of this condition, if maintained, will be very helpful for the future. Material prices also have continued relatively stable as a whole. Money for building purposes has been readily available in most localities.

These facts point toward continued stability in volume of operations for the industry as a whole, and the council urges that all new work possible for the winter season should be undertaken and carried to completion so as to avoid a spring congetion.

The public should be doubly cautious, however, as to the character of construction it accepts for its money. With the gradual overcoming of the post-war shortage and passing of temporary building booms in some localities the return to normal consideration of building values will make structures of inferior quality an increasingly heavy liability. There are evidences in some few localities, that the element of caution is already curtailing speculative operations.

## HAMMOND

### ALMOST LIKE THE ROBIN

**Wage Agitations Harbingers That Make One Think of Spring**

"If winter comes, can spring be far behind?"

Any contractor will tell you no, for even if he had somehow overlooked the rotating of the seasons, winter, in sneaking up on him, would bring its avalanche of wage scale readjustment agitations, and when they come he knows winter is at hand and spring is not far behind.

And that is the very fix in which the Calumet contractor finds himself today. The cold, off-bubilding season is upon him and even now, before the first of the year, he is starting his preliminary training for his spell of wrestling with the wage scales for the 1926-1927 season.

Just last week, on December 11, the General Contractors Central Council of the Calumet District held a special meeting at Hammond to confer on wage matters with representatives of the Carpenters District Council and also delegates from the Hod Carriers Union.

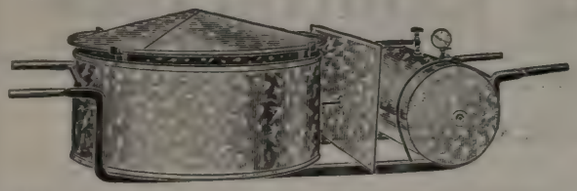
The carpenters appeared to be satisfied with the way things had been going and simply presented a request that the current working agreement and hourly wage scale be renewed for the new building season starting in the spring.

However, when it came time for the hod carriers to have their say a different atmosphere and light enveloped the setting. They got it into their heads that the stage was theirs and were prepared "to trod the boards" in a full burst of spot-light. Primed for a big argument to back up their modest demand for a thirty-five per cent increase in wages next season they sought to strut their stuff. But the contractors shut off the flow of oratory and rang down the curtain by informing the H. C.'s committee that the demand would be taken under advisement, passed along to the various city associations for consideration and an answer would be rendered at another meeting to be called later.

Though no official action was taken on this latter demand, private opinions expressed indicated that it was considered unreasonable and that if the men who shoulder the hod are expecting much to mature from their submitted proposal they are in a good way to be disappointed.

### DECIDE TO THUMB DOWN DEMAND OF PAINTERS ON GLAZING OPERATIONS

**Contractors, Mill Men and Lumber Take Definite Stand**



The general contractors, planing mill men and lumber dealers at a recent meeting held to consider the new demand of painters, that all glazing after the first of the year be done on the premises of the individual building project for which intended, decided not to submit to any such proposal and a notice has been issued to all Hammond painting and glazing contractors advising them against signing up any working agreements on the proposed basis. It was further advanced that no general contractors would be bound by, nor would they conceed to such a demand.

### FATE OF PROPOSED COUNTY CONTRACTORS ORGANIZATION HANGS IN THE BALANCE

**Veil Enshrouds Effort**

Information at Hammond relative to the proposed Central County Contractors Association for Lake County is to the effect that those sponsoring the move are still at work on the proposition but details as to the progress being made is lacking. Several meetings have been held to encourage the organization but so far it has not come into being. There is considerable divergence of opinion regarding this proposition and time alone will be able to settle the question one way or the other.

## Work Straight Thru the Winter

### Reynolds Portable Furnaces

*What Large Contractors Says*

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron. architects, engineers and contractors praise it highly.

### PREPARING FOR ANNUAL CONVENTION AT NASHVILLE, TENNESSEE

**Local Masons Expect to Send a Large Delegation to the Southern City**

Indianapolis mason contractors are looking forward with anticipation to an event just a month hence, at which time the annual convention of the Mason Contractors Association of the United States and Canada will be held at the Andrew Jackson Hotel, Nashville, Tenn.

That affair is the big one on the masons' calendar and each year the Indianapolis association arranges to send all its members who may desire to attend, in fact, every one of them is urged to make the trip, to drop his business cares for the time being and hob-nob with his brother masons from all sections of the country and even all parts of Canada.

Secretary Walter McGarvey, Cincinnati, Ohio, has announced the convention dates in the southern city as January 18, 19 and 20 and advises that plans arranged provide for a fine meet both from a business and social standpoint.

One of the main topics for discussion will be the suggested five-day week as proposed by certain branches of the building trades affiliated with Organized Labor and since it is a matter of vital importance to the building industry it will be debated fully by the international masons association and a definite stand taken either for or against.

It is admitted that the past year's experience has not been of the best for some of the local associations and an effort will be made at the convention to evolve constructive plans that will tend to aid in greater uplift for the masons and their industry and also be conducive

### CITY'S BUILDING BUSINESS THIS SEASON RUNNING AHEAD OF THAT OF LAST YEAR

**Over Twenty-Four Millions of Dollars Put Into New Construction Work**

Two big monthly gains in Indianapolis for October and November over the corresponding periods in 1924 sent the building construction volume of business for the first eleven months of the current year over and above the figures posted during the same period last year.

This season's total estimated valuation on new work for which permits were granted up to December 1, amounts to $24,548,494 as against $24,281,719 for the corresponding span of time a year ago, a gain of $303,175. In view of the fact that there were 504 less permits granted from January 1 to December 1, 1925, than in the first eleven months last year the Indianapolis record so far this season is very creditable and if December can but hold its own in building during the waning of the year the 1925 performance for the twelve months will stack up well with those of previous seasons.

The monthly totals as compiled by the city building inspector are as follows:

| | 1925 | 1924 |
|---|---|---|
| January | $ 964,526 | $ 1,012,221 |
| February | 1,905,578 | 2,354,162 |
| March | 2,454,598 | 2,213,313 |
| April | 2,817,231 | 2,492,173 |
| May | 2,047,741 | 1,965,741 |

## LAFAYETTE

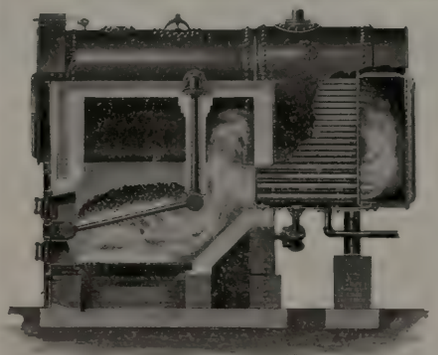
### UNUSUAL MEETING OF LOCAL BUILDERS HELD

**Lafayette Experiment Proves Highly Successful**

There is a widespread movement throughout the country to encourage and build up a good will spirit amongst all citizens and, while not connected with that move though breathing of the same spirit, a meeting along that line, unique in local history, was recently held at Lafayette, Ind., under the auspices of the local Building Trades Council.

From the nature of the affair one is led to the conclusion that it is an aftermath of the big State Builders Conference held at Purdue University the latter part of October. Craftsmen, contractors, architects, enginers made up the bulk of those present at the affair which was held in the large reception room at the Painters and Decorators Building. The motive behind this gathering had for its purpose the creation of more understandable and amicable relationships between all those engaged in the execution of building construction.

There was a heartening display of good fellowship manifested throughout the evening to make the dawn of a new era in local building circles a dawn that augurs well for the future of the industry.



An appetizing dinner opened the evening's event and was followed by a

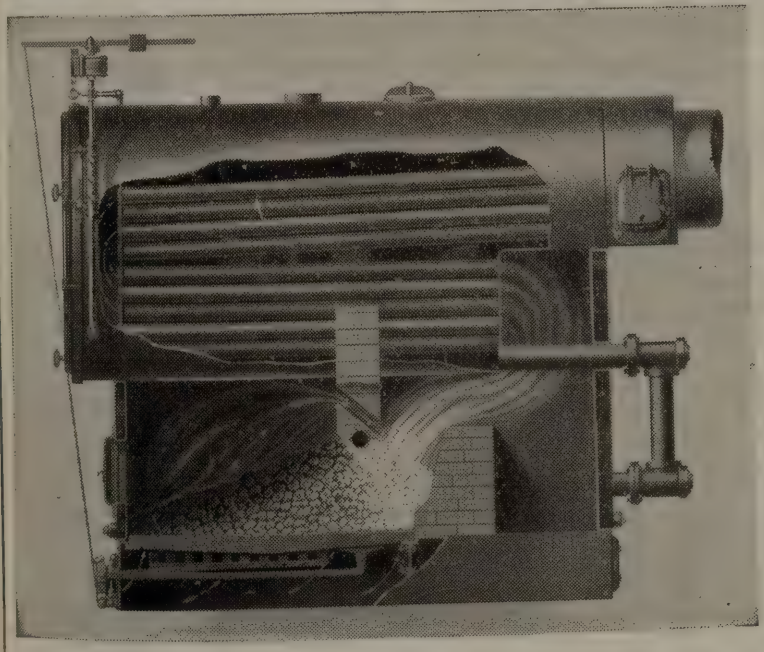
number of addresses and a general round table discussion.

Charles Kern, Indianapolis, president of the Indiana Building Trades Council, emphasized the growing feeling of harmony that is now prevalent between employers and employes in the building field and the sincere effort that those representative of the contractural element and also those of the crafts are putting forward in an endeavor to reach a plane where they all can get together and thresh things out in a spirit of fairness and justice to all concerned.

Another speaker was Dean Stanley Coulter who called attention to the merits of collective bargaining and stressed upon the respect that such methods are now commanding as against the former antipathy that formerly held sway.



And then for the contractor's interest, in the effort to effect co-operation between the employers and the crafts, A. E. Kemmer asserted he and all the members of the Associated Building Contractors of Lafayette had long ago come to realize the value of such action and stood ready at all times to endorse it and promote its furtherance as the one great means to eliminate friction, strife, delays and thus speed up productive operation.

Such toleration and reason as is now being employed both by the employer and the employe in the building industry when misunderstandings arise, said Louis Hart, business representative of the Lafayette Building Trades Council, has successfully removed much hard feeling and been the agency through which aggravating difficulties have been ironed out.

It is just such meetings of a nature as the one indulged in at Lafayette, asserted Charles J. Lambert, Secretary-Treasurer of the Brotherhood of Painters, Decorators and Paperhangers, that create a favorable impression not only upon the participants but also upon the public. These affairs demonstrate that all is not selfishness and that there are men who are actually willing to be fair, who desiré to facilitate business matters in a business way.

The gathering was especially favored by the presence of President Edward C. Elliott of Purdue University, who, accompanied by his father, Fred Elliott, North Platte, Neb., was enthusiastically welcomed. President Elliot who has shown a decided interest in the building construction industry, stressed upon favorable consideration of the employe who in return for that consideration should give an honest day's work for an honest day's pay. Honest and sincere workmanship, he insisted, is the crying need of the country, not pay.

PACIFIC

PACIFIC BOILERS are built in all sizes from two hundred to twenty-five thousand square feet, are strictly A. S. M. E. Code, and come completely assembled with the grates and fire brick arches in place.

# *for* SCHOOLS *and* COLLEGES

EDUCATION itself is typified by the permanent character of the modern structures which house institutions of learning. The outstanding responsibility of every community today is the provision of adequate, attractive and permanent school and university buildings. More and more architects, builders, boards of education and educators generally have come to give due importance to roofs. The result is that a steadily increasing number of schools and colleges are being roofed with Federal Cement Tile. Why? Because there is no other roof material which will give equal service with no maintenance cost. Federal Cement Tile come to the job ready for installation on any type of flat or pitched roof or deck regardless of weather or temperature conditions. Write for complete details. Federal Cement Tile are made, laid and guaranteed by

Reynolds Portable Furnaces

*What Large Contractors Says*

"Saved us many thousands of dollars on limited time contract. Every craft working and never lost a day, even with weather below zero." — Union Labor Temple, Inc., Louisville. "One Reynolds takes the place of at least four salamanders." — L. W. Hancock, Gen'l Contractor.

ABSOLUTELY safe, easy to control, odorless, smokeless, sootless, operates without pipes or vents. Converts kerosene into gas which burns like natural gas. Produces more heat than ordinary hot air furnace in 10 or 12-room dwelling. Weighs only 183 lbs. and easily moved by two men while in operation. Constructed of steel and galvanized iron. architects, engineers and contractors praise it highly.

## SUPPORT OF ARCHITECTS THE ONE THING NEEDED MOST TO MAKE ARCHITECTURAL EXHIBIT AN ASSURED SUCCESS

### Time For Annual I. S. A. Event Narrowing Down

Are you working toward the success of the Annual Indiana Architectural Exhibit to be held at the John Herron Art Institute, Indianapolis, during the month of February?

The Exhibits and Pageants Committee of the Indiana Society of Architects is doing its utmost to perfect arrangements and arouse an interest that will assure the success of the venture, but it will take more than that, it will require the united support of the Indiana architectural profession to put the exhibit over in the way of which it is deserving.

The galleries for display purposes are assured in an environment in keeping with the nature of the enterprise, an art institute, and now it is up to the architects to furnish the exhibits needed.

It is not an individual undertaking but a collective one and affords a fine opportunity for the architects to focus public attention on their profession in an atmosphere that is dignified and artistic.

Then, too, the situation is most timely in view of the building mood that is prevalent and the fact that prospective builders will soon be turning their thoughts to action rather than allowing them to dwell merely upon contemplations.

There is no telling the psychological effect that may be brought about and the instant urge the exhibits may inspire. It is an effort well worthy of support and is bound to give to the architectural profession a publicity obtainable thru no other medium.

Just a little over a month intervenes before the time for the exhibit opening, therefore, it behooves the architects right now to begin to assemble their displays.

It is interesting to know that newspapers have taken notice of the architects' annual event and made mention of it. Further, it may interest the profession that an inquiry has been sent in from Ft. Wayne to learn if it would be possible to move the exhibit on to that city when it had run its allotted course in Indianapolis.

## WIND PRESSURE ON MODEL OF BUILDING DETERMINED BY BUREAU OF STANDARDS

### Interesting Data Secured As a Result of Unique Experiments

The average wind pressure on a tall building when the wind is blowing at 76 miles per hour (100 miles per hour, as shown by a Weather Bureau, Robinson type anemometer) is about 22 pounds per square foot, according to results obtained by the Bureau of Standards, Department of Commerce. The value which is commonly used is 30 pounds per square foot. This would correspond to a true wind speed of about 88.5 miles per hour (118 miles per hour indicated speed). Gusts of this speed have only been observed in a few cities, such as New York, and St. Paul.

These results were obtained by measuring the force of the wind on a model of a tall building mounted in the large outdoor wind tunnel of the Bureau. This tunnel is 10 feet in diameter, and in these experiments winds up to 70 miles per hour were produced, values for higher speeds being obtained by extrapolation. By means of small openings in the face and top of the model which were connected to a pressure gauge, the pressures produced by the wind at various parts of the structure were measured. These measurements were made at 70 places on the face of the model and at 49 places on the top, with the wind coming from 13 directions, varying from directly against one face to directly against the opposite face. Of course, in this work the wind always comes from one direction, and the model is turned on its mounting. The pressures obtained were then multiplied by the appropriated areas to give the total force on the model under the different conditions. The forces tending to overturn and to twist the model were also computed.

This work was undertaken because of the many inquiries received by the Bureau concerning wind pressures on Buildings. The same experimental methods were employed which have been found so useful in the investigation of air forces on airplanes.

It has always been recognized that in the design of engineering structures such as tall buildings, bridges, chimneys, transmission lines, radio masts, etc., it is necessary to make provision for the stresses produced by the pressure of high winds. However, the values of the forces produced by the wind used by engineers in structural design are based on experiments made a great many years ago by methods which are now known to be subject to large errors, and on models which do not resemble actual structures. Many engineers have felt that these old values are too large, and that many structures are made stronger than is necessary, and therefore cost more than they should.

The Bureau has determined the actual pressure corresponding to a given wind velocity. There still remains the problem of determining what wind velocity to use in designing a structure. Obviously, a higher velocity ought to be assumed in designing a building facing the lake front in Chicago than for a building in the downtown section of Washington.

# NOTHING SUCCEEDS LIKE SUCCESS

ORGANIZATION AND CURRENT NEWS

## ANOTHER SIX BILLION-DOLLAR BUILDING YEAR PREDICTED FOR 1926

### Annual Forecast By the Architectural Forum Indicates a Great Building Construction Season Lies Ahead

Each year for the past five years The Architectural Forum of New York has conducted an extensive survey among architects and builders to determine the amount of building construction contemplated for the ensuing year. The method used includes the obtaining of confidential reports from thousands of sources covering six geographical divisions of the United States in 19 building classifications. These reports are carefully tabulated and correlated and the totals determined by a careful system of weighting. Thus the final forecast figures are established after months of careful research work.

Each forum forecast during this five year period has proven to be amazingly close to the actual figures shown at the end of the year; and in all cases conservative, so that this survey has become recognized as the most authoritative presentation of probable building activity. The allocation of activity throughout the country is an almost certain indication of what will actually take place in the building industry.

**Review of 1925 Building Construction**

In view of the fact that The Forum Forecast for 1926 indicates another six billion-dollar building year, probably equal to the record-breaking activity of 1925, it will be interesting to review briefly the building activity of the year 1925 in order that later comparisons may be clear. As this article goes to press the figures for the year 1925 indicate that approximately six and one-half billion dollars were spent this year for new building construction in the United States:

At the beginning of the year 1925 all conditions indicated that this year would probably equal 1924, which established a record up to that time; but no one anticipated completely the amazing volume to which the building totals have climbed. Records were broken everywhere during 1925 as will be seen by an examination of the accompanying chart, which shows the total value and volume of new building in 1925 as compared with each year since 1920, and also indicates the trend of building costs, commodity costs and real estate transfers in the United States.

Everyone connected with or interested in the building construction industry knows of the phenomenal activity which was apparent during the year 1925. Owing to the limitations of space it is not possible to present here the full details of last year's activity but the great interest of the building fraternity today is expressed in the question "What will occur in 1926?"

**Probable Building Total For 1926**

Classified according to nineteen types of structures and divided into six geographical divisions of the United States, the anticipated expenditure for new buildings shows the amazing total of $5,584,782,500, which will pass over the boards of architects and into actual construction during the year 1926. In addition to this vast sum to be spent for building materials and labor there must be considered the fact that in the small house field and that of industrial construction there is considerable building not developed from architects' plans, probably totaling another half-billion dollars.

Thus it is predicted that 1926 will be another six billion-dollar building year with certain changes in the relative proportion of activity in building types and districts as explained in the following paragraphs and tables.

**Changes in Public Demand For New Buildings**

Each year the grand total of The Forum forecast is broken up into percentages showing the anticipated activity in new building construction for each of the nineteen building types in the six established geographical divisions of the United States. By comparing these percentages for 1925 and 1926 it is possible to ascertain the changing public demand for new buildings and to establish for each district the relative activity which may be expected.

The first interesting comparison is to learn what, if any, shifting of public demand has occurred in building requirements for the following six georgraphical divisions of the United States:

1. Northeastern States, including Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut.
2. North Atlantic States, including New York, New Jersey, Pennsylvania, Delaware, Maryland, District of Columbia.
3. Southeastern States, including Virginia, North Carolina, South Carolina, Georgia, Florida.
4. Southwestern States including Kentucky, West Virginia, Tennessee, Alabama, Mississippi, Louisiana, Texas, Oklahoma, Arkansas.
5. Middle States, including Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas.
6. Western States, including Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Idaho, Washington, Oregon, California.

The following table shows a comparison of public demand for new buildings in 1925 with that of 1926 for each of the six districts indicated above. In other words a comparison of the relative demand for new buildings in each district for 1926 as compared with 1925. The changes in these percentages forecast the change of construction activity from a geographical viewpoint:

**Public Demand For New Buildings**

| | 1925 | 1926 |
|---|---|---|
| 1. Northeastern States | 8.4% | 8.1% |
| 2. North Atlantic States | 36.3% | 36.6% |
| 3. Southeastern States | 3.6% | 5.9% |
| 4. Southwestern States | 6.3% | 6.4% |
| 5. Middle States | 32.4% | 31.4% |
| 6. Western States | 12.9% | 11.6% |

The above comparison shows that there will be approximately the same relative building activity in each of the six geographical divisions of the United States during 1926 as compared with 1926 with some decrease in the North-

eastern and Middle States and a considerable increase in the Southeastern States( due to activity in Florida).

**Character of Anticipated New Building Construction**

In the course of the research work involved in establishing this forecast for 1925 with some decrease in the North-the opportunity to make an interesting series of observations as to the changing character of new building in the United States. The accompanying percentage tables indicate the change in public demand for new buildings; but it may also be noted that the general character of materials and workmanship in buildings is constantly improving.

The high cost of building, together with increased real estate values, has during the past few years provided a forced education for the investing public in this field, indicating the fallacy of poorly considered planning and the use of inferior materials and workmanship. The great effort in the planning of buildings today is to eliminate all waste space and provide a maximum of rental or utility efficiency at the same time attempting definitely to reduce depreciation and maintenance cost through good architectural specifications.

Many mortgage companies, having learned the lesson of sound building collateral, are insisting upon better construction and upon a serious review of plans and specifications before building and permanent mortgage loans are made.

The total effect of these conditions is reflected in a constant improvement in the character of new buildings and the placing of greatly increased responsibility upon the architectural profession, which to a great extent controls the expenditure of the building dollar.

Thus it is evident that 1926 will not only show a tremendous volume of new building construction but that these buildings will be in general of better architectural design and better construction.

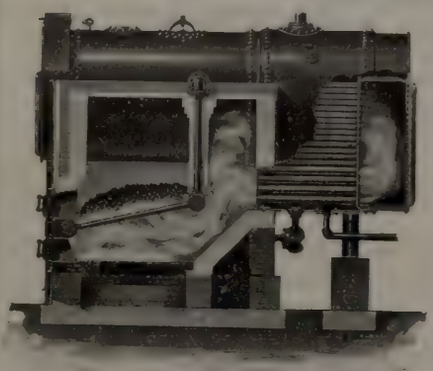
The American public has learned the lesson of folly in cheap building and poor planning!

**Sound Supporting Economic Conditions**

A highly important factor in all forecasts of this nature is the background of economic conditions. If business conditions in the United States were not good, with sound promises of so remaining for several years, there might be expected a definite curtailment of building activity—a slowing down of the great momentum established during the past few years. But conditions are good, with definite signs of stability and as the building industry is the indicator of conditions, so with the entire economic situation favorable, there is little fear of a break in public confidence or any basic business change which will interrupt the anticipated program of another six billion-dollar building year during 1926.

There is some talk of the building shortage having been met—of rentals coming down—of building again assuming its normal activity. What is a "normal" building year at the present time? Surely it cannot be the pre-war normal. The population of the United States has increased materially since then; the cost of building has increased; the standards of housing American life and business have been raised; the demand for buildings is greater.

The probable "normal" building year of today is four billion dollars or more and on this basis it would take three or four six-billion-dollar years to meet the still existing shortage!



All is well with the building industry. It is going about its business seriously, contributing to the wealth and comfort of the nation. Some idea of the magnitude and importance of the con-

struction industry may be gained from a statement recently made by Secretary of Labor Davis in which he said: "More than 11,000,000 of our people are dependent for their living upon the construction industry, and 22 per cent of all the skilled and unskilled labor of the country is engaged in the building branch alone. Some 250,000 freight cars are required to handle the materials. Our building bill is $200 per year for each family in the United States. It is truly the chief barometer of the business of the country. When construction gains, prosperity is with us. It is the great outstanding influence for good or bad in our financial progress."

Architects are busier than ever before—a sure sign of great building activity to come. The number of plans being filed is constantly increasing—another sign of activity.

The Architectural Forum anticipates and predicts that approximately the total number of building permits which will be issued for structures of every kind, including alterations will run around 700,000.

## FT. WAYNE

### PAINTERS ELECT

**Local Association Names Officers For the Ensuing Year**

John Beyerlein was elected president of the Fort Wayne Association of Master House Painters and Decorators at a meeting of the painters held recently. He succeeds Oliver S. Jones.

Other officers elected were: Vice-president Harley Smock; Secretary, George Ehrman; Treasurer, Edward Haller; Trustees, Eugene Brunner, Frank Zink and William Buckles; Sergeant-at-arms, John Romick.

Following the election, plans for a dinner to be given sometime in January for members, their wives, salesmen and jobbers, were discussed. There was also a discussion of plans for attending the convention of the International Association of House Painters and Decorators which is to be held in February in Philadelphia. Mr. Jones, the retiring president, a member of the executive committee of the international association, will be a delegate from this city.

opposed to any increase in the building trades hourly wage scales for the season of 1926-27. Further they voiced disapproval at any attempt to cutting down the working week to five days.

Then in accordance with feeling expressed the members voted unanimously to adopt the resolution passed at the conference of the National Ass'n. of Building Trades Employers held at Chicago, which embraced opposition to wage increases for the coming building season.

### STILL DEBATING COUNTY BUILDERS' ASSOCIATION

**Held a Good Thing If It Can Draw the Proper Support**

There was an interesting meeting at Hammond this week at which in addition to the local contractors, there were builders from Gary and Indiana Harbor present.

The main topic of discussion dwelt upon the proposed formation of a county contractors' association to include in the membership all the builders in Lake County.

It was the concensus of opinion of those in attendance that such an organization as proposed would be a fine move for theb uilding industry if—the contractors will back it both morally and financially, and will be willing to each do his share toward furthering its function.

The main trouble just now seems to be to arrive at a feasible plan that would be satisfactory to all parties concerned but efforts are being exerted steadily toward that end.

Hammond has not gone into the scheme wholly as yet but the matter has been referred to the Board of Directors of the B. T. E. A., and some definite move either for or against is expected in the near future.

It is going to take real financing to make the suggested organization worth while and then much personal support and activity, unless the contractors all are of a mind to contribute both ways it would be futile to try to start a county association, for, half hearted support would get the body nowhere and its days would be numbered. It must have men back of it with vision and constructive ability, otherwise, it will fail, the name won't carry it along, and unless it can impart a virile interest to its members its mission will be nil.

### HAMMOND BUILDING COMMENT

The architects report new work slack at the present time, but several large building projects are under consideration for the spring.

The dedication and opening of the new bank building has been postponed until January 1st, as some of the interior work is not quite completed.

The cold weather of the last few days has just put a decided crimp in outside building operations.

Some of our contractor nimrods Thursday drove 35 miles to hunt rabbits and returned with one lone owl. Oh yes! They went after rabbits.

If the present slacking up in building continues for the next 30 days there will be a lot of idle building mechanics.

Another life was sacrificed to building here this week. Workmen had raised a cottage and built a foundation under it, when the structure was let down the footings on one side gave way causing the wall to sink and the building slid sideways crushing one of the workmen.

### ERNEST H. PIERSON DIES

**Brother of State A. B. C. Secretary, C. C. Pierson, Succumbs to Attack of Pneumonia**

Particularly at this season of the year the leveling hand of Death falls heaviest when it strikes, hence, the unbounded sympathy of the entire membership of the Associated Building Contractors will go out to Secretary Chiron C. Pierson whose brother Ernest, a well-known Indianapolis brick mason contractor, passed away in Florida, December 21.

The news of "Ernie's", as he was popularly known, death was a great shock to his many friends in Indianapolis building circles with which he had been connected for years. He was one of the largest mason contractor operators in the Hoosier capital and built many of the largest buildings in the city in addition to other big projects out over the state.

Mr. Pierson was born in Indianapolis in 1874 and entered the building business upon reaching young manhood. He took an active interest in the Indianapolis Mason Contractors Association, also in the Mason Contractors Association of the United States and Canada, the Columbia Club, First Baptist Church and charitable organizations.

About two weeks ago Mr. Pierson and his wife left Indianapolis for Miami, Fla., where he was stricken with pneumonia, the result of a cold contracted on his way South, and the end came Monday night.
